Contents and Subject Index

INTRODUCTION	1
OVERVIEW	3
Energy Recovery Processes	3
Preprocessing Techniques	6
Size Reduction Techniques	7
Separation Techniques	12
Separation and Size Reduction as a Terminal Process	21
Incineration Processes	27
Incineration Equipment	28
Typical Incineration Plants with Energy Recovery	30
Supplemental Fuel Incineration	37
Solid Fuel Incineration—Eco-Fuel	39
Pyrolysis Processes	40
General Considerations	40
Vertical Shaft Reactors	43
Horizontal Shaft	48
Rotary Kiln	49
Fluidized Bed	51
Other Pyrolysis Work	53
Biodegradation Processes	56
Composting	56
Methane Production Process	60
Biochemical Processes	63
