Environmental Department  
Arizona Public Service Company  
Phoenix, Arizona 85072

An AWMA/EPA International Specialty Conference

Sponsored by  
AWMA's AB-6, AB-1, EP-1, EM-2, and EM-3 Committees  
The United States Environmental Protection Agency

Estes Park, Colorado  
October, 1989

Hosted by UNIVERSITÄTSBIBLIOTHEK  
Rocky Mountain States Section HANNOVER

TECHNISCHE  
INFORMATIONSBIBLIOTHEK

**AIR & WASTE MANAGEMENT ASSOCIATION**

# TABLE OF CONTENTS

Preface		v
Conference Organizing Committees		xv
Conference Cosponsors		xvii
Keynote Address	<i>Bruce Jordan</i>	xviii

## I. POLICY AND REGULATORY ISSUES

1. The Environmental Protection Agency's Visibility Protection Program: Ten Years of Regulatory Development	<i>D. Scott and D.H. Stonefield</i>	2
2. Toward the National Goal: The National Park Service Experience in Implementing the Visibility Regulations	<i>C.L. Shaver</i>	11
3. Looking Ahead--Toward Implementation of Programs to Further Protect Visibility	<i>T.G. Pace</i>	20
4. Discussion of Federal Regulatory Approaches for Addressing Regional Visibility Impairment	<i>B.V. Polkowsky and M.L. Pitchford</i>	29
5. Percent Change in Extinction Coefficient: A Proposed Approach for Federal Visibility Protection Strategy	<i>M.L. Pitchford, et al.</i>	37
6. A Conceptual Plan for a National Policy to Foster Long-Term Visibility Improvement	<i>D.A. Latimer</i>	50
7. NESCAUM Activities Pertaining to Regulation of Visibility-Impairing Pollutants	<i>R. Poirot and F. DiGenova</i>	61

8. Visibility Protection in Oregon's Class I Areas: Program Evaluation and Future Directions	<i>J.E. Core</i>	71
9. Performance Criteria for Visibility and Aerosol Monitoring	<i>I.H. Tombach, et al.</i>	81

## II. VISIBILITY MEASUREMENTS IN NONURBAN AREAS

### A. FINE PARTICLE MEASUREMENTS

1. Design Constraints on Aerosol Samplers Used in Visibility Studies in the Southwest	<i>T.A. Cahill</i>	97
2. A Survey of Fine Particle Sampling Systems Used in Visibility Studies	<i>J.G. Watson, et al.</i>	109
3. Annular Denuders and Visibility Studies	<i>R.K. Stevens, et al.</i>	122
4. Design Equations for Gas Sampling in Diffusion Denuders and the Effects of Particle Dissociation	<i>P. Biswas, et al.</i>	131
5. Loss of Semi-Volatile Organic Compounds from Particles During Sampling on Filters	<i>D.J. Eatough, et al.</i>	146
6. An Investigation of the Size Distributions of the Particulate Sulfate Concentrations Measured During WHITEX	<i>K.A. Gebhart and W.C. Malm</i>	157
7. Reconciliation of Aerosol Particle Size Measurements	<i>C.S. Sloane, et al.</i>	170
8. A Novel 2.5 $\mu\text{m}$ cut Virtual Impactor for High Volume Fine and Coarse Particle Sampling	<i>R.M. Burton, et al.</i>	177
9. Measurement of Fine Particles and Their Chemical Components in the IMPROVE Network	<i>R.A. Eldred, et al.</i>	187

10. Particulate Sampling in the Northeast: A Description of the NESCAUM Network	<i>R.G. Flocchini, et al.</i>	197
11. Seasonal Trends in Fine Mass Budgets Through Regression--Application to the Glen Canyon SCENES Data	<i>J.L. Sutherland and P.S. Bhardwaja</i>	207
12. The Stacked Filter Unit Revisited	<i>T.A. Cahill, et al.</i>	213
13. Progress in Evaluating Particulate Liquid Water Measurement Methods and in Developing a Benchmark Generator	<i>C.F. Rogers and J.G. Watson</i>	222
14. Heat Transfer Effects in An Aerosol Sampler	<i>D.G. Sultana</i>	232
15. Nitrogen and Sulfur Chemistry and Aerosol Formation in a Western Coal-Fired Power Plant Plume	<i>L.W. Richards, et al.</i>	242

## B. OPTICAL MEASUREMENTS

1. Effect of the Atmosphere on Visibility	<i>L.W. Richards</i>	261
2. Parameters Involved in Visibility Perception During Haze Episodes	<i>V.K. Saxena and D.C. Weintraub</i>	271
3. An Assessment of the Accuracy and Precision of Photographic Densitometric Measurements for Monitoring Visual Air Quality	<i>D. Dietrich, et al.</i>	281
4. Long Path Transmissometer for Measuring Ambient Atmospheric Extinction	<i>J.V. Molenar, et al.</i>	293
5. Application of a Long Range Transmissometer to Measure the Atmospheric Extinction Coefficient in Remote Pristine Environments	<i>J.V. Molenar, et al.</i>	305
6. Trends of Seasonal Haziness and Sulfur Emissions Over the Eastern United States	<i>R.B. Husar and W.E. Wilson</i>	318
7. Visibility Monitoring in the National Forests: A Perspective on the Past and the Future	<i>R. W. Fisher</i>	328

10. Particulate Sampling in the Northeast: A Description of the NESCAUM Network	<i>R.G. Flocchini, et al.</i>	197
11. Seasonal Trends in Fine Mass Budgets Through Regression--Application to the Glen Canyon SCENES Data	<i>J.L. Sutherland and P.S. Bhardwaja</i>	207
12. The Stacked Filter Unit Revisited	<i>T.A. Cahill, et al.</i>	213
13. Progress in Evaluating Particulate Liquid Water Measurement Methods and in Developing a Benchmark Generator	<i>C.F. Rogers and J.G. Watson</i>	222
14. Heat Transfer Effects in An Aerosol Sampler	<i>D.G. Sultana</i>	232
15. Nitrogen and Sulfur Chemistry and Aerosol Formation in a Western Coal-Fired Power Plant Plume	<i>L.W. Richards, et al.</i>	242

## B. OPTICAL MEASUREMENTS

1. Effect of the Atmosphere on Visibility	<i>L.W. Richards</i>	261
2. Parameters Involved in Visibility Perception During Haze Episodes	<i>V.K. Saxena and D.C. Weintraub</i>	271
3. An Assessment of the Accuracy and Precision of Photographic Densitometric Measurements for Monitoring Visual Air Quality	<i>D. Dietrich, et al.</i>	281
4. Long Path Transmissometer for Measuring Ambient Atmospheric Extinction	<i>J.V. Molenaar, et al.</i>	293
5. Application of a Long Range Transmissometer to Measure the Atmospheric Extinction Coefficient in Remote Pristine Environments	<i>J.V. Molenaar, et al.</i>	305
6. Trends of Seasonal Haze and Sulfur Emissions Over the Eastern United States	<i>R.B. Husar and W.E. Wilson</i>	318
7. Visibility Monitoring in the National Forests: A Perspective on the Past and the Future	<i>R. W. Fisher</i>	328

8. Visibility and Fine Particle Monitoring in the Southern Region of the USDA Forest Service	<i>C. Huber, et al.</i>	337
9. Visibility Conditions in Eastern Wildernesses	<i>J. Thomas, et al.</i>	343
10. Optical Measurements of Jet Engine Plume Transmission and Scattered Radiance	<i>C.E. Johnson, et al.</i>	350

### III. VISIBILITY MEASUREMENTS IN URBAN AREAS

1. An Overview of the 1987-1988 Metro Denver Brown Cloud Study	<i>S. Burns, et al.</i>	363
2. Transmissometer Extinction Measurements in an Urban Environment	<i>D.L. Dietrich, et al.</i>	374
3. Size Distribution and Optical Properties of the Denver Brown Cloud	<i>C.S. Sloane, et al.</i>	384
4. Extinction Apportionment for the Denver Brown Cloud	<i>L.W. Richards, et al.</i>	394
5. Evaluation of the Fuel-Switching Strategy Used in the Denver Brown Cloud Study	<i>W. Neff and J. G. Watson</i>	410
6. Composite Source Profiles for Particulate Motor Vehicle Exhaust Source Apportionment in Denver, CO.	<i>J.G. Watson, et al.</i>	422
7. Chemical Characterization of Emission Sources Contributing to Light Extinction	<i>J.E. Houck, et al.</i>	437
8. Data Base for Characterizing the Chemical Composition of Source Emissions for Particulate Matter and Volatile Organic Compounds	<i>W.B. Kuykendal, et al.</i>	447
9. Emission Source Characterization Data for the Southern California Air Quality Study	<i>J.J. Shah, et al.</i>	456
10. Visibility and PM-10 in the South Coast Air Basin of California	<i>H.A. Gray and J.C. Marlia</i>	468

## IV. METEOROLOGICAL FACTORS INFLUENCING VISIBILITY

1. Denver/Boulder Visibility: Meteorological Aspects and Comparisons *D.W. Wolfe and C. King* 479
2. A Computer-Aided Meteorological Classification Scheme for the Desert Southwest *D.E. Cover, et al.* 489
3. Synoptic Climatology of the Desert Southwest *T. E. Hoffer, et al.* 497
4. Visibility Episodes in the Southern Sierra Nevada *D.E. Schorran, et al.* 509
5. A Synoptic Evaluation of the Winter SCENES Air Quality Data *L.K. Kalkstein, et al.* 518
6. Seasonal Visibility-Reducing Episodes Near Page, Arizona *J.L. Sutherland* 527
7. Lake Powell Basin Airflow Studies in Winter *W.M. Porch, et al.* 533
8. A Case Study of Ventilation in the Lake Powell Area Under Winter Stagnant Conditions *G.R. Markowski* 541

## V. HUMAN PERCEPTION OF VISIBILITY

1. Prediction of Color Matches and Color Differences in the Outdoor Environment *R.C. Henry and L.V. Matamala* 554
2. Analysis of the Grand Canyon Color Matching Experiment *L.V. Matamala and R.C. Henry* 562
3. Measuring How Landscape Color Affect Aesthetic Value *A.C. Hill* 570
4. Human Visual Sensitivity to Layered Haze Using Computer Generated Images *D.M. Ross, et al.* 582

- |  |                          |     |
|--|--------------------------|-----|
| 5. Validation of a Layered Haze Description Protocol Using Field and Laboratory Settings | <i>D.M. Ross, et al.</i> | 596 |
| 6. Human Perception of Night Sky Glow  | <i>E. Carr</i>           | 608 |

## VI. ECONOMICS OF VISIBILITY

- |  |                                    |     |
|--|------------------------------------|-----|
| 1. New National Park Visibility Value Estimates  | <i>L.G. Chestnut and R.D. Rowe</i> | 618 |
| 2. Controlling Wintertime Visibility Impacts at the Ground Canyon National Park: Preliminary Benefit Cost Analysis   | <i>R.D. Rowe, et al.</i>           | 628 |
| 3. Valuing Air Quality Improvements: Simulating a Hedonic Equation in the Context of a Contingent Valuation Scenario | <i>R.T. Carson, et al.</i>         | 639 |
| 4. Urban Visibility: Some Experiments on the Contingent Valuation Method   | <i>J. Irwin, et al.</i>            | 647 |
| 5. Factors Affecting Visibility Values in Vermont  | <i>A.H. Gilbert</i>                | 659 |

## VII. VISIBILITY AND FINE PARTICLE MODELING

- |  |  |     |
|--|--|-----|
| 1. A Review of Aerosol Models  | <i>C. Seigneur</i>                     | 669 |
| 2. Visibility Modeling: The State of the Technology and New Directions   | <i>D. A. Latimer</i>                   | 679 |
| 3. Determination of the Uncertainty of Mie Theory Calculations of the Atmospheric Scattering Coefficient             | <i>S.M. Larson and A.E. Isbell</i>     | 691 |
| 4. A Monte-Carlo Simulation to Assess the Sensitivity of Structured Regression Coefficients to Measurement Precision | <i>L.V. Matamala and R.C. Nininger</i> | 700 |

5. Prediction of the Refractive Index of Ambient Tropospheric Aerosol by Partial Molar Refraction Approach	<i>A.W. Stelson</i>	708
6. The Application of Several Radiative Transfer Models to Aircraft Plume Visibility	<i>C.E. Johnson and J.V. Molenaar</i>	715
7. Simulations of Regional Sulfate Distributions with RADM	<i>J.S. Chang, et al.</i>	726
8. Intercomparison of Numerical Techniques for the Simulation of Visibility Improvements from SO <sub>2</sub> Emission Controls in the Eastern United States	<i>P. Zannetti and I.H. Tombach</i>	738
9. Relationship of Trends in Regional SO <sub>2</sub> Emissions to Particulate Sulfate Concentrations in the Southwestern United States	<i>J.F. Sisler and W.C. Malm</i>	750
10. Assessing the Improvement in Visibility of Various Sulfate Reduction Scenarios	<i>W.C. Malm, et al.</i>	763

## VIII. SOURCE ATTRIBUTION OF VISIBILITY IMPAIRMENT

1. Survey of a Variety of Receptor Modeling Techniques	<i>W.C. Malm, et al.</i>	781
2. Application of Tracer Mass Balance Regression to WHITEX Data	<i>W.C. Malm, et al.</i>	806
3. Application of a Differential Mass Balance Model to Attribute Sulfate Haze in the Southwest	<i>D.A. Latimer, et al.</i>	819
4. Source Attribution During WHITEX--A Modeling Study	<i>R. Stocker and R.A. Pielke</i>	831
5. Meteorological Issues Associated with the WHITEX	<i>R.J. Farber, et al.</i>	845
