Preface.....	xi
Acknowledgments.....	xiii
Authors.....	xv
<b>Chapter 1</b> Introduction to CO <sub>2</sub> Reduction through Advanced Conversion and Utilization Technologies.....	1
1.1 Globe Energy Status, Challenges, and Perspectives .....	1
1.2 CO <sub>2</sub> Emission and Reducing.....	2
1.3 Main Approaches of CO <sub>2</sub> Conversion and Utilization.....	4
References .....	6
<b>Chapter 2</b> Fundamentals of CO <sub>2</sub> Structure, Thermodynamics, and Kinetics.....	9
2.1 Molecular Structure of CO <sub>2</sub> .....	9
2.2 Thermodynamics of CO <sub>2</sub> .....	9
2.3 Kinetics of CO <sub>2</sub> Conversion .....	14
2.4 Summary .....	16
References .....	16
<b>Chapter 3</b> Enzymatic and Mineralized Conversion Process of CO <sub>2</sub> Conversion .....	19
3.1 Enzymatic Conversion of CO <sub>2</sub> .....	19
3.2 Mineralization Process of CO <sub>2</sub> Conversion .....	22
3.3 Summary.....	26
References .....	27
<b>Chapter 4</b> Thermochemical and Photochemical/Photoelectrochemical Conversion Process of CO <sub>2</sub> Conversion .....	31
4.1 Thermochemical Process of CO <sub>2</sub> Conversion.....	31
4.1.1 CO <sub>2</sub> Hydrogenation to CH <sub>3</sub> OH .....	31
4.1.2 CO <sub>2</sub> Hydrogenation to HCOOH.....	33
4.1.3 CO <sub>2</sub> (Dry) Reforming of Methane (DRM) .....	35
4.2 Photocatalytic and Photoelectrochemical Processes of CO <sub>2</sub> Conversion.....	38
4.3 Summary.....	42
References .....	42

<b>Chapter 5</b>	Low-Temperature Electrochemical Process of CO <sub>2</sub> Conversion.....	49
5.1	Brief Introduction to the Electrochemical Process of CO <sub>2</sub> Conversion.....	49
5.2	Thermodynamics of Low-Temperature Electrochemical Process .....	49
5.3	Electrolyzer Used in Low-Temperature Electrochemical Process .....	51
5.4	Catalyst/Electrode Used in Low-Temperature Electrochemical Process .....	51
5.5	Summary and Outlook.....	55
	References .....	55
<b>Chapter 6</b>	High-Temperature Electrochemical Process of CO <sub>2</sub> Conversion with SOCs 1: Introduction and Fundamentals .....	57
6.1	Introduction of Solid Oxide Cells (SOCs).....	57
6.2	Fundamentals of High-Temperature CO <sub>2</sub> Conversion through Electrochemical Approaches.....	58
6.2.1	Thermodynamics of High-Temperature CO <sub>2</sub> /H <sub>2</sub> O Co-electrolysis.....	58
6.2.2	Kinetics of High-Temperature CO <sub>2</sub> /H <sub>2</sub> O Co-electrolysis.....	62
6.2.3	Comparisons between Water Electrolysis, CO <sub>2</sub> Electrolysis, and H <sub>2</sub> O/CO <sub>2</sub> Co-electrolysis .....	64
6.2.4	Key Material Selection and Components of SOCs .....	64
6.3	Summary .....	67
	References .....	67
<b>Chapter 7</b>	High-Temperature Electrochemical Process of CO <sub>2</sub> Conversion with SOCs 2: Research Status.....	71
7.1	Brief History .....	71
7.2	Research Status of HTCE with SOC in the United States.....	74
7.3	HTCE Research towards Sustainable Hydrocarbon Fuels in Europe.....	86
7.4	Research Status of HTCE with SOC in China .....	98
7.5	Summary .....	103
	References .....	103
<b>Chapter 8</b>	High-Temperature Electrochemical Process of CO <sub>2</sub> Conversion with SOCs 3: Key Materials.....	113
8.1	Materials and Microstructures of Electrodes.....	113
8.2	Fuel Electrode Materials.....	114
8.3	Oxygen Electrode Materials .....	119

8.3.1	Reaction Mechanism of Oxygen Electrode Process.....	119
8.3.2	Mixed Ionic and Electronic Materials.....	120
8.3.2.1	Perovskites ( $ABO_{3\pm\delta}$ ).....	120
8.3.2.2	Double Perovskites ( $AA'B_2O_{6-\delta}$ ).....	122
8.3.2.3	Ruddlesden-Popper ( $A_2BO_{4+\delta}$ ).....	124
8.3.3	Main Issues of the Oxygen Electrode.....	127
8.4	Electrolyte.....	128
8.5	Interconnect Materials.....	129
8.6	Cell Sealing Materials.....	130
8.7	Summary.....	131
	References.....	132

<b>Chapter 9</b>	High-Temperature Electrochemical Process of $CO_2$ Conversion with SOCs 4: Measurement, Characterization, and Simulation .....	139
9.1	Electrochemical Measurement.....	139
9.2	Microstructure Characterization.....	141
9.2.1	SEM, TEM, and STEM.....	141
9.2.2	FIB-SEM and XCT.....	142
9.2.3	STM/STS and AFM.....	144
9.3	Surface Analysis.....	145
9.4	Simulation and Calculation Method.....	148
9.5	Product Analysis.....	149
9.6	Summary.....	150
	References.....	150

<b>Chapter 10</b>	High-Temperature Electrochemical Process of $CO_2$ Conversion with SOCs 5: Advanced Fabrication Methods (Infiltration and Freeze Casting).....	155
10.1	Infiltration for Nano-Structured $Ln_{1-x}Sr_xMO_{3-\delta}$ ( $Ln=La, Sm; B=Mn, Co, Fe$ ) SOC Electrode.....	155
10.1.1	Introduction of Infiltration Used in SOCs.....	155
10.1.2	Process of Infiltration.....	156
10.1.3	Infiltration with Various $Ln_{1-x}Sr_xMO_{3-\delta}$ SOC Electrodes.....	157
10.1.3.1	LSM-YSZ Electrode.....	157
10.1.3.2	LSC-YSZ Electrode.....	160
10.1.3.3	LSF-YSZ Electrode.....	161
10.1.3.4	LSCF-YSZ Electrode.....	163
10.1.3.5	SSC-Infiltrated Electrodes.....	164
10.1.3.6	Comparison of Infiltrated Electrodes' Performance.....	165
10.1.4	Conclusions and Future Prospects.....	167

10.2	An Electrolyte-Electrode Interface Structure with Directional Micro-Channel Fabricated by Freeze Casting ....	167
10.2.1	Freeze Casting Technology Used in SOCs .....	167
10.2.2	The Process and Critical Factors of Freeze Casting Technology.....	168
10.2.2.1	The Process of Freeze Casting.....	168
10.2.2.2	Effect of Critical Factors on Morphologies .....	169
10.2.3	Summary and Perspectives .....	175
	References .....	177
<b>Chapter 11</b>	<b>High-Temperature Electrochemical Process of CO<sub>2</sub> Conversion with SOCs 6: Advanced Structure (Heterostructure).....</b>	<b>187</b>
11.1	Brief Introduction for Heterostructure.....	187
11.2	Heterostructure of ABO <sub>3</sub> /A <sub>2</sub> BO <sub>4</sub> in SOCs .....	189
11.3	Mechanism of ORR/OER in ABO <sub>3</sub> /A <sub>2</sub> BO <sub>4</sub> Heterostructure ...	192
11.3.1	Electronic Structure .....	192
11.3.2	Anisotropy.....	194
11.3.3	Lattice Strain (or the Mismatch in Lattice Parameter) .....	194
11.3.4	Cation Inter-diffusion.....	195
11.4	Current Challenges for ABO <sub>3</sub> /A <sub>2</sub> BO <sub>4</sub> Heterostructure .....	196
11.4.1	Barriers to Accurately Detecting the Performance of a Heterointerface .....	197
11.4.2	Invisibility of Heterointerface and its Unclear Mechanism .....	197
11.4.3	The Gap Between Theoretical Investigation and Practical Application .....	198
	References .....	198
<b>Chapter 12</b>	<b>High-Temperature Electrochemical Process of CO<sub>2</sub> Conversion with SOCs 7: The Significant Phenomenon of Cation Segregation .....</b>	<b>203</b>
12.1	Introduction of Cation Segregation in Perovskite-Based SOC Electrodes.....	203
12.2	Characterization of Surface Segregation .....	204
12.2.1	Low-Energy Ion Scattering .....	205
12.2.2	Auger Electron Spectroscopy and Scanning Electron Microscope .....	207
12.2.3	X-Ray Photoelectron Spectroscopy.....	209
12.2.4	Scanning Transmission Electron Microscope and Energy-Dispersive X-Ray Spectroscopy .....	210
12.2.5	Secondary Ion Mass Spectroscopy .....	211
12.2.6	Atomic Force Microscope and Scanning Tunneling Microscope.....	211

12.2.7	X-Ray Diffraction.....	214
12.2.8	State-of-the-Art Characterization Methods for Surface Segregation.....	215
12.2.8.1	In Situ XPS .....	215
12.2.8.2	Environmental Transmission Electron Microscopy.....	216
12.2.8.3	In Situ SIMS .....	217
12.2.8.4	Resonant Soft X-Ray Reflectivity and Resonant Anomalous X-Ray Reflectivity .....	218
12.2.8.5	Raman Spectroscopy and In Situ Raman Spectroscopy .....	218
12.2.8.6	In Situ X-Ray Fluorescence .....	219
12.3	Factors Influencing Segregation Level in Perovskite- Based Oxides .....	221
12.3.1	The Effect of Cation Non-Stoichiometry .....	221
12.3.2	The Effect of the Cation Species.....	223
12.3.3	The Effect of Crystallinity .....	224
12.3.4	The Effect of Lattice Strain.....	225
12.3.5	The Effect of Temperature and Thermal History....	225
12.3.6	The Effect of Atmosphere .....	227
12.3.7	The Effect of Electrical Polarization.....	228
12.4	Influences of Cation Segregation on Electrochemical Activity of SOC Electrodes .....	229
12.4.1	Influence of Sr Segregation .....	230
12.4.1.1	Mechanism 1: Blocking Effects.....	231
12.4.1.2	Mechanism 2: Inducing Detrimental Side Reactions.....	234
12.4.1.3	Mechanism 3: Generating Active Phases.....	235
12.4.2	A-Site Segregation on Sr-Free Electrode Materials.....	236
12.4.3	Influence of B-Site Segregation.....	238
12.5	Surface Engineering Promotes ORR/OER Activity for Perovskite Electrodes.....	239
12.5.1	Surface Decoration with Alkaline Earth Metal Oxides.....	240
12.5.2	Surface Decoration of Transition Metal Cations .....	240
12.5.3	Surface Decoration by Secondary Perovskite- Based Phase.....	242
12.5.4	Surface Decoration by Less Activated Phase.....	245
12.6	Conclusion and Outlook.....	246
	References.....	247

<b>Chapter 13</b>	High-Temperature Electrochemical Process of CO <sub>2</sub> Conversion with SOCs 8: Cell and Stack Design, Fabrication, and Scale-Up.....	259
13.1	SOEC Component/Cell/Stack Structure, Fabrication, and Scale-Up.....	259
13.1.1	Component/Cell/Stack Structure .....	259
13.1.2	Fabrication.....	265
13.1.2.1	Particulate Method .....	265
13.1.2.2	Deposition Method .....	266
13.1.3	Scale-Up .....	266
13.2	SOEC Systems .....	270
13.2.1	System Management .....	270
13.2.2	Lab-Scale SOEC Systems .....	270
	References.....	272
<b>Chapter 14</b>	High-Temperature Electrochemical Process of CO <sub>2</sub> Conversion with SOCs 9: Degradation Issues .....	275
14.1	Delamination of Oxygen Electrode .....	275
14.2	Cr Poisoning of the Oxygen Electrode .....	278
14.3	SiO <sub>2</sub> Poisoning of the Fuel Electrode.....	279
14.4	Redox Stability of the Fuel Electrode.....	281
	References.....	282
<b>Chapter 15</b>	Economic Analysis of CO <sub>2</sub> Conversion to Useful Fuels/Chemicals .....	287
15.1	Methanol .....	289
15.2	Urea.....	291
15.3	Dimethyl Carbonate (DMC).....	291
15.4	Formic Acid .....	292
15.5	Syngas (CO+H <sub>2</sub> ) .....	294
15.6	Summary.....	295
	References .....	295
<b>Chapter 16</b>	Summary and Possible Research Directions for CO <sub>2</sub> Conversion Technologies .....	297
	References .....	299
<b>Index</b> .....		301
