

# Carbon Based Nanomaterials for Advanced Thermal and Electrochemical Energy Storage and Conversion

Edited by

**Rajib Paul**

**Vinodkumar Etacheri**

**Yan Wang**

**Cheng-Te Lin**

# Contents

List of Contributors .....	xiii
Preface .....	xvii

## **CHAPTER 1 Carbon Nanotubes, Graphene, Porous Carbon, and Hybrid Carbon-based Materials: Synthesis, Properties, and Functionalization for Efficient Energy Storage ..... 1**

*Rajib Paul, Mewin Vincent, Vinodkumar Etacheri and Ajit K. Roy*

1.1 Introduction .....	1
1.2 Various Allotropic Structures of Carbon Nanomaterials .....	3
1.3 Metal-free Heteroatom-doped Carbon .....	4
1.4 Synthesis of 3D Carbon Materials and Heteroatom Doping.....	7
1.5 Metal or Metal Oxide Based Hybrid Carbon Materials.....	9
1.6 Synthesis of Metal or Metal Oxide Based Hybrid Carbon Materials.....	13
1.7 Conclusions and Perspectives .....	18
1.8 Acknowledgments .....	18
References.....	18
Further Reading .....	24

## **CHAPTER 2 Architectural Design and Promises of Carbon Materials for Energy Conversion and Storage: in Laboratory and Industry ..... 25**

*Aniruddha Jana, Rajib Paul and Ajit K. Roy*

2.1 Introduction .....	26
2.1.1 Grid Energy Storage .....	27
2.1.2 Energy Storage for Transportation Technologies .....	28
2.1.3 Portable Electronics .....	31
2.2 Architectural Design: Key Theoretical Considerations.....	33
2.3 Architectural Tuning of Carbon Electrode Materials.....	36
2.3.1 Carbon Nanotubes for Battery Anodes .....	36
2.3.2 Graphene for Battery Anodes .....	37
2.3.3 Composite Anodes and Cathodes .....	37
2.3.4 Sodium-ion Batteries .....	39
2.3.5 Electrochemical Capacitors .....	39
2.3.6 Fuel Cells and Other Catalytic Energy Conversion Devices.....	41
2.3.7 Optoelectronic and Photovoltaic Energy Conversion .....	42
2.3.8 Piezoelectric Energy Harvesting.....	45
2.3.9 Thermoelectric Transducers.....	46
2.3.10 Sorption-based Thermal Energy Recovery .....	48

2.4	Conclusions .....	50
	References.....	50
	Further Reading .....	60
<b>CHAPTER 3</b>	<b>Characterization Techniques and Analytical Methods of Carbon-based Materials for Energy Applications .....</b>	<b>63</b>
	<i>Rajib Paul, D. Zemlyanov, Ajit K. Roy and A.A. Voevodin</i>	
3.1	Introduction .....	63
3.2	Properties of Electrode Materials .....	64
3.3	Electrode Materials Characterization.....	66
3.4	Characterization of Electrochemical Catalysis for Energy Conversion .....	68
3.5	Carbon Catalysts for Oxygen Reduction Reaction.....	72
3.6	Carbon-based Electrocatalysts for Oxygen Evolution Reaction .....	73
3.7	Carbon-based Electrocatalysts for Hydrogen Evolutions Reaction .....	73
3.8	Carbon-based Electrocatalysts for Carbon Dioxide Reduction Reaction .....	74
3.9	Carbon-based Electrocatalysts for H <sub>2</sub> O <sub>2</sub> Reduction.....	75
3.10	Carbon-based Electrocatalysts for Nitrogen Reduction Reaction .....	76
3.11	Carbon-based Electrodes for Li-ion Batteries .....	77
3.12	Carbon-based Electrodes for Solar Cells.....	79
3.13	Electrochemical Supercapacitors .....	81
3.14	Conclusions and Perspectives .....	83
	Acknowledgments .....	83
	References.....	84
<b>CHAPTER 4</b>	<b>Sorption-based Thermal Energy Storage on Hierarchically Porous Carbon Foams .....</b>	<b>89</b>
	<i>Rajib Paul</i>	
4.1	Introduction .....	89
4.2	Sorption-based Thermal Energy Storage.....	91
4.3	Materials for Sorption Heat Storage .....	92
4.4	Experimental Methods .....	93
4.5	Results and Discussion.....	96
4.6	Conclusions and Perspectives .....	100
	Acknowledgments .....	101
	References.....	101
<b>CHAPTER 5</b>	<b>Carbon Nanomaterials for Thermal Rectification .....</b>	<b>103</b>
	<i>Tengfei Ma and Yan Wang</i>	
5.1	Introduction .....	103
5.2	Applications of Thermal Rectification .....	104
5.3	Common Mechanisms of Thermal Rectification in Macroscopic and Nanosystems.....	106

5.4	Thermal and Mechanical Properties of Carbon Nanomaterials .....	108
5.5	Thermal Rectification Based on Carbon Nanomaterials.....	110
5.6	Outlook and Conclusion.....	116
	References.....	118
<b>CHAPTER 6</b>	<b>Carbon Nanomaterials for Thermoelectric Applications.....</b>	<b>121</b>
	<i>Pranay Chakraborty and Yan Wang</i>	
6.1	Graphene and Graphene Nanoribbons.....	122
6.2	Graphene Nanomesh .....	125
6.3	Graphene Nanowiggles .....	127
6.4	Carbon Nanotubes .....	130
6.5	Other Allotropes of Carbon .....	132
6.6	Summary.....	133
	Acknowledgments .....	135
	References.....	135
<b>CHAPTER 7</b>	<b>Enhancing Semiconductor Photocatalysis with Carbon Nanostructures for Water/air Purification and Self-cleaning Applications .....</b>	<b>139</b>
	<i>Revathi Kottappara, Shajesh Palantavida and Baiju Kizhakkekilikoodayil Vijayan</i>	
7.1	Introduction .....	140
7.2	Semiconductor Photocatalysis.....	140
	7.2.1 Mechanism Of Semiconductor Photocatalysis.....	140
7.3	Photocatalysis in Water/Air Purification .....	143
7.4	Challenges in Semiconductor Photocatalysis for Water/Air Purification.....	144
7.5	Advancement of Carbonaceous Nanomaterials Toward Photocatalytic Water/Air Purification.....	145
	7.5.1 Role of Carbon Nanomaterials In Photocatalysis .....	145
	7.5.2 Activated Carbon as Support in Photocatalysis .....	145
	7.5.3 Fullerene-based Nanocomposites .....	146
	7.5.4 Carbon Nanotube-based Composites for Water Purification.....	147
	7.5.5 Graphene-based Materials .....	149
	7.5.6 Carbon Dots .....	152
	7.5.7 Polymeric Carbon Nanostructures for Photocatalytic Water/Air Purification.....	155
	7.5.8 Band-gap Engineering of g-C <sub>3</sub> N <sub>4</sub> .....	156
7.6	Carbon Nanomaterials for Photocatalytic Self-cleaning Surfaces .....	159
	7.6.1 Self-cleaning Surfaces .....	159
	7.6.2 Mechanism of Photocatalytic Self-cleaning Activity .....	161
	7.6.3 Advantages of Photocatalytic Self-cleaning.....	162

7.6.4	Testing Methods for Photocatalytic Self-cleaning Surfaces .....	163
7.6.5	Carbon Nanostructures as Photocatalytic Self-cleaning Materials .....	163
<b>7.7</b>	<b>Conclusions .....</b>	<b>166</b>
	References.....	166
<b>CHAPTER 8</b>	<b>Recent Progress in Carbon-based Materials as Catalysts for Electrochemical and Photocatalytic Water Splitting .....</b>	<b>173</b>
	<i>Chunyu Cui, Jiale Xie, Deqing Lin, Jiakui Zhang, Xianghong Chen, Chunxian Guo and Jiantie Xu</i>	
<b>8.1</b>	<b>Introduction .....</b>	<b>174</b>
<b>8.2</b>	<b>Fundamental Principles .....</b>	<b>174</b>
	8.2.1 Photocatalytic Water Splitting.....	174
	8.2.2 Oxygen Evolution Reaction.....	175
	8.2.3 Hydrogen Evolution Reaction .....	175
<b>8.3</b>	<b>Carbon-based Materials as Catalysts for Water Splitting .....</b>	<b>177</b>
	8.3.1 Carbon Nanotube-based Materials.....	177
	8.3.2 Graphene-based Materials .....	181
	8.3.3 C <sub>3</sub> N <sub>4</sub> -based Materials.....	185
<b>8.4</b>	<b>Metal–Carbon Hybrid Materials.....</b>	<b>188</b>
	8.4.1 Noble-metal/Carbon-based Catalysts for Oxygen Evolution Reaction .....	188
	8.4.2 Noble-metal/Carbon-based Catalysts for Photocatalytic Water Splitting .....	189
	8.4.3 Nonnoble-metal/Carbon-based Catalysts.....	190
<b>8.5</b>	<b>Conclusion and Perspectives.....</b>	<b>194</b>
	Acknowledgments .....	195
	References.....	195
<b>CHAPTER 9</b>	<b>Carbon Nanotubes in Hybrid Photovoltaics: Dye Sensitized and Perovskites Solar Cells .....</b>	<b>201</b>
	<i>Alfonso Monreal-Bernal, Maria Bidikoudi and Rubén D. Costa</i>	
<b>9.1</b>	<b>Introduction .....</b>	<b>201</b>
<b>9.2</b>	<b>Carbon Nanotubes in Dye-sensitized Solar Cells.....</b>	<b>204</b>
	9.2.1 Carbon Nanotubes as Counter-Electrodes.....	206
	9.2.2 Carbon Nanotubes-based Photoanodes.....	211
	9.2.3 Carbon Nanotube-based Electrolytes .....	214
	9.2.4 Future Trends and Carbon Nanotube Macroscopic Applications.....	220
<b>9.3</b>	<b>Carbon Nanotubes in Perovskites Solar Cells .....</b>	<b>222</b>
<b>9.4</b>	<b>Carbon Nanotubes Applied to Active Layers.....</b>	<b>226</b>
	9.4.1 Carbon Nanotubes Applied to Hole Transport Layers .....	228
	9.4.2 Carbon Nanotubes Applied to Counter-Electrodes .....	231
	9.4.3 Future Trends and Carbon Nanotube Macroscopic Applications.....	234

9.5	Conclusions .....	239
	Acknowledgments .....	239
	References.....	239
<b>CHAPTER 10</b>	<b>Materials Science of Multifunctional Supercapacitors Based on Nanocarbon Networks .....</b>	<b>249</b>
	<i>Evgeny Senokos, Rebeca Marcilla and Juan J. Vilatela</i>	
10.1	General Design Drivers for Supercapacitors .....	249
10.2	Nanocarbons and Other Building Blocks .....	250
10.3	Basic Aspects of Combined Electrochemical and Mechanical Properties .....	252
	10.3.1 Flexibility in Bending .....	253
	10.3.2 Porosity and Aggregation .....	255
10.4	Examples of Multifunctional Electrical Double Layer Capacitor Devices Based on Nanocarbon Networks.....	257
10.5	Increasing Capacitance Through Pseudocapacitive Reactions .....	258
	10.5.1 The Various Effects of Nanocarbon Functionalization.....	259
	10.5.2 Integration of Pseudocapacitive Materials (Increasing Energy Density in Flexible and Tough Devices).....	263
10.6	Towards Structural Supercapacitors .....	269
10.7	Conclusions and Perspective.....	272
	References.....	276
<b>CHAPTER 11</b>	<b>Carbon Nanomaterials for Rechargeable Lithium–Sulfur Batteries .....</b>	<b>279</b>
	<i>Álvaro Doñoro, Daniel Cíntora-Juárez and Vinodkumar Etacheri</i>	
11.1	Introduction .....	279
11.2	Lithium–Sulfur Batteries.....	280
	11.2.1 Electrochemical Characteristics of Li–S Batteries.....	280
	11.2.2 Drawbacks of Li–S Batteries.....	282
11.3	Integration of Sulfur in Li–S Batteries .....	282
	11.3.1 Physical Methods .....	283
	11.3.2 Chemical Methods .....	283
11.4	Carbon–sulfur Hybrid Cathodes .....	284
	11.4.1 Zero-dimensional Carbon Materials .....	284
	11.4.2 One-dimensional Carbon Materials .....	286
	11.4.3 Two-dimensional Carbon Materials .....	289
	11.4.4 Porous Carbon Materials .....	292
	11.4.5 Hierarchical and Hybrid Carbon Materials .....	294
11.5	Carbon-based Anodes for Lithium–Sulfur Batteries.....	297
	11.5.1 Graphite Anodes .....	298
	11.5.2 Hard Carbon Anodes.....	301
	11.5.3 Composite Anodes of Lithium with Carbon .....	302

11.6	Conclusions .....	303
	References.....	303
	Further Reading .....	309
<b>CHAPTER 12</b>	<b>Carbon Nanomaterials for Metal–Air Batteries .....</b>	<b>311</b>
	<i>Jiangxuan Song and Luning Guo</i>	
12.1	Metal–Air Batteries .....	311
12.1.1	Zinc–Air Batteries.....	312
12.1.2	Lithium–Air Batteries .....	314
12.2	Carbon Nanomaterials.....	314
12.2.1	Challenges for Metal–Air Batteries.....	314
12.2.2	Advantages of Carbon Nanomaterials.....	315
12.2.3	Carbon Nanomaterials for Metal–Air Batteries .....	316
12.3	Applications.....	317
12.3.1	Zinc–Air Batteries.....	317
12.3.2	Lithium–Air Batteries .....	324
12.4	Conclusion.....	330
	References.....	331
<b>CHAPTER 13</b>	<b>Carbon Nanomaterials for Advanced Lithium and Sodium-ion Batteries .....</b>	<b>335</b>
	<i>Ricardo Alcántara, Pedro Lavela, Gregorio Ortiz and José L. Tirado</i>	
13.1	Carbon Nanotubes and Nanofibers .....	336
13.2	Fullerenes .....	337
13.2.1	Doping and/or Functionalizing .....	338
13.2.2	Combination With Other Forms of Carbon: G, SWCNT .....	339
13.2.3	Use as Coating or Carbon Source of Other Electroactive Materials.....	339
13.2.4	Na-ion Batteries .....	340
13.3	Graphene and Expanded Graphite .....	340
13.4	Disordered Carbon Nanomaterials.....	346
13.5	Conclusions .....	349
	References.....	350
<b>CHAPTER 14</b>	<b>Carbon-based Integrated Devices for Efficient Photo-energy Conversion and Storage.....</b>	<b>357</b>
	<i>Rabindra N. Gayen, Venkata Sai Avvaru and Vinodkumar Etacheri</i>	
14.1	Introduction .....	357
14.2	Carbon Nanomaterials for Energy Storage and Conversion .....	359
14.2.1	Carbon-based Photo-Energy Conversion Devices .....	359
14.3	Carbon-based Electrochemical Energy Storage Devices .....	363
14.3.1	Supercapacitors .....	363
14.3.2	Lithium-ion Batteries .....	364

14.4	Carbon-based Integrated Devices For Photo-Energy Conversion and Storage ....	364
14.4.1	One-dimensional Structures for Integrated Devices .....	365
14.4.2	Two-dimensional Structures for Integrated Devices.....	367
14.5	Summary.....	371
	References.....	371
<b>CHAPTER 15</b>	<b>Carbonaceous Materials for Efficient Electrocatalysis.....</b>	<b>375</b>
	<i>Rajib Paul, Ajit K. Roy and Liming Dai</i>	
15.1	Introduction .....	375
15.2	Carbon-based Catalysts for Oxygen Reduction Reaction .....	377
15.3	Carbon-based Catalysts for Oxygen Evolution Reaction.....	380
15.4	Carbon-based Catalysts for Hydrogen Evolution Reaction .....	382
15.5	Carbon-based Catalysts for Carbon-dioxide Reduction Reaction.....	387
15.6	Carbon-based Catalysts for Nitrogen Reduction Reaction.....	388
15.7	Carbon-based Metal-free Electrocatalysts .....	389
15.8	Conclusions and Perspectives .....	389
	Acknowledgment .....	391
	References.....	391
	Further Reading .....	394
<b>CHAPTER 16</b>	<b>Automated Energy Storage Using Carbon Nanostructured Materials .....</b>	<b>395</b>
	<i>Rajib Paul</i>	
16.1	Introduction .....	395
16.2	Available Energy Resources and Future Direction .....	396
16.3	Integrated Energy Devices Using Dye-sensitized Solar Cell and Supercapacitor .....	398
16.4	Integrated Energy Systems Using Solar Cell, Supercapacitor, and Nanogenerator .....	400
16.5	Integrated Photoelectrochemical Cells Based on Dye-sensitized Solar Cells and Perovskite Solar Cells .....	400
16.6	Organic Solar Cell and Supercapacitor Based Integrated Devices.....	402
16.7	Integrated Energy Device Using Perovskite Solar Cells, Polymer Membrane Fuel Cell and Water Splitting Electrolyzer .....	402
16.8	Triboelectric Nanogenerator for Water Wave Energy Harvesting .....	405
16.9	Conclusion and Perspectives.....	407
	References.....	407
<b>CHAPTER 17</b>	<b>Atomic Simulation of Carbon Nanomaterials for Energy Application .....</b>	<b>411</b>
	<i>Jonghoon Lee and Ajit K. Roy</i>	
17.1	Introduction .....	411
17.2	Computational Efficiency Matters.....	413

17.3	DFTB Parameterization.....	416
17.4	Conclusion.....	419
	Reference.....	419
	Further Reading.....	421
<b>CHAPTER 18</b>	<b>Prospects of Carbon Nanomaterials for Energy Storage and Conversion .....</b>	<b>423</b>
	<i>Rajib Paul</i>	
18.1	Introduction.....	423
18.2	Flexible, Wearable, and Transparent Energy Systems.....	424
18.3	Load-bearing Carbon Material-based Energy Storage.....	424
18.4	Carbon-based Cathodes for Air Battery.....	425
18.5	Advancement in Carbon Composites.....	426
18.6	Advanced Structural Energy Storage.....	428
18.7	Commercialization Aspects of Carbon Materials for Energy Storage.....	428
18.8	Conclusions.....	429
	References.....	429
Index.....		431
