

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO 60

Ophiolites and their Modern Oceanic Analogues

EDITED BY

L. M. PARSON, B. J. MURTON
Institute of Oceanographic Sciences, Godalming, UK

and

P. BROWNING
Department of Geology,
University of Bristol, UK

1992

Published by
The Geological Society
London

Contents

PARSON, L. M. & MURTON, B. J. Introduction	1
ALEXANDER, R. J. & HARPER, G. D. The Josephine ophiolite: and ancient analogue for slow-to intermediate-spreading oceanic ridges	3
MACLEOD, C. J. & ROTHERY, D. A. Ridge axial segmentation in the Oman ophiolite: evidence from along-strike variations in the sheeted dyke complex	39
SEARLE, R. C. The volcano-tectonic setting of oceanic lithosphere generation	65
RUSBY, R. I. GLORIA and other geophysical studies of the tectonic pattern and history of the Easter Microplate, Southeast Pacific	81
KARSON, J. A. & WINTERS, A. T. Along-axis variations in tectonic extension and accommodation zones in the MARK Area, Mid-Atlantic Ridge 23°N latitude	107
TAYLOR, R. N., MURTON, B. J. & NESBITT, R. W. Chemical transects across intra-oceanic arcs: implications for the tectonic setting of ophiolites	117
KOSTOPOULOS, D. K. & MURTON, B. J. Origin and distribution of components in boninite genesis: significance of the OIB component	133
KELLER, R. A. & FISK, M. R. Quaternary marginal basin volcanism in the Bransfield Strait as a modern analogue of the Southern Chilean ophiolites	155
SMELLIE, J. L. & STONE, P. Geochemical control on the evolutionary history of the Ballantrae Complex, SW Scotland, from comparisons with recent analogues	171
BALLANTYNE, P. Petrology and geochemistry of the plutonic rocks of the Halmahera ophiolite, Eastern Indonesia, an analogue of modern oceanic forearcs	179
ROBERTS, S. Influence of the partial melting regime on the formation of ophiolitic chromitite	203
VALSAMI, E. & CANN, J. R. Mobility of rare earth elements in zones of intense hydrothermal alteration in the Pindos ophiolite, Greece	219
LAURENT, R. Peridotite intrusions emplaced in the fossil suprasubduction zone environment of Cyprus	233
GIRARDEAU, J. & MERCIER, J.-C. C. Evidence for plagioclase-lherzolite intrusion in the Mid-Atlantic Ridge, DSDP Leg 37	241
ALLERTON, S. & VINE, F. J. Deformation styles adjacent to transform faults: evidence from the Troodos ophiolite, Cyprus	251
BREWER, T. S., PELLING, R., LOVELL, M. A. & HARVEY, P. K. The validity of whole-rock geochemistry in the study of the oceanic crust: a case study from ODP Hole 504B	263
BORGIA, A. & TREVES, B. Volcanic plates overriding the ocean crust: structure and dynamics of Hawaiian volcanoes	277
HARRIS, R. A. Peri-collisional extension in the Banda Orogen as a model for the tectonic evolution of Oman-type ophiolites	301
