

GIS and Geostatistical Techniques for Groundwater Science

Venkatramanan Senapathi

Research Professor, Department of Earth and Environmental Sciences,
Pukyong National University, Busan, South Korea

Research Collaborator, Department for Management of Science and Technology Development,
Faculty of Applied Sciences, Ton Duc Thang University, Ho Chi Minh City, Vietnam

Guest Lecturer, Department of Geology, Alagappa University, Karaikudi, Tamilnadu, India

Prasanna Mohan Viswanathan

Associate Professor, Department of Applied Geology, Faculty of Engineering and Science,
Curtin University Malaysia, Miri, Sarawak, Malaysia

Sang Yong Chung

Professor, Department of Earth and Environmental Sciences,
Pukyong National University, Busan, South Korea

Section A			
Introduction and History of GIS and Geostatistical Techniques in Groundwater Science			
1. Fundamentals of GIS			
<i>S. Selvam, A. Manisha, J. Vidhya and S. Venkatramanan</i>			
1.1 Introduction	3	3. An Introduction to Various Spatial Analysis Techniques	
1.2 Definition of GIS	4	<i>C.R. Paramasivam and S. Venkatramanan</i>	
1.3 What GIS Can Do	5	3.1 Introduction	23
1.4 Geographic Referencing Concepts	5	3.2 Types of Spatial Analysis	24
1.5 Geographic Coordinate System	5	3.2.1 Inverse Distance Weighting	25
1.6 Projected Coordinate System	6	3.2.2 Natural Neighbor Inverse Distance Weighted	26
1.7 Adopted From ESRI	6	3.2.3 Spline	26
1.8 Map Scale	7	3.2.4 Spline Interpolations	26
1.9 Creating a GIS	7	3.2.5 Kriging	27
1.10 GIS Data Input	9	3.3 Kriging Types	28
1.10.1 Vector Data Capture	9	3.3.1 Ordinary Kriging	28
1.10.2 Raster Data Capture	11	3.3.2 Simple Kriging	28
1.10.3 Attribute Data	11	3.3.3 Universal Kriging	28
1.11 Data Storage and Retrieval	12	3.3.4 Indicator Kriging	28
1.12 Geographic Analysis	13	3.3.5 Probability Kriging	29
1.13 Steps in Building a GIS	13	3.3.6 Disjunctive Kriging	29
1.14 Summary	14	3.3.7 Topo Grid/Topo to Raster	29
References	14	3.4 Summary	30
		References	30
Section B			
Types of Geospatial and Geostatistical Techniques			
2. Merits and Demerits of GIS and Geostatistical Techniques			
<i>C.R. Paramasivam</i>			
2.1 Introduction	17	4. Supplement of Missing Data in Groundwater-Level Variations of Peak Type Using Geostatistical Methods	
2.2 Basic Principles of Geostatistical Methods	18	<i>Sang Yong Chung, S. Venkatramanan, Hussam Eldin Elzain, S. Selvam and M.V. Prasanna</i>	
2.3 Merits and Demerits of GIS	19	4.1 Introduction	33
2.3.1 Disadvantages of Geographic Information Systems	20	4.2 Groundwater Level Data With a Peak Type Variation	34

4.3 Geostatistical Methods	35	6.3.5 Grouping Analysis	61
4.3.1 Kriging	35	6.3.6 Statistical Analysis	62
4.3.2 Variogram	35	6.4 Results and Discussion	63
4.3.3 Conditional Simulation	36	6.4.1 Water Quality for Drinking Purpose	63
4.4 Comparison of Interpolation Capability	36	6.4.2 Groundwater Types	66
4.4.1 Statistical Validation Test	36	6.4.3 Major Ions Chemistry	67
4.4.2 Interpolation of Artificial Missing Data	36	6.4.4 Water Quality Index	69
4.5 Interpolation of Actual Missing Data	38	6.4.5 Groundwater Quality for Irrigation Purposes	69
4.5.1 Application of Kriging	38	6.4.6 Residual Sodium Carbonate	72
4.5.2 Application of Conditional Simulation	38	6.4.7 Permeability Index	72
4.5.3 Cross Validation Test	38	6.4.8 Magnesium Hazard	73
4.6 Conclusions	40	6.5 Multivariate Statistical Analysis	73
References	40	6.5.1 Correlation Matrix	73
		6.5.2 Cluster Analysis	74
		6.5.3 Factor Analysis	74
		6.6 Conclusions	75
5. A Comparative Study of Spatial Interpolation Technique (IDW and Kriging) for Determining Groundwater Quality		Acknowledgments	76
		References	76
<i>Prafull Singh and Pradipika Verma</i>			
5.1 Introduction	43	7. Spatial Prediction of Groundwater Level Using Models Based on Fuzzy Logic and Geostatistical Methods	
5.1.1 Nongeostatistical Interpolation Methods	44		
5.1.2 Geostatistical Interpolation Methods	45	<i>Ata Allah Nadiri, Rahman Khatibi, Fatemeh Vahedi and Keyvan Naderi</i>	
5.1.3 Use of Geostatistics for the Study of Groundwater Quality	48	7.1 Introduction	79
5.2 Geographic Setup and Hydrogeological Characteristics	48	7.2 Methodology	80
5.3 Data and Methods Used	49	7.2.1 Fuzzy Logic	80
5.3.1 Exploring the Dataset	50	7.2.2 Geostatistical Techniques	81
5.3.2 Interpolation Methods	50	7.3 Data Availability	82
5.3.3 Semivariogram Modeling	51	7.3.1 Study Area	82
5.3.4 Cross-Validation	51	7.3.2 Data Analysis	83
5.3.5 Prediction Map	51	7.4 Results	83
5.4 Results and Discussion	51	7.4.1 Performances of Fuzzy Models	84
5.4.1 Quantile-Quantile Plots	52	7.4.2 Performances of Geostatistical Techniques	85
5.5 Conclusion	54	7.5 Discussion	87
Acknowledgments	54	7.6 Conclusion	88
References	55	References	89
Further Reading	56	Further Reading	90
6. Methods for Assessing the Groundwater Quality		8. Remote Sensing and Fuzzy Logic Approach for Artificial Recharge Studies in Hard Rock Terrain of South India	
<i>R. Rajesh, L. Elango and K. Brindha</i>		<i>C.K. Muthumaniraja, S. Anbazhagan, A. Jothibasur and M. Chinnamuthu</i>	
6.1 Introduction	57	8.1 Introduction	91
6.2 Study Area	58	8.2 Study Area	92
6.2.1 Geology and Hydrogeology	58	8.3 Methodology	93
6.3 Methodology	59	8.3.1 Fuzzy Logic and Membership Functions	93
6.3.1 Groundwater Sampling and Analysis	59		
6.3.2 Estimation of the Water Quality Index	60		
6.3.3 GIS Analysis	61		
6.3.4 Spline Spatial Analysis	61		

8.3.2 Fuzzy Membership Function and Ranking Assigned to Thematic Classes	94	10.4 Framework for Stochastic Modeling	137
8.4 Results and Discussion	100	10.4.1 Making Time Series Ready for Stochastic Modeling	137
8.5 Conclusion	111	10.4.2 Choosing Stochastic Model	139
Acknowledgment	111	10.4.3 Identifying the Model Structure	140
References	111	10.4.4 Estimating Model Parameters	141
Further Reading	112	10.4.5 Diagnostic Checking and Validating Identified Models	142
		10.4.6 Performance Evaluation for Selecting the Best-Fit Model	144
9. Groundwater Quality Assessment Using Multivariate Statistical Methods for Chavara Aquifer System, Kerala, India		10.4.7 Forecasting of the Subsurface Hydrologic Time Series	145
<i>R. Anand Krishnan, Jamal Ansari, M. Sundararajan, Cincy John and P.M. Saharuba</i>		10.5 Current Status of Stochastic Time-Series Modeling Applications in Subsurface Hydrology	145
9.1 Introduction	113	10.6 Scope for Future Research	147
9.1.1 Study Area	113	References	148
9.1.2 Land Use/Land Cover	113		
9.2 Materials and Methods	114	11. Intelligent Prediction Modeling of Water Quality Using Artificial Neural Networking: Nambiyar River Basin, Tamil Nadu, India	
9.3 Results	114	<i>C. Gajendran, K. Srinivasamoorthy and P. Thamarai</i>	
9.3.1 Groundwater Quality Based on TDS	119	11.1 Introduction	153
9.4 Discussion	120	11.2 Study Area	153
9.4.1 Saline Water Intrusion	120	11.3 Intelligent Predictive Model	154
9.4.2 Factor Analysis	120	11.4 Data Collection and Analysis	155
9.4.3 Cluster Analysis	120	11.5 Neural Network Model Configuration	155
9.4.4 Water Quality Index	120	11.6 GIS Integration	155
9.4.5 Irrigation Water Quality	126	11.7 Correlation of Physicochemical Parameters	158
9.4.6 Sodium Percentage	126	11.8 Regression	158
9.4.7 Sodium Absorption Ratio	126	11.9 Neural Network Model	158
9.5 Conclusion	129	11.9.1 Data Partition	161
Acknowledgments	130	11.9.2 Model Development	161
References	131	11.9.3 Model Performance Evaluation	161
		11.10 Conclusion	163
10. Overview, Current Status, and Future Prospect of Stochastic Time Series Modeling in Subsurface Hydrology		References	163
<i>Priyanka Sharma, Deepesh Machiwal and Madan Kumar Jha</i>			
10.1 Introduction	133	Section C	
10.2 Time Series Analysis	134	Groundwater Quality Assessment Using GIS and Geostatistical Aspects	
10.2.1 Components of Time Series	134		
10.2.2 Stochastic Modeling	134	12. Simulation of Seasonal Rainfall and Temperature Variation—A Case Study of Climate Change Projection in Ponnaiyar River Basin, Southern India	
10.3 Checking Hypotheses Prior to Stochastic Modeling	135	<i>A. Jothibasud and S. Anbazhagan</i>	
10.3.1 Checking Normality of Time Series	135	12.1 Introduction	167
10.3.2 Detecting Homogeneity of Time Series	135	12.2 Study Area	167
10.3.3 Examining Stationarity of Time Series	135		
10.3.4 Evaluating the Presence of Trends	135		
10.3.5 Testing Persistence in Time Series	137		

12.3 Methodology	168	14.5 Interaction of Groundwater With Wetlands	204
12.3.1 Baseline Climate	169	14.6 Measurement of Groundwater-Surface Water Interactions	205
12.3.2 Projection for 2011–2040	170	References	206
12.3.3 Projection for 2041–2080	170	Further Reading	207
12.4 Results and Discussion	171		
12.4.1 Simulation of Temperature 2011–2080	171		
12.4.2 Rainfall Simulation (2011–2080)	174		
12.5 Conclusions	176		
References	176		
13. Impact of Urbanization on Groundwater Quality		15. Evaluation of Vulnerability Zone of a Coastal Aquifer Through GALDIT GIS Index Techniques	
<i>K. Brindha and Michael Schneider</i>		<i>G. Gnanachandrasamy, T. Ramkumar, J.Y. Chen, S. Venkatramanan, S. Vasudevan and S. Selvam</i>	
13.1 Introduction	179	15.1 Introduction	209
13.2 Potential Sources of Groundwater Contamination	180	15.2 Study Site	210
13.2.1 Natural Sources	180	15.3 Methodology	210
13.2.2 Heavy Groundwater Pumping	182	15.4 Result and Discussions	212
13.2.3 Industries	184	15.4.1 Groundwater Occurrence (G)	212
13.2.4 Fertilizers	186	15.4.2 Aquifer Hydraulic Conductivity (A)	212
13.2.5 Sewage Systems and Septic Tanks	187	15.4.3 Height of Groundwater Level Above Sea Level (L)	212
13.2.6 Landfills	187	15.4.4 Distance From the Shore (D)	214
13.2.7 e-Waste	188	15.4.5 Impact of the Existing Status of Saltwater Intrusion (I)	215
13.2.8 Storage Tanks	188	15.4.6 Aquifer Thickness (T)	216
13.2.9 Polluted Surface Water	189	15.5 Conclusions	217
13.2.10 Road Salts	189	References	220
13.2.11 Impact of Climate Change	189	Further Reading	221
13.3 Case Study: Groundwater Contamination in an Urban Area in India	190		
13.3.1 Study Area	190	16. A Statistical Approach to Identify the Temporal and Spatial Variations in the Geochemical Process of a Coastal Aquifer, South East Coast of India	
13.3.2 Water Demand and Supply	190	<i>M.V. Prasanna, S. Chidambaram, R. Thilagavathi, C. Thivya, S. Venkatramanan and N. Murali Krishnan</i>	
13.3.3 Sampling Methodology	190	16.1 Introduction	223
13.3.4 Groundwater Quality Mapping	190	16.2 Study Area	224
13.4 Summary and Recommendations	193	16.3 Methodology	224
References	193	16.4 Results and Discussion	224
		16.4.1 Correlation Matrix	224
		16.4.2 Factor Analysis	229
		16.4.3 Post Monsoon	229
		16.4.4 Northeast Monsoon	229
		16.4.5 Summer	230
		16.4.6 Southwest Monsoon	231
		16.4.7 Factor Scores	233
		16.5 Conclusion	233
		References	233

14. Groundwater and Surface Water Interaction			
<i>Haris Hasan Khan and Arina Khan</i>			
14.1 Introduction	197		
14.2 Scales of Groundwater-Surface Water Interaction	198		
14.1.1 Large-Scale Interactions	198		
14.1.2 Channel Scale (Hyporheic Zone) Interactions	200		
14.3 Interaction of Groundwater With Rivers and Streams	201		
14.4 Interaction of Groundwater With Lakes and Reservoirs	202		

17. Hydrogeochemistry of Groundwater From Tamil Nadu and Pondicherry Coastal Aquifers, South India: Implication for Chemical Characteristics and Sea Water Intrusion		References	266
<i>S. Gopinath, K. Srinivasamoorthy, R. Prakash, K. Saravanan and D. Karunanidhi</i>		Further Reading	268
17.1 Introduction	237		
17.2 Study Area	238		
17.2.1 Geology	238		
17.2.2 Drainage	239		
17.3 Methodology	239		
17.4 Result and Discussion	239		
17.4.1 Cations and Anions	239		
17.4.2 Hydrochemical Facies Evolution Diagram	240		
17.5 Ionic Ratio Plots	240		
17.5.1 Sodium Versus Chloride	240		
17.5.2 Chloride vs Chloride/Bromide	241		
17.5.3 Ion Exchange and Seawater Mixing Ratio	241		
17.5.4 Seawater Mixing Index	243		
17.6 Water Quality Index	244		
17.6.1 Step I	244		
17.6.2 Step II	244		
17.6.3 Step III	244		
17.6.4 Step IV	244		
17.7 Conclusion	246		
Acknowledgments	247		
References	247		
Further Reading	249		
18. Organic (Hydrocarbon) Contamination: Nonaqueous Phase Liquids			
<i>Cüneyt Güler</i>			
18.1 Introduction	251		
18.2 Classification of Hydrocarbons	252		
18.3 Production of Hydrocarbon Compounds	254		
18.4 Relevant Information Sources on Hydrocarbon Compounds	255		
18.5 Causes of Nonaqueous Phase Liquid Contamination	257		
18.6 Physical Properties of Nonaqueous Phase Liquid Contaminants	258		
18.7 Behavior of Nonaqueous Phase Liquid Contaminants in the Subsurface	262		
18.8 Abiotic and Biotic Processes Affecting Nonaqueous Phase Liquid Contaminants	263		
18.9 Concluding Remarks	266		
19. Prediction of Spatial Fluoride Concentrations by a Hybrid Artificial Neural Network in Complex Aquifers			
<i>Ata Allah Nadiri, Rahman Khatibi and Frank T.-C. Tsai</i>			
19.1 Introduction	269		
19.2 Variations of Artificial Neural Networks—Model Specifications	270		
19.3 Study Area	271		
19.4 Preliminary Investigations and Setting Up Datasets	272		
19.4.1 Identifying Significant Variables by Factor Analysis	272		
19.4.2 Preliminary Setups for Modeling Test Runs	274		
19.4.3 Spatial Strategy for the Models	275		
19.5 Results	275		
19.5.1 Artificial Neural Network Modeling—Strategy 1	275		
19.5.2 Hybrid Artificial Neural Network Model Integrating Artificial Neural Networks With Learning Vector Quantization—Strategy 2	277		
19.6 Discussions	278		
19.7 Summary and Conclusions	278		
Acknowledgments	279		
References	279		
Further Reading	281		
20. Spatio-Temporal Variations of Fluoride in the Groundwater of Dindigul District, Tamil Nadu, India: A Comparative Assessment Using Two Interpolation Techniques			
<i>N.S. Magesh and L. Elango</i>			
20.1 Introduction	283		
20.2 Study Area	284		
20.3 Materials and Methods	285		
20.3.1 Data Collection of Groundwater Quality	285		
20.3.2 GIS Analysis	285		
20.3.3 Inverse Distance Weighted Method	285		
20.3.4 Empirical Bayesian Kriging Method	286		
20.4 Results	286		
20.4.1 Spatio-Temporal Variation of Fluoride and Its Geogenic Sources	286		

20.4.2 Comparison of Deterministic and Geostatistical Methods	288	22.7 Health Effects (Review of Status)	317
20.5 Discussion	291	22.8 Conclusion	319
20.6 Conclusion	295	Acknowledgments	319
References	295	References	319
		Further Reading	322
21. Geostatistical Studies for Evaluation of Fluoride Contamination in Part of Dharmapuri District, South India		23. Arsenic Contamination	
<i>S. Anbazhagan, M. Rajendran and A. Jothibasu</i>		<i>S. Selvam, K. Jesuraja and G. Gnanachandrasamy</i>	
21.1 Introduction	297	23.1 Introduction	323
21.2 Study Area	298	23.2 Study Area	324
21.3 Methodology	298	23.3 Materials and Methods	324
21.3.1 Frequency Distribution	298	23.4 Results and Discussion	326
21.3.2 Spatial Variation of Fluoride Concentration	298	23.4.1 Arsenic (As)	326
21.3.3 Variations of Fluoride With Other Ions	299	23.5 Statistical Analysis	327
21.3.4 Variation of Chemistry at Selected Traverses	301	23.5.1 Impact of Arsenic on Human Health	328
21.4 Results and Discussions	302	23.6 Conclusion	328
21.4.1 Traverse A–A'	302	Acknowledgments	328
21.4.2 Traverse B–B'	302	References	329
21.4.3 Traverse C–C'	303	Further Reading	329
21.4.4 Traverse D–D'	305		
21.4.5 Traverse E–E'	307	24. Evaluation of Heavy-Metal Contamination in Groundwater using Hydrogeochemical and Multivariate statistical Analyses	
21.5 Conclusion	308	<i>Sang Yong Chung, R. Rajesh and S. Venkatramanan</i>	
References	308	24.1 Introduction	331
22. Fluoride Contamination in Groundwater—A GIS and Geostatistics Reappraisal		24.2 Study Area	332
<i>Banajarani Panda, V. Dhanu Radha, S. Chidambaram, M. Arindam, R. Thilagavathi, S. Manikandan, C. Thivya, A.L. Ramanathan and N. Ganesh</i>		24.3 Geology and Hydrogeology	332
22.1 Introduction	309	24.4 Methodology	333
22.2 Review of Status of Fluoride Contamination in Groundwater Linked With GIS and Geostatistical Aspects	310	24.4.1 Sampling	333
22.3 Sources	310	24.4.2 Evaluation Indices	333
22.4 Mechanism of Fluoride Release to Groundwater	311	24.4.3 Heavy-Metal Contamination Index	333
22.4.1 From Atmosphere and Surface Water	311	24.4.4 Heavy Metal Evaluation Index	334
22.4.2 From Minerals	311	24.4.5 Degree of Contamination (C_d)	334
22.4.3 From Soil	311	24.4.6 Multivariate Statistical Analysis	334
22.4.4 From Solution	312	24.5 Results and Discussion	335
22.5 A Case Study on GIS and Geostatistical Application	312	24.5.1 Hydrochemistry and Metals	335
22.5.1 Correlation	314	24.5.2 Toxic Heavy Metals (As and V)	336
22.5.2 Factor Analysis	314	24.5.3 Alkaline Heavy Metals (Sr and Ba)	336
22.6 Fluoride Distributions in Groundwater	317	24.5.4 Metallic Heavy Metals (Cu, Fe, Mn, Zn, and Al)	336
		24.5.5 Comparison of Heavy Metals Worldwide and in Korea	337
		24.5.6 Contamination Evaluation Indices	337
		24.5.7 Contamination Source Identification	337
		24.5.8 Geochemical Modeling	341
		24.6 Conclusion	343
