Contents

Preface	v
1 Introduction	1
2 History of Conventional Spin Wave Theory	71
2.1 Theoretical and Experimental Confusions	71
2.2 Problems with the Macroscopic Magnetization	81
3 Basic Issues of Renormalization Group (RG) Theory	100
3.1 Boson Fields in Non-Magnetic Insulators	100
3.2 Boson fields in Ordered Magnets	128
4 Universality	140
4.1 Non-Magnetic Solids	140
4.2 Ordered Magnets	149
4.3 Non-Universal Behavior	164
4.4 Coexistence of Universality Classes	182
5 Microscopic Processes	219
6 Relevant and Non-Relevant Magnons	230
6.1 Non-Relevant Magnons	230
6.2 Relevant Magnons	289
7 Crossover Phenomena	295
7.1 Amplitude Crossover (AC)	295
7.2 Quantum State Crossover (QS)	309
7.3 Crossover Between Critical Points (CP)	324
7.4 Symmetry Crossover (SC)	332
7.5 Dimensionality Crossover (DC)	340

8	Metastability of Universality Classes	349
9	Relevant and Non-Relevant Interactions	380
10	Temperature Dependence of the Magnon Excitation Spectra	418
11	Magnetic Heat Capacity	435
11.1	Non-Relevant Magnetic Heat Capacity for $T \rightarrow 0$	435
11.2	Relevant Magnetic Heat Capacity for $T \rightarrow 0$	445
12	Experimental Verification of GSW Bosons	475
13	Magnets With and Without Magnon Gap	508
13.1	Isotropic Magnets with Half-Integer Spin	513
	(T^2 Universality Class)	
13.2	Isotropic Magnets with Integer Spin	517
	($T^{9/2}$ Universality Class)	
13.3	Two-Dimensional Magnets with Half-Integer Spin	520
	($T^{3/2}$ Universality Class)	
13.4	Two-Dimensional Magnets with Integer Spin	525
	(T^2 Universality Class)	
13.5	One-Dimensional Magnets with Half-Integer Spin	526
	($T^{5/2}$ Universality Class)	
13.6	One-Dimensional Magnets with Integer Spin	527
	(T^3 Universality Class)	
13.7	Field Dependence of the Classical Magnon Spectrum	542
13.8	Interactions Between Magnons and GSW Bosons	549
14	Microscopic Details: Spin Structure, Site Disorder, Two Order Parameters	594
15	Boson Fields at the Magnetic Ordering Transition	621
15.1	Isotropic 3D Magnets with Half-Integer Spin	667
	(T^2 Universality Class)	
15.2	Isotropic 3D Magnets with Integer Spin	682
	($T^{9/2}$ Universality Class)	
15.3	Two-Dimensional Magnets with Integer Spin	701
	(T^2 Universality Class)	

15.4	Two-Dimensional Magnets with Half-Integer Spin ($T^{3/2}$ Universality Class)	707
15.5	One-Dimensional Magnets with Integer Spin (T^3 Universality Class)	713
15.6	One-Dimensional Magnets with Half-Integer Spin ($T^{5/2}$ Universality Class)	729
16	Thermal Lattice Expansion and Magnetostriction	742
16.1	Spontaneous Magnetostriction	744
16.2	Thermal Lattice Expansion of Non-Magnetic Solids	768
16.3	Interactions Between Phonons and Debye Bosons	781
16.4	Thermal Conductivity of Insulators	807
16.5	Thermal Conductivity of Metals	826
17	Boson Fields Near Melting Transition	840
18	Boson Fields in Conventional Superconductors	860
18.1	Superconducting Heat Capacity	871
18.2	Superconducting Excitation Gap	894
19	Summary	905
	Bibliography	921
	Substance Index	945
