

Micro and Nano Technologies

Nanostructures in Ferroelectric Films for Energy Applications

Domains, Grains, Interfaces and
Engineering Methods

Edited by

JUN OUYANG

Key Laboratory for Liquid-Solid Structural Evolution and Processing
of Materials (Ministry of Education), School of Materials Science
and Engineering, Shandong University, Jinan, P.R. China

Suzhou Institute of Shandong University, Suzhou, P.R. China

Physics and Astronomy, Hunter College of the City University
of New York, New York, NY, United States

Contents

| | |
|--|-------------|
| <i>List of contributors</i> | <i>xi</i> |
| <i>Preface</i> | <i>xiii</i> |
| <i>Acknowledgments</i> | <i>xv</i> |
| 1. Introduction | 1 |
| Jun Ouyang and Jing Yan | |
| 1.1 General design methods of a thin film heterostructure | 2 |
| 1.2 Nanostructures in ferroelectric films | 3 |
| 1.3 Ferroelectrics and their applications | 3 |
| 1.4 Performance of ferroelectric materials: intrinsic versus extrinsic effects | 8 |
| 1.5 Engineering of nanostructures in ferroelectric films | 11 |
| 1.6 Chapters in this book | 13 |
| References | 14 |
| 2. Ferroelectric thin films and nanostructures: current and future | 19 |
| Jijie Huang, Xingyao Gao, Judith L. MacManus-Driscoll and Haiyan Wang | |
| 2.1 Introduction on ferroelectricity | 19 |
| 2.2 BaTiO ₃ | 20 |
| 2.3 Ferroelectric thin films and structures | 21 |
| 2.4 BiFeO ₃ | 22 |
| 2.5 Ferroelectric thin films: processing | 28 |
| 2.6 Beyond epitaxial thin films: from nanostructures to flexible films | 29 |
| 2.7 New ferroelectric materials | 32 |
| 2.8 Summary | 33 |
| Acknowledgments | 34 |
| References | 34 |
| Further reading | 39 |
| 3. Self-assembled polydomain structures and domain engineering | 41 |
| Jun Ouyang and Alexander L. Roytburd | |
| 3.1 Introduction | 41 |
| 3.2 Thermodynamic principles | 44 |
| 3.3 “Thick film, thin domain” model and the exact solution of elastic energy | 53 |
| 3.4 Microstresses and thickness dependence | 56 |
| 3.5 Temperature–misfit (phase) diagrams/“domain stability maps” | 62 |
| 3.6 “Thick film, thin domain” model versus exact solution | 64 |

| | | |
|-----------|--|------------|
| 3.7 | Methods of “domain engineering” | 67 |
| 3.8 | Concluding remarks | 85 |
| | Acknowledgments | 86 |
| | References | 86 |
| 4. | Phase-field modeling for elastic domain engineering applications | 91 |
| | Andrei Artemev | |
| 4.1 | Introduction: Basic concepts of phase-field models | 91 |
| 4.2 | Chemical energy density | 93 |
| 4.3 | Gradient energy density | 95 |
| 4.4 | Long-range elastic interactions | 97 |
| 4.5 | Long-range electrostatic interactions | 100 |
| 4.6 | Kinetic equation—energy minimization technique | 101 |
| 4.7 | Phase-field modeling of domain maps and domain structure design | 103 |
| 4.8 | Phase-field modeling of functional response in polydomain films | 111 |
| 4.9 | Phase-field modeling of the self-assembling structures in nanocomposite films | 117 |
| 4.10 | Phase-field modeling of domain structures and the functional Properties in nanocomposite films | 120 |
| | References | 124 |
| 5. | Nanograins in ferroelectric films | 129 |
| | Y. Su, Jun Ouyang and Y.-Y. Zhao | |
| 5.1 | Introduction | 129 |
| 5.2 | Phase-field studies of the nanograind ferroelectric films | 132 |
| 5.3 | Experimental studies of the nanograind BaTiO ₃ ferroelectric films | 154 |
| 5.4 | Concluding remarks | 156 |
| | References | 159 |
| 6. | Interface engineering of ferroelectric thin-film heterostructures | 163 |
| | Wei Zhang and Jun Ouyang | |
| 6.1 | Design the bottom (electrode) interface | 164 |
| 6.2 | Theories and model of interface charge transport | 169 |
| 6.3 | Influences of the interface charge behaviors | 171 |
| 6.4 | Interface coupling involving a ferroelectric layer | 191 |
| 6.5 | Conclusions | 196 |
| | References | 198 |
| 7. | Low-temperature processing of ferroelectric thin films on Si substrates | 203 |
| | Zhanjie Wang and Jun Ouyang | |
| 7.1 | Introduction | 203 |

| | | |
|------------|--|------------|
| 7.2 | Low-temperature processing of ferroelectric thin films by the sol–gel method | 204 |
| 7.3 | Low-temperature processing of ferroelectric films by magnetron sputtering | 217 |
| | References | 233 |
| 8. | Fundamentals of piezoelectric thin films for microelectromechanical systems | 237 |
| | Isaku Kanno | |
| 8.1 | Introduction | 237 |
| 8.2 | Device applications of piezoelectric microelectromechanical systems | 238 |
| 8.3 | Deposition of piezoelectric thin films | 241 |
| 8.4 | Evaluation of piezoelectric properties | 247 |
| 8.5 | Conclusion | 251 |
| | Acknowledgments | 252 |
| | References | 252 |
| 9. | Electrocaloric effect in polycrystalline ferroelectrics and its measurement methods | 257 |
| | Yang Bai | |
| 9.1 | Electrocaloric effect in polycrystalline ferroelectrics | 258 |
| 9.2 | Measurements of electrocaloric effect | 273 |
| | Acknowledgment | 285 |
| | References | 285 |
| 10. | Recent progress in ferroelectric thin film capacitors for high density energy storage | 289 |
| | Cheng Hongbo, Yue Zhanxing, Jun Ouyang, Zhang Wei and Hu Fangren | |
| 10.1 | Introduction | 289 |
| 10.2 | Methods for evaluating energy-storage performance | 290 |
| 10.3 | Ferroelectric films for capacitive energy storage | 293 |
| 10.4 | Summary and prospects | 304 |
| | References | 305 |
| 11. | Analysis of ferroelectric nanostructures—microscopic methods | 309 |
| | Zhanjie Wang, Qian Li and Huarong Zeng | |
| 11.1 | Introduction | 309 |
| 11.2 | Transmission electron microscopy study for nanostructure characterization of ferroelectric ultrathin films and superlattices | 310 |
| 11.3 | Quantitative analysis of ferroelectric nanostructures using piezoresponse force microscopy | 323 |

| | |
|---|------------|
| 11.4 Conclusion | 334 |
| References | 334 |
| 12 Analysis of ferroelectric nanostructures—spectroscopic methods/second harmonic generation polarimetry | 339 |
| Yuhang Ren | |
| 12.1 Optical second harmonic generation polarimetry | 340 |
| 12.2 Second harmonic generation in reflection geometry from BZT films | 347 |
| 12.3 Second harmonic generation in transmission geometry from BZT films | 351 |
| 12.4 X-ray diffraction and transmission electron microscopy results from BZT films | 354 |
| References | 355 |
| <i>Index</i> | 359 |
