Sedimentology of meandering river deposits: advances and challenges <i>Massimiliano Ghinassi, Luca Colombera, Nigel P. Mountney and Arnold Jan H. Reesink</i>	1	
Controls on the depositional architecture of fluvial point-bar elements in a coastal-plain succession <i>Michelle N. Shiers, Nigel P. Mountney, David M. Hodgson and Luca Colombera</i>	15	
Toggling between expansion and translation: The generation of a muddy-normal point bar with an earthquake imprint <i>Shelby Johnston and John Holbrook</i>	47	
Planform sinuosity of Proterozoic rivers: A craton to channel-reach perspective <i>Alessandro Ielpi, Massimiliano Ghinassi, Robert H. Rainbird and Dario Ventura</i>	81	
The shortage of geological evidence for pre-vegetation meandering rivers <i>William J. McMahon and Neil S. Davies</i>	119	
An exhumed fine-grained meandering channel in the lower Permian Clear Fork Formation, north-central Texas: Processes of mud accumulation and the role of vegetation in channel dynamics <i>Sharane S.T. Simon, Martin R. Gibling, William A. DiMichele, Dan S. Chaney and Rebecca Koll</i>	149	
Interpretation of cross strata formed by unit bars <i>Arnold Jan H. Reesink</i>	173	
		Chute cutoffs in meandering rivers: formative mechanisms and hydrodynamic forcing <i>Daniele P. Viero, Sergio Lopez Dubon and Stefano Lanzoni</i>
		201
		Predicting heterogeneity in meandering fluvial and tidal-fluvial deposits: The point bar to counter point bar transition <i>Paul R. Durkin, Stephen M. Hubbard, Derald G. Smith and Dale A. Leckie</i>
		231
		Fill characteristics of abandoned channels and resulting stratigraphy of a mobile sand-bed river floodplain <i>Arved Schwendel, Rolf Aalto, Andrew Nicholas and Daniel Parsons</i>
		251
		Characterising three-dimensional flow through neck cutoffs with complex planform geometry <i>Derek Richards, Kory Konsoer, Christopher Turnipseed and Clinton Willson</i>
		273
		Hydro-sedimentological processes in meandering rivers: A review and some future research directions <i>Koen Blanckaert</i>
		297
		Unsuccessful cut offs – origin and partial preservation of enigmatic channel fills encased within a large-scale point-bar deposit – The McMurray Formation type section, Alberta, Canada <i>Milovan Fustic, Rudy Strobl, Massimiliano Ghinassi and Shuyu Zhang</i>
		321
		Modern and ancient amalgamated sandy meander-belt deposits: recognition and controls on development <i>Adrian J. Hartley, Amanda Owen, Gary S. Weissmann and Louis Scuderi</i>
