### Keynote lectures

- Corporate social responsibilities for sustainable design and construction  
  *M.J. Skibniewski*  
  
  3  

- A software platform for civil infrastructure health monitoring  
  *K.H. Law*  
  
  4  

- Environmentally friendly techniques for quality-improving the recycled concrete aggregate  
  *J. Yang, W.M. Shaban & H. Su*  
  
  5  

- Human-technology reliability for sustainable civil infrastructure systems  
  *P. B. Tang*  
  
  6  

- Effective use of brick waste in concrete  
  
  7  

### Invited lectures

- Sustainability assessment of bridge structures based on big data and carbon emission reduction policies  
  *Y.F. Wang*  
  
  11  

- Compressive performance of FRP-confined steel-reinforced high strength concrete columns  
  *M.X. Xiong, G.M. Chen & Z.H. Lan*  
  
  12  

- Study on compressive performance of prefabricated composite column with steel angles  
  *J. Ding, Y. Zou, C. Wang, T. Li & M. Chen*  
  
  13  

- Ductile fracture of welded steel structures  
  *L. Kang & H.B. Ge*  
  
  14  

- Life cycle assessment and management of sustainable buildings  
  *H.T. Wang, L. Zhang, Y.W. Liang & Y.Y. Liao*  
  
  15  

- Deep semantic segmentation for 3D as-is bridge model generation  
  *Y. Turkan & Y. Xu*  
  
  16  

- A brief on cost controls of highway construction projects  
  *Y. Liu, G. Gong & X. Zhan*  
  
  17  

- New achievements and new opportunities and challenges in tunnel engineering in China  
  *X. Zhan, G. Gong & Y. Liu*  
  
  18
Sustainable construction materials

Roles of nano-silica and micro-silica in durability of concrete
L.G. Li, J.Y. Zheng & A.K.H. Kwan
21

Recycled aggregate from wet mix concrete
D.W. Law, C. Gunasekara, S. Setunge, M. Hogan & D. Thomas
28

Overview of the influence of internal curing in recycled aggregate concrete
B.F.N. Rahmasari, Y. Yu & J. Yang
32

Sustainability analysis of functionally graded concrete produced with fibres and recycled aggregates
38

Effects of particle morphology on the macroscopic behaviour of ellipsoids: A discrete element investigation
S.P.K. Kodicherla, G. Gong, L. Fan & Charles K.S. Moy
45

Electrochemical investigation of steel bar in slag-cement paste under coupled chloride and sulphate attack
H. Davoudi & X.B. Zuo
51

Development of optimized waste-containing concrete
J. He & G. Gong
57

A seismic integrity evaluation method of structures under multi-stage earthquake
H. Hou & W. Liu
65

Improving properties of recycled coarse aggregate (RCA) by biomineralization method
Z.W. Liu, C.S. Chin, J. Xia & V. Achal
75

Using travertine as pervious pavements to control urban-flooding and storm water quality
81

Compressive strength of recycled coarse aggregate pervious concrete containing cement supplementary material
L.N. Jia, J. Xia & M.D. Liu
88

Effect of basalt fibre addition to cementitious mortar at ambient and elevated temperatures
96

Sustainable design in built environment

Investigation of efficient self-powered sensors for vibrations in building floors
105

Numerical evaluation of reinforced concrete frames with corroded steel reinforcement under seismic loading: A case study
F. Pugliese, L. Di Sarno & A. Mannis
112

Nonlinear dynamic analysis on progressive collapse resistance of a multi-story reinforced concrete building with slab
S. Nyum, J. Yang, F.L. Wang & Q.F. Liu
121

Numerical modelling of structural behaviour of transverse beam under interior column removal scenario
S. Shah, F. Wang & J. Yang
127

vi
Compressive behavior of FRP-confined steel-reinforced recycled aggregate concrete columns: An experimental study
Z. Xu, G.M. Chen & M.X. Xiong

Dynamic analysis of short-circuit effects on a flexible conductor system
P. Yang & G. Gong

A comparative study of concrete filled steel tubes using FEM & DEM
M. Zhu & G. Gong

Experimental and numerical study on seismic performance of the SRC beams to inclined circular CFST columns connection
B.L. Jiang, Y.M. Li & S.Y. Ji

Smart construction for urban rail transit based on energy-efficient bi-directional vertical alignment optimisation
C. Wu, S. Lu, F. Xue, L. Jiang, & G. Gong

Optimization of neutral section location on high-speed railways with consideration of train operations
R. Miao, C. Wu, S. Lu, F. Xue, Z. Tian & S. Hillmansen

Investigation on mechanical characterizations of metal-coated lattice structure
X. Wang, F. Yuan, M. Chen, J. He, P. Wang, Y. Yu & J. Li

Potential for the design of an energy saving facade system using agglomerated cork: Implications in subtropical climates
F. Afonso

Use of multi-agent system to switch driving strategy in rail transit and procedure simulation
Y.D. Guo, C. Zhang & S.F. Lu

Multi-agent systems for energy efficient train and train station interaction modelling
Y. Guo, Q. Wang & C. Zhang

Green and low carbon buildings

Semantic enrichment of city information models with LiDAR-based rooftop albedo
F. Xue, W. Lu, T. Tan & K. Chen

Experimental study on thermal comfort improvement of building envelope with PCM energy storage
H. Ye, Y. Wang & F. Qian

Effect of fiber type on mechanical properties of magnesium phosphate cements
T. Geng, Z.Q. Jiang, J. Li, & L.W. Zhang

BIM model for evaluating green building through its life cycle
X. Liu, L. Lin & Y. Gao

BEAM upgrade and cost premium for green building development
H. Wang, W. Tang & X. Zhang

The performance of the backfills of the borehole heat exchanger of the ground source heat pump system in cooling dominated region of China
W. Ma, J. Hao, C. Zhang, H. Wen & F. Guo

Intelligent design of climate responsive skin in modern buildings
J.Y. Ying & Z. Zhuang
Analysis of key factors causing delay in green buildings: An empirical study in China
*M. Sajjad & Z. Pan*  
256

Critical success factors for sustainable mass housing projects in developing countries: A case study of Nigeria
*M. M. Mukhtar & M. M. Mustapha*  
263

**Smart construction and construction management**

Design for construction waste management
*J. Xu & W. Lu*  
271

Behaviour and big data in construction waste management: A critical review of research
*M. W. W. Lee & W. Lu*  
277

Construction waste cross jurisdictional trade under PESTEL context
*Z. Bao, W. Lu, B. Chi, C. S. Chin & J. Hao*  
283

A new strategy framework for construction waste recycling in China
*H. Guo & W. Lu*  
288

Developing information requirements for BIM-enabled quantity surveying practice: An adaptation approach
*J. Wang & W. S. Lu*  
293

Influence of scene crisis perception on the coping behavior of public during shopping mall fire
*X. Gu, Y. Chen, Y. Peng & M. Liu*  
300

Challenges of off-site construction: A critical review
*L. Hou & Y. T. Tan*  
307

Real-time 3D reconstruction using SLAM for building construction
*T. Qian & C. Zhang*  
313

Social impact assessment for sponge city PPPs: Framework and indicators
*J. Guo, W. Li & J. Yuan*  
319

Effects of random measurement errors on a linear DEM error model: A case study using TLS point clouds
*L. Fan, G. Gong & C. Zhang*  
329

Exploring the influence of information technology on learning performance: A case study of construction management students
*S. Zhang, Y. Hua & S. Galvin*  
335

Feasibility analysis of an automated construction progress management system based on indoor positioning technology
*W. Shen & C. Zhang*  
344

SWOT analysis for using BIM for infrastructure across the whole lifecycle of transportation projects
*Z. Li, F. Guo, & D. Schaefer*  
351

Financial subsidies to further construction waste resources utilization through a game theory model
*S. H. Chen, J. L. Hao, B. Q. Cheng, C. M. Herr, J. J. Wang & J. Xu*  
360

Lean construction application: A case study in Suzhou, China
*W. Xing, J. Hao, D. Wu, L. Qian & K. S. Sikora*  
365
Application of an intelligent safety helmet to construction site safety management
X. Zhang, M. Zhou, L. Dai & K. Zhou

Developing sustainability performance evaluation indicators of PPP projects: A case study
Q. Sun, S. Zhang & W. Lu

Enlightenment of the construction of zero waste city in Singapore to China

Author index
