| Preface..... | xii |
| Authors | xiii |
| 1. Introduction | 1 |
| 1.1 Global Energy Production and Resources..... | 1 |
| 1.2 Solar Energy..... | 2 |
| 1.2.1 Solar-Generated Electricity | 2 |
| 1.2.2 Solar Thermal Energy | 3 |
| 1.2.3 Cogeneration of Solar Electricity and Heat..... | 5 |
| 1.2.4 Solar Energy Storage | 6 |
| 1.3 Refrigeration Applications..... | 7 |
| 1.3.1 Historical Overview | 8 |
| 1.4 Refrigerants..... | 10 |
| 1.4.1 Safety, Toxicity, and Flammability | 11 |
| 1.4.2 Regulations and Phase Out | 12 |
| 1.4.3 Overview of Common Refrigerants and Their Basic Properties | 14 |
| 1.4.4 Optimal Properties of Refrigerants..... | 17 |
| 1.5 Solar Cooling Status | 18 |
| Nomenclature | 21 |
| References | 22 |
| 2. Thermodynamic Cycles for Solar Cooling..... | 27 |
| 2.1 Carnot Cycle for Refrigeration | 27 |
| 2.1.1 Tutorial on the Carnot Cycle | 30 |
| 2.2 The Main Components of Mechanical Refrigeration | 30 |
| 2.2.1 Compressor..... | 31 |
| 2.2.1.1 Tutorial on the Compressor | 33 |
| 2.2.2 Condenser | 35 |
| 2.2.2.1 Tutorial on the Condenser..... | 38 |
| 2.2.3 Evaporator..... | 40 |
| 2.2.4 Throttling Device..... | 42 |
| 2.3 The Vapor Compression Cycle | 43 |
| 2.3.1 Actual Vapor Compression Cycle..... | 45 |
| 2.3.2 Subcooling and Superheating | 46 |
| 2.3.3 Multi-Stage and Cascade Vapor Compression Systems | 46 |
| 2.3.4 Tutorial on the Vapor Compression Cycle..... | 47 |
| 2.4 Absorption Cooling Cycle | 51 |
| 2.4.1 Multiple Stage Absorption Chillers | 53 |
| 2.4.2 Energy Considerations for an Absorption Cycle | 53 |
| 2.4.3 Exergy Considerations | 57 |
| 2.4.4 Tutorial on the Absorption Cycle | 58 |
| 2.4.5 Real Cycle..... | 63 |
| 2.5 Adsorption Cooling Cycle | 63 |
| 2.5.1 Energy and Exergy Analysis of the Adsorption Cycle..... | 65 |

| | | |
|-----------|---|------------|
| 2.6 | Desiccant Cooling Cycle..... | 66 |
| 2.6.1 | Energy Considerations for Desiccant Cooling..... | 68 |
| 2.7 | Organic Rankine Cycles..... | 70 |
| 2.7.1 | Energy and Exergy Considerations for the ORC | 71 |
| 2.7.1.1 | Tutorial on the ORC | 73 |
| 2.8 | Supercritical CO ₂ Cycle | 75 |
| | Nomenclature..... | 76 |
| | References | 79 |
| 3. | Solar Thermal Collectors | 81 |
| 3.1 | Non-Concentrating Solar Collectors | 82 |
| 3.1.1 | Flat-Plate Collectors | 82 |
| 3.1.2 | Evacuated Tube Collectors..... | 88 |
| 3.1.3 | Hybrid PV-Thermal Collectors (PVT) | 90 |
| 3.2 | Concentrating Solar Collectors | 94 |
| 3.2.1 | Non-Imaging Concentrating Collectors | 94 |
| 3.2.2 | Imaging Concentrating Collectors | 96 |
| 3.2.2.1 | Parabolic Trough Collectors..... | 99 |
| 3.2.2.2 | Linear Fresnel Reflectors..... | 102 |
| 3.2.2.3 | Central Tower Receivers (CTR)..... | 104 |
| 3.2.2.4 | Paraboloidal Dish Reflectors..... | 106 |
| 3.3 | Collector Applications | 108 |
| 3.3.1 | Low-Temperature Solar Thermal Systems | 108 |
| 3.3.1.1 | Water Heating Systems..... | 108 |
| 3.3.1.2 | Space Heating Systems..... | 110 |
| 3.3.1.3 | Space Cooling and Refrigeration Systems | 111 |
| 3.3.1.4 | Water Desalination Systems | 113 |
| 3.3.2 | Medium- and High-Temperature Solar Thermal Systems | 117 |
| 3.3.2.1 | Industrial Process Heat Systems | 117 |
| 3.3.2.2 | Solar Thermal Power Generation Systems | 118 |
| 3.3.2.3 | Material Processing and Thermochemical Fuel Production Systems..... | 119 |
| | Nomenclature..... | 121 |
| | References | 122 |
| 4. | Photovoltaic-Driven Heat Pumps..... | 129 |
| 4.1 | Photovoltaic Systems | 129 |
| 4.1.1 | PV Cell Materials | 130 |
| 4.2 | Solar Electric Chillers | 133 |
| 4.3 | Photovoltaic-Thermal Systems | 143 |
| | Nomenclature..... | 151 |
| | References | 152 |
| 5. | Absorption Cooling Heat Pumps | 157 |
| 5.1 | Absorption Applications and Performance Data..... | 157 |
| 5.1.1 | Working Pairs..... | 157 |
| 5.1.2 | Absorption Units..... | 159 |
| 5.1.3 | Theoretical Investigations on Absorption Units | 161 |

| | | |
|---------|---|-----|
| 5.1.4 | Experimental Investigations on Absorption Units | 166 |
| 5.1.5 | Market Status..... | 169 |
| 5.2 | Solar Cooling with Absorption Chillers..... | 172 |
| 5.2.1 | Theoretical Investigations on Solar Absorption Cooling..... | 172 |
| 5.2.2 | Dynamic Simulations of Solar Absorption Cooling Systems | 181 |
| 5.2.3 | Performance Data from Experimental Setups..... | 182 |
| 5.2.4 | Rethymno Village Hotel Solar Absorption System | 193 |
| 5.2.5 | Demokritos Research Center Solar Absorption System..... | 195 |
| 5.2.6 | Centre for Renewable Energy Sources and Saving Solar Cooling System..... | 195 |
| 5.2.7 | ISI Pergine Business Center..... | 198 |
| 5.2.8 | GICB Building Solar Cooling Application | 201 |
| 5.2.9 | Agència de la Salut Pública | 202 |
| 5.2.10 | Inditex Arteixo Offices | 203 |
| 5.2.11 | The Technical College for Engineering in Butzbach | 204 |
| 5.2.12 | The Jiangmen Solar Absorption System..... | 205 |
| 5.3 | Process Model..... | 207 |
| 5.3.1 | Basic Assumptions..... | 207 |
| 5.3.1.1 | Generator | 207 |
| 5.3.1.2 | Absorber | 208 |
| 5.3.1.3 | Condenser..... | 209 |
| 5.3.1.4 | Evaporator | 210 |
| 5.3.1.5 | Solution Heat Exchanger..... | 211 |
| 5.3.1.6 | Heat Transfer Considerations..... | 211 |
| 5.3.1.7 | System Pressures | 211 |
| 5.3.1.8 | Overall Masses..... | 212 |
| | Nomenclature..... | 213 |
| | References | 215 |
| 6. | Adsorption Cooling Heat Pumps | 225 |
| 6.1 | Adsorbents | 225 |
| 6.1.1 | Physical Adsorbents | 225 |
| 6.1.2 | Chemical Adsorbents | 227 |
| 6.1.3 | Composite Adsorbents | 228 |
| 6.2 | Adsorption Refrigerants | 229 |
| 6.3 | Adsorption Working Pairs..... | 230 |
| 6.3.1 | Zeolite-Water | 230 |
| 6.3.2 | Silica Gel-Water | 230 |
| 6.3.3 | Activated Carbon-Ammonia..... | 230 |
| 6.3.4 | Calcium Chloride-Methanol | 231 |
| 6.3.5 | Working Pair Comparison Investigations | 231 |
| 6.4 | Adsorption Chiller Applications | 233 |
| 6.5 | Solar Cooling with Adsorption Chillers..... | 242 |
| 6.6 | Overview of Adsorption Systems Reported in Literature | 251 |
| 6.7 | Process Model..... | 251 |
| 6.7.1 | Basic Assumptions..... | 251 |
| 6.7.2 | Adsorption Isotherms and Kinetics..... | 257 |
| 6.7.3 | Evaporator..... | 257 |

| | | |
|-----------|---|------------|
| 6.7.4 | Adsorber..... | 258 |
| 6.7.5 | Desorber | 258 |
| 6.7.6 | Condenser | 258 |
| 6.7.7 | Performance Indicators..... | 259 |
| 6.8 | Model Solution and Results..... | 260 |
| 6.9 | Adsorption Cooling Applications | 263 |
| 6.9.1 | Fahrenheit eZea Case Study..... | 263 |
| 6.9.1.1 | Phase 1 | 263 |
| 6.9.1.2 | Phase 2 | 263 |
| 6.9.1.3 | Phase 3 | 263 |
| 6.9.1.4 | Phase 4 | 263 |
| 6.9.1.5 | Performance Data..... | 264 |
| 6.9.2 | The University of Freiburg Hospital Case..... | 265 |
| 6.9.3 | Fraunhofer Institute for Solar Technology—Freiburg, Germany | 266 |
| | Nomenclature..... | 267 |
| | References | 269 |
| 7. | Alternative and Hybrid Cooling Systems | 277 |
| 7.1 | Alternative Cooling Systems | 277 |
| 7.1.1 | Isothermal Dehumidification..... | 277 |
| 7.1.2 | Ejector Cooling | 277 |
| 7.1.3 | Stirling Cooling..... | 283 |
| 7.1.4 | Electrochemical Cooling..... | 284 |
| 7.2 | Hybrid Cooling Systems | 285 |
| 7.2.1 | Desiccant-Brayton Cascade Cycle..... | 285 |
| 7.2.2 | Desiccant-Vapor Compression Cycle..... | 286 |
| 7.2.3 | Absorption-Rankine Cycle | 287 |
| 7.2.4 | Ejector-VCC Hybrid System..... | 288 |
| 7.2.5 | Ejector-Absorption Cycle | 290 |
| 7.2.6 | Absorption-Compressor Cycle | 294 |
| 7.2.7 | Electrochemical-Absorption Cycle | 296 |
| 7.2.8 | Electro-Adsorption Cycle | 298 |
| 7.3 | Hybrid Solar Cooling Systems | 298 |
| 7.3.1 | Solar Ejector-VCC Coupling | 298 |
| 7.3.2 | Solar Ejector-Rankine Cycle | 300 |
| 7.3.3 | Solar Ejector-Absorption Cycle | 302 |
| 7.3.4 | Solar Absorption-Rankine Cycle | 302 |
| 7.3.5 | Solar Absorption-VCC Coupling | 303 |
| 7.3.6 | Solar Absorption-Desiccant Cooling Cycle..... | 305 |
| 7.3.7 | Solar Adsorption-Ejector | 305 |
| 7.3.8 | Solar Adsorption-Desiccant Cooling Systems | 308 |
| | Nomenclature..... | 310 |
| | References | 311 |
| 8. | Trigeneration Systems | 317 |
| 8.1 | Introduction | 317 |
| 8.2 | Literature Review..... | 318 |

| | |
|--|------------|
| 8.3 Case Study: The BioTRIC Trigeneration System..... | 329 |
| 8.4 Conclusions..... | 334 |
| Nomenclature | 334 |
| References | 335 |
| 9. Solar Desiccant Cooling..... | 339 |
| 9.1 Evaporative Cooling | 339 |
| 9.1.1 Direct Evaporative Cooling | 340 |
| 9.1.2 Indirect Evaporative Cooling | 341 |
| 9.2 Dehumidifiers/Regenerators..... | 342 |
| 9.2.1 Desiccant Wheel..... | 342 |
| 9.2.2 Packed Bed..... | 343 |
| 9.2.3 Spray Towers..... | 344 |
| 9.2.4 Falling Films..... | 344 |
| 9.2.5 Indirect Contact Dehumidifiers/Regenerators..... | 344 |
| 9.3 Solid Desiccant Cooling | 345 |
| 9.3.1 Silica Gel..... | 346 |
| 9.3.2 Zeolite..... | 346 |
| 9.3.3 Activated Clay | 346 |
| 9.3.4 Investigations on Solid Desiccant Cooling..... | 346 |
| 9.4 Liquid Desiccant Cooling | 348 |
| 9.4.1 Investigations on Liquid Desiccant Cooling..... | 350 |
| 9.5 Coupling with Solar Setups..... | 351 |
| 9.5.1 Market Status..... | 351 |
| 9.5.2 Theoretical and Experimental Investigations on Solar Desiccant Cooling | 352 |
| 9.6 Solar-Driven Desiccant Cooling Applications | 358 |
| 9.6.1 Ökopark Hartberg Case..... | 358 |
| 9.6.2 Ineti Research Building..... | 359 |
| 9.6.3 Solar Info Center, Freiburg, Germany | 361 |
| Nomenclature | 361 |
| References | 362 |
| 10. Thermal Energy Storage..... | 367 |
| 10.1 Sensible Thermal Energy Storage | 368 |
| 10.1.1 Liquid Media | 370 |
| 10.1.1.1 Water | 370 |
| 10.1.1.2 Mineral Oil Hydrocarbons, Molten Salts, and Liquid Metals | 373 |
| 10.1.2 Solid Media..... | 373 |
| 10.1.2.1 Packed Bed Storage | 373 |
| 10.1.2.2 Borehole Thermal Energy Storage | 374 |
| 10.1.2.3 Particle Suspensions and Storage | 375 |
| 10.2 Latent Energy Storage (LTES)..... | 375 |
| 10.2.1 Phase Change Materials Classification and Properties..... | 376 |
| 10.2.2 Containment of Phase Change Materials..... | 378 |

| | |
|--|------------|
| 10.2.3 Heat Transfer Enhancement Techniques..... | 379 |
| 10.2.3.1 Micro- and Nano-Encapsulation..... | 379 |
| 10.2.3.2 Insertion of Extended Heat-Exchange Surfaces..... | 380 |
| 10.2.3.3 Insertion of High-Conductivity Materials..... | 380 |
| 10.2.3.4 Impregnation of High-Conductivity Porous Structures | 381 |
| 10.2.3.5 Cascaded PCM Storage Systems | 382 |
| 10.3 Thermochemical Energy Storage (TCS)..... | 383 |
| 10.3.1 Chemical Sorption Processes | 384 |
| 10.3.2 Chemical Reaction Processes | 385 |
| Nomenclature | 388 |
| References | 389 |
| 11. Economic Evaluation of Solar Cooling Technologies | 393 |
| 11.1 Introduction | 393 |
| 11.2 Overview of Solar Cooling Technologies | 394 |
| 11.3 Literature Review of Solar Cooling Economic Evaluation Studies..... | 400 |
| 11.4 Compilation of Cost Data for Solar Cooling Technologies | 408 |
| 11.5 Economic Evaluation Case Studies..... | 411 |
| 11.5.1 System Description and Modeling | 411 |
| 11.5.1.1 Step 1. Selection of Geographical Location and Building Types, Calculation of Cooling Loads..... | 412 |
| 11.5.1.2 Step 2. Modeling and Sizing of the Solar Cooling Systems ... | 413 |
| 11.5.2 Economic Evaluation Methodology | 417 |
| 11.5.3 Economic Evaluation Results | 423 |
