

**FRIEDRICH-SCHILLER-  
UNIVERSITÄT  
JENA**

Chemisch-Geowissenschaftliche  
Fakultät

**Nature-inspired metallopolymers: A novel approach for  
the synthesis of self-healing materials**

**Dissertation**

**(kumulativ)**

zur Erlangung des akademischen Grades

doctor rerum naturalium (Dr. rer. nat.)

vorgelegt dem Rat der Chemisch-Geowissenschaftlichen Fakultät

der Friedrich-Schiller-Universität Jena

von M.Sc. Marcel T. Enke

geboren am 05.09.1990 in Gera

**Table of content**

Documentation of authorship .....	5
1. Introduction .....	9
2. Supramolecular interactions as key role in intrinsic self-healing polymers .....	14
3. Self-healing metallopolymers – terpyridine as ligand moieties .....	21
3.1 The critical role of the metal salt .....	21
3.2 Self-healing block copolymers using terpyridine complexes .....	25
4. Mussel inspired self-healing polymers .....	35
4.1 Thermodynamic parameters of reversible histidine-zinc interactions .....	35
4.2 Mimicking of the preCols architecture by histidine-rich block copolymers .....	39
5. Summary .....	46
6. Zusammenfassung .....	51
7. References .....	56
List of abbreviations .....	63
Publication list .....	66
Acknowledgements / Danksagung .....	69
Declaration of authorship / Selbstständigkeitserklärung .....	71
Publications Pub1 to Pub6 .....	72
