der Forschung mit Synchrotronstrahlung

Accessing Active Sites of Molecular Proton Dynamics

Publikationsbasierte Dissertation

zur Erlangung des akademischen Grades
doctor rerum naturalium
(Dr. rer. nat.)
in der Wissenschaftsdisziplin
Experimentalphysik

eingereicht an der
Mathematisch-Naturwissenschaftlichen Fakultät
der Universität Potsdam

von
Sebastian Oliver Eckert

Disputation am
04.03.2019

Contents

1	Introduction	1
2	Molecular Proton Dynamics: Concepts and Experimental Access	5
2.1	Electronic Structure from Quantum Chemistry	7
2.2	Dynamics on Potential Energy Surfaces	9
2.3	X-ray Tools to Access Molecular Proton Dynamics	14
2.3.1	X-ray Absorption Spectroscopy	14
2.3.2	Resonant Inelastic X-ray Scattering	16
2.3.3	Orbital Selectivity and Limitations	17
2.3.4	Dynamics in Core-Excited States	20
3	Photo-Induced Proton Dynamics	23
3.1	Excited-State Proton-Transfer in 2-Thiopyridone	23
3.2	Initial Response of Biomolecular Systems to Ionizing Radiation	29
3.3	Properties of Ground State Potentials from Core-Excited State Wave Packets	32
4	Soft X-ray Spectroscopy Instrumentation for Molecular Dynamics	39
4.1	Soft X-ray Light Sources	39
4.2	Gas Phase and Liquid Sample Environments	42
4.3	Liquid flexRIXS Experimental Setup	42
4.4	RIXS Spectrometers	43
4.5	Time-resolved XAS in Transmission Mode	44
4.6	Timing at Free Electron Lasers and Synchrotrons	46
5	Publications	49
I	Molecular structures and protonation state of 2-Mercaptopyridine in aqueous solution	51
II	Ultrafast Independent N-H and N-C Bond Deformation Investigated with Resonant Inelastic X-Ray Scattering	57
III	T ₁ Population as the Driver of Excited-State Proton Transfer in 2-Thiopyridone	65

IV	Valence orbitals and local bond dynamics around N atoms of histidine under X-ray irradiation	89
V	Selective gating to vibrational modes through resonant X-ray scattering	99
VI	One-dimensional cuts through multidimensional potential energy surfaces by tunable x rays	109
VII	Time-resolved soft X-ray absorption spectroscopy in transmission mode on liquids at MHz repetition rates	119
VIII	Versatile soft X-ray-optical cross-correlator for ultrafast applications	133
6	Conclusion and Future Prospects	143
	Bibliography	147
A	Presentation of the Results	163
B	Supporting Information	165
	Acknowledgments	193
