CONTENTS

Foreword ................................................................. IX

Structure/function relations in transition metal sulfide catalysts
   R.R. Chianelli and M. Daage ........................................ 1

Stacking of molybdenum disulfide layers in hydrotreating catalysts

Chevrel phase HDS catalysts: structural and compositional relationships to
catalytic activity
   G.L. Schrader and M.E. Ekman ...................................... 41

Influence of the support and the sulphidation temperature on the catalytic
properties of molybdenum sulphide in pyridine hydrogenation and
piperidine hydrodenitrogenation
   J.L. Portefaix, M. Cattenot, J.A. Dalmon and C. Mauchausse ........... 67

The effect of phosphate on the hydrodenitrogenation activity and
selectivity of alumina-supported sulfided Mo, Ni and Ni-Mo catalysts
   S. Eijsbouts, L. van Gruijthuijsen, J. Volmer, V.H.J. de Beer and
   R. Prins ............................................................... 79

Influence of preparation on the morphology and microstructure of cobalt-
molybdenum sulphides
   G. Diaz, F. Pedraza, H. Rojas, J. Cruz, M. Avalos, L. Cota and
   S. Fuentes .......................................................... 91

Effect of 2,6-diethylaniline and hydrogen sulphide on hydrodenitrogenation
of quinoline over a sulphided NiO-MoO₃/Al₂O₃ catalyst
   C. Moreau, L. Bekakra, A. Messalhi, J.L. Olive and P. Geneste .......... 107

Search for simple model compounds to simulate the inhibition of
hydrodenitrogenation reactions by asphaltenes
   C. Moreau, L. Bekakra, R. Durand, N. Zmimita and P. Geneste ........ 115
VI

The versatile role of nickel in Ni-Mo$_2$/Al$_2$O$_3$ hydrotreating catalysts as shown by the use of probe molecules
J.P. Bonnelle, A. Wambeke, A. Kherbeche, R. Hubaut, L. Jalowiecki, S. Kasztelan and J. Grimblot ........................................... 123

A history of the development of high-metals hydrotreating catalysts. The use of crystallographic concepts in catalyst design
H.D. Simpson ................................................................. 133

Structures of bimetallic catalysts (Pt/Sn) on SiO$_2$ vs Al$_2$O$_3$ supports: NEXAFS and EXAFS diagnostics
N-S. Chiu, W-H. Lee, Y-Xi Li, S.H. Bauer and B.H. Davis ................. 147

Mössbauer study of the sulfidation of hydrodesulfurization catalysts: so-called “Co-Mo-S” phase observed in carbon-supported Co and Co-Mo sulfide catalysts
M.W.J. Craje, E. Gerkema, V.H.J. de Beer and A.M. van der Kraan ...... 165

A new approach for studying the acid strength distribution in hydrotreating catalysts by differential scanning calorimetry
A.K. Aboul-Gheit and A.M. Summan ........................................ 181

Supported Co-Mo thin film sulphide catalysts for hydrodesulphurization.
1. XPS studies of the effects of reactant pressure
N.S. McIntyre, T.C. Chan, P.A. Spevack and J.R. Brown ................. 187

Adsorption, reaction and desorption rate constants in heterogeneous catalysis, measured simultaneously by gas chromatography
N.A. Katsanos and J. Kapolos ............................................. 211

A miniature on-line closed-cycle reactor for X-ray photoelectron spectroscopy studies of hydrodesulphurization reactions
P.A. Spevack, L.L. Coatsworth, N.S. McIntyre, I. Schmidt and J.R. Brown 229

Catalytic properties in hydrotreating reactions of ruthenium sulphides on Y zeolites: influence of the support acidity
S. Gobolos, M. Breyssse, M. Cattenot, T. Decamp, M. Lacroix, J.L. Portefaix and M. Vrinat ................................................. 243
Upgrading of coprocessed naphtha by hydrotreating
  M.V.C. Sekhar and P.M. Rahimi ............................................. 251

Improved hydrocracking performance by combining conventional hydrotreating
  and zeolitic catalysts in stacked bed reactors
  A.A. Esener and I.E. Maxwell .................................................. 263

The microbial upgrading of model heavy oils
  L.E. Patras and I.A. Webster ................................................. 273

Author Index ................................................................. 289

Subject Index ............................................................... 291

Studies in Surface Science and Catalysis (other volumes in the series) .... 293
