

**Hauptreferent:**

*Prof. Dr.-Ing. Udo Nackenhorst*

**Korreferent:**

*Prof. Dr.-Ing. Michael Beer*

**Doktorand:**

*Govindarajan Narayanan*

**A**

**STOCHASTIC FATIGUE MODEL FOR CASTED ALUMINIUM**

**STRUCTURES**

Von der Fakultät für  
Bauingenieurwesen und Geodäsie  
der Gottfried Wilhelm Leibniz  
Universität Hannover

zur Erlangung des Grades eines

*Doktor-Ingenieurs*

genehmigte Dissertation  
von

*Govindarajan Narayanan*

Hannover 2018

Tag der Einreichung:

19. 06. 2018

Tag der mündl. Prüfung:

20.08.2018

**Institut für Baumechanik und  
Numerische Mechanik.**

## TABLE OF CONTENTS

|  |     |
|--|-----|
| LIST OF FIGURES .....  | III |
| LIST OF TABLES .....   | VI  |
| CHAPTER 1 .....  | 1   |
| <b>PROBLEM DESCRIPTION, MOTIVATION, OBJECTIVES</b> .....                       | 1   |
| 1.1 Introduction and problem description .....                                 | 1   |
| 1.2 Motivation .....   | 3   |
| 1.3 Objective and flow work of the thesis.....                                 | 4   |
| CHAPTER 2 .....  | 9   |
| <b>FATIGUE LIFE OF ALUMINIUM CAST STRUCTURE</b> .....                          | 9   |
| 2.1 Introduction .....   | 9   |
| 2.2 State of the art on fatigue of cast aluminium alloy and its scatters ..... | 11  |
| 2.3 Casting bearing support structure.....                                     | 21  |
| 2.4 Quality and producibility of cast alloys.....                              | 22  |
| 2.5 Acceptance criteria and definition .....                                   | 24  |
| CHAPTER 3 .....  | 29  |
| <b>STOCHASTIC MODEL AND RANDOM PROCESS</b> .....                               | 29  |
| 3.1 Definitions and general properties.....                                    | 29  |
| 3.2 Single random variables –formulation .....                                 | 31  |
| 3.3 Bivariate and multivariate random variables –formulation .....             | 33  |
| 3.4 Methods of sample generation.....  | 34  |
| 3.4.1 Monte Carlo methods.....   | 35  |
| 3.4.2 Stratified sampling methods.....   | 35  |
| 3.4.3 Low discrepancy sequence methods .....                                   | 35  |
| CHAPTER 4 .....  | 37  |
| <b>FINITE ELEMENT SIMULATION OF CASTING STRUCTURE</b> .....                    | 37  |
| 4.1 Simulation Models .....  | 37  |
| 4.2 Simulation of the casting process .....                                    | 38  |
| 4.3 Structural finite element model of the cast structure.....                 | 42  |
| CHAPTER 5 .....  | 47  |
| <b>CUT UP SPECIMENS AND EXPERIMENTAL DETAILS</b> .....                         | 47  |

|  |   |    |
|--|---|----|
| 5.1  | Cut up specimens from casting structure.....                        | 47 |
| 5.2  | Material properties evaluation.....                                 | 54 |
| 5.2.1  | Stress-strain diagram and tensile strength.....                     | 55 |
| 5.2.2  | Formulation of porosity fraction distribution function .....        | 56 |
| 5.2.3  | Measurement of the hardness of the materials .....                  | 59 |
| 5.2.4  | Experimental fatigue life of AS7G06 cast aluminium alloys.....      | 61 |
| 5.2.5  | Limit of porosity fraction.....                                     | 64 |
| CHAPTER 6 .....                                  |   | 66 |
| STOCHASTIC FATIGUE MODEL FOR CAST STRUCTURE..... |   | 66 |
| 6.1  | Introduction .....  | 66 |
| 6.2  | Application to empirical formulation on fatigue - formulation ..... | 68 |
| 6.3  | Probabilistic fatigue life model for cast specimen .....            | 69 |
| 6.4  | Generation of fatigue curve by stochastic models .....              | 75 |
| 6.5  | Generation of porosity fraction limit curve .....                   | 82 |
| 6.6  | Acceptance criteria .....   | 84 |
| CHAPTER 7 .....                                  |   | 86 |
| CONCLUSIONS, OBSERVATIONS AND FUTURE WORK.....   |   | 86 |
| 7.1  | Future Work Proposed .....  | 87 |
| REFERENCES .....                                 |   | 88 |
| CURRICULUM VITAE (C.V).....                      |   | 92 |
