
Cumulative Dissertation submitted to obtain doctoral degree in Faculty of
Mathematics and Natural Sciences, University of Potsdam, Germany

**Morphometric changes at the Merapi lava dome
between 2012 and 2017: Observations and relevance
for hazard assessment**

Submitted by:

Herlan Darmawan

Advisors:

1. PD Dr. Habil Thomas R. Walter (GeoForschungsZentrum Potsdam, Germany)
2. Prof. Valentin R. Troll (Uppsala Universitet, Sweden)

Potsdam, May 2018

Contents

Abstract	i
Zusammenfassung	iii
Acknowledgements	v
Contents	vi
1. Introduction	1
1.1. General overview of dome building volcanoes	1
1.2. Motivation	2
1.3. Research objectives.....	3
1.4. Study area.....	4
1.5. Methods	6
1.5.1. Remote sensing techniques.....	6
1.5.2. Numerical modeling.....	8
1.5.3. Laboratory experiments.....	8
1.6. Summary of chapters	9
1.6.1. Volcano-tectonic control of Merapi’s lava dome splitting: The November 2013 fracture observed from high resolution TerraSAR-X data.....	9
1.6.2. Morphological and structural changes at the Merapi lava dome monitored in 2012 – 15 using unmanned aerial vehicles (UAVs).....	9
1.6.3. Dome instability at Merapi volcano identified by drone photogrammetry and numerical modeling	10
1.6.4. Progressive hydrothermal alteration processes change mechanical strength of the Merapi lava dome	11

2. Volcano-tectonic control of Merapi’s lava dome splitting: The November fracture observed from high resolution TerraSAR-X data	12
2.1. Introduction	14
2.1.1. Merapi volcano setting and dome deformation	14
2.1.2. Dome growth and recent explosions	16
2.2. Data and methods.....	19
2.3. Results	21
2.3.1. Dome splitting.....	21
2.3.2. Deformation absence	24
2.3.3. Lineaments.....	25
2.4. Discussion	27
2.4.1. Dome splitting and instability	27
2.4.2. The NNW-SSE trend.....	27
2.4.3. Origin of the lava dome fracture	29
2.4.4. External triggering	30
2.5. Conclusion.....	31
3. Morphological and structural changes at the Merapi lava dome monitored in 2012 – 15 using unmanned aerial vehicles (UAVs)	32
3.1. Introduction	34
3.2. Overview of Merapi volcano	36
3.3. Data and methods.....	37
3.3.1. UAV photogrammetric data.....	37
3.3.2. Photogrammetric data processing	39
3.3.3. Point cloud quality assessment	41
3.3.4. Methodology of analyses of changes in topography and lineament.....	42
3.3.5. Digital elevation models and volume calculations.....	43

3.4. Results	43
3.4.1. Quality assessment	45
3.4.2. Morphology and general expression	47
3.4.3. Lineaments	49
3.4.4. Topography changes and material redistribution	50
3.5. Discussion	51
3.5.1. Temporal evolution of the lava dome between 2012 and 2014	52
3.5.2. UAV photogrammetry performances	54
3.6. Conclusions	56
4. Dome instability at Merapi volcano identified by drone photogrammetry and numerical modeling.....	57
4.1. Introduction	59
4.2. Merapi volcano	60
4.3. Data and methods.....	62
4.3.1. Observational data.....	62
4.3.2. Factor of safety	64
4.3.3. Scenario modeling of block and ash flows	67
4.4. Results	67
4.4.1. Geomorphology and structure of the southern part of the Merapi dome.....	67
4.4.2. Thermal variation of the Merapi dome.....	72
4.4.3. Factor of Safety	73
4.4.4. Scenario numerical model of block and ash flows.....	75
4.5. Discussion	77
4.5.1. Limitations	77
4.5.2. Structures at the unstable dome sector	79
4.5.3. Implications for future failure.....	80

4.5.4. Block and ash hazard along the Gendol valley	81
4.6. Conclusions	82
5. Progressive Hydrothermal Alteration Processes change mechanical strength of the Merapi lava dome	83
5.1. Introduction	85
5.2. Materials.....	87
5.3. Analytical methods	89
5.3.1. Preparation.....	89
5.3.2. X-Ray Diffraction (XRD)	89
5.3.3. Mineral textures	90
5.3.4. Physical properties measurement	90
5.3.5. Oxygen isotope of whole rock ($\delta^{18}\text{O}_{\text{WR}}$) and water-rock ratio analysis	91
5.4. Results.....	91
5.4.1. Changes of minerals composition and texture.....	91
5.4.2. Physical changes of the Merapi dome rocks	96
5.4.3. Oxygen isotope of whole rock ($\delta^{18}\text{O}_{\text{WR}}$)	98
5.5. Discussion	98
5.5.1. The formation of sulfate alteration minerals in the Merapi dome rocks	98
5.5.2. Physical changes due to hydrothermal alteration	99
5.5.3. Oxygen isotope related to hydrothermal alteration	100
5.5.4. Hydrothermal alteration at the Merapi lava dome and its hazard implications	100
5.6. Conclusions	102
6. Dissertation conclusions	104
Appendix.....	106
References.....	120
