

Advanced Micro- and Nanomaterials for Photovoltaics

Edited by

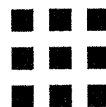

David Ginley

National Renewable Energy Laboratory (NREL), Golden,
Colorado, United States

Thomas Fix

ICube laboratory, CNRS and University of Strasbourg,
Strasbourg, France

Contents

Contributors xi

Preface xv

1. Fundamental Understanding of Solar Cells	1
<i>Kevin P. Musselman, Kianoosh Poorkazem</i>	
1. Operation of a Photovoltaic Solar Cell	1
2. Limitations in Photovoltaic Energy Conversion	5
3. Emerging Photovoltaic Materials and Photovoltaic Solar Cells	10
References	15
2. Oxide and Ferroelectric Solar Cells	19
<i>Thomas Fix</i>	
1. Computational and Combinatorial Screening	21
2. Band Offsets	23
3. All-Oxide Contact Materials	23
4. Cu ₂ O	24
5. Nanowire Solar Cells	25
6. Mott Insulator Solar Cells	26
7. Ferroelectric Solar Cells	26
8. Conclusions	32
Acknowledgments	32
References	32
3. Thin-Film Colloidal Quantum Dot Solar Cells	35
<i>Lenore Kubie, Matthew C. Beard</i>	
1. Introduction to Colloidal Quantum Dots	35
2. Quantum Dot Arrays for Solar Light Conversion	40

3. Conclusions and Outlook	46
Acknowledgments	47
References	47
Further Reading	52
4. Hot-Carrier Solar Cells: Modeling Carrier Transport	53
<i>François Gibelli, Laurent Lombez, Jean-François Guillemoles</i>	
1. Hot-Carrier Solar Cell: Modeling Theory	55
2. Hot Carrier With Different Temperatures: Modeling Results	65
3. Appendix	80
References	89
Further Reading	90
5. Kesterite: New Progress Toward Earth-Abundant Thin-Film Photovoltaic	93
<i>Sergio Giraldo, Marcel Placidi, Edgardo Saucedo</i>	
1. Introduction	93
2. Progresses in Front Contact of Kesterite	95
3. Absorber Properties and Progresses: How to Manage Such a Complex Material	99
4. Back Electrical Contact	104
5. Conclusions	111
Acknowledgments	112
References	112
6. Photon Converters for Photovoltaics	121
<i>Aline Nonat, Thomas Fix</i>	
1. Downshifting and Downconversion	121
2. Upconversion	138
References	145
Further Reading	151

7. Multifunctional Optical Coatings and Light Management for Photovoltaics	153
<i>Stephanie L. Moffitt, Laura T. Schelhas, Sunjay Melkote, Michael F. Toney</i>	
1. Introduction	153
2. Light Management	156
3. Antireflection Coatings	159
4. Antisoiling	165
5. Advanced Research Areas	171
6. Conclusions	172
Acknowledgment	172
References	172
8. Hybrid Multifunctional Transparent Conductors	175
<i>David Ginley</i>	
1. Solution-Processed Metal Nanowire Mesh Transparent Electrodes	178
2. Specific Application to PV Technologies	187
3. Theory	189
4. Summary	190
Acknowledgment	190
References	190
9. New Directions for Organic Thin-Film Solar Cells: Stability and Performance	195
<i>Dominik Landerer, Christian Sprau, Bernd Ebenhoch, Alexander Colsmann</i>	
1. Introduction	195
2. Performance of Organic Solar Cells	197
3. Stability of Organic Solar Cells	211
4. From Lab to Fab: Organic Solar Modules	219

5. Future Design Criteria and Challenges for Organic Solar Cells	224
Acknowledgments	225
References	225
10. Atmospheric Pressure Spatial Atomic Layer Deposited Metal Oxides for Thin Film Solar Cells	245
<i>Robert L.Z. Hoye, Judith L. MacManus-Driscoll</i>	
1. Introduction	245
2. Atmospheric Pressure Spatial Atomic Layer Deposition Reactors (AP-SALD): From Laboratory to Industry	247
3. Growth and Applications of <i>n</i> -Type AP-SALD Metal Oxides	252
4. Growth and Applications of <i>p</i> -Type AP-SALD Metal Oxide	267
5. Coating High-Aspect Ratio Nanostructures and Selective Area Deposition	267
6. Outlook	270
7. Conclusions	271
Acknowledgments	272
References	272
11. Combined and Sequential Accelerated Stress Testing for Derisking Photovoltaic Modules	279
<i>Peter Hacke, Michael Owen-Bellini, Michel Kempe, David C. Miller, Tadonori Tanahashi, Keiichiro Sakurai, William J. Gambogi, John T. Trout, Thomas C. Felder, Kaushik Roy Choudhury, Nancy H. Philips, Michael Koehl, Karl-Anders Weiss, Sergiu Spataru, Christos Monokroussos, Gerhard Mathiak</i>	
1. Introduction	279
2. Sequential and Cyclic Sequential Test Methods	281
3. Mechanism Specific Multifactor Stress Tests	292

4. Combined-Accelerated Stress Testing	302
5. Overview of Degradation Modes and Causal Stress Factors	305
6. Future Directions	305
References	310
Index	315
