# Sample Path Analysis and Distributions of Boundary Crossing Times

 Springer

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>Technical Prerequisites</b> .....	3
2.1	Poisson Processes .....	3
2.2	The Compound Poisson Process .....	5
2.3	Renewal Processes .....	6
2.4	The Brownian Motion .....	7
2.5	Lévy Processes .....	9
<b>3</b>	<b>First Crossing by Poisson Processes</b> .....	11
3.1	Horizontal Line Boundary .....	11
3.2	Decreasing Linear Boundary .....	11
3.3	Increasing Linear Boundary .....	13
3.4	Truncated Wald SPRT for a Poisson Process .....	18
3.4.1	Truncation Type I .....	19
3.4.2	Truncation Type II .....	23
3.5	Crossing a Lower Boundary by the Difference of Two Independent Poisson Processes .....	26
3.6	One-Sided CUSUM Procedure for a Poisson Process .....	30
3.6.1	The One-Sided CUSUM .....	30
3.6.2	The Distribution of the Length of a Renewal Phase .....	31
3.6.3	The Distribution of the Length of a Terminal Phase .....	33
3.6.4	The Density of the Run Length .....	34
3.7	Iterated Poisson Process .....	35
3.7.1	First Crossing Times of Iterated Poisson .....	36
3.7.2	Constant Boundary .....	36
3.7.3	Decreasing Linear Boundary .....	38
3.7.4	Increasing Linear Boundary .....	39

<b>4</b>	<b>First Crossing by Compound Poisson Processes</b> . . . . .	41
4.1	The Horizontal Line Boundary . . . . .	41
4.2	Decreasing Upper Linear Boundary . . . . .	44
4.2.1	The Distribution of the Fraction of Time in a Mode . . . . .	47
4.3	Linear Boundary with Negative $y$ -Intercept . . . . .	49
4.3.1	Application in Queueing Theory . . . . .	51
4.4	Increasing Upper Linear Boundary . . . . .	52
4.5	Continuation Region Between Two Parallel Lines: Transforms . . . . .	54
4.5.1	The Wald Martingale Approach . . . . .	55
4.5.2	The Transforms Approach . . . . .	56
4.6	Application in Insurance . . . . .	59
4.7	Busy Period Analysis of $M/G/1$ Queue with Restricted Accessibility . . . . .	60
4.8	Compound Poisson Processes Subordinated by a Poisson Process . . . . .	62
4.8.1	The Distribution of the Subordinated Process . . . . .	62
4.8.2	CPP with Exponential Jumps . . . . .	64
4.8.3	CPP with Normal Jumps . . . . .	65
4.9	Compound Poisson Process Crossing One of Two Parallel Linear Boundaries: Exact Distributions . . . . .	65
<b>5</b>	<b>Telegraph Processes</b> . . . . .	69
5.1	Generalized Integrated Telegraph Process and The Distribution of Related Stopping Times . . . . .	69
5.1.1	Crossing an Upper Boundary . . . . .	72
5.2	Telegraph Process with Randomly Changing Velocities . . . . .	75
5.2.1	Two Random Velocities . . . . .	75
5.2.2	Velocity Is a Continuous Random Variable . . . . .	77
5.2.3	The Expected Value and Variance of $X(t)$ . . . . .	78
5.3	Brownian Motion Driven by a Generalized Telegraph Process . . . . .	79
5.4	Alternating Positive and Negative Compound Poisson Processes . . . . .	81
5.4.1	The Distribution of $Y(t)$ . . . . .	82
<b>6</b>	<b>Sequential Estimation</b> . . . . .	87
6.1	Estimating the Mean of an Exponential Distribution . . . . .	87
6.1.1	Stopping Variables and Their Loss Functions . . . . .	87
6.1.2	Poisson Process Crossing Concave Boundary . . . . .	89
6.2	Estimating the Log-Odds in Bernoulli Trials . . . . .	92
6.2.1	The Distribution of The Sample Size . . . . .	93
6.2.2	Functionals of the Odds . . . . .	94
6.2.3	Application in Reliability Testing . . . . .	96
<b>7</b>	<b>First Crossing a Random Process</b> . . . . .	97
7.1	Brownian Motion and Compound Poisson Process . . . . .	97

<b>8</b>	<b>Failure Times of Deterioration Processes</b> .....	101
8.1	Distributions of Failure Times Associated with Nonhomogeneous Compound Poisson Damage Processes .....	101
8.1.1	Cumulative Damage Failure Distribution .....	102
8.2	The Availability and Hazard of a System Under a Cumulative Damage Process with Replacement .....	103
8.2.1	Instantaneous Replacement .....	104
8.2.2	Random Length of Replacement Intervals .....	106
8.3	Deterioration Processes with Increasing Threshold .....	107
8.3.1	Increasing Step-Function .....	109
8.3.2	Linear Increasing Function with Drops .....	109
<b>9</b>	<b>Miscellaneous Topics</b> .....	111
9.1	A Markovian Growth-Collapse Model .....	111
9.2	Hysteretic Switching Capacity for M/G/1 Queues .....	114
9.2.1	Expected Discounted Total Loss Without Switching .....	116
9.2.2	The Expected Discounted Total Cost of Switching .....	118
	<b>Appendix: Computing Algorithms</b> .....	121
	<b>References</b> .....	127
	<b>Glossary</b> .....	131
	<b>Index</b> .....	133
