<b>Preface</b>	<b>xv</b>
<b>Part 1: Occurrence of Emerging Pollutants in Water and Possible Risks</b>	<b>1</b>
<b>1 Geochemical Prediction of Metal Dispersion in Surface and Groundwater Systems</b>	<b>3</b>
<i>Martin Mkandawire</i>	
1.1 Introduction	4
1.2 Metal Sources and Contamination	6
1.2.1 Fundamental Processes	6
1.2.2 Source Types	7
1.2.3 Metal Dispersion Mechanism and Processes	7
1.2.3.1 Phreatic Process	7
1.2.3.2 Vadose Processes	8
1.3 Fundamentals of Geochemical Prediction	10
1.3.1 Basis Principles	10
1.3.2 Types of Geochemical Prediction Models	11
1.3.2.1 Analytical Model	11
1.3.2.2 Numerical Models	12
1.3.3 Modeling Procedures and Approaches	12
1.3.3.1 Deterministic and Stochastic Modeling Approaches	12
1.3.3.2 Steady-State and Transient Modeling Approaches	13
1.4 Geochemical Prediction Model Development	13
1.4.1 Steps in Model Development	13
1.4.2 Conceptual and Mathematical Formulations	14
1.4.2.1 Conceptual Model Development	14

1.4.2.2	Mathematical Formulations	15
1.4.3	Numerical Simulations	23
1.4.3.1	Mathematical Basics for Simulations	23
1.4.3.2	Factors Prerequisite to Effective Simulations	24
1.4.3.3	Common Techniques Used in Prediction Simulations	25
1.4.3.4	Simulation Model Development	27
1.5	Limitations and Challenges	31
1.6	Concluding Remarks	35
	Acknowledgments	36
	References	36
<b>2</b>	<b>From Priority Contaminants to Emerged Threat: Risk and Occurrence-Based Analysis for Better Water Management Strategies in Present and Future</b>	<b>41</b>
	<i>Hussein N. Nassar and Sherif A. Younis</i>	
	List of Abbreviations	42
2.1	Introduction	44
2.2	Pollution and Contamination: Historical Background and Concept of ECs/PCs	46
2.3	Classification of ECs or CECs	50
2.4	Environmental Fate and Lifestyle: Sources and Pathways of Emerging Contaminants	54
2.5	Sources of ECs/CECs	55
2.6	Environmental Behavior and Fate of ECs/CECs	58
2.7	Detection and Analysis of Emergent or Priority Compounds	59
2.7.1	Sample Preparation: ECS Extraction Procedures	61
2.7.2	Analytical Techniques for ECS/CECS Identification	61
2.8	Current Legislation and Normatives Policies	68
2.9	Reclamation Technologies of Emergent Pollutants	73
2.9.1	Phase-Changing Technology	73
2.9.2	Membrane Processes	84
2.9.3	Biological Processes	84
2.9.4	Advanced Oxidation Processes (AOPs)	93
2.10	Toxicological Behavior and Risk Assessment of Emergent Contaminants	94
2.11	Future Research Directions	96
	References	96

<b>3</b>	<b>Advances in Chromatographic Determination of Selected Anti-Retrovirals in Wastewater</b>	<b>105</b>
	<i>Gbolahan Olabode and Vernon Somerset</i>	
3.1	Introduction	105
3.2	Pharmaceuticals and Personal Care Products	107
3.3	Antivirals	109
	3.3.1 Anti-Retroviral (ARVs) Drugs	109
3.4	Impact of Anti-Retrovirals on the Aquatic Ecosystem	110
	3.4.1 Occurrence of Anti-Retrovirals as Emergent Pollutants in Aquatic Ecosystems	110
	3.4.2 Anti-Retroviral Drugs and Their Toxicology Effects in the Aquatic Ecosystem	111
3.5	Treatment Technologies for Anti-Retrovirals	113
	3.5.1 Treatment Technologies of Removing Antiretroviral in Water	113
	3.5.2 Regulations on ARV Pollution in Water	115
3.6	Advances in Analysis of Anti-Retrovirals	115
3.7	Metabolites and Transformational Products of Anti-Retroviral Compounds	116
3.8	Conclusions	121
	References	121
<b>4</b>	<b>Liquid Extraction and Determination of Selected Organophosphorous Pesticides in Wastewater and Sediment Samples</b>	<b>129</b>
	<i>Vernon Somerset and Luleka Luzi-Thafeni</i>	
4.1	Introduction	130
4.2	Pesticides in the Environment	131
	4.2.1 Sources of Pesticides	131
	4.2.2 Analysis of Pesticides	132
	4.2.3 Pesticides in Wastewater Streams	134
4.3	Extraction Techniques for Pesticides Analysis	136
	4.3.1 Liquid-Liquid Extraction	137
	4.3.2 Liquid-Phase Micro-Extraction	137
	4.3.3 Single Drop Micro-Extraction	138
	4.3.4 Solid Phase Extraction	138
	4.3.5 Solid Phase Micro-Extraction	139
4.4	Organophosphorus Pesticides	139
4.5	Conclusions	140

<b>Part 2: Nano and Bio-Based Technologies for Wastewater Treatment</b>	<b>147</b>
<b>5 Coal Power Plant Wastewater Treatment by Thermal and Membrane Technologies</b>	<b>149</b>
<i>J.G. Redelinghuys, E. Fosso-Kankeu, G. Gericke and F. Waanders</i>	
5.1 Introduction	150
5.2 Mineral Scale Formation	150
5.3 Scale Formation Mechanisms	150
5.3.1 Super Saturation/Clustering	151
5.3.2 Nucleation	152
5.3.3 Crystal Growth	153
5.3.4 Deposition/Agglomeration	154
5.4 Scale Inhibition Mechanisms	154
5.4.1 Sequestration	155
5.4.2 Crystal Distortion	156
5.4.3 Dispersion and Surface Conditioning	156
5.5 Characteristics of Anti-Scaling Agents	156
5.6 Principles of the Different Treatment Methods	157
5.6.1 Distillation	157
5.6.1.1 Multi-Effect Distillation	157
5.6.1.2 Multi-Stage Flash Distillation	158
5.6.2 Eutectic Freeze Distillation	159
5.6.3 Membrane Technologies	160
5.6.3.1 Nano-Filtration	160
5.6.3.2 Reverse Osmosis	161
5.6.3.3 Forward Osmosis	161
5.6.4 Comparison of Different Technologies	162
5.6.4.1 Scaling	162
5.6.4.2 Salinity Limitations	163
5.6.4.3 Energy Consumption	163
5.7 Conclusion	164
Acknowledgments	164

<b>6 PAHs Released From Coal Tars and Potential Removal Using Nanocatalysts</b>	<b>169</b>
<i>N. Mukwevho, E. Fosso-Kankeu and F. Waanders</i>	
6.1 Introduction	169
6.2 General Information on Polycyclic Aromatic Hydrocarbons	170

6.3	Formation of PAHs	171
6.4	Sources of PAHs	172
6.4.1	Leaching of Tar to Water	172
6.4.2	Underground Coal Gasification	172
6.4.3	Combustion of Tar	173
6.5	Environmental Occurrence of PAHs	173
6.6	Possible Health Impact of PAHs Pollutants	174
6.6.1	Effects of PAHs on the Immune System	174
6.6.2	Mutagenic Effects	174
6.6.3	Carcinogenicity	174
6.7	Review of General Methods and Systems Used to Control Organic Contaminants in Water	175
6.7.1	Reverse Osmosis	175
6.7.2	Distillation	175
6.7.3	Physical Methods	176
6.7.4	Chemical Methods	176
6.7.5	Biological Methods	176
6.8	Principles of Photocatalysis	177
6.9	Light Sources	179
6.9.1	Solar Source	179
6.10	Different Types of Composites Used for the Degradation of Organic Pollutants	179
6.11	Strategies for Enhancing Photocatalytic Activity	180
6.11.1	Modulation of Energy Band	180
6.11.1.1	Modification of the Valence Band	180
6.11.1.2	Modification of Conduction Band	181
6.11.2	Modification of Morphology	181
6.11.3	Formation of Semiconductor Composite	181
6.11.4	Composite Photocatalyst	181
6.12	Factors Affecting Photocatalytic Degradation Efficiency	182
6.12.1	pH	183
6.12.2	Catalysts Dosage	183
6.12.3	Effect of Oxidants	183
6.12.4	Effect of Concentration	184
6.12.5	Effect of Time Irradiation	184
6.12.6	Effect of Surface Morphology	185
6.12.7	Effect of Surface Area	185
6.13	Synthesis Methods	185
6.13.1	Oxidation Methods	185
6.13.2	Hydrothermal/Solvothermal Methods	186
6.13.3	Sol Gel Method	186

6.14	Characterization Techniques	186
6.14.1	Scanning Electronic Microscopy	186
6.14.2	X-Ray Diffraction	187
6.14.3	Transmission Electron Microscopy	188
6.14.4	Fourier Transform Infrared Spectroscopy	188
6.14.5	Ultraviolet and Visible Spectroscopy	188
6.15	Conclusion	189
