ADAPTIVE OPTICAL COMPONENTS

Volume 141

CONTENTS

Introduction.....vi
Seminar Committee.....v

SESSION 1. ADAPTIVE OPTICAL COMPONENTS.....1

141-01 **Historical Review of Adaptive Optics Technology.....2**
Louis C. Marquet, Massachusetts Institute of Technology, Lincoln Laboratory
John Hardy, Itek Corporation

141-02 **New Developments in Deformable Surface Devices.....11**
Jeffrey H. Everson, Itek Corporation Optical Systems Division

141-03 **High Performance Tip/Tilt Mirror Positioner.....16**
Carroll Steele and Hewitt Crane, SRI International,
Roy D. Nelson and Emery Erdelyi, Rockwell International Corporation

141-04 **Intracavity Tip and Tilt Adaptive Control Experiments.....20**
Martin Tarabocchia and Sandor Holly, Rockwell International Corporation

141-05 **An Optical System with Continuously Variable Spherocylindrical Power.....26**
David L. Guyton, The Wilmer Ophthalmological Institute, The Johns Hopkins Hospital
Hewitt D. Crane, Stanford Research Institute

SESSION 2. ADAPTIVE OPTICAL SYSTEMS.....31

141-06 **A Tutorial Review of Key System Aspects of Wavefront Measurement, Control and
Conjugation.....32**
Hanns J. Wetzstein, W. J. Schafer Associates, Inc.

141-07 **Precision Focus Control.....43**
Burton D. Figler, Aerodyne Research, Inc.

141-08 **Wavefront Error Compensation Capabilities of Multi-Actuator Deformable Mirrors.....50**
James E. Harvey and Gary M. Callahan, Pratt & Whitney Aircraft Group

141-09 **Laser Wavefront Analyzer for Diagnosing High-Energy Lasers.....58**
Captain John Van Workum, Air Force Weapons Laboratory,
James A. Plascyk, Perkin-Elmer Corporation, Electro-Optical Division,
Michael L. Skolnick, Rocketdyne Division, Rockwell International

141-10 **A Comparison of Wavefront Sensing Systems.....67**
John W. Hardy and Richard H. Hudgin, Itek Corporation, Optical Systems Division

SESSION 3. INSTRUMENTATION & A/O SYSTEMS DIAGNOSTICS.....	73
141-11 Characterization Techniques for Deformable Metal Mirrors.....	74
H. R. Garcia and L. D. Brooks, Pratt & Whitney Aircraft Group	
141-12 Quasi-Real Time High Precision Characterization of Active Mirrors.....	82
N. A. Massie and S. Holly, Rockwell International Corporation	
141-13 Stroboscopic Interferometry.....	88
David G. Kocher, Massachusetts Institute of Technology, Lincoln Laboratory	
141-15 Characteristics of Bismuth (BI) Photopot Position-Sensing Detectors and Their Use in Adaptive Optical Systems.....	92
Stephen R. Aiken, Rockwell International Corporation	
 SESSION 4. MISCELLANEOUS TOPICS.....	 99
141-17 Experimental Studies of Adaptive Laser Resonator Techniques (ALERT).....	100
R. R. Stephens and R. C. Lind, Hughes Research Laboratories	
141-18 Ground-to-Space Optical Power Transfer.....	108
G. E. Mevers, C. L. Hayes, J. F. SooHoo, and R. M. Stubbs, Rockwell International	
 Author Index.....	 119
Subject Index.....	119
