Contents

<i>Preface</i>	<i>page xi</i>
<i>Acknowledgments</i>	<i>xiii</i>
1 Estimation and Dimensional Analysis	1
1.1 Making Estimates on the Back of the Envelope	1
1.2 Scaling	9
1.3 Dimensional Analysis	12
1.4 Dimensionless Ratios and the Pi Theorem	20
1.4.1 Application of the Buckingham Pi Theorem	21
1.5 Dimensional Analysis: Some Remarks	29
1.6 Further Reading	30
Problems	31
2 Derivatives and Integrals	36
2.1 Derivatives, Limits, and Continuity	36
2.2 Rules for Differentiation	46
2.2.1 Product Rule	47
2.2.2 Chain Rule	48
2.2.3 Higher-Order Derivatives	49
2.3 Maxima and Minima	50
2.4 Some Theorems About Derivatives	53
2.5 Taylor's Theorem	56
2.6 L'Hôpital's Rule	61
2.7 Using Derivatives	63
2.7.1 Curve Sketching	63
2.7.2 Newton's Method	65
2.8 Partial Derivatives	67
2.9 Using Partial Derivatives	73
2.9.1 Propagating Uncertainty	73
2.9.2 Fitting a Straight Line	76
2.10 Integration	78
2.10.1 Properties of Integrals	82
2.11 Techniques of Integration	85
2.11.1 Partial Fractions	85
2.11.2 Substitution of Variables	87

2.11.3	Integration by Parts	89
2.11.4	Differentiation	90
2.11.5	Other Methods	91
2.12	Proper and Improper Integrals	92
2.13	Mean Value Theorems	95
2.14	Integrals, Areas, and Volumes	96
2.15	Integrating Multivariate Functions	99
2.15.1	Line Integrals	99
2.15.2	Multiple Integrals	106
2.15.3	Green's Theorem	109
2.16	Numerical Evaluation of Integrals	112
2.16.1	Rectangle Rules	112
2.16.2	Trapezium Rule	116
2.16.3	Simpson's Rule	118
2.17	Further Reading	120
	Problems	121
3	Series and Summations	129
3.1	Sequences and Series	129
3.2	Arithmetic and Geometric Series	130
3.3	Binomial Theorem and Binomial Series	134
3.4	Power Series	140
3.5	Convergence Criteria	142
3.5.1	Root Test	146
3.5.2	Integral Test	147
3.5.3	Comparison Test	149
3.5.4	Alternating Series	150
3.6	Double Series	150
3.7	Further Reading	153
	Problems	153
4	Scalars, Vectors, and Matrices	156
4.1	Scalars and Vectors	156
4.2	Vector Algebra	157
4.2.1	Linear Independence and Basis Vectors	163
4.2.2	Transformations of Vectors	165
4.2.3	Describing Lines and Curves Using Vectors	169
4.3	Multiplying Vectors Together	172
4.3.1	Scalar Product	172
4.3.2	Vector Product	178
4.3.3	Triple Product	185
4.4	Matrices	187
4.4.1	Matrix Arithmetic	189

4.4.2	Linear Transformations and Matrix Multiplication	191
4.4.3	Inverse Matrix	197
4.4.4	Special Matrices	198
4.5	Solving Linear Equations with Matrices	202
4.5.1	Determinants	209
4.6	Kronecker Delta and Levi-Civita Symbol	217
4.7	Eigenvalues and Eigenvectors	220
4.8	Vectors, Matrices, and Data	231
4.9	Further Reading	232
	Problems	233
5	Probability	236
5.1	What Is Probability?	236
5.2	Random Variables, Expectation, and Variance	242
5.3	Discrete Random Variables	246
5.3.1	Discrete Uniform Distribution	246
5.3.2	Binomial Distribution	249
5.3.3	Poisson Distribution	253
5.4	Continuous Random Variables	256
5.4.1	Normal or Gaussian Distribution	260
5.5	Law of Large Numbers and Central Limit Theorem	268
5.6	Manipulating Random Variables	272
5.6.1	Adding Continuous Random Variables	272
5.6.2	Transforming Random Variables	276
5.7	Monte Carlo Methods	278
5.7.1	Monte Carlo Error Propagation	278
5.7.2	Monte Carlo Integration	280
5.8	Further Reading	283
	Problems	284
6	Ordinary Differential Equations	289
6.1	Terminology and Classification	294
6.2	First Order Differential Equations	295
6.2.1	First Order Linear Differential Equations	295
6.2.2	Direction Fields	301
6.2.3	First Order Nonlinear Equations	303
6.2.4	A Question of Uniqueness	312
6.3	Solving Differential Equations in Practice	314
6.4	Second Order Differential Equations	320
6.4.1	Second Order Linear Differential Equations	321
6.4.2	Oscillations and Waves	330
6.5	Series Solutions and Singular Solutions	337
6.6	Higher Order Equations	343

6.7	Differential Equations in Practice	344
6.7.1	Phase Plane	346
6.8	Systems of Linear Differential Equations	347
6.8.1	Real, Distinct Eigenvalues	350
6.8.2	Complex Conjugate Eigenvalues	352
6.8.3	Repeated Roots	353
6.9	Systems of Autonomous Nonlinear Equations	355
6.10	Numerical Solution	358
6.10.1	Euler Method and Its Relations	359
6.10.2	Higher Order Methods: Runge–Kutta	368
6.10.3	Boundary Value Problems	373
6.10.4	Computer Algebra Systems	376
6.11	Dynamical Systems and Chaos	377
6.11.1	Chaos	381
6.12	Boundary Value Problems, Sturm–Liouville Problems, and Green’s Functions	386
6.12.1	Green’s Functions	394
6.13	Further Reading	397
	Problems	398
7	Vectors and Calculus	406
7.1	Differentiating a Vector	406
7.2	Gradient	412
7.3	Divergence and Curl	415
7.3.1	Vector Identities	419
7.4	Curvilinear Coordinate Systems	420
7.5	Integrals and Vectors	426
7.5.1	Divergence Theorem	436
7.5.2	Stokes’ Theorem	442
7.6	Further Reading	444
	Problems	445
8	Special Functions	448
8.1	Heaviside Function	448
8.2	Delta Function	450
8.3	Gamma and Error Functions	454
8.4	Orthogonal Functions and Orthogonal Polynomials	457
8.5	Legendre Polynomials	459
8.5.1	Associated Legendre Functions and Spherical Harmonics	462
8.6	Bessel Functions	464
8.7	Further Reading	466
	Problems	467

9	Fourier Series and Integral Transforms	469
9.1	Fourier Series	469
9.1.1	Complex Fourier Series	477
9.1.2	Even and Odd Functions	477
9.1.3	Dirichlet Conditions	478
9.1.4	Parseval's Theorem	480
9.1.5	Differentiating and Integrating Fourier Series	482
9.2	Fourier Transform	482
9.2.1	Sine and Cosine Transforms	486
9.2.2	Properties of the Fourier Transform	487
9.2.3	Applications of the Fourier Transform	490
9.3	Laplace Transform	492
9.4	Further Reading	496
	Problems	496
10	Partial Differential Equations	499
10.1	Introduction	499
10.2	First Order Linear Partial Differential Equations	501
10.3	Classification of Second Order Linear Partial Differential Equations	507
10.3.1	Hyperbolic Equations	509
10.3.2	Parabolic Equations	510
10.3.3	Elliptic Equations	510
10.3.4	Boundary Value Problems	511
10.4	Parabolic Equations: Diffusion and Heat	512
10.4.1	Solving the Diffusion Equation	515
10.5	Hyperbolic Equations: Wave Equation	523
10.6	Elliptic Equations: Laplace's Equation	525
10.7	More Laplace Transforms	526
10.8	Numerical Methods	529
10.8.1	Advection Equation	531
10.9	Further Reading	539
	Problems	541
11	Tensors	545
11.1	Covariant and Contravariant Vectors	545
11.2	Metric Tensors	552
11.3	Manipulating Tensors	553
11.4	Derivatives of Tensors	554
11.5	Further Reading	556
	Problems	556
Appendix A	Units and Dimensions	558
A.1	International System of Units	559
A.2	Converting between Units	561

Appendix B	Tables of Useful Formulae	563
B.1	Properties of Basic Functions	563
B.1.1	Trigonometric Functions	563
B.1.2	Logarithms and Exponentials	564
B.1.3	Hyperbolic Functions	564
B.2	Some Important Series	564
B.3	Some Common Derivatives	565
B.4	Some Common Integrals	566
B.5	Fourier and Laplace Transforms	566
B.6	Further Reading	567
Appendix C	Complex Numbers	568
C.1	Making Things Complex	568
C.2	Complex Plane	569
C.3	Series	569
C.4	Euler's Formula	570
C.5	De Moivre's Theorem	571
	<i>References</i>	573
	<i>Index</i>	579
