

**Two stages of skarn formation - two tin enrichments: the  
Hämmerlein polymetallic skarn deposit, western Erzgebirge,  
Germany**

---

kumulative Dissertation  
zur Erlangung des akademischen Grades  
„doctor rerum naturalium” (Dr. rer. Nat.)  
in der Wissenschaftsdisziplin „Geochemie“

eingereicht an der  
MATHEMATISCH-NATURWISSENSCHAFTLICHEN FAKULTÄT  
INSTITUT FÜR ERD- UND UMWELTWISSENSCHAFTEN DER UNIVERSITÄT  
POTSDAM

von  
Marie G. Lefebvre  
Potsdam, im März 2019

Datum der Disputation: 05.03.2019

## Contents

<b>Zusammenfassung</b> .....	<b>I</b>
<b>Abstract</b> .....	<b>II</b>
<b>Acknowledgements</b> .....	<b>III</b>
<b>1. Chapter 1: Introduction</b> .....	<b>1</b>
1.1. <i>Generalities on skarns</i> .....	1
1.1.1. Skarns: terminology.....	1
1.1.2. Classification.....	1
1.2. <i>Identity card of Sn-skarns</i> .....	2
1.2.1. Morphology.....	2
1.2.2. Mineralogy.....	2
1.3. <i>Genesis conditions</i> .....	3
1.3.1. Environment.....	3
1.3.2. P-T-X conditions of the skarnification.....	3
1.4. <i>Tin mineralization in the western Erzgebirge</i> .....	5
1.4.1. Types of tin mineralization.....	5
1.4.2. Hämmerlein skarns and the Eibenstock granite associated greisens.....	6
<b>2. Chapter 2: The Hämmerlein skarn-hosted polymetallic deposit and the Eibenstock granite associated greisen, western Erzgebirge, Germany: Two phases of mineralization – two Sn sources</b> <b>8</b>	
2.1. <i>Introduction</i> .....	8
2.2. <i>Geological Setting</i> .....	9
2.2.1. Tectonic context.....	9
2.2.2. Post-kinematic granites.....	11
2.3. <i>Skarn and greisen assemblages</i> .....	12
2.3.1. Skarn assemblage.....	12
2.3.2. Greisen assemblage.....	19
2.4. <i>Materials and methods</i> .....	20
2.5. <i>Results</i> .....	20
2.5.1. Mineral chemistry.....	20
2.5.2. Theriak-Domino modelling.....	27
2.5.3. Rb-Sr age determination.....	28
2.5.4. Pb isotopic composition of skarn minerals of the Hämmerlein deposit.....	34
2.6. <i>Discussion</i> .....	37
2.6.1. Age of skarn formation.....	37
2.6.2. Age of greisen mineralization, age and source of tin additions in greisen and skarn....	38
2.6.3. Hämmerlein – a skarn with two events of Sn mineralization.....	41
<b>3. Chapter 3: Two stages of skarn formation in the Hämmerlein tin-skarn deposit, western Erzgebirge, Germany</b> .....	<b>43</b>

3.1.	<i>Introduction</i> .....	43
3.2.	<i>Samples</i> .....	44
3.3.	<i>Whole rock composition of the various skarn units</i> .....	45
3.4.	<i>P-T-XCO<sub>2</sub> models</i> .....	46
3.5.	<i>Rb-Sr ages and mineral data</i> .....	47
3.6.	<i>Discussion</i> .....	48
<b>4.</b>	<b>Chapter 4: Skarn formation and tin enrichment during regional metamorphism: the Hämmerlein polymetallic skarn deposit</b> .....	<b>50</b>
4.1.	<i>Introduction</i> .....	51
4.2.	<i>Geological setting</i> .....	52
4.2.1.	Regional pre-Variscan and Variscan development of peri-Gondwana .....	52
4.2.2.	Post-kinematic granites .....	53
4.2.3.	The Hämmerlein polymetallic skarn .....	55
4.2.4.	Greisen mineralization related to the Eibenstock granite .....	57
4.3.	<i>Material and methods</i> .....	57
4.4.	<i>Results</i> .....	59
4.4.1.	Whole rocks chemistry .....	59
4.4.2.	Nd and Sr isotopic composition .....	64
4.4.3.	Pb isotopic composition of skarn minerals.....	65
4.4.4.	Li and B isotopic composition of skarns, gneiss, schist, and greisen.....	68
4.5.	<i>Discussion</i> .....	72
4.5.1.	Modification of protolith chemistry during skarn formation.....	72
4.5.2.	Isotopic composition of Li and B in greisen and skarn .....	73
4.5.3.	General model for the formation of the Hämmerlein polymetallic skarn deposit .....	74
4.6.	<i>Summary/Conclusions</i> .....	76
<b>5.</b>	<b>Conclusion</b> .....	<b>77</b>
	<b>Bibliography</b> .....	<b>79</b>
	<b>Electronic Supplementary Material 1</b> .....	<b>88</b>
	<b>Electronic Supplementary Material 2</b> .....	<b>132</b>
	<b>Electronic Supplementary Material 3</b> .....	<b>134</b>
	<b>Electronic Supplementary Material 4</b> .....	<b>143</b>
	<b>Electronic Supplementary Material 5</b> .....	<b>146</b>
