

Vladimir Krainov · Boris M. Smirnov

# Atomic and Molecular Radiative Processes

With Applications to Modern Spectroscopy  
and the Greenhouse Effect

 Springer

# Contents

<b>1</b>	<b>Single-Photon Transitions of Atomic Particles</b>	1
1.1	Principles of Atomic and Molecular Structure	1
1.1.1	One and Two-Electron Atoms	1
1.1.2	Light Atoms	4
1.1.3	LS- and jj-Coupling Schemes	8
1.1.4	Parentage Scheme of Atom	11
1.2	Single-Photon Transitions	12
1.2.1	Rates of Single-Photon Transitions for Nonrelativistic System	12
1.2.2	Intensity of Radiative Transitions	18
1.2.3	Selection Rules for Single-Photon Radiative Transitions	20
1.2.4	Polarization of Spontaneous Radiation of Atomic Particles	26
1.3	Oscillator Strength for Radiative Transition	33
1.3.1	Sum Rules	33
1.3.2	Sum Rules for One-Electron Atom	36
1.3.3	Peculiarities of the Oscillator Strength	39
	References	42
<b>2</b>	<b>Properties of Radiation Field</b>	43
2.1	Broadening of Spectral Lines	43
2.1.1	Broadening of Spectral Line for Isolated Atom	43
2.1.2	Collision Broadening of Spectral Lines	51
2.1.3	Quasistatic Broadening of Spectral Lines	57
2.2	Equilibrium Radiation	64
2.2.1	Laws of Blackbody Radiation	64
2.2.2	Spontaneous and Stimulated Emission	66
2.2.3	Cross Section and Parameters of Radiative Processes	68
	References	75

<b>3</b>	<b>Resonant Radiation in Atomic Gases</b> . . . . .	77
3.1	Radiation Involving Resonantly Excited Atoms . . . . .	77
3.1.1	Broadening of Resonant Spectral Lines . . . . .	77
3.1.2	Propagation of Resonant Radiation in Excited Gas . . . . .	80
3.2	Applying Aspects of Resonant Photons . . . . .	87
3.2.1	Optical Pumping . . . . .	87
3.2.2	Cooling of Atoms in Laser Field . . . . .	88
3.2.3	Light Induced Drift . . . . .	91
3.2.4	Photoresonant Plasma . . . . .	92
	References . . . . .	96
<b>4</b>	<b>Radiative Processes in Molecular Gases</b> . . . . .	99
4.1	Selection Rules for Radiation of Molecular Gases . . . . .	99
4.1.1	Selection Rules for One-Photon Transitions Between Vibrational States in Molecules . . . . .	99
4.1.2	Selection Rules for Transitions Between Rotational States of Diatomic Molecules . . . . .	107
4.1.3	Radiative Properties of CO <sub>2</sub> Molecule . . . . .	112
4.1.4	Spectroscopic Databases . . . . .	116
4.2	Absorption of Infrared Radiation in Gas of Linear Molecules . . . . .	117
4.2.1	Infrared Radiation of Molecular Gas . . . . .	117
4.2.2	Vibrational-Rotational Radiative Transitions for Diatomic Molecules . . . . .	120
4.2.3	Absorption Coefficient for Gas of Diatomic Molecules . . . . .	122
4.2.4	Absorption Coefficient Produced by Carbon Dioxide Molecules . . . . .	125
	References . . . . .	131
<b>5</b>	<b>Elementary Radiative Processes</b> . . . . .	133
5.1	Radiative Transitions Involving States of Continuous Spectrum . . . . .	133
5.1.1	Photoionization and Photodetachment of Atomic Particles . . . . .	133
5.1.2	Two-Step Photoionization of Atoms . . . . .	139
5.1.3	Photodetachment of Hydrogen Negative Ion . . . . .	140
5.1.4	Photoionization of Hydrogen Atom . . . . .	143
5.1.5	Radiation of Solar Photosphere . . . . .	147
5.1.6	Photoprocesses Involving Atmospheric Molecules . . . . .	149
5.2	Photoprocesses Involving Rydberg States . . . . .	159
5.2.1	Photoexcitation and Photoionization of Rydberg Atoms . . . . .	159
5.2.2	Photoionization of Rydberg Atoms . . . . .	165
5.2.3	Rydberg Atoms in Detector of Submillimeter Radiation . . . . .	169
5.3	Photoprocesses Involving Free Electrons . . . . .	170
5.3.1	Character of Photorecombination of Atomic Particles . . . . .	170

- 5.3.2 Bremsstrahlung Processes Involving Electrons . . . . . 173
- 5.3.3 Radiation of Dissociative Air . . . . . 183
- 5.4 Reflection of Radiowaves from Ionosphere . . . . . 186
  - 5.4.1 Reflection of Radiowaves by the Ionosphere E-Layer . . . . 186
  - 5.4.2 Reflection of Radiowaves by the Ionosphere F-Layer . . . . 188
- References . . . . . 189
- 6 Photon Interaction with Clusters and Microparticles . . . . . 191**
  - 6.1 Scattering of the Electromagnetic Wave on Atomic and Small Particles . . . . . 191
    - 6.1.1 Resonance Fluorescence Involving Molecules and Atoms . . . . . 191
    - 6.1.2 Raman Scattering on Atomic Particles . . . . . 194
    - 6.1.3 Rayleigh Scattering by Dielectric Particles . . . . . 202
    - 6.1.4 Small Dielectric Particles in Electromagnetic Field . . . . . 204
  - 6.2 Absorption of Radiation by Metal Particles . . . . . 206
    - 6.2.1 Interaction of Metal Particles with the Electromagnetic Wave . . . . . 206
    - 6.2.2 Absorption of Radiation by Metal Nanoparticles . . . . . 208
    - 6.2.3 Emission of Metal Clusters in Hot Gases . . . . . 214
  - 6.3 Absorption by Atmospheric Particles . . . . . 216
    - 6.3.1 Aerosols and Water Microdrops in Atmosphere . . . . . 216
    - 6.3.2 Water Microdrops in Clouds . . . . . 219
    - 6.3.3 Atmospheric Water Microdrops as Atmospheric Radiators and Absorbers . . . . . 222
  - References . . . . . 223
- 7 Greenhouse Effect in Atmospheres of Earth and Venus . . . . . 227**
  - 7.1 General Principles of Atmospheric Greenhouse Effect . . . . . 227
    - 7.1.1 Nature of Atmospheric Greenhouse Effect . . . . . 227
    - 7.1.2 Global Properties of the Earth’s Atmosphere . . . . . 233
    - 7.1.3 Models of Emission from Optically Dense Gaseous Layer . . . . . 238
  - 7.2 Greenhouse Effect in Atmospheres . . . . . 241
    - 7.2.1 Emission of Atmospheric CO<sub>2</sub> Molecules Towards the Earth . . . . . 241
    - 7.2.2 Water as Atmospheric Radiator . . . . . 246
    - 7.2.3 Climate Sensitivity . . . . . 251
    - 7.2.4 Energy Balance of Venus and Its Atmosphere . . . . . 256
  - References . . . . . 263
- Conclusion . . . . . 267**
- Bibliography . . . . . 269**
- Index . . . . . 271**
