1. Field Methods in Regional Geochemical Surveys
   REIJO SALMINEN
   1 Introduction 1
   2 Sampling Media 1
   3 Sampling Density 4
   4 Sampling Network 5
   5 Quality Assurance in Sampling 6
   6 Sampling Procedures 6
   7 Documentation of the Field Data 10
   8 Photographing 10
   9 Sample Archive 10
   References 11

2. Sampling Methods for Site Characterization
   CHRIS SWYNGEDOUW
   1 Introduction 13
   2 Site Characterization 14
   3 Basic Sampling Types 15
   4 Some Further Sampling Considerations 19
   References 23

3. Contaminated Groundwater Sampling and Quality Control of Water Analyses
   JULIAN K. TRICK, MARIANNE STUART, SHAUN REEDER
   1 Introduction 25
   2 Groundwater Sampling Objectives 25
   3 Choosing the Right Portable Sampling Devices 26
   4 Avoiding Cross-Contamination 30
   5 Water-Level Measurements 30
   6 Well Purging Techniques 31
   7 On-Site Water-Quality Measurements 35
   8 Preservation and Handling of Samples 37
   9 Quality Assurance and Quality Control Procedures 40
   10 Data Validation 42
   11 Health and Safety in Fieldwork 44
   Acknowledgment 44
   References 44

4. The Collection of Drainage Samples for Environmental Analyses From Active Stream Channels
   CHRISTOPHER C. JOHNSON, DEE M.A. FLIGHT, E. LOUISE ANDER, THOMAS R. LISTER, NEIL BREWARD, FIONA M. FORDYCE, SARAH E. NICE, KATE V. KNIGHTS
   1 Introduction 47
   2 Drainage Basins 48
   3 Drainage Sampling 51
   4 Sampling Strategy 54
   5 Procedures 57
   6 Discussion 70
   7 Conclusions 74
   Acknowledgments 75
   References 75

   CHRISTOPHER C. JOHNSON, E. LOUISE ANDER, THOMAS R. LISTER, DEE M.A. FLIGHT
   1 Introduction 79
   2 Planning Quality Control—Quality Assurance 80
   3 Raw Data Checking 86
   4 Statistical Analyses and Plotting of Control Sample Data 89
   5 Leveling Data 92
   6 Discussion 97
Acknowledgments 100
References 100

6. Gas Chromatographic Methods of Chemical Analysis of Organics and Their Quality Control
CHRIS SWYNGEDOUW, ROBERT LESSARD

1 Introduction 103
2 Sample Preparation—Aqueous Samples 104
3 Sample Preparation—Soil Samples 105
4 Clean-Up Techniques 106
5 Instrumental Analysis 108
6 Data Analysis 109
7 Quality Control 110
References 112

7. Evaluation of Geochemical Background at Regional and Local Scales by Fractal Filtering Technique: Case Studies in Selected Italian Areas
ANNAMARIA LIMA

1 Introduction 115
2 Multifractal Interpolation and Fractal Concentration-Area (C-A) Method 117
3 Background/Baseline Geochemical Map Obtained by Fractal Filtering (S-A) method 119
4 Pb and U Background Values for Campania Region Stream Sediments 120
5 Pb Background Values for the Volcanic Soils of the Metropolitan and Provincial Areas of Napoli 123
6 Conclusions 128
Acknowledgments 130
References 130

8. Geochemical Mapping of Urban Areas
STEFANO ALBANESE, DOMENICO CICCHELLA, ANNAMARIA LIMA, BENEDETTO DE VIVO

1 Introduction 133
2 Definition of Geochemical Background and Baseline at an Urban Scale 134
3 Planning Urban Geochemical Mapping 135
4 Sampling Protocols and Field Activities 136
5 Sample Preparation and Analyses 138
6 Geochemical Data Presentation 141

9. Chemical Speciation to Assess Bioavailability, Bioaccessibility and Geochemical Forms of Potentially Toxic Metals (PTMs) in Polluted Soils
PAOLA ADAMO, DIANA AGRELLI, MARIAVITTORIA ZAMPELLA

1 Introduction 153
2 PTMs Forms in Soil and Bioavailability 154
3 The Need of Speciation and Speciation Methods of PTMs in Soil 155
4 Plant Bioavailability 157
5 Human Bioavailability and Bioaccessibility 168
6 PTM Partitioning Between Soil Geochemical Phases 173
7 Applications of PTM Speciation for Risk and Remediation Assessment 181
8 Concluding Remarks 183
References 183

10. Extraction and Characterization of Pore Water in Contaminated Soils
MARCELLO DI BONITO, NEIL BREWARD, NEIL CROUT, BARRY SMITH, SCOTT D. YOUNG, HAO ZHANG

1 Introduction 195
2 Methods for Sampling Soil Pore Water 198
3 Description and Discussion of Selected Methods 202
4 Conclusions and Recommendations 224
References 226

11. Models of Geochemical Speciation: Structure and Applications
MARCELLO DI BONITO, STEPHEN LOFTS, JAN E. GROENENBERG

1 Introduction 237
2 History of Speciation Modeling 238
3 Modeling Metal Binding to Specific Ligands 243
4 Applying Speciation Models to Soils and Waters 258
5 Linking Metal Speciation to Bioavailability, Biotic Accumulation and Toxicity 279
6 Future Prospects 287
7 Summary and Conclusions 290
References 291
CONTENTS

12. Lead and Strontium Isotopes as Monitors of Anthropogenic Contaminants in the Surficial Environment
    ROBERT A. AYUSO, NORA K. FOLEY
    1 Introduction 307
    2 Analytical Techniques 311
    3 Case Study: Pb and As in Soils and Well Water, Mohr Orchards Site, Pennsylvania 337
    4 Summary Conclusions 358
    Acknowledgments 358
    References 358

    MONICA IADAROLA, PIEROBARESCHINO, FRANCESCO PEPE
    1 Introduction 363
    2 MSW Incineration 364
    3 Treatment of Flue Gas From MSW Incineration 368
    4 Management of Solid By-products From MSW Incineration 371
    5 Management of Hazardous By-products From MSW Incineration in Italy 372
    6 Conclusions 375
    References 376

14. Cos Cob: A New Community Asset From an Old Contaminated Site
    CYNDE SEARS
    1 Introduction 377
    2 Background: Cos Cob Power Plant, Connecticut 377
    3 Plans for Site Redevelopment 379
    4 Update Since 2008 380
    5 Finalizing the Project 384
    6 Conclusion 384
    Acknowledgments 387
    References 387

15. The Bagnoli-Napoli Brownfield Site in Italy: Before and After the Remediation
    BENEDETTO DE VIVO, ANNAMARIA LIMA
    1 Introduction 389
    2 Environmental Remediation of the Brownfield Site 390
    3 Geological Settings of the Bagnoli-Fuorigrotta Area and Stratigraphy of the Brownfield Site 390
    4 Potential Sources of Anthropogenic Pollution 393
    5 Hydrogeological Characteristics of the Bagnoli-Fuorigrotta Plain 393
    6 Site Characterization 394
    7 Natural and Anthropogenic Components of the Pollution 405
    8 Chemical-Structural Characterization of Waste Material and Leachability Tests 409
    9 Asbestos Characterization and Remediation 409
    10 Preliminary Operative Remediation Plan 409
    11 Securing the Site 413
    12 Postremediation Events 414
    Acknowledgments 415
    References 415

16. Environmental Human Health Issues Related to Indoor Air Pollution from Domestic Biomass Use in Rural China: A Review
    HARVEY E. BELKIN
    1 Introduction 417
    2 IAP—The Magnitude of the Problem 418
    3 Deforestation and Domestic Solid Fuel in China 420
    4 Rural Versus Urban in China 421
    5 Domestic Biomass Use in Developing Countries 422
    6 Emission Factors of Biomass Burning 424
    7 Types of Pollution from Biomass Burning 425
    8 Where There's Smoke There's Lung Disease 427
    9 Mitigation and Reduction of IAP in Rural China 428
    10 Conclusions 429
    Acknowledgments 429
    References 430

17. Applications of Geochemistry to Medical Geology
    ROBERT B. FINKELMAN, WILLIAM H. OREM, GEOFFREY S. PLUMLEE, OLLE SELINUS
    1 Introduction 435
    2 Health-Related Geochemical Mapping: Examples 435
    3 Geochemical Controls on the Sources, Fate, Exposure Pathways, and Toxicity Effects of Geogenic and Anthropogenic Toxicants 440
    4 Human Health Impacts of Organic Substances of Geogenic Origin 444
    5 Aqueous Geochemistry: Selected Elements 453
6 Coal Geochemistry and Health 456
7 Conclusions 460
8 Summary 460
Acknowledgments 460
References 460

18. Biological, Chemical, and Environmental Hazards of Desert Dust to Military Personnel
MARK B. LYLES
1 Introduction 467
2 “Operation Sandbox”—Study of Airborne Particle Sizes, Quantity, and Other Health Risks 468
3 Exposure to Mineralized Dust—Particle Size, Quantity, and Health Risks 473
4 Exposure to Mineralized Dust—Chemical Content and Heavy and Trace Metals 476
5 Exposure to Mineralized Dust—Biological Exposures and Infectious Diseases 477
6 Medical Consequences of Middle East Dust Exposure 481
7 Conclusions 482
Acknowledgments 484
References 484

19. Environmental Characteristics and Utilization Potential of Metallurgical Slag
NADINE M. PIATAK
1 Introduction 487
2 Metallurgical Processes 488
3 Factors That Influence Environmental Behavior 489
4 Slag as a Resource 506
5 Environmental Liability or Valuable Resource? 511
6 Conclusions 514
Acknowledgments 515
References 515

20. Polyurethane Foam-Based Passive Air Samplers in Monitoring Persistent Organic Pollutants: Theory and Application
CHENGKAI QU, ANGELA L. DOHERTY, XINLI XING, WEN SUN, STEFANO ALBANESE, ANNAMARIA LIMA, SHIHUA QI, BENEDETTO DEVIVO
1 Introduction 521
2 Principles 523
3 Progress of the PUF-PAS in Monitoring POPs 529
4 Case History 532

5 Perspective 538
Acknowledgments 539
References 540

21. Legacies of Organochlorine Pesticides (OCPs) in Soil of China—A Review, and Cases in Southwest and Southeast China
YUAN ZHANG, SHIHUA QI, XINLI XING, DAN YANG, NINGOMBAM LINTHOINGAMBI DEVI, CHENGKAI QU, HONG-XIA LIU, JIA-QUAN ZHANG, FA-MING ZENG
1 Introduction 543
2 Origins and Environmental Chemistry of OCPs 544
3 The Past and Present of OCPs in China 548
4 Regional Distributions and Factors Influencing the OCPs Distributions: Case Studies From Southwest and Southeast China 552
5 Conclusions 561
Acknowledgments 561
References 561

22. Soil and Water Contamination by Potentially Hazardous Elements: A Case History From India
PRADIP K. GOVIL, ARADHI K. KRISHNA
1 Introduction 567
2 PHEs and Their Effects 568
3 Health and Environmental Effects of PHEs 569
4 Description and Abstracted Case Studies of Some Contaminated Areas From India 572
5 Description of the Study Area 575
6 Risk Assessment and Methodology 588
7 Conclusions 593
8 Recommendations 595
Acknowledgments 595
References 596

23. A Microbial Analysis Primer for Biogeochemists
HONGCHEN JIANG, LIUQIN HUANG, JIAN YANG, GENG WU
1 Methods for Measuring Microbial Abundance 600
2 Methods for Measuring Microbial Diversity/Functions 602
Acknowledgments 606
References 606

Index 611
