Taylor & Francis Group, an **informa** business

A BALKEMA BOOK

## Table of contents

<i>Preface</i>	XI
<i>Committees</i>	XIII
<i>Acknowledgements</i>	XV
<i>Sponsors</i>	XVII

### *Keynotes*

Potential of district-scale geothermal energy in urban cities <i>K. Soga, Y. Zhang &amp; R. Choudhary</i>	3
Multiphysical phenomena and mechanisms involved with energy piles <i>L. Laloui &amp; A.F. Rotta Loria</i>	11
Geomechanical and numerical modeling of gas hydrate sediments <i>M. Sánchez &amp; X. Gai</i>	19
Coupled chemo-mechanics: A comprehensive process modeling for Energy Geotechnics <i>T. Hueckel, L.B. Hu &amp; M.M. Hu</i>	25

## **Part I: Regular sessions**

### *Energy geo-storage and geo-structures*

Thermomechanical properties of a new small-scale reinforced concrete thermo-active pile for centrifuge testing <i>A. Minto, A.K. Leung, D. Vitali &amp; J.A. Knappett</i>	37
Monitoring elastic parameter changes in the vicinity of salt caverns due to cyclic loading by seismic waveform inversion <i>D. Köhn, D. De Nil, S.A. al Hagrey, W. Rabbel, K. Khaledi, D. König &amp; T. Schanz</i>	45
Deep geothermal energy wells based on artificial large area fractures <i>J. Frankovská, M. Ondrášik &amp; Ch. Källberg</i>	53
Numerical study of bearing capacity and consolidation settlement of energy piles in fine-grained soils <i>M. Khodaparast, M.A. Kiani &amp; H. Bayesteh</i>	57
Differences and challenges in salt cavern design for hydrogen, air and natural gas storage <i>M. Schlichtenmayer &amp; M. Klafki</i>	65
Effects of transient phenomena on the behaviour of thermo-active piles <i>K.A. Gawecka, D.M. Potts, D.M.G. Tabora, W. Cui &amp; L. Zdravković</i>	71
Determining the maximum operating pressure of gas storage caverns as function of the horizontal <i>in situ</i> geostatic stress <i>E. Passaris &amp; M. Clemente</i>	79
Thermo-mechanical behaviour of energy pile in underground railway construction site <i>M. Adinolfi, A. Mauro, R.M.S. Maiorano, N. Massarotti &amp; S. Aversa</i>	83

### *Geotechnical challenges of energy infra-structures*

Innovative deep-mixing methods for oil & gas applications <i>G. Spagnoli, D. Bellato, P. Doherty &amp; G. Murphy</i>	91
---	----

A comparative study of wind farm potential in shallow-waters in Brazil and Scotland <i>G. Alves &amp; S.B. Mickovski</i>	99
A new backfill material enhancing axial bedding of district heating pipes <i>B. Wagner &amp; T. Neidhart</i>	105
Assessment of geothermal snow-melting system used in cold region area <i>I.-H. Ho &amp; M. Dickson</i>	113
Difficult behavior of young continental “loess – like” clayey soil deposits of mud-volcanogenetic heritage in Azerbaijan <i>E.E. Vicente, A.M. Krumb &amp; F. Ulbricht</i>	119
Wind farm development and the use of geogrid-stabilised unbound platforms and floating access roads on soft ground <i>M.A. Horton, T.L.H. Oliver &amp; J. Cook</i>	131
Static analysis of Mansa Devi hill landslide using FLAC3D <i>S. Islam &amp; Z.H. Rizvi</i>	139
<i>Shallow and deep subsurface geo-thermal systems</i>	
The influence of natural convection on thermal performance of ground heat exchangers <i>A. Bidarmaghz &amp; G.A. Narsilio</i>	145
Geological models as a tool for the planning of deep geothermal projects <i>F. Hese, K. Lademann, P. Offermann, A. Schaller &amp; C. Thomsen</i>	149
Effects of ground heat exchanger variable pipe separation in ground-source heat pump systems <i>N. Makasis, G.A. Narsilio, A. Bidarmaghz &amp; I.W. Johnston</i>	155
Numerical study of the performance of energy diaphragm walls <i>D. Rammal, H. Mroueh, S. Burlon &amp; M.E. Suryatriyastuti</i>	163
Analysis of thermally induced mechanical interactions in energy pile groups <i>A.F. Rotta Loria &amp; L. Laloui</i>	171
Ground thermal response to borehole ground heat exchangers <i>O. Mikhaylova, I.W. Johnston &amp; G.A. Narsilio</i>	179
Effect of moisture migration on the thermal conductivity of a geothermal well seal <i>C. Walton-Macaulay, J.C. Evans &amp; L. Daher</i>	187
Heat content in soil-borehole thermal energy systems in the vadose zone <i>T. Başer, Y. Dong &amp; J.S. McCartney</i>	195
Advanced shallow geothermal systems: Temperature induced cracking of backfill materials and system hydraulic conductivity <i>H. Anbergen, W. Rühaak, I. Sass &amp; J. Frank</i>	203
<i>Natural and hydraulic fractured reservoirs</i>	
Studying cryogenic fracturing process using transparent specimens <i>M. Cha, N.B. Alqahtani, B. Yao, L. Wang, X. Yin, Y.S. Wu &amp; T.J. Kneafsey</i>	211
Interactions between hydraulic fracture and interfaces in layered formations <i>S.M. Ham, T.-H. Kwon &amp; Y.J. Sim</i>	217
A parametric sensitivity study on CO <sub>2</sub> injection in deep saline aquifers accounting for hydro-mechanical microfracturing <i>A.B. Tatmir, I. Tomac &amp; M. Sauter</i>	223
Experimental study of proppant particle-particle interaction micromechanics during flow and transport in the fracture <i>I. Tomac &amp; L. Luo</i>	231
Modeling of discrete intersecting discontinuities in rock mass using XFEM/level set approach <i>K.C. Das, S.S. Sandha, E. Rodrigues, U. Mello, I. Carol, P.E. Vargas, N.A. González, J.M. SeguraSerra &amp; M.R. Lakshmikantha</i>	239

DEM modeling of hydraulic fracturing in fractured shale formation: Effect of inherent anisotropy and induced anisotropy <i>K. Duan &amp; C.Y. Kwok</i>	247
Comparison of discrete and equivalent continuum approaches to simulate the mechanical behavior of jointed rock masses <i>N.A. González, P.E. Vargas, I. Carol, K.C. Das, S.S. Sandha, E. Rodrigues, U. Mello, J.M. Segura &amp; M.R. Lakshmikantha</i>	255
<i>THMC behavior of geomaterials</i>	
Thermal-hydraulic modelling a Canadian deep geological repository <i>P. Abootalebi &amp; G.A. Siemens</i>	265
Behaviour of kaolinite and bentonite at elevated and lowered temperatures <i>T. Ring, C. Leo &amp; S. Livanapathirana</i>	271
Analysis of cement-based thermal energy storages considering natural convection <i>H. Hailemariam, D. Shrestha &amp; F. Wuttke</i>	277
Experimental and constitutive study of the thermo-mechanical behavior of an oil sand <i>M. Mohamadi, E. Piotrowska &amp; R.G. Wan</i>	285
Effect of temperature and pressure on mechanical behavior of rock salt in underground storage caverns <i>K. Khaledi, E. Mahmoudi, D. König &amp; T. Schanz</i>	293
CTE analysis of saturated cement-based sensible heat storage materials <i>H. Hailemariam, D. Shrestha &amp; F. Wuttke</i>	299
A laboratory investigation on the thermo-mechanical behaviour of thermal piles in sand <i>A. Rafiei, C. Arya, S.W. James, R.G. Correia &amp; R. Fuentes</i>	305
Temperature dependence of elastic <i>P</i> - and <i>S</i> -wave properties of rocks: Applications to geothermal reservoir evaluation <i>H.B. Motra &amp; F. Wuttke</i>	311
<i>Numerical methods and algorithms in energy geotechnics</i>	
Inverse-volume pore pressure projection technique for the coupling of reservoir flow and geomechanics simulators <i>P.E. Vargas, N.A. González, C.N. Mena Paz, M. de Bayser, P.W. Bryant, J.M. Segura &amp; M.R. Lakshmikantha</i>	319
Axisymmetric transient modelling of a suction caisson in sand: A numerical study <i>B. Cerfontaine, F. Collin &amp; R. Charlier</i>	327
Modelling the environmental impact of underground coal gasification <i>B.D. Roullier, P.A. Langston &amp; X.L. Li</i>	335
Stability analysis of large diameter boreholes using finite element modelling <i>C. Morris, A. Cardoso &amp; S. Raymackers</i>	343
Thermo-mechanical hypoplastic interface model for fine-grained soils <i>H. Stutz, D. Mašin, F. Wuttke &amp; B. Prädél</i>	351
A novel cavity expansion-based analytical tool and its potential application for energy pile foundation <i>H. Zhou, G. Kong, H. Liu, Y. Wu &amp; G. Li</i>	359
Numerical analysis of heat conduction in granular geo-material using lattice element method <i>Z.H. Rizvi, A.S. Sattari &amp; F. Wuttke</i>	367
Thermo-hydraulic coupled modelling: Analysis of thermal enhanced backfill structures and materials for near-shore power cables <i>K. Sembdner, H. Anbergen &amp; F. Wuttke</i>	373

## *Experimental studies and material design in energy geotechnics*

Development of laboratory system for cryogenic fracturing study <i>M. Cha, N.B. Alqahtani, B. Yao, X. Yin, Y.S. Wu &amp; T.J. Kneafsey</i>	381
Steady state vs transient thermal conductivity of soils <i>H. Hailemariam, D. Shrestha &amp; F. Wuttke</i>	389
Determination of time-dependent undrained shear strength of mining landfill <i>M. Uhlig, I. Herle &amp; C. Karcher</i>	397
Enhancement of soil thermal conductivity in dry condition <i>D. Shrestha, H. Hailemariam &amp; F. Wuttke</i>	405
Heat energy recovery from waste water in the Glasgow Subway system <i>N. Hytiris, K. Ninikas, R. Emmanuel &amp; P.L. Younger</i>	413
Potential of nano material (SiC) for improving the thermal properties of sand <i>Z.H. Rizvi, K. Sembdner, A.S. Sattari &amp; F. Wuttke</i>	419
Bearing capacity and settlement of raft-pile foundations under cyclic loading <i>I.T. Mirsayapov &amp; M.I. Shakirov</i>	423
Calculation model of foundation base settlement at the static and cyclic regime loading <i>I.T. Mirsayapov, I.V. Koroleva &amp; D.D. Sabirzyanov</i>	429

## **Part II: Minisymposia**

### *Minisymposium geomechanical characterization and modeling of hydrate bearing sediments*

The role of high-pressure flow-through experiments for evaluating the mechanical behaviour of gas hydrate-bearing soils <i>C. Deusner, E. Kossel, N. Bigalke, M. Haeckel, S. Gupta, M. Freise, H. Anbergen &amp; T. Wille</i>	437
Influence particle size on strength of gas hydrate cemented granular materials <i>B.N. Madhusudhan &amp; C.R.I. Clayton</i>	445
Sand production modeling of the 2013 Nankai offshore gas production test <i>S. Uchida, A. Klar &amp; K. Yamamoto</i>	451
A small pore size effect on dissociation behavior of gas hydrates in fine-grained sediments <i>T. Park, H.-S. Kim &amp; T.-H. Kwon</i>	459
Experimental and numerical studies on geomechanical behavior of various gas hydrate-bearing sediments in China <i>X.G. Xie, Y.F. Leung, S. Uchida, J.S. Lu, D.L. Li &amp; D.Q. Liang</i>	463
A new software collection for 3D processing of X-ray CT images <i>S. Chauhan, W. Rühaak, I. Sass, H. Anbergen, A. Kabdenov, M. Freise &amp; T. Wille</i>	471
Predicting deformation of MHBS during hydrate dissociation using a state-dependent critical state model <i>J. Shen, C.F. Chiu, G.H. Lei, J. Xu &amp; C.W.W. Ng</i>	477
Composite model to reproduce the mechanical behaviour of Methane Hydrate Bearing Sediments <i>M. De La Fuente, J. Vaunat &amp; H. Marin-Moreno</i>	483

### *Minisymposium shallow geothermal systems*

Shallow geothermal systems – geophysical support for geothermal planning maps <i>R. Kirsch, A. Wolf, K. Baezner, C. Thomsen &amp; H. Wiederhold</i>	493
Validation of a numerical model for the design of borehole heat exchangers in the presence of groundwater flow <i>J. Van Steenwinkel, D. Simpson, M. Degros, W. Vienne, G. Van Lysebetten &amp; M. Müller-Petke</i>	499

Fiber-optic temperature measurements in closed-loop geothermal systems: A case study in heterogeneous bedrock <i>G. Radioti, S. Delvoie, K. Sartor, F. Nguyen &amp; R. Charlier</i>	505
Temperature distribution in the vicinity of a borehole heat exchanger for intermittent heat extraction: An analytical solution <i>S. Erol &amp; B. François</i>	513
Use underground reservoir in Taipei basin as cooling source for air conditioners <i>H.J. Liao &amp; C. Kuo</i>	521
Cyclic loading effects on soil-energy pile interaction <i>S. Xiao, M.T. Suleiman, R. Elzeiny &amp; M.J. Al-Khawaja</i>	529
Benefits and optimisation of district hybrid ground source heat pump systems <i>O. Mikhaylova, R. Choudhary, K. Soga &amp; I.W. Johnston</i>	535
<i>Minisymposium thermo-active foundations, tunnels and earth-coupled structures</i>	
Thermo-mechanical finite element analyses of energy walls <i>D. Sterpi &amp; L. Mauri</i>	545
Lessons learned from mechanical monitoring of a thermoactive pile <i>J. Habert, M. El'Mejahed &amp; J.B. Bernard</i>	551
Effect of forced thermal recharging on the thermal behaviour of a field scale geothermal energy pile <i>M. Faizal &amp; A. Bouazza</i>	557
Numerical investigation of the mechanical behaviour of single energy piles and energy pile groups <i>C. Tsetoulidis, A. Naskos &amp; K. Georgiadis</i>	569
Thermo-mechanical behavior of small scale energy pile in dry sand <i>V.T. Nguyen, A.M. Tang &amp; J.M. Pereira</i>	577
Long term monitoring of CFA energy pile schemes in the UK <i>F.A. Loveridge, W. Powrie, T. Amis, M. Wischy &amp; J. Kiauk</i>	585
Numerical analysis of thermal cycling during a multi-stage energy pile thermal response test <i>F. Cecinato, R. Piglialepre, F.A. Loveridge &amp; D. Nicholson</i>	593
An investigation of the potential thermal energy of geothermal tunnels with focus on a case study in Stuttgart, Germany <i>P. Buhmann, B. Westrich, C. Moormann, A. Bidarmaghz &amp; G. Narsilio</i>	601
<i>Minisymposium trends and challenges in energy geotechnical storage systems and materials</i>	
Probabilistic analysis of a rock salt cavern with application to energy storage systems, using subset simulation methodology <i>E. Mahmoudi, K. Khaledi, D. König &amp; T. Schanz</i>	609
Effect of degree of saturation on thermal conductivity of CLSM used for a horizontal ground coupled heat pump system <i>T.M. Do, Y.S. Kim, C.H. Lee &amp; M.Q. Dang</i>	617
Evaluation of temperature controlled oedometer test apparatus <i>Y. Li, M. Karstunen, M. Karlsson &amp; J. Dijkstra</i>	623
Numerical modelling of the cyclic behaviour of rock material in the context of underground pumped storage hydroelectricity <i>B. Cerfontaine, F. Collin &amp; R. Charlier</i>	629
A small geothermal project of low enthalpy in Bio Bio sand <i>V. Hernández, D. Böttcher &amp; F.A. Villalobos</i>	637
Determination of interface temperatures at scaled borehole heat exchanger physical models using distributed temperature sensing <i>K.S.O. Seibertz, T. Vienken, H. Shao, P. Dietrich &amp; F. Händel</i>	645

*Minisymposium geotechnics risk and items for underground nuclear power plants*

Underground nuclear power plants <i>P. Duffaut</i>	653
Why do nuclear engineers refuse to consider the concept of underground power plants? <i>D. De Bruyn &amp; P. Duffaut</i>	657
Underground nuclear power plants: A realistic option? <i>Varun, C. Fairhurst, M. Pierce, H. Lager &amp; P. Duffaut</i>	663
<i>Minisymposium geotechnics for nuclear waste disposal</i>	
An analytical study of PRACLAY Heater test <i>G.J. Chen, L. Yu &amp; X.L. Li</i>	675
Experimental study of thermal effects on clay rock for deep disposal of radioactive waste <i>C.-L. Zhang</i>	683
Temperature impact on the creep behaviour of compacted illitic clay <i>N. Jarad, O. Cuisinier &amp; F. Masrouri</i>	691
Impact of temperature variation on pressuremeter test parameters in compacted soils <i>A. Boukelia, H. Eslami, S. Rosin-Paumier &amp; F. Masrouri</i>	699
Clay-water interactions in swelling claystones: The case of the Callovo-Oxfordian claystone <i>H. Menaceur, P. Delage, A.M. Tang &amp; J. Talandier</i>	707
Air injection tests in two argillaceous rock formations: Experimental results and modelling <i>L. Gonzalez-Blanco, E. Romero, X.L. Li, X. Sillen, P. Marschall &amp; C. Jommi</i>	715
Author index	723
