Trip Report	xxi

CONTRIBUTED PAPERS

A reflectometric system for studying lower hybrid energy deposition in a tokamak plasma	3
<i>M. E. Manso, F. M. Serra & J. T. Mendonça</i>	
TBR-1 (Brazilian tokamak) – Recent results	13
<i>A. N. Fagundes, D. F. Cruz Jr., R. M. O. Galvão, J. I. Elizondo, I. C. Nascimento, W. P. Sá, E. K. Sanada, R. P. Silva, A. G. Tuszel, A. Vannucci & J. H. Vuolo</i>	
FRC formation studies in a field reversed theta pinch with a variable coil length	25
<i>R. J. Maqueda, J. Sobehart & A. B. Rodrigo</i>	
A way to reduce plasma spin-up in field-reversed configurations	34
<i>R. A. Clemente</i>	
Perpendicular and oblique absorption of electron cyclotron radiation by non-Maxwellian plasmas	39
<i>L. F. Ziebell</i>	
Dielectric permeability of an inhomogenous cylindrical plasma	47
<i>W. H. Amein</i>	

Plasma heating by microwave and lower hybrid geometrical resonance in linear LISA machine	53
<i>C. da C. Rapozo, J. C. X. da Silva, A. S. Assis, R. Y. Honda, H. R. T. Silva & P. H. Sakanaka</i>	
Reactor potential of the magnetically insulated inertial confinement fusion (MICF) system	65
<i>T. Kammash & D. L. Galbraith</i>	
Plasma production and expansion by laser irradiation of thin solid foils	81
<i>J. P. Sudano, L. C. S. Goes & N. A. S. Rodrigues</i>	
Plasma production and heating by a laser TEA-CO ₂	87
<i>L. C. S. Goes, J. P. Sudano & N. A. S. Rodrigues</i>	
Resonant helical fields in TBR-1	101
<i>I. L. Caldas, O. W. Bender, A. S. Fernandes, M. V. A. P. Heller, M. Y. Kucinski, I. C. Nascimento, I. H. Tan & A. Vannucci</i>	
Formation of linear high-beta heliacs in a 3-meter theta pinch	112
<i>F. L. Ribe, C. M. Greenfield & M. E. Koepke</i>	
Design, construction and operation of a small RFP for turbulent plasma studies	122
<i>Y. Aso, R. M. O. Galvão & M. Ueda</i>	
Current control necessary for toroidal plasma equilibrium	133
<i>S. Nagao</i>	
Comparison between CNEA θ -pinch experimental data and rotating snow plow model	143
<i>N. O. Fuentes & R. A. Clemente</i>	
Parameter studies on the impact of plasma physics/engineering assumptions on the data of possible next step tokamak reactors	150
<i>A. F. Knobloch</i>	

The stabilized bumpy torus between theory and experiment	160
<i>A. M. El-Nadi</i>	
Impact of electron trapping on RF current drive in tokamaks	169
<i>G. Giruzzi & F. Engelmann</i>	
Magnetohydrodynamic stability of tokamak plasmas with poloidal mode coupling	177
<i>H. Shigueoka & P. H. Sakanaka</i>	
Comparison between the boundary layer and global resistivity methods for tearing modes in reversed field configurations	187
<i>M. A. M. Santiago, A. S. Gomes, B. M. B. Ponciano & P. H. Sakanaka</i>	
Neutronic analysis of alternative structural materials for the INTOR blanket	196
<i>R. dos Santos</i>	
Ion energies analysis in a radio frequency discharge	206
<i>H. S. Maciel, N. Benjamin, J. Amorim, J. P. Sudano & L. C. Goes</i>	
Plasma torch temperature measurement using an enthalpy probe	218
<i>A. Marotta, A. G. Cunha & M. de Moraes</i>	
Gyrotron development at the Instituto de Pesquisas Espaciais	226
<i>J. J. Barroso, P. J. de Castro, R. A. Correa, G. P. Galvão, G. O. Ludwig, A. Montes, M. C. A. Nono & J. O. Rossi</i>	
Plasma centrifuge development at INPE	236
<i>J. A. Bittencourt, E. Del Bosco, R. S. Dallaqua & G. O. Ludwig</i>	
Characteristics of a 30 kW plasma torch	248
<i>J. Busnardo-Neto, V. A. Rodrigues, H. K. Böckelmann & P. H. Sakanaka</i>	
Plasma technology: A technical – economic and political challenge	259
<i>V. A. de Abreu, L. C. Vicente, M. de A. Campanário, O. W. Bender & O. Sanchez Jr.</i>	

A preliminary assessment of the prospects of fusion and fission as viable power sources	269
<i>A. Molin, M. Heindler & W. Kernbichler</i>	
Electric energy independence in Brazil and the role of nuclear energy	278
<i>I. C. Nascimento & J. R. Moreira</i>	
Fusion research and third world countries	289
<i>A. M. El-Nadi</i>	
Current generation by the kinetic Alfvén wave	293
<i>A. S. Assis, J. Busnardo-Neto & K. H. Tsui</i>	
Dispersion relation of warm magnetized plasma bounded by a cylindrical waveguide	302
<i>A. K. T. de Assis & P. H. Sakanaka</i>	
Solution of Maxwell's equations for a plasma surrounded by vacuum and contained in a toroidal vessel. Application for low-frequency RF-heating	311
<i>F. F. Cap</i>	
The role of isoelectronic extrapolation of highly ionized atoms in plasma physics	320
<i>A. G. Trigueiros</i>	
Snow-plow operation in plasma focus	332
<i>M. A. Eissa, A. H. Saady & W. Sharkawy</i>	
Single particle motion in the strongly coupled one-component plasma in a uniform magnetic field	341
<i>O. Malo & R. O. Genga</i>	
Wave propagation in quasi-one-dimensional quantum plasma in a magnetic field	352
<i>R. O. Genga</i>	
Ion cyclotron waves in large β_{\parallel} multicomponent plasmas	377

Nonlinear interaction of relativistic radiation with surface waves in anisotropic plasma layer	387
<i>Sh. M. Khalil</i>	
Double layers formed by beam driven ion-acoustic turbulence	396
<i>G. O. Ludwig, J. L. Ferreira & A. Montes</i>	
Heavy ion thermal and anisotropy effects on the ion cyclotron instability	407
<i>L. Gomberoff & P. Vega</i>	
A theory of the coherent fundamental plasma emission in tokamaks	418
<i>M. V. Alves & A. C.-L. Chian</i>	
Weakly nonlinear electromagnetic waves in a electron-ion- positron plasma	427
<i>F. B. Rizzato, R. S. Schneider & D. Dillenburg</i>	
Wave dynamics of theta pinch implosions	436
<i>K. H. Tsui</i>	
Transport scaling in field reversed configurations	448
<i>N. A. Krall</i>	
Main features of the EXTRAP device	458
<i>M. Tendler</i>	
Conceptual design of a radio-frequency driven compact tokamak	471
<i>R. M. O. Galvão, L. C. S. Goes, G. O. Ludwig, A. Montes & M. Udea</i>	
Formation of field reversed configuration in FRP-1	484
<i>Zhang Baozhen, Li Yanan, Cheng Zhijian, Ye Maofu & Wu Cheng</i>	
Field-reversed configuration produced by a linear theta-pinch, Tupã-I	493
<i>M. E. Kayama, H. K. Böckelmann, P. H. Sakanaka & M. Machida</i>	

Generation of compact torus configuration by rotating magnetic fields	504
<i>M. Kühnappfel, A. Stampa, R. Tabersky & H. Tucek</i>	
Compact tokamak configurations driven by rotating magnetic fields	508
<i>G. Durance, W. K. Bertram, G. A. Collins, I. J. Donnelly, G. R. Hogg, E. K. Rose, J. Tendys & P. A. Watterson</i>	

POST-DEADLINE PAPERS

RO5: Proposal of a relevant facility in nuclear fusion research	521
<i>J. Pouzo</i>	
Sistemas y procesos plasmquimicos	534
<i>J. Castro B.</i>	
Parametros del plasma de una descarga contraida de alta frecuencia entre dos electrodos para presiones de 100 A 760 Torr	544
<i>G. Zambrano R.</i>	
Heating and acceleration mechanism in plasma focus	554
<i>T. A. El-Khalafawy, M. M. Masoud & H. M. Soliman</i>	

REVIEW PAPERS

Advances in inertial confinement fusion	567
<i>C. Yamanaka</i>	
Tokamak experiments	601
<i>D. C. Robinson</i>	
Magnetic confinement in reversed field pinch plasmas	620
<i>S. Ortolani</i>	
Current status of plasma physics research in Latin America	659
<i>H. Chuaqui</i>	

A direct approach toward proving ignition conditions	673
<i>B. Coppi</i>	
Trends in fusion research	720
<i>M. N. Rosenbluth</i>	
A review of the experimental and theoretical status of the reversed-field pitch	730
<i>D. A. Baker</i>	
Sharing of fusion relation technology among developing countries	754
<i>S. Lee</i>	
Japanese fusion research	782
<i>T. Uchida</i>	
Fusion research in the European community	804
<i>F. Engelmann</i>	
 PANEL DISCUSSION	
The role of developing countries in the international fusion research effort	833
National programmes for developing countries	842
 LIST OF PARTICIPANTS	 879
