

Massimo Guiggiani

The Science of Vehicle Dynamics

Handling, Braking, and Ride of Road
and Race Cars

Second Edition

 Springer

Contents

| | | |
|----------|---|----|
| 1 | Introduction | 1 |
| 1.1 | Vehicle Definition | 2 |
| 1.2 | Vehicle Basic Scheme | 3 |
| | References | 6 |
| 2 | Mechanics of the Wheel with Tire | 7 |
| 2.1 | The Tire as a Vehicle Component | 9 |
| 2.2 | Carcass Features | 9 |
| 2.3 | Contact Patch | 10 |
| 2.4 | Rim Position and Motion | 12 |
| | 2.4.1 Reference System | 13 |
| | 2.4.2 Rim Kinematics | 13 |
| 2.5 | Footprint Force | 16 |
| | 2.5.1 Perfectly Flat Road Surface | 18 |
| 2.6 | Global Mechanical Behavior | 20 |
| | 2.6.1 Tire Transient Behavior | 20 |
| | 2.6.2 Tire Steady-State Behavior | 20 |
| | 2.6.3 Simplifications Based on Tire Tests | 21 |
| 2.7 | Rolling Resistance Moment | 23 |
| 2.8 | Definition of Pure Rolling for Tires | 25 |
| | 2.8.1 Zero Longitudinal Force | 26 |
| | 2.8.2 Zero Lateral Force | 28 |
| | 2.8.3 Zero Vertical Moment | 28 |
| | 2.8.4 Zero Lateral Force and Zero Vertical Moment | 28 |
| | 2.8.5 Pure Rolling Summary | 29 |
| | 2.8.6 Rolling Velocity and Rolling Yaw Rate | 31 |
| 2.9 | Definition of Tire Slips | 33 |
| | 2.9.1 Theoretical Slips | 34 |
| | 2.9.2 The Simple Case (No Camber) | 35 |
| | 2.9.3 From Slips to Velocities | 35 |

| | | |
|----------|--|-----------|
| 2.9.4 | (Not So) Practical Slips | 36 |
| 2.9.5 | Tire Slips Are Rim Slips Indeed | 36 |
| 2.9.6 | Slip Angle | 37 |
| 2.10 | Grip Forces and Tire Slips | 38 |
| 2.11 | Tire Tests | 39 |
| 2.11.1 | Tests with Pure Longitudinal Slip | 41 |
| 2.11.2 | Tests with Pure Lateral Slip | 42 |
| 2.12 | Magic Formula | 45 |
| 2.12.1 | Magic Formula Properties | 46 |
| 2.12.2 | Fitting of Experimental Data | 47 |
| 2.12.3 | Vertical Load Dependence | 47 |
| 2.12.4 | Horizontal and Vertical Shifts | 50 |
| 2.12.5 | Camber Dependence | 50 |
| 2.13 | Mechanics of the Wheel with Tire | 50 |
| 2.13.1 | Braking/Driving | 51 |
| 2.13.2 | Cornering | 51 |
| 2.13.3 | Combined | 53 |
| 2.13.4 | Camber | 55 |
| 2.13.5 | Grip | 56 |
| 2.13.6 | Vertical Moment | 57 |
| 2.14 | Exercises | 58 |
| 2.14.1 | Pure Rolling | 58 |
| 2.14.2 | Theoretical and Practical Slips | 58 |
| 2.14.3 | Tire Translational Slips and Slip Angle | 58 |
| 2.14.4 | Tire Spin Slip and Camber Angle | 59 |
| 2.14.5 | Motorcycle Tire | 59 |
| 2.14.6 | Finding the Magic Formula Coefficients | 60 |
| 2.15 | Summary | 63 |
| 2.16 | List of Some Relevant Concepts | 63 |
| 2.17 | Key Symbols | 63 |
| | References | 64 |
| 3 | Vehicle Model for Handling and Performance | 67 |
| 3.1 | Mathematical Framework | 68 |
| 3.1.1 | Vehicle Axis System | 68 |
| 3.2 | Vehicle Congruence (Kinematic) Equations | 69 |
| 3.2.1 | Velocity of G , and Yaw Rate of the Vehicle | 69 |
| 3.2.2 | Yaw Angle of the Vehicle, and Trajectory of G | 70 |
| 3.2.3 | Velocity Center C | 72 |
| 3.2.4 | Fundamental Ratios β and ρ | 73 |
| 3.2.5 | Acceleration of G and Angular Acceleration of the Vehicle | 73 |
| 3.2.6 | Radius of Curvature of the Trajectory of G | 76 |

| | | |
|---------|---|-----|
| 3.2.7 | Radius of Curvature of the Trajectory of a Generic Point | 78 |
| 3.2.8 | Telemetry Data and Mathematical Channels | 78 |
| 3.2.9 | Acceleration Center K | 79 |
| 3.2.10 | Inflection Circle | 80 |
| 3.3 | Tire Kinematics (Tire Slips) | 81 |
| 3.3.1 | Translational Slips | 84 |
| 3.3.2 | Spin Slips | 85 |
| 3.4 | Steering Geometry (Ackermann) | 85 |
| 3.4.1 | Ackermann Steering Kinematics | 87 |
| 3.4.2 | Best Steering Geometry | 89 |
| 3.4.3 | Position of Velocity Center and Relative Slip Angles | 89 |
| 3.5 | Vehicle Constitutive (Tire) Equations | 90 |
| 3.6 | Vehicle Equilibrium Equations | 91 |
| 3.6.1 | Inertial Terms | 92 |
| 3.6.2 | External Force and Moment | 92 |
| 3.7 | Forces Acting on the Vehicle | 93 |
| 3.7.1 | Weight | 93 |
| 3.7.2 | Aerodynamic Force | 93 |
| 3.7.3 | Road-Tire Friction Forces | 95 |
| 3.7.4 | Road-Tire Vertical Forces | 99 |
| 3.8 | Vehicle Equilibrium Equations (More Explicit Form) | 100 |
| 3.9 | Vertical Loads and Load Transfers | 102 |
| 3.9.1 | Longitudinal Load Transfer | 102 |
| 3.9.2 | Lateral Load Transfers | 103 |
| 3.9.3 | Vertical Load on Each Tire | 103 |
| 3.10 | Suspension First-Order Analysis | 104 |
| 3.10.1 | Suspension Reference Configuration | 105 |
| 3.10.2 | Suspension Internal Coordinates | 106 |
| 3.10.3 | Kinematic Camber Variation | 107 |
| 3.10.4 | Kinematic Track Width Variation | 108 |
| 3.10.5 | Vehicle Internal Coordinates | 109 |
| 3.10.6 | Definition of Roll and Vertical Stiffnesses | 109 |
| 3.10.7 | Suspension Internal Equilibrium | 113 |
| 3.10.8 | Effects of a Lateral Force | 113 |
| 3.10.9 | No-Roll Centers and No-Roll Axis | 115 |
| 3.10.10 | Suspension Jacking | 118 |
| 3.10.11 | Roll Moment | 118 |
| 3.10.12 | Roll Angles and Lateral Load Transfers | 120 |
| 3.10.13 | Explicit Expressions of the Lateral Load Transfers | 122 |
| 3.10.14 | Lateral Load Transfers with Rigid Tires | 124 |

| | | |
|---------|--|-----|
| 3.11 | Sprung and Unsprung Masses | 124 |
| 3.12 | Dependent Suspensions (Solid Axle) | 125 |
| 3.13 | Linked Suspensions | 128 |
| 3.14 | Differential Mechanisms | 128 |
| 3.14.1 | Relative Angular Speeds | 130 |
| 3.14.2 | Torque Balance | 130 |
| 3.14.3 | Internal Efficiency and TBR | 131 |
| 3.14.4 | Locking Coefficient | 135 |
| 3.14.5 | Rule of Thumb | 136 |
| 3.14.6 | A Simple Mathematical Model | 138 |
| 3.14.7 | Alternative Governing Equations | 138 |
| 3.14.8 | Open Differential | 139 |
| 3.14.9 | Limited-Slip Differentials | 139 |
| 3.14.10 | Geared Differentials | 140 |
| 3.14.11 | Clutch-Pack Differentials | 141 |
| 3.14.12 | Spindle Axle | 144 |
| 3.14.13 | Differential–Tire Interaction | 144 |
| 3.14.14 | Informal Summary About the Differential Behavior | 150 |
| 3.15 | Vehicle Model for Handling and Performance | 150 |
| 3.15.1 | Equilibrium Equations | 150 |
| 3.15.2 | Camber Variations | 152 |
| 3.15.3 | Roll Angles | 153 |
| 3.15.4 | Steer Angles | 153 |
| 3.15.5 | Tire Slips | 154 |
| 3.15.6 | Tire Constitutive Equations | 155 |
| 3.15.7 | Differential Mechanism Equations | 156 |
| 3.15.8 | Summary | 156 |
| 3.16 | The Structure of This Vehicle Model | 157 |
| 3.17 | Three-Axle Vehicles | 157 |
| 3.18 | Exercises | 160 |
| 3.18.1 | Center of Curvature Q_G of the Trajectory of G | 160 |
| 3.18.2 | Track Variation | 160 |
| 3.18.3 | Camber Variation | 160 |
| 3.18.4 | Power Loss in a Self-locking Differential | 161 |
| 3.18.5 | Differential–Tires Interaction | 161 |
| 3.19 | Summary | 164 |
| 3.20 | List of Some Relevant Concepts | 165 |
| 3.21 | Key Symbols | 165 |
| | References | 167 |
