<b>NEW REACTION SECTIONS CORRELATION: 7TH EDITION → 8TH EDITION</b>	<b>xv</b>
<b>PREFACE</b>	<b>xxi</b>
<b>COMMON ABBREVIATIONS</b>	<b>xxv</b>
<b>BIOGRAPHICAL STATEMENT</b>	<b>xxxix</b>
<b>NEW FEATURES OF THE 8<sup>TH</sup> EDITION</b>	<b>xxxiii</b>
<b>PART I INTRODUCTION</b>	<b>1</b>
<b>1. Localized Chemical Bonding</b>	<b>3</b>
1.A. Covalent Bonding	3
1.B. Multiple Valence	7
1.C. Hybridization	7
1.D. Multiple Bonds	9
1.E. Photoelectron Spectroscopy	12
1.F. Electronic Structures of Molecules	15
1.G. Electronegativity	17
1.H. Dipole Moment	19
1.I. Inductive and Field Effects	20
1.J. Bond Distances	23
1.K. Bond Angles	27
1.L. Bond Energies	29
<b>2. Delocalized Chemical Bonding</b>	<b>33</b>
2.A. Molecular Orbitals	34
2.B. Bond Energies and Distances in Compounds Containing Delocalized Bonds	37
2.C. Molecules that have Delocalized Bonds	39
2.D. Cross Conjugation	44
2.E. The Rules of Resonance	46
2.F. The Resonance Effect	48
2.G. Steric Inhibition of Resonance and the Influences of Strain	48
2.H. $p\pi-d\pi$ Bonding: Ylids	52

2.I.	Aromaticity	54
2.I.i.	Six-Membered Rings	58
2.I.ii.	Five-, Seven-, and Eight-Membered Rings	62
2.I.iii.	Other Systems Containing Aromatic Sextets	67
2.J.	Alternant and Nonalternant Hydrocarbons	68
2.K.	Aromatic Systems with Electron Numbers Other Than Six	70
2.K.i.	Systems of Two Electrons	72
2.K.ii.	Systems of Four Electrons: Antiaromaticity	73
2.K.iii.	Systems of Eight Electrons	76
2.K.iv.	Systems of Ten Electrons	77
2.K.v.	Systems of More than Ten Electrons: $4n + 2$ Electrons	80
2.K.vi.	Systems of More Than Ten Electrons: $4n$ Electrons	85
2.L.	Other Aromatic Compounds	89
2.M.	Hyperconjugation	92
2.N.	Tautomerism	96
2.N.i.	Keto–Enol Tautomerism	97
2.N.ii.	Other Proton-Shift Tautomerism	100
<b>3.</b>	<b>Bonding Weaker Than Covalent</b>	<b>105</b>
3.A.	Hydrogen Bonding	105
3.B.	$\pi$ – $\pi$ Interactions	113
3.C.	Addition Compounds	114
3.C.i.	Electron Donor–Acceptor (EDA) Complexes	114
3.C.ii.	Crown Ether Complexes and Cryptates	117
3.C.iii.	Inclusion Compounds	122
3.C.iv.	Cyclodextrins	125
3.D.	Catenanes and Rotaxanes	127
3.E.	Cucurbit[ $n$ ]Urils-Based Gyroscane	131
<b>4.</b>	<b>Stereochemistry and Conformation</b>	<b>133</b>
4.A.	Optical Activity and Chirality	133
4.B.	Dependence of Rotation on Conditions of Measurement	135
4.C.	What Kinds of Molecules Display Optical Activity?	136
4.D.	The Fischer Projection	147
4.E.	Absolute Configuration	148
4.E.i.	The Cahn-Ingold-Prelog System	150
4.E.ii.	Methods Of Determining Configuration	152
4.F.	The Cause of Optical Activity	156
4.G.	Molecules with More Than One Stereogenic Center	157
4.H.	Asymmetric Synthesis	161
4.I.	Methods of Resolution	166
4.J.	Optical Purity	173
4.K.	<i>Cis–Trans</i> Isomerism	175
4.K.i.	<i>Cis–Trans</i> Isomerism Resulting from Double Bonds	175
4.K.ii.	<i>Cis–Trans</i> Isomerism of Monocyclic Compounds	179
4.K.iii.	<i>Cis–Trans</i> Isomerism of Fused and Bridged Ring Systems	180

4.L.	<i>Out-In</i> Isomerism	181
4.M.	Enantiotopic and Diastereotopic Atoms, Groups, and Faces	183
4.N.	Stereospecific and Stereoselective Syntheses	186
4.O.	Conformational Analysis	187
4.O.i.	Conformation in Open-Chain Systems	188
4.O.ii.	Conformation in Six-Membered Rings	194
4.O.iii.	Conformation in Six-Membered Rings Containing Heteroatoms	199
4.O.iv.	Conformation in Other Rings	202
4.P.	Molecular Mechanics	204
4.Q.	Strain	206
4.Q.i.	Strain in Small Rings	207
4.Q.ii.	Strain in Other Rings	213
4.Q.iii.	Unsaturated Rings	215
4.Q.iv.	Strain Due to Unavoidable Crowding	218
<b>5.</b>	<b>Carbocations, Carbanions, Free Radicals, Carbenes, and Nitrenes</b>	<b>223</b>
5.A.	Carbocations	224
5.A.i.	Nomenclature	224
5.A.ii.	Stability and Structure of Carbocations	224
5.A.iii.	The Generation And Fate Of Carbocations	234
5.B.	Carbanions	237
5.B.i.	Stability and Structure	237
5.B.ii.	The Structure Of Organometallic Compounds	244
5.B.iii.	The Generation And Fate Of Carbanions	249
5.C.	Free Radicals	250
5.C.i.	Stability and Structure	250
5.C.ii.	The Generation and Fate of Free Radicals	261
5.C.iii.	Radical Ions	265
5.D.	Carbenes	266
5.D.i.	Stability and Structure	266
5.D.ii.	The Generation and Fate of Carbenes	269
5.D.iii.	<i>N</i> -Heterocyclic Carbenes (NHCs)	274
5.E.	Nitrenes	276
<b>6.</b>	<b>Mechanisms and Methods of Determining Them</b>	<b>279</b>
6.A.	Types of Mechanism	279
6.B.	Types of Reaction	280
6.C.	Thermodynamic Requirements for Reaction	283
6.D.	Kinetic Requirements for Reaction	284
6.E.	The Baldwin Rules for Ring Closure	288
6.F.	Kinetic and Thermodynamic Control	290
6.G.	The Hammond Postulate	291
6.H.	Microscopic Reversibility	291
6.I.	Marcus Theory	292

6.J.	Methods of Determining Mechanisms	293
6.J.i.	Identification of Products	293
6.J.ii.	Determination of the Presence of an Intermediate	294
6.J.iii.	The Study of Catalysis	295
6.J.iv.	Isotopic Labeling	296
6.J.v.	Stereochemical Evidence	296
6.J.vi.	Kinetic Evidence	297
6.J.vii.	Isotope Effects	304
6.K.	Catalyst Development	308
<b>7.</b>	<b>Irradiation Processes and Techniques that Influence Reactions in Organic Chemistry</b>	<b>313</b>
7.A.	Photochemistry	314
7.A.i.	Excited States and the Ground State	314
7.A.ii.	Singlet and Triplet States: "Forbidden" Transitions	316
7.A.iii.	Types of Excitation	317
7.A.iv.	Nomenclature and Properties of Excited States	318
7.A.v.	Photolytic Cleavage	319
7.A.vi.	The Fate of the Excited Molecule: Physical Processes	320
7.A.vii.	The Fate of the Excited Molecule: Chemical Processes	325
7.A.viii.	The Determination of Photochemical Mechanisms	330
7.B.	Sonochemistry	331
7.C.	Microwave Chemistry	334
7.D.	Flow Chemistry	336
7.E.	Mechanochemistry	338
<b>8.</b>	<b>Acids and Bases</b>	<b>339</b>
8.A.	Brønsted Theory	339
8.A.i.	Brønsted Acids	340
8.A.ii.	Brønsted Bases	347
8.B.	The Mechanism of Proton Transfer Reactions	350
8.C.	Measurements of Solvent Acidity	352
8.D.	Acid and Base Catalysis	355
8.E.	Lewis Acids and Bases	357
8.E.i.	Hard–Soft Acids–Bases	359
8.F.	The Effects of Structure on the Strengths of Acids and Bases	361
8.G.	The Effects of the Medium on Acid and Base Strength	370
<b>9.</b>	<b>Effects of Structure and Medium on Reactivity</b>	<b>375</b>
9.A.	Resonance and Field Effects	375
9.B.	Steric Effects	377
9.C.	Quantitative Treatments of the Effect of Structure on Reactivity	380
9.D.	Effect of Medium on Reactivity and Rate	390
9.E.	High Pressure	390
9.F.	Water and Other Nonorganic Solvents	391

9.G. Ionic Liquid Solvents	393
9.H. Solventless Reactions	395
<b>PART II INTRODUCTION</b>	<b>397</b>
<b>10. Aliphatic Substitution, Nucleophilic and Organometallic</b>	<b>403</b>
10.A. Mechanisms	404
10.A.i. The $S_N2$ Mechanism	404
10.A.ii. The $S_N1$ Mechanism	410
10.A.iii. Ion Pairs in the $S_N1$ Mechanism	414
10.A.iv. Mixed $S_N1$ and $S_N2$ Mechanisms	418
10.B. SET Mechanisms	420
10.C. The Neighboring-Group Mechanism	422
10.C.i. Neighboring-Group Participation by $\pi$ and $\sigma$ Bonds: Nonclassical Carbocations	425
10.D. The $S_Ni$ Mechanism	440
10.E. Nucleophilic Substitution at an Allylic Carbon: Allylic Rearrangements	441
10.F. Nucleophilic Substitution at an Aliphatic Trigonal Carbon: The Tetrahedral Mechanism	445
10.G. Reactivity	449
10.G.i. The Effect of Substrate Structure	449
10.G.ii. The Effect of the Attacking Nucleophile	457
10.G.iii. The Effect of the Leaving Group	464
10.G.iv. The Effect of the Reaction Medium	469
10.G.v. Phase-Transfer Catalysis	474
10.G.vi. Influencing Reactivity by External Means	477
10.G.vii. Ambident (Bidentant) Nucleophiles: Regioselectivity	478
10.G.viii. Ambident Substrates	481
10.H. Reactions	483
10.H.i. Oxygen Nucleophiles	483
10.H.ii. Sulfur Nucleophiles	506
10.H.iii. Nitrogen Nucleophiles	512
10.H.iv. Halogen Nucleophiles	534
10.H.v. Carbon Nucleophiles	545
<b>11. Aromatic Substitution, Electrophilic</b>	<b>607</b>
11.A. Mechanisms	607
11.A.i. The Arenium Ion Mechanism	608
11.A.ii. The $S_E1$ Mechanism	613
11.B. Orientation and Reactivity	614
11.B.i. Orientation and Reactivity in Monosubstituted Benzene Rings	614
11.B.ii. The <i>Ortho/Para</i> Ratio	618
11.B.iii. Ipso Attack	620

11.B.iv.	Orientation in Benzene Rings With More Than One Substituent	621
11.B.v.	Orientation in Other Ring Systems	622
11.C.	Quantitative Treatments of Reactivity in the Substrate	624
11.D.	A Quantitative Treatment of Reactivity of the Electrophile: The Selectivity Relationship	626
11.E.	The Effect of the Leaving Group	628
11.F.	Reactions	629
11.F.i.	Hydrogen as the Leaving Group in Simple Substitution Reactions	629
11.F.ii.	Hydrogen as the Leaving Group In Rearrangement Reactions	675
11.F.iii.	Other Leaving Groups	680
<b>12.</b>	<b>Aliphatic, Alkenyl, and Alkynyl Substitution: Electrophilic and Organometallic</b>	<b>687</b>
12.A.	Mechanisms	687
12.A.i.	Bimolecular Mechanisms. $S_E2$ and $S_Ei$	688
12.A.ii.	The $S_E1$ Mechanism	691
12.A.iii.	Electrophilic Substitution Accompanied by Double-Bond Shifts	694
12.A.iv.	Other Mechanisms	695
12.B.	Reactivity	695
12.C.	Reactions	697
12.C.i.	Hydrogen as Leaving Group	697
12.C.ii.	Metals as Leaving Groups	733
12.C.iii.	Halogen as Leaving Group	746
12.C.iv.	Carbon Leaving Groups	751
12.C.v.	Electrophilic Substitution At Nitrogen	760
<b>13.</b>	<b>Aromatic Substitution: Nucleophilic and Organometallic</b>	<b>767</b>
13.A.	Mechanisms	768
13.A.i.	The $S_NAr$ Mechanism	768
13.A.ii.	The $S_N1$ Mechanism	771
13.A.iii.	The Benzyne Mechanism	772
13.A.iv.	The $S_{RN}1$ Mechanism	774
13.A.v.	Other Mechanisms	776
13.B.	Reactivity	776
13.B.i.	The Effect of Substrate Structure	776
13.B.ii.	The Effect of the Leaving Group	778
13.B.iii.	The Effect of the Attacking Nucleophile	779
13.C.	Reactions	779
13.C.i.	All Leaving Groups Except Hydrogen And $N_2^+$	779
13.C.ii.	Hydrogen as Leaving Group	823

13.C.iii.	Nitrogen as Leaving Group	824
13.C.iv.	Rearrangements	834
<b>14.</b>	<b>Radical Reactions</b>	<b>839</b>
14.A.	Mechanisms	839
14.A.i.	Radical Mechanisms in General	839
14.A.ii.	Free-Radical Substitution Mechanisms	844
14.A.iii.	Mechanisms at an Aromatic Substrate	845
14.A.iv.	Neighboring-Group Assistance in Free-Radical Reactions	847
14.B.	Reactivity	848
14.B.i.	Reactivity for Aliphatic Substrates	848
14.B.ii.	Reactivity at a Bridgehead	853
14.B.iii.	Reactivity in Aromatic Substrates	854
14.B.iv.	Reactivity in the Attacking Radical	855
14.B.v.	The Effect of Solvent on Reactivity	856
14.C.	Reactions	856
14.C.i.	Hydrogen as Leaving Group	856
14.C.ii.	Metals as Leaving Groups	880
14.C.iii.	Halogen as Leaving Group	883
14.C.iv.	Sulfur as Leaving Group	883
14.C.v.	Carbon as Leaving Group	885
<b>15.</b>	<b>Addition to Carbon–Carbon Multiple Bonds</b>	<b>891</b>
15.A.	Mechanisms	892
15.A.i.	Electrophilic Addition	892
15.A.ii.	Nucleophilic Addition	895
15.A.iii.	Free-Radical Addition	896
15.A.iv.	Cyclic Mechanisms	898
15.A.v.	Addition to Conjugated Systems	898
15.B.	Orientation and Reactivity	899
15.B.i.	Reactivity	899
15.B.ii.	Orientation	902
15.B.iii.	Stereochemical Orientation	904
15.B.iv.	Addition to Cyclopropane Rings	906
15.C.	Reactions	908
15.C.i.	Isomerization of Double and Triple Bonds	908
15.C.ii.	Reactions in Which Hydrogen Adds to One Side	910
15.C.iii.	Reactions in Which Hydrogen Adds to Neither Side	992
15.C.iv.	Cycloaddition Reactions	1027
<b>16.</b>	<b>Addition to Carbon–Heteroatom Multiple Bonds</b>	<b>1087</b>
16.A.	Mechanism and Reactivity	1087
16.A.i.	Nucleophilic Substitution at an Aliphatic Trigonal Carbon: The Tetrahedral Mechanism	1089

16.B. Reactions	1094
16.B.i. Reactions in Which Hydrogen or a Metallic Ion Adds to the Heteroatom	1095
16.B.ii. Acyl Substitution Reactions	1218
16.B.iii. Reactions in Which Carbon Adds to the Heteroatom	1257
16.B.iv. Addition to Isocyanides	1264
16.B.v. Nucleophilic Substitution at a Sulfonyl Sulfur Atom	1266
<b>17. Elimination Reactions</b>	<b>1273</b>
17.A. Mechanisms and Orientation	1273
17.A.i. The E2 Mechanism	1274
17.A.ii. The E1 Mechanism	1280
17.A.iii. The E1cB Mechanism	1281
17.A.iv. The E1-E2-E1cB Spectrum	1286
17.A.v. The E2C Mechanism	1287
17.B. Regiochemistry of the Double Bond	1288
17.C. Stereochemistry of the Double Bond	1290
17.D. Reactivity	1291
17.D.i. Effect of Substrate Structure	1291
17.D.ii. Effect of the Attacking Base	1293
17.D.iii. Effect of the Leaving Group	1294
17.D.iv. Effect of the Medium	1294
17.E. Mechanisms and Orientation in Pyrolytic Eliminations	1295
17.E.i. Mechanisms	1295
17.E.ii. Orientation in Pyrolytic Eliminations	1298
17.E.iii. 1,4 Conjugate Eliminations	1298
17.F. Reactions	1299
17.F.i. Reactions in Which C=C and C≡C Bonds Are Formed	1299
17.F.ii. Fragmentations	1321
17.F.iii. Reactions in Which C≡N or C=N Bonds Are Formed	1325
17.F.iv. Reactions in Which C=O Bonds Are Formed	1328
17.F.v. Reactions in Which N=N Bonds Are Formed	1329
17.F.vi. Extrusion Reactions	1329
<b>18. Rearrangements</b>	<b>1335</b>
18.A. Mechanisms	1336
18.A.i. Nucleophilic Rearrangements	1336
18.A.ii. The Actual Nature of the Migration	1337
18.A.iii. Migratory Aptitudes	1340
18.A.iv. Memory Effects	1343
18.B. Longer Nucleophilic Rearrangements	1344
18.C. Free-Radical Rearrangements	1345
18.D. Carbene Rearrangements	1349
18.E. Electrophilic Rearrangements	1349
18.F. Reactions	1350

18.F.i.	1,2-Rearrangements	1350
18.F.ii.	Non 1,2-Rearrangements	1389
<b>19.</b>	<b>Oxidations and Reductions</b>	<b>1439</b>
19.A.	Mechanisms	1440
19.B.	Reactions	1442
19.B.i.	Oxidations	1442
19.B.ii.	Reductions	1510
