

POST ACCIDENT DEBRIS COOLING

PROCEEDINGS OF THE FIFTH POST ACCIDENT HEAT
REMOVAL INFORMATION EXCHANGE MEETING

JULY 28 - 30, 1982

NUCLEAR RESEARCH CENTER KARLSRUHE
KARLSRUHE

EDITED BY

U. MÖLLER AND C. GÜNTHER

INSTITUTE FOR REACTOR COMPONENTS

Table of Contents

	Page
0 <u>Summary</u>	
1 <u>Introduction</u>	1
R.S. Peckover	2
Outline of PAHR Problems Related to Licensing	
2 <u>Debris Bed Formation and Debris Bed Properties</u>	12
M. Ando, L. Caldarola	13
Triggered Fragmentation Experiments at Karlsruhe	
R. Benz, L. Biasi, H. Schins	22
Debris Formation in Sodium	
D. Alvarez, M. Amblard	28
Fuel Leveling	
B. Duret, J.C. Bonnard	34
Permeability of a Bed of Fuel Particles Experimental Research	
I. Cook, R.S. Peckover	40
Effective Thermal Conductivity of Debris Beds	
B. Schulz	46
Wetting Properties in the System UO ₂ -Stainless Steel 1.4970 and Thermal Conductivity of Molten Materials	
R. Besnard, J. P. Chaudat	53
Breaking up of Pure and Simulated "Burnt" Mixed Oxide Fuel by Chemical Interaction with Oxidized Sodium	
M. Bober, J. Singer, K. Wagner	59
On the Radiative Heat Transfer in Liquid Urania	
3 <u>Debris Bed Experiments and Interpretation (LMFBR Related)</u>	65
L. Baker, Jr., D.R. Pedersen, J.D. Gabor, S.W. Jones, J.D. Bingle	66
Correlations of Particulate Debris Bed Coolability Data	
L. Barleon, K. Thomauske, H. Werle	74
Dependence of Dryout Heat Flux on Particle Diameter and Bed Height and Effects of Stratification and Bed Reconfiguration	
G.W. Mitchell, R.J. Lipinski, M.L. Schwarz	79
Heat Removal from a Stratified UO ₂ -Sodium Particle Bed	
J.D. Gabor, J.C. Cassulo, D.R. Pedersen	85
The Effect of Particle Stratification on Debris Bed Dryout	

	Page
G.W. Mitchell, C.A. Ottinger The D7 Experiment: Heat Removal from a Shallow Stratified UO ₂ -Sodium Particle Bed	90
B.D. Turland Convection in Debris Beds?	96
S.I. Abdel-Khalik, M.M. El-Wakil, H.S. Kim, K.J. Choi Convective Cooling of Simulated Core Debris Beds	102
G.F. Stevens, R. Trenberth Experimental Studies of Boiling Heat Transfer and Dry- out in Heat Generating Particulate Beds in Water at 1 Bar	108
E. Sowa, D.R. Pedersen, J. Pavlik, R. Purviance Experiments and Procedures for Bottom Heating Heat Transfer Experiments Through UO ₂ Debris Beds in Sodium	114
L. Barleon, K. Thomauske, H. Werle Bottom Cooling of Particulate Debris Beds	119
<u>Heat Removal from Particle Beds (LWR-HTR)</u>	126
J.B. Rivard Understanding of Core Damage Phenomena in LWRs Importance, Status, and Prospects	127
R.R. Hobbins, B.A. Cook, R.E. Mason LWR Debris from Severe In-Pile Transient Tests	133
R.L. Moore, J.M. Broughton Relocation and Freezing of Liquefied Fuel Rod Material	139
D.H. Cho, D.R. Armstrong, L. Bova, S.H. Chan, G.R. Thomas Experiments on Quenching of a Hot Debris Bed	145
T. Ginsberg, J. Klein, J. Klages, C.E. Schwarz, J.C. Chen Phenomenology of Transient Debris Bed Heat Removal	151
D. Squarer, L.E. Hochreiter, A.T. Pieczynski Some Aspects of Decay Heat Removal From a Debris Bed and its Implication to Degraded Core Coolability	159
F.P. Tsai, J. Jakobsson, I. Catton, V.K. Dhir Dryout Heat Flux in a Debris Bed With Flow From Below	165
G.F. Hewitt Flooding Phenomena in Debris Beds	168
G. Hofmann On the Location and Mechanisms of Dryout in Top-Fed and Bottom-Fed Particulate Beds	186
B.D. Turland, K.A. Moore One-Dimensional Models of Boiling and Dryout	192

	Page
R.J. Lipinski A Dryout Model for Core Debris With Bottom Flow Entry	198
E. Achenbach Pressure Drop, Forced Convective, Free Convective and Radiant Heat Transfer of Pebble Beds	204
5 <u>Experimental Test Facilities and Programmes</u>	214
D. Rousseau, J.F. Veyrat, H. Holtbecker The In-Pile PAHR Experiments in Melusine Reactor	215
H. Hohmann, H. Holtbecker, H. Schins, J. Donea, L. Biasi, L. Castellano PAHR-Out-of-Pile Studies at JRC-Ispra; Multipurpose Experimental Facility and Related Analysis	221
C. Joly, M. Soenen, W. Detavernier, C. De Raedt, L. Fouarge, H. Backs European PAHR Experiments in the BR2 Reactor: Layout and Characterization of the First Experiment	227
F. Hofmann Post-Accident Heat Removal Investigations for Fast Breeder Reactors at the Nuclear Research Center Karlsruhe (FRG)	233
6 <u>Interaction of Core Debris With Underlying Structural Materials</u>	241
R. Farhadieh, D.R. Pedersen, R. Purviance, N. Carlson Interaction and Penetration of Heated UO ₂ with Limestone Concrete	242
R.M. Wong, I. Catton, V.K. Dhir Solid Particle Penetration of a Melting Substrate	248
G.A. Greene and C.E. Schwarz An Approximate Model for Calculating Overall Heat Transfer Between Overlying Immiscible Liquid Layers with Bubble- Induced Liquid Entrainment	251
A. Hunsbedt, S.T. Lam, E.L. Gluekler, F.B. Cheung Comparison of Melt Penetration Models	258
7 <u>Computation Modeling of PAHR Phenomena</u>	264
J.M. Buchlin, C. Benocci, C. Joly, A. Siebertz A Two-Dimensional Finite Difference Modeling of the Thermohydraulic Behaviour of the PAHR Debris Bed up to Extended Dryout	265
L. Biasi, L. Castellano Molten Pool Theoretical Analysis	272
J.D. Gabor, J.C. Cassulo, D.R. Pedersen The Application of Debris Bed Dryout Data to CONACS-1 Modeling	278

	S.T. Lam, E.L. Gluekier GROWS-2C Code for Evaluation of Debris Melt Penetration and Cell Responses	Page 284
	N. Tanaka, H. Nakamura, K. Miyagi, K. Suzuki An Analytical Study on the Coolability of LMFBR Disrupted Core	292
8	<u>Core Debris Retention Concepts</u>	298
	M. Dalle Donne, S. Dorner, A. Roth Measurements of the Viscosity of Sodium Tetraborate (Borax)-UO ₂ and of Sodium Metaborate-UO ₂ Liquid Solutions	299
	D.G. Swanson, I. Catton, V.K. Dhir A Thoria Rubble Bed for Post Accident Core Retention	307
	D. Schwalm, H. Schins Some Remarks on the Advantage of Porous Retention Plates for LMFBR In-Vessel Core Catchers	313
	J.D. Fish, M. Pilch, F.E. Arellano Particle-Bed Core Retention Concept Assessment	319
	H. Vossebrecker, H.J. Friedrich In-Vessel Fuel Retention, Retrospective View of SNR-300 and Prospect of SNR-2	325
	K.H. Kerz, H. Laue Mechanical Behaviour of SNR-300 Reactor Vessel Components Under PAHR-Conditions	334
	C. Le Rigoleur, G. Kayser The Internal Core Catcher in Super Phenix	340
	G. Kayser, C. Le Rigoleur PAHR - Engineering Problems and Solutions	345
9	<u>Concluding Remarks</u> E.L. Gluekier	356
	List of Participants	361
