

Geophysical Monograph 232

Microstructural Geochronology

Planetary Records Down to Atom Scale

Desmond E. Moser
Fernando Corfu
James R. Darling
Steven M. Reddy
Kimberly Tait
Editors

This Work is a co-publication of the American Geophysical Union and John Wiley and Sons, Inc.

CONTENTS

Contributors.....	vii
Preface.....	xi
Part I: Chemical Microstructure/Zoning	
1 Zircon as Magma Monitor: Robust, Temperature-Dependent Partition Coefficients from Glass and Zircon Surface and Rim Measurements from Natural Systems <i>Lily L. Claiborne, Calvin F. Miller, Guilherme A. R. Gualda, Tamara L. Carley, Aaron K. Covey, Joseph L. Wooden, and Marc A. Fleming</i>	3
2 Petrology and Geochronology of Metamorphic Zircon <i>Matthew J. Kohn and Nigel M. Kelly</i>	35
3 Origins of Textural, Compositional, and Isotopic Complexity in Monazite and Its Petrochronological Analysis <i>Callum J. Hetherington, Ethan L. Backus, Christopher R. M. McFarlane, Christopher M. Fisher, and D. Graham Pearson</i>	63
4 Application of Single-Shot Laser Ablation Split-Stream Inductively Coupled Plasma Mass Spectrometry to Accessory Phase Petrochronology <i>John M. Cottle and Michael A. Stearns</i>	91
5 Comparing Chemical Microstructures of Some Early Solar System Zircon from Differentiated Asteroids, Mars and Earth <i>Julia Roszjar, Desmond E. Moser, Brendt C. Hyde, Chutimun Chanmuang, and Kimberly Tait</i>	113
6 Crystallization of Baddeleyite in Basaltic Rocks from Mars, and Comparisons with the Earth, Moon, and Vesta <i>Christopher D. K. Herd, Desmond E. Moser, Kimberly Tait, James R. Darling, Barry J. Shaulis, and Timothy J. McCoy</i>	137
Part II: Orientation Microstructure	
7 Strength and Deformation of Zircon at Crustal and Mantle Pressures <i>Ievgeniia Morozova, Sean R. Shieh, Desmond E. Moser, Ivan R. Barker, and John M. Hanchar</i>	169
8 Role of Elastic Anisotropy in the Development of Deformation Microstructures in Zircon <i>Nicholas E. Timms, David Healy, Timmons M. Erickson, Alexander A. Nemchin, Mark A. Pearce, and Aaron J. Cavosie</i>	183
9 The Rietputs Formation in South Africa: A Pleistocene Fluvial Archive of Meteorite Impact Unique to the Kaapvaal Craton <i>Aaron J. Cavosie, Timmons M. Erickson, Pedro E. Montalvo, Diana C. Prado, Nadja O. Cintron, and Ryan J. Gibbon</i>	203
10 Deciphering the Effects of Zircon Deformation and Recrystallization to Resolve the Age and Heritage of an Archean Mafic Granulite Complex <i>Nicole M. Rayner, Mary Sanborn-Barrie, and Desmond E. Moser</i>	225

11	Alpha Recoil Loss of Pb from Baddeleyite Evaluated by High-Resolution Ion Microprobe (SHRIMP II) Depth Profiling and Numerical Modeling: Implications for the Interpretation of U-Pb Ages in Small Baddeleyite Crystals	
	<i>William J. Davis and Donald W. Davis</i>	247
12	Transmission Electron Microscope Imaging Sharpens Geochronological Interpretation of Zircon and Monazite	
	<i>Anne-Magali Seydoux-Guillaume, Bernard Bingen, Valérie Bosse, Emilie Janots, and Antonin T. Laurent</i>	261
Part III: 3D Nanostructure		
13	Detecting Micro- and Nanoscale Variations in Element Mobility in High-Grade Metamorphic Rocks: Implication for Precise U-Pb Dating of Zircon	
	<i>Monika A. Kusiak, Simon A. Wilde, Richard Wirth, Martin J. Whitehouse, Daniel J. Dunkley, Ian Lyon, Steven M. Reddy, Andrew Berry, and Martin de Jonge</i>	279
14	The Optimization of Zircon Analyses by Laser-Assisted Atom Probe Microscopy: Insights from the 91500 Zircon Standard	
	<i>David W. Saxey, Steven M. Reddy, Denis Fougereuse, and William D. A. Rickard</i>	293
15	Atom Probe Tomography of Phalaborwa Baddeleyite and Reference Zircon BR266	
	<i>David A. Reinhard, Desmond E. Moser, Isabelle Martin, Katherine P. Rice, Yimeng Chen, David Olson, Daniel Lawrence, Ty J. Prosa, and David J. Larson</i>	315
16	Uncertainty and Sensitivity Analysis for Spatial and Spectral Processing of Pb Isotopes in Zircon by Atom Probe Tomography	
	<i>Tyler B. Blum, David A. Reinhard, Yimeng Chen, Ty J. Prosa, David J. Larson, and John W. Valley</i>	327
17	Complex Nanostructures in Shocked, Annealed, and Metamorphosed Baddeleyite Defined by Atom Probe Tomography	
	<i>Lee F. White, James R. Darling, Desmond E. Moser, David A. Reinhard, Joseph Dunlop, David J. Larson, Daniel Lawrence, and Isabelle Martin</i>	351
18	Best Practices for Reporting Atom Probe Analysis of Geological Materials	
	<i>Tyler B. Blum, James R. Darling, Thomas F. Kelly, David J. Larson, Desmond E. Moser, Alberto Perez-Huerta, Ty J. Prosa, Steven M. Reddy, David A. Reinhard, David W. Saxey, Robert M. Ulfig, and John W. Valley</i>	369
