

**On the origin of epithermal Sn-Ag-Zn mineralization at the
Pirquitas mine, NW Argentina: fluid inclusion and isotopic
constraints**

kumulative Dissertation
zur Erlangung des akademischen Grades
„doctor rerum naturalium“ (Dr. rer. Nat.)
in der Wissenschaftsdisziplin „Geochemie“

eingereicht an der
MATHEMATISCH-NATURWISSENSCHAFTLICHEN FAKULTÄT DER UNIVERSITÄT
POTSDAM

von
Louis Desanois

Potsdam, im Februar 2019
Datum der Disputation: 22.05.2019

Contents

Abstract	5
Abstract	7
Acknowledgements	9
Contents.....	10
Figures.....	13
1. General introduction	17
1.1. The metallogeny of the Central Andes.....	17
1.2. The Bolivian Tin-Belt	19
1.2.1. Sn–W–Zn pluton related deposits	19
1.2.2. Sn–polymetallic vein type deposits	20
1.3. Mina Pirquitas, overview and history.....	21
1.3.1. Geographical characteristics.....	21
1.3.2. General geology	21
1.3.3. History of mining	23
1.4. Open questions, objectives, and methodology	23
1.4.1. Main motivations and purpose	23
1.5. General information of methods and technologies.....	25
References	27
2. Fluid inclusion studies in ore minerals from the polymetallic epithermal Sn-Ag Pirquitas deposit, Jujuy Province, NW Argentina	32
2.1. Abstract.	32
2.2. Introduction	32
2.3. Regional setting.....	33

2.3.1.	Local geology	34
2.4.	Results	35
2.4.1.	Fluid inclusion petrography.....	35
2.5.	Discussion	39
References	40
3.	Formation of epithermal Sn-Ag-(Zn) vein-type mineralization at the Pirquitas deposit, NW Argentina: Fluid inclusion and noble gas isotopic constraints	42
3.1.	Abstract	42
3.2.	Introduction	43
3.3.	Geological setting.....	46
3.3.1.	Puna plateau	46
3.3.2.	Regional geology of the Pirquitas area.....	47
3.3.3.	Mineralization of the Pirquitas deposit.....	48
3.4.	Methods.....	50
3.5.	Results	53
3.5.1.	Fluid inclusions	53
3.5.2.	Noble gas isotopes.....	56
3.6.	Discussion	60
3.6.1.	Constraints on fluid origin.....	60
3.6.2.	Evolution of the vein mineralization	61
3.6.3.	Breccia ore mineralization.....	62
3.6.4.	Fluid evolution and the significance of boiling	63
3.6.5.	Mina Pirquitas in the context of the Bolivian Tin Belt.....	65
3.7.	Conclusions	66

References	68
4. Lead and sulfur isotopic composition of ore minerals from the polymetallic Pirquitas Ag-Sn-(Zn) deposit, Jujuy, Argentina.....	76
4.1. Abstract	76
4.2. Introduction	77
4.3. Mineralization at the Pirquitas deposit.....	77
4.4. Lead and sulfur isotope ratios in the Bolivian Tin Belt.....	79
4.5. Sampling and methods	82
4.6. Results	83
4.6.1. Pb and U isotopes	83
4.6.2. Sulfur isotopes	86
4.7. Discussion	87
4.8. Conclusions	92
References	94
5. General conclusions	103
