Preface *xiii*

1	Global Frameworks for Aeolian Geomorphology	1
	<i>Andrew Warren</i>	
1.1	Introduction	1
1.2	Wind	1
1.2.1	Wind Systems with Daily Rhythm and Local Scale	1
1.2.1.1	Dust Devils	1
1.2.1.2	Haboobs	1
1.2.1.3	Low-Level Jets	4
1.2.1.4	Sea Breezes	4
1.2.1.5	Hurricanes, Cyclones, Typhoons	5
1.2.1.6	Mountain Winds	7
1.2.2	Wind Systems with Annual Rhythms and Semi-Global Scale	8
1.2.2.1	Westerlies	8
1.2.2.2	The Trade Winds	11
1.2.2.3	The Harmattan	12
1.2.2.4	Monsoons	12
1.2.3	The Calmer Globe	13
1.3	Rhythms of Erosivity and Erodibility from the Semi-Decadal to Hundreds of Thousands of Years	13
1.3.1	Multiannual Rhythms	13
1.3.2	Century-Scale Rhythms	13
1.3.3	Orbitally-Forced Rhythms	13
1.4	Frameworks of Sedimentary Supply	16
1.4.1	Hard Rock	16
1.4.2	Sand (63–2000 μm)	16
1.4.2.1	The Fluvial Origins of Most Quartz Sand	18
1.4.3	Coarse Dust (10–63 μm)	18
1.4.4	Fine Dust (<10 μm)	18
1.5	Plate-Tectonic Frameworks: A Glimpse	19
1.6	Conclusion	20
	Acknowledgements	20
	Note	20
	Further Reading	20
	References	20

2 Grains in Motion 27*Andreas C.W. Baas*

- 2.1 Introduction 27
- 2.2 The Nature of Wind 27
 - 2.2.1 Turbulent Boundary Layers 27
 - 2.2.2 Turbulence and Coherent Flow Structures 30
- 2.3 Transport Modes 31
- 2.4 Ripples 32
- 2.5 Initiation of Grain Motion 33
 - 2.5.1 Thresholds 33
 - 2.5.2 Grain Size Control and Dust Emission 35
 - 2.5.3 Other Sedimentary Controls 36
- 2.6 Sand Transport: Steady-State 36
 - 2.6.1 Saltation Trajectories 36
 - 2.6.2 The Vertical Profile 38
 - 2.6.3 Modification of the Wind 39
 - 2.6.4 Bulk Transport Models 40
- 2.7 Sand Transport: Natural Environments 44
 - 2.7.1 Fetch and Saturation 45
 - 2.7.2 Spatio-Temporal Variability 46
 - 2.7.3 Slope 47
 - 2.7.4 Vegetation 48
 - 2.7.5 Sand Roses 50
- 2.8 Conclusion 51
- Further Reading 51
- References 52

3 Wind Erosion 61*Jasper Knight*

- 3.1 Introduction 61
- 3.2 The Processes of Wind Abrasion 61
 - 3.2.1 Environmental Controls on the Wind Transport of Particles 62
- 3.3 Ventifacts 63
 - 3.3.1 Morphology 64
 - 3.3.2 Wind Abrasion Microfeatures 65
 - 3.3.3 Ventifact Evolution 67
- 3.4 Yardangs 68
 - 3.4.1 Yardang Morphology and Evolution 69
- 3.5 Hamadas and Stone Pavements 71
- 3.6 Deflation Basins and Pans 72
- 3.7 Discussion 73
 - 3.7.1 Wind Erosion and Boundary Layer Climates 73
 - 3.7.2 Reconstructing Past Wind Patterns from Wind-Eroded Features 74
- 3.8 Conclusions 74
- Acknowledgements 75
- Further Reading 75
- References 75

4	Dust: Sources, Entrainment, Transport	81
	<i>Joanna Bullard and Matthew Baddock</i>	
4.1	Introduction	81
4.2	What Is Dust?	82
4.3	Production and Entrainment	83
4.4	Sources	85
4.5	Dust Events and Weather Systems	93
4.6	Dust in Suspension	98
	Further Reading	100
	References	100
5	Loess	107
	<i>Helen M. Roberts</i>	
5.1	Introduction	107
5.2	Definitions of Loess and its Relationship to Dust	107
5.3	Distribution and Thickness of Loess Deposits	109
5.4	Loess Morphology	112
5.5	The Generation of Loess Sediments	114
5.5.1	The 'Glacial' Model	116
5.5.2	The 'Desert' Model	117
5.5.3	Seasonality and Continuity	118
5.6	Other Accumulations of Dust	119
5.6.1	Dust on the Ocean Floor	120
5.6.2	Ice Cores	120
5.7	The Palaeoclimatic and Palaeoenvironmental Records from Loess and Dust	121
5.8	Dating Loess and Dust Deposits	122
5.9	The Role of Dust in Climate Change	124
5.10	Cultural, Economic, and Environmental Significance of Loess and Dust	125
5.11	Conclusion	127
	Further Reading	127
	References	128
6	Desert Dunes: Form and Process	133
	<i>Giles Wiggs</i>	
6.1	Introduction	133
6.2	The Classification of Dunes	134
6.2.1	Major Dune Types and Their Controls	135
6.3	Dune Dynamics	137
6.4	Dune Morphology	141
6.4.1	Barchan Dunes and Transverse Ridges	141
6.4.2	Linear Dunes	143
6.4.3	Star Dunes	145
6.5	Dune Orientation and Alignment	146
6.6	Dune Interactions and Equilibrium	148
6.6.1	Complex Systems Models	148
6.6.2	Analytical Models	150

6.7 Conclusion 151

Further Reading 151

References 151

7 Anchored Dunes 157

Patrick A. Hesp and Thomas A.G. Smyth

7.1 Introduction 157

7.2 Nebkhas and Nebkha Fields 157

7.2.1 Generalities 157

7.2.2 Evolutionary Trends 159

7.3 Shadow Dunes 159

7.4 Foredunes 160

7.5 Lunette or Clay Dunes 162

7.6 Blowouts 163

7.7 Parabolic Dunes 165

7.8 Coastal Transgressive Sand Sheets and Dunefields 166

7.8.1 Semi-fixed (Stabilising) and Fixed (Stabilised) Desert Dunefields 166

7.9 Echo Dunes 168

7.10 Climbing, Clifftop, Falling, and Lee Dunes 170

7.11 The Influence of Topography on Wind Flow and Dune Orientation
and Migration 172

7.12 Conclusion 172

Acknowledgements 172

Further Reading 172

8 Sand Seas 179

Paul Hesse

8.1 Introduction 179

8.2 The Distribution of Sand Seas 180

8.3 Climatic Factors 181

8.3.1 Wind 181

8.3.2 Precipitation 182

8.4 Topography 186

8.5 Sorting Processes 189

8.6 Geological Factors 190

8.6.1 Lithology 190

8.6.2 Tectonic Setting 190

8.7 A Basin Model of Sand-Sea Formation 192

8.8 Dune Patterns and Their Origins 195

8.8.1 Sediment Properties (Grain Size and Composition) 195

8.8.2 Climate Change and Changing Wind Regime 197

8.8.3 Sand Supply and Flow Paths 200

8.8.4 Climatic Gradients 200

8.9 Conclusion 200

Further Reading 204
