

Industrial Minerals in California: Economic Importance, Present Availability, and Future Development

EDWIN W. TOOKER and DAVID J. BEEBY, Compiler-Editors

Prepared in cooperation with the California Department of
Conservation, Division of Mines and Geology

Presentations and discussions at a workshop held February 15–16,
1989, in Marina del Rey, Calif., on the problems encountered in and
recommendations for improving the current and future industrial rock
and mineral-resource availability in California

U.S. GEOLOGICAL SURVEY BULLETIN 1958

UB/TIB Hannover 89
111 821 681

CONTENTS

- Introduction, by E.W. Tooker and D.J. Beeby 1
- California's industrial-mineral resources, by J.A. Anderson 5
- The variety, uses, and demand for industrial-mineral resources in California,
Hal McVey, convenor 7
- The importance of industrial minerals in our everyday lives, by Hal McVey 7
- Production and demand for industrial minerals in California, by G.W. Griggs 9
- Favorable locations and geologic environments for the occurrence of California's
industrial minerals, by Ken Santini 12
- Discussion and comments 15
- Transportation 15
- Substitution of materials 16
- Level of exploration activity 17
- Availability of reserve data 17
- Land-access and permitting problems for resource availability, P.H. Dohms,
convenor 29
- Public-lands-access issues, by R.A. Sega 29
- Mining-problem resolution in high-growth areas of California,
by P.H. Dohms 32
- California minerals-permitting issues, by J.E. Good 33
- The role of the applicant and the counties, by D.C. Deem 35
- Land access and permitting from an industry/bureaucrat perspective,
by D.L. Blubaugh 36
- Discussion and comments 37
- Access to withdrawn lands 37
- Risk assessment 38
- Regulation by initiatives 38
- Permitting 39
- The critical need for better public information 39
- Improving the image of mining in the eyes of the public 40
- The environmental impacts of mining and their mitigation, R.A. Matthews, convenor 41
- The McLaughlin mine experience, by R.E. Krauss 41
- Land-use planning and reclamation, by W.J. Kockelman 43
- Air quality and toxics, by P.H. Dohms 45
- Discussion and comments 46
- The cost of permitting and mitigation for mining operations 46
- Success in the art of permitting and mitigation 46
- Achieving fair pollution regulations 47
- Resource availability and SMARA 48
- Restoration of mined lands 49
- Good advice for rebuilding the image of the mining industry 49
- A public-action educational program is needed by the industrial-mineral
industry 50
- Economic issues associated with industrial-mineral development, Dwane Johnson,
convenor 51
- Effect of the railroad on the industrial-mineral industry, and the economics of
 the railroad industry, by R.W. Brown 52
- Materials flow in California 52
- Economic problems facing the railroads 54
- Response of the railroads to change 55
- Effect on industrial-mineral producers 56

Economic issues associated with industrial-mineral development—Continued	
Effect of the Port of Los Angeles on the industrial-mineral industry, by P.B. St. Onge	56
Types of materials passing through the port	56
Solutions to some port economic problems	57
Future expectations and opportunities for growth of the industrial- mineral industry, by James Gosnell	58
Regional population changes	59
Regional job market	59
Demographic changes in the region	59
SCAG's long-range plans	60
Transportation factors in SCAG projections	60
SCAG air-quality plans	61
Funding dilemma for the SCAG highway plan	61
Access to the port	61
Quality of life and regional controls	61
Creating problem-solving partnerships or coalitions	62
Discussion and comments	62
Interaction with government leaders	65
Challenges for the State legislative and executive bodies, by Senator John Garamendi	65
Assistance from universities, government agencies, and other organizations, J.H. DeYoung, Jr., convener	67
University resources	67
Image problems and the roles of the university community, by Michael Hood	67
Examples of applied research, by M.A. McKibben	68
State and local government agencies	69
San Bernardino County Department of Land Management, by J.N. Jaquess	69
State Lands Commission, by A.D. Willard	71
Office of Permit Assistance, Governor's Office of Planning and Research, by D.C. Nunenkamp	71
Division of Mines and Geology, by J.T. Alfors	72
Federal agency assistance	74
U.S. Bureau of Land Management, by R.M. Anderson	74
U.S. Geological Survey, by M.P. Foose	75
U.S. Bureau of Mines, by A.F. Barsotti	77
Scientific-society assistance, by Siegfried Muessig	78
Discussion and comments	80
Educating the public about industrial-mineral issues, R.A. Reveles, convener	85
Effects and challenges of Hispanic immigration on resources in southern California, by Harry Pachon	85
Effect of immigration on Los Angeles	86
Hispanic political potential	86
Public-policy concerns for Latin immigrants	87
Immigrants' image of the resource industry	87
Need for better communication, a mutual concern	88
Discussion and comments	88
A case study of a public resource education program in Nevada, by P.J. Iverson	89
Basic strategy for the Nevada resource education program	89
First step, a survey of public knowledge about mining	90
Next step, convene a planning committee	90

Educating the public about industrial-mineral issues—Continued	
A case study of a public resource education program in Nevada—Continued	
Start with an elementary-school program	90
Create teaching materials	91
Create teaching activities and activity guides	91
Provide study kits	92
Mining-industry facts brochure	92
Continuing education for teachers	93
Museum project	93
Concluding remark	95
Discussion and comments	95
Where do we go from here? by E.W. Tooker and D.J. Beeby	99
Summary, conclusions, and recommendations, J.I. Ziony, convenor	101
Industrial-mineral supply and demand, by Hal McVey	101
Discussion and comments	102
Access to lands, availability of industrial mineral, and permitting, by P.H. Dohms	103
Discussion and comments	105
Environmental impacts of mining and their mitigation, by R.A. Matthews	105
Economic issues associated with industrial minerals, by Dwane Johnson	107
Assistance from government agencies, universities, and scientific societies, by J.H. DeYoung, Jr.	107
Discussion and comments	108
Educating the public about industrial-mineral issues, by R.A. Reveles	109
Discussion and comments	109
Responsibility for action on the recommendations, E.W. Tooker and D.J. Beeby, compiler-editors	110
Closing remarks from the sponsors	111
For the DMG, by J.I. Ziony	111
For the USGS, by J.H. DeYoung, Jr.	111
References cited	112

APPENDIXES

1. Program for the 1989 Industrial Minerals Workshop	114
2. Summary of the Los Angeles 2000 Committee Study (Jefferson, 1988)	115
3. Summary of the California Desert Protection Act (CDPA), U.S. Senate bill S. 11	116
4. Description of California SMARA, 1975 (Beeby, 1988)	118
5. Summary of California's initiative proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986	122
6. Homeowners protection initiative of El Dorado County	123
7. U.S. Geological Survey industrial rock and mineral resource specialists	125
8. U.S. Bureau of Mines industrial rock and mineral commodity specialists	127

FIGURES

1. Chart showing some industrial rock and mineral products and their uses	2
2. Map of California, showing distribution of some industrial-mineral resources	13
3. Map of southern California, showing distribution of nonmetallic mineral resources	14

- 4-7. Photographs of:
 4. Molycorp's rare-earth mine, Mountain Pass, Calif. 15
 5. U.S. Borax and Chemical Corp.'s boron mine, Boron, Calif. 16
 6. Kerr-McGee Chemical Corp.'s salt deposits, Searles Lake, Calif. 18
 7. Cominco's trona deposit, Owens Lake, Calif. 19
8. Map of California, showing locations of zeolite deposits 20
9. Photographs of zeolite deposits at Steelhead Specialty Minerals' Ash Meadows zeolite mine 21
10. Photograph of Pfizer's Marble Canyon marble deposit 22
11. Map of California, showing locations of magnesium deposits 22
12. Photograph of the CALMAT Co.'s Bissel magnesite mine, Kern County, Calif. 24
- 13-15. Maps of California, showing locations of:
 13. Phosphate deposits 25
 14. Active silica operations 26
 15. Titanium deposits 27
16. Photograph of the U.S. Gypsum Co.'s gypsum deposit, Plaster City, Calif. 28
17. Maps of southern California, showing areas considered in current desert plan and those being considered for inclusion in proposed legislation 30
18. Photograph showing example of sequential land use in the Los Angeles area 45
19. Plot showing generalized trend of use of most metals in comparison with industrial minerals in developing industrial societies 52
20. Plot comparing rail versus truck employee wages, 1980-87 55
21. Photograph of WORLDPORT LA, the Port of Los Angeles on San Pedro Bay 57
22. Photograph of PLA ship-storage facility owned by the Riverside Cement Co. 58
23. Graph showing anticipated growth in California's population 59
24. Pie charts showing changes in types of employment in California between 1860 and 1980 60
25. Pie charts showing anticipated shifts in the demography of California 60
- 26-28. Organization charts showing structure of:
 26. California Department of Conservation, Division of Mines and Geology 73
 27. U.S. Geological Survey 76
 28. U.S. Bureau of Mines 77
29. Matrix diagram showing content of MAS data base—a deposit description 79
30. Photograph of old mining prospector demonstrating gold panning to teachers and students as part of the Nevada mining awareness educational program 92
31. Photographs of activities for teachers as part of the Nevada resource education program 94

TABLES

1. Types of industrial minerals, classified by end use 10
2. California industrial mineral production in 1987, listed in order of dollar value 11
3. Ages of rocks in which the industrial minerals produced in California are commonly found 12
4. Selected intra-State industrial-mineral traffic in California 52
5. Selected outbound industrial-mineral traffic in California 53
6. Selected inbound industrial-mineral traffic in California 53
7. Intra-State liquified-petroleum-gas traffic in California 54
8. Index list of workshop recommendations directed to specific members of the California industrial-mineral-resource constituencies 110
