<i>Preface</i>	v
<i>Acknowledgments</i>	xi
<i>Contributing Authors</i>	xiii
<b>Part 1. Symposium Presentations</b>	
A. Theoretical Approaches to Validation	1
<i>Robert A. Scala</i>	
B. Validation as Applied to <i>In Vitro</i> Toxicology	11
<i>John O. Rundell</i>	
C. The Interplay Among Validation, Policy, and Regulation	17
<i>Richard N. Hill</i>	
D. Diffusion of a New Methodology	21
<i>Frank Baker</i>	
E. Validation Studies in Progress	31
1. Validation Studies on a Battery of Potential <i>In Vitro</i> Alternatives to the Draize Test	31
<i>Charles Shopsis, Ellen Borenfreund, and Dennis M. Stark</i>	
2. The FRAME Approach to the Development, Validation, and Evaluation of <i>In Vitro</i> Alternative Methods	45
<i>Michael Balls, Rosemary J. Riddell, Steven A. Horner, and Richard H. Clothier</i>	
3. The Development and Evaluation of the Chorioallantoic Membrane (CAM) Assay	59
<i>Betty M. Kong, Chris J. Viau, Perveen Y. Rizvi, and Salvatore J. De Salva</i>	
4. An Approach to Validation: Comparison of Six Materials in Three Tests	75
<i>John A. Shaddock, James Render, Jeffrey Everitt, Rose Ann Meccoli, and Diane Essex-Sorlie</i>	

5. Validation of an <i>In Vitro</i> Eye Irritancy Test: A First Step <i>Herman B.W.M. Koeter and Menk K. Prinsen</i>	79
6. The Validation Approach of The Johns Hopkins Center for Alternatives to Animal Testing <i>John M. Frazier</i>	87
F. Skin and Eye Studies in Progress	91
1. Chairman's Remarks Direct Toxicity to the Cornea: A Nonspecific Process? <i>David Maurice</i>	91
2. Introductory Lecture: Mechanisms of Inflammation in Skin and Eyes— Similarities and Differences <i>Michael B. Berman</i>	95
3. Two New <i>In Vitro</i> Methods for Evaluating Toxicity to Skin (Employing Short-Term Organ Culture): I. Paranuclear Vacuolization, Seen in Glycol Methacrylate Tissue Sections; II. Inhibition of <sup>14</sup> C-Leucine Incorporation <i>Arthur M. Dannenberg, Jr., K. Gregory Moore, Brian H. Schofield, Ka- zuyuki Higuchi, Akira Kajiki, Kin-Wing Au, Peggy J. Pula, and David P. Bassett</i>	115
4. Surfactant-Induced Cutaneous Primary Irritancy: An <i>In Vitro</i> Model <i>Vincent A. DeLeo, Lauren Midlarsky, Leonard C. Harber, Betty M. Kong, and Salvatore De Salva</i>	129
5. Corneal Epithelial Wound Closure: A Tissue Culture Model of Ocular Irritancy <i>Marcia M. Jumblatt, Sandra J. Simmons, and Arthur H. Neufeld</i>	139
6. Further Testing of an <i>In Vitro</i> Phototoxicity Assay <i>Irene E. Kochevar, Andre Western, and Daniel J. McAuliffe</i>	147
7. Novel Strategies for Evaluating the Comparative Toxicity of Unmodified Viscoelastic Formulations <i>Dale R. Meyer and James P. McCulley</i>	153
8. A Simple Fluorometer for Use with a Permeability Screen for Immediate Ocular Toxicity <i>Darrell Brooks and David Maurice</i>	173
G. Special Lecture Development and Validation of an Alternative Test for the Detection of Em- bryonic Malformations: The Postimplantation Embryo Culture Test (PECT) <i>Beat P. Schmid and L. Cicurel</i>	179
H. Conclusions	189
1. The Economic Viability of <i>In Vitro</i> Testing Techniques <i>Henry R. Hertzfeld and Thomas D. Myers</i>	189
2. Alternatives—A Kaleidoscope of Perspectives <i>Andrew N. Rowan</i>	203

## Part 2. Poster Presentations

1. Cellular Uptake and Response of Primary Cultures of Rabbit Renal Proximal Tubule Cells Exposed to Mercuric Chloride and Methylmercury Chloride 211  
*Michael D. Aleo, Mary L. Taub, James R. Olson, Peter A. Nickerson, and Paul J. Kostyniak*
2. The Use of Primary Hepatocyte Cultures to Detect the Induction of Hepatic Alkaline Phosphatase Enzyme in the Rat 227  
*David E. Amacher and Donna J. Smith*
3. Ocular Irritancy Evaluated *In Vivo* by Conjunctival Lavage Technique and *In Vitro* by Bovine Eye Cup Model 235  
*C.A. Benassi, M.R. Angi, L. Salvalaio, and A. Bettero*
4. Use of Stimulated Oxygen Consumption as a Measure of Cutaneous Perturbation 243  
*M.G. Bird, G. Witz, R.A. Scala, and D.V. Parke*
5. Differential Response of *In Vitro* Vaginal Tissue to Various Test Agents 253  
*N.H. Dubin, R.B. Ghodgaonkar, and T.H. Parmley*
6. *In Vitro* Detection of Cornea-Derived Leukocytic Chemotactic Factors as Indicators of Corneal Inflammation 257  
*Salwa A. Elgebaly, Faripour Forouhar, and Donald L. Kreutzer*
7. Some Problems in Validating Cytotoxicity as a Correlate of Ocular Irritancy 269  
*Christopher Flower*
8. Development, Validation, and Transfer of a New Test System Technology in Toxicology 275  
*Shayne C. Gad, Brendan J. Dunn, Frances A. Gavigan, Christopher Reilly, and Robert D. Walsh*
9. EYTEX™, An *In Vitro* Method for Evaluation of Ocular Irritancy 293  
*V. C. Gordon and H.C. Bergman*
10. Empirical and Experimental Bases for Selecting the Low Volume Rabbit Eye Irritation Test as the Validation Standard for *In Vitro* Methods 303  
*J.F. Griffith and F.E. Freeberg*
11. Incorporation of Species Differences in Metabolism into *In Vitro* Teratogenicity Testing 313  
*Barbara F. Hales*
12. Influence of Reduced Numbers of Rabbits on the Adequacy of Eye Irritancy Tests 323  
*N.S. Hatoum, C.L. Leach, R.D. Gibbons, D.M. Talsma, J-C. Roger, and P.J. Garvin*
13. *In Vitro* Methods for Assessing Cytotoxicity of Contact Lenses—Comparison with *In Vivo* Data 327  
*C. Hecquet, X. Ronot, L. Le Naour, J.G. Josse, and M. Adolphe*

14. Intralaboratory Replication of Results Obtained in the Hydra Developmental Toxicity Screen	335
<i>Alan M. Hoberman, Eric W. Sica, Mildred S. Christian, Betty M. Kong, and Frederick R. Kirchner</i>	
15. Chemical Structure—Transport Rate Relationships for Model Skin Lipid Membranes	341
<i>Joy Houk, Corwin Hansch, Larry L. Hall, and Richard H. Guy</i>	
16. HET-CAM—Reproducibility Studies	353
<i>Niels-P. Luepke and Siegfried Wallat</i>	
17. A New Teratogenic Risk Assessment Bioassay System Utilizing Marine Hydrozoans	365
<i>Vicki J. Martin</i>	
18. Evaluation of the Comparative Toxicity of Intraocular Viscoelastic Preparations	393
<i>Dale R. Meyer and James P. McCulley</i>	
19. Cisplatinum Toxicity in Rabbit Renal Proximal Tubule Suspensions and Precision-Cut Renal Cortical Slices	411
<i>J.S. Phelps, A.J. Gandolfi, and K. Brendel</i>	
20. <i>In Vitro</i> Enzymatic Toxicity Test Model Validity Approach	421
<i>K.S. Jagannatha Rao</i>	
21. Use of Cultured Human Cells as Screening Models for Antipsoriatic Drugs	453
<i>Uwe Reichert, Alain Chatelus, and Gerard Pautrat</i>	
22. Validation of Three Cell Toxicity Tests and the Hen's Egg Test with Guinea Pig Eye and Human Skin Irritation Data	463
<i>Christoph A. Reinhardt, Martin Aeschbacher, Max Bracher, and Jochen Spengler</i>	
23. Evaluating the Percutaneous Absorption of Polynuclear Aromatics Using <i>In Vivo</i> and <i>In Vitro</i> Techniques and Structure Activity Relationships	471
<i>Timothy A. Roy, Joseph J. Yang, and Maria H. Czerwinski</i>	
24. A Comparison of the Toxicity of Acrylamide, Cyclophosphamide, Chlordecone, and Diethylstilbestrol in Chinese Hamster Ovary (CHO) Cells with Their Toxicity <i>In Vivo</i>	483
<i>Jane Ellen Simmons, Marcus Jackson, Joellen Lewtas, and Ezra Berman</i>	
25. Ocular Lens Organ Culture System for <i>In Vitro</i> Toxicology	499
<i>J.G. Sivak, D. Gershon, A. Dovrat, and J. Weerheim</i>	
26. Clonal Cultures of RPE Cells as Sensitive Indicators of Agents Affecting Terminal Differentiation	507
<i>Sabine H.H. Swierenga, Ursula Vielkind, and Fai Lee</i>	
27. Validation of the Becam Assay—An Eye Irritancy Screening Test	515
<i>Peter J.J.M. Weterings and Yvette H.M. van Erp</i>
