

# Volcanotectonics

Understanding the Structure, Deformation,  
and Dynamics of Volcanoes

---

AGUST GUDMUNDSSON

<i>Preface</i>	<i>page xi</i>
<i>Acknowledgements</i>	<i>xiii</i>
<b>1 Introduction</b>	<b>1</b>
1.1 Aims	1
1.2 Definition of a Volcano	1
1.3 Volcanotectonics – the Scope and Aims	4
1.4 Structural-Geology Techniques and Definitions	5
1.5 Geophysical Techniques and Definitions	12
1.6 Interpreting the Data	17
1.7 Summary	26
1.8 Main Symbols Used	27
1.9 Worked Examples	28
1.10 Exercises	31
References and Suggested Reading	32
<b>2 Volcanotectonic Structures</b>	<b>34</b>
2.1 Aims	34
2.2 Field Observations and Measurements	34
2.3 Basic Data Analysis and Presentation	46
2.4 General Shape	53
2.5 Segmentation and Linkage	58
2.6 Tips (Ends)	61
2.7 Direction of Propagation and Magma Flow	68
2.8 Feeder-Dikes and Non-Feeders	71
2.9 Sills	75
2.10 Summary	77
2.11 Worked Examples	78
2.12 Exercises	82
References and Suggested Reading	83
<b>3 Volcanotectonic Deformation</b>	<b>87</b>
3.1 Aims	87
3.2 Basic Definitions and Data	88
3.3 Stress, Strain, and Elasticity	92
3.4 Magma Chambers as Nuclei of Strain – the Mogi Model	105

3.5	Magma Chambers as Cavities – Analytical Models	109
3.6	Magma Chambers as Cavities – Numerical Models	122
3.7	Magma Chambers as Cavities – Analogue Models	137
3.8	Stress and Deformation Associated with Dikes and Sheets	140
3.9	Summary	156
3.10	Main Symbols Used	158
3.11	Worked Examples	160
3.12	Exercises	172
	References and Suggested Reading	175
<b>4</b>	<b>Volcanic Earthquakes</b>	<b>179</b>
4.1	Aims	179
4.2	Seismic Waves	179
4.3	Hypocentre, Epicentre, and Focal Mechanism	183
4.4	Earthquake Moments and Magnitudes	187
4.5	High-Frequency Earthquakes	195
4.6	Low-Frequency Earthquakes	203
4.7	Explosion Earthquakes	203
4.8	Volcanic Tremors	204
4.9	Earthquakes Triggering of Volcanic Eruptions	205
4.10	Seismic Monitoring	206
4.11	Summary	208
4.12	Main Symbols Used	211
4.13	Worked Examples	212
4.14	Exercises	219
	References and Suggested Reading	220
<b>5</b>	<b>Volcanotectonic Processes</b>	<b>224</b>
5.1	Aims	224
5.2	Magma-Chamber Initiation	224
5.3	Magma-Chamber Rupture and Dike Injection	234
5.4	Dike Emplacement	239
5.5	Sill Emplacement	242
5.6	Laccolith Emplacement	247
5.7	Vertical Collapses (Caldera Collapses)	251
5.8	Lateral/Sector Collapses (Landslides)	259
5.9	Summary	261
5.10	Main Symbols Used	263
5.11	Worked Examples	264
5.12	Exercises	267
	References and Suggested Reading	269

---

<b>6 Formation and Dynamics of Magma Chambers and Reservoirs</b>	<b>272</b>
6.1 Aims	272
6.2 Formation of Deep-Seated Reservoirs	272
6.3 Magma Migration in Deep-Seated Reservoirs	277
6.4 Formation of Double Magma Chambers	281
6.5 Dynamics of Shallow Magma Chambers	286
6.6 Dynamics of Deep-Seated Magma Reservoirs	290
6.7 Dynamics of Double Magma Chambers	294
6.8 Detecting Magma Chambers and Reservoirs	299
6.9 Summary	308
6.10 Main Symbols Used	310
6.11 Worked Examples	312
6.12 Exercises	319
References and Suggested Reading	320
<b>7 Magma Movement through the Crust: Dike Paths</b>	<b>325</b>
7.1 Aims	325
7.2 Dike Initiation	325
7.3 Dike-Propagation Paths	332
7.4 Dike Arrest	338
7.5 Surface Effects of Dikes	348
7.6 Fissure Eruption	356
7.7 Heat Transfer and Magma Solidification	361
7.8 Summary	367
7.9 Main Symbols Used	368
7.10 Worked Examples	370
7.11 Exercises	374
References and Suggested Reading	376
<b>8 Dynamics of Volcanic Eruptions</b>	<b>379</b>
8.1 Aims	379
8.2 Eruption Sizes and Frequencies	379
8.3 Magma Transport to the Surface	382
8.4 Duration of Eruptions	390
8.5 Large Explosive Eruptions	400
8.6 Large Effusive Eruptions	407
8.7 Summary	411
8.8 Main Symbols Used	413
8.9 Worked Examples	414
8.10 Exercises	420
References and Suggested Reading	421

<b>9 Formation and Evolution of Volcanoes</b>	424
9.1 Aims	424
9.2 Why Are There Any Volcanic Edifices?	424
9.3 Intrusion and Eruption Frequencies of Central Volcanoes	428
9.4 Shape (Geometry) of a Volcano	436
9.5 Internal Structure of a Volcano	444
9.6 Extinction of Volcanoes	458
9.7 Summary	460
9.8 Main Symbols Used	461
9.9 Worked Examples	462
9.10 Exercises	465
References and Suggested Reading	466
<b>10 Understanding Unrest and Forecasting Eruptions</b>	472
10.1 Aims	472
10.2 Volcanic Unrest	472
10.3 Depth, Form, and Function of Magma Chambers	476
10.4 Magma-Chamber Rupture	481
10.5 Dike Propagation	483
10.6 Dike-Induced Deformation	512
10.7 Forecasting Large Eruptions	520
10.8 Preventing Large Eruptions	524
10.9 Summary	536
10.10 Main Symbols Used	540
10.11 Worked Examples	541
10.12 Exercises	551
References and Suggested Reading	553
<b>Appendix A. Units, Dimensions, and Prefixes</b>	560
A.1 SI Base Units	560
A.2 Derived SI Units of Some Quantities	560
A.3 SI Prefixes	561
<b>Appendix B. The Greek Alphabet</b>	563
<b>Appendix C. Some Mathematical and Physical Constants</b>	564
<b>Appendix D. Elastic Constants</b>	565
D.1 Typical Young's Moduli and Poisson's Ratios	565
D.2 Relations among the Elastic Constants for Isotropic Rock	566
<b>Appendix E. Properties of Some Crustal Materials</b>	568
E.1 Rock Densities, Strengths, and Internal Friction	568
E.2 General Rock and Fluid Properties	569

<b>Appendix F. Physical Properties of Lavas and Magmas</b>	572
F.1 Lavas	572
F.2 Magmas	572
References	572
