## Keynote Lectures

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Masonry Bridges and Viaducts: Testing, Mechanics, Retrofitting</td>
<td>3</td>
</tr>
<tr>
<td>Towards an Extended Life</td>
<td></td>
</tr>
<tr>
<td>Antonio Brencich</td>
<td></td>
</tr>
<tr>
<td>History of Arch Bridges in Portugal</td>
<td>31</td>
</tr>
<tr>
<td>Júlio Appleton</td>
<td></td>
</tr>
<tr>
<td>Arch Bridges or Bridges with Arches, Elegant and Efficient Solutions to Cross an Obstacle</td>
<td>51</td>
</tr>
<tr>
<td>Vincent de Ville de Goyet</td>
<td></td>
</tr>
<tr>
<td>Challenge and Development of Long Span Arch Bridges in Statics, Dynamics and Aerodynamics</td>
<td>71</td>
</tr>
<tr>
<td>Yaojun Ge</td>
<td></td>
</tr>
<tr>
<td>Arch Bridges in Italy and the Role of Riccardo Morandi in the Last Century</td>
<td>92</td>
</tr>
<tr>
<td>Enzo Siviero and Alberto Zanchettin</td>
<td></td>
</tr>
</tbody>
</table>

## Heritage Arch Bridges

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Old Bridges in Bragança – Building a Landscape Heritage</td>
<td>101</td>
</tr>
<tr>
<td>Daniel Vale</td>
<td></td>
</tr>
<tr>
<td>Strategies and Conservation Concepts in the Bridge of Arco in Marco de Canaveses</td>
<td>109</td>
</tr>
<tr>
<td>Miguel Malheiro and Aníbal Costa</td>
<td></td>
</tr>
</tbody>
</table>

## Analytic and Numerical Studies of Arch Structures

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nonlinear Analysis of a Multispan Stone Masonry Bridge Under Railway Traffic Loading</td>
<td>119</td>
</tr>
<tr>
<td>Rúben Silva, Cristina Costa, and António Arède</td>
<td></td>
</tr>
</tbody>
</table>
Contributions on Refined Modelling of Stone Arch Bridges .......... 128
Cristina Costa and António Arêde

Impact of Boundary Conditions on the Soil-Steel Arch Bridge Behaviour Under Seismic Excitation .................................................. 136
Tomasz Maleska and Damian Beben

Closed-Form Solution for In-plane Nonlinear Elastic Buckling of Parabolic Three-Pinned Arches .............................................. 145
Chang-Fu Hu and Xiao-Qian Liu

Consequences of Simplifications in Modelling and Analysis of Masonry Arch Bridges ................................................................. 153
Tomasz Kamiński

Numerical Investigation on the Behavior of Skewed Concrete Tied Arch Bridges ................................................................. 161
Mohamed A. Azim Elewa

Effect of Different Debonding Degree on Mechanical Behavior of CFST Truss Arch Ribs ....................................................... 170
Yan Yang, Junping Liu, and Lan Li

Modelling Backfill in Masonry Arch Bridges: A DEM Approach ........... 178
Vasilis Sarhosis, Tamás Forgács, and Jose V. Lemos

Behavior of Concrete Tied Arch Railway Bridges Under Moving Loads ................................................................. 185
Mohamed A. Azim Elewa and Eslam Sayed Youssef

Experimental and Numerical Assessment of an Old Backfilled Concrete Arch Bridge ................................................................. 194
Tomasz Kamiński, Mieszko Kużawa, and Jan Bień

Medium Span Flat Arch Bridges: Efficient or not? ................................. 203
Riccardo Stroscio

Dynamic Amplification of Curved Beams Subjected to a Moving Point Load ................................................................. 212
Jack Smith and Sinan Acikgoz

Mechanical Role of Spandrel Walls on the Capacity of Masonry Arch Bridges ................................................................. 221
Tamás Forgács, Szilveszter Rendes, Sándor Ádány, and Vasilis Sarhosis

Geometric Non-linear Form-Finding Design for Optimal Tied Arch Bridge ................................................................. 230
Esko Järvenpää, Rauno Heikkilä, and Matti-Esko Järvenpää
Contents

Investigation of Deformations in Flexible Soil-Steel Arch Bridge Based on Strain Gauges’ Measurements ............................................. 238
Czesław Machelski and Piotr Tomala

Construction Loads of the Flexible Arch Bridges ..................... 246
Czesław Machelski and Piotr Tomala

Investigations on Welded Splices of Heavy HD Sections in Net-Arch Bridges ......................................................... 255
Teodora Bogdan, Mike Tibolt, Miguel Candeias, Wojciech Ochojski, and Dennis Rademacher

Stiffness Identification of Truss Joints of the Nam O Bridge Based on Vibration Measurements and Model Updating .................. 264
Hoa Tran-Ngoc, Samir Khatir, Guido De Roeck, Thanh Bui-Tien, Long Nguyen-Ngoc, and Magd Abdel Wahab

Photogrammetric Modelling of a Stone Bridge for Structural Analysis ................................................................. 273
Harold Schuch, Carnot L. Nogueira, Frederick R. Rutz, and Kevin L. Rens

Comparative Study of the Proportions and Efficiency of Steel Arch Bridges ................................................................. 280
Konstantinos Kris Mermigas and Hongyou Wang

The Mechanism Method in the Analysis of Two-Span Masonry Arch Bridges ................................................................. 289
Fernando Saitta, Paolo Clemente, Giacomo Buffarini, and Giovanni Bongiovanni

Seismic Reliability Analysis: Application to an Existing Single-Span Open-Spandrel RC Arch Bridge ........................................... 298
Mariano Angelo Zanini, Lorenzo Hofer, Flora Faleschini, and Carlo Pellegrino

Limit Analysis of Masonry Arch Bridges Using Discontinuity Layout Optimization ................................................................. 307
Matthew Gilbert, John Valentino, Colin Smith, and Tom Pritchard

Modelling Masonry Arch Bridges Containing Internal Spandrel Walls ................................................................. 315
Serena Amodio, Matthew Gilbert, and Colin Smith

Lower Bound Stress Fields in the Limit Analysis of Soil-Filled Masonry Arch Bridges ................................................................. 323
Qi Dang, M. Gilbert, and C. C. Smith

The Arch Action Model for Shear Capacity Assessments of Prestressed Beams with Parallel Chords ................................................................. 331
Philipp Gleich and Reinhard Maurer
# Contents

## Analysis Methods and Seismic Strengthening of Existing Masonry Arch Bridges of the Conventional Railway Network
Franco Iacobini, Marco Tisalvi, Andrea Vecchi, Francesco Iodice, and Alberto Mauro

Using Thrust Lines to Calculate the Kinematic Collapse Multiplier for Retrofitting Masonry Arch Bridges
Giuseppe Stagnitto and Alessandro Pederzani

Lateral Stability of Network Arch Bridges
Cyrille Denis Tetougueni, Paolo Zampieri, and Carlo Pellegrino

## Experimental Studies of Arch Structures

Experimental Research on Effects of Debonding on Circular CFST Columns with Different Slenderness Ratios
Junqing Xue, Yifei Zhang, Bruno Briseghella, and Baochun Chen

Experimental Study on the Spatial Mechanical Behavior of CFST X-Shaped Arches Subjected to Non-directional Loads
Jiangang Wei, Zhitao Xie, Qingxiong Wu, Baochun Chen, and Jianchun Ping

Segmental Model Test of a Sunflower Arch Bridge and Joint Optimal Design
Yonghui Huang, Airong Liu, and Rui Rao

Dynamic Characterization of a Stress Ribbon and Butterfly Arch Pedestrian Bridge Using Wireless Measurements
Leqia He, Zhiyong Zhang, Giuseppe Carlo Marano, Bruno Briseghella, Junqing Xue, and Zhengbin Ni

Experimental Study on Creep of Concrete Filled Steel Tube Under Eccentric Compression
Xiuying Lai, Zhaoyu Chen, and Baochun Chen

Experimental and Numerical Investigations of a Segmental Masonry Arch Subjected to Horizontal Settlements
Maria-Giovanna Masciotta, Daniele Brigante, Alberto Barontini, Daniele Pellegrini, Paulo B. Lourenço, Giovanni Fabbrocino, Cristina Padovani, and Maria Girardi

The Marsh Lane Railway Viaduct: 2 Years of Monitoring with Combined Sensing and Surveying Technologies
Sinan Acıkgoz, Haris Alexakis, Cong Ye, Andrea Franza, and Matthew DeJong
Uncommon University Initiatives in Arch Bridges Education
Pawel Hawryszkowski and Krzysztof Galik

Comparative Evaluation of Monitoring Technologies for a Historic Skewed Masonry Arch Railway Bridge
Sam Cocking, Daniel Thompson, and Matthew DeJong

Anomaly Detection Based on Automated OMA and Mode Shape Changes: Application on a Historic Arch Bridge
Gabriele Marrongelli, Carmelo Gentile, and Antonella Saisi

Preliminary Structural Assessment of a Multi-span Masonry Arch Bridge
Paolo Borlenghi, Antonella Saisi, and Carmelo Gentile

Assessment of a Medieval Arch Bridge Resorting to Non-destructive Techniques and Numerical Tools
Daniel V. Oliveira, Reza Allahvirdizadeh, Ana Sánchez, Belen Riveiro, Nuno Mendes, Rui A. Silva, and Francisco M. Fernandes

Static and Dynamic Testing of a Road Arch Bridge in Rabka Zdroj, Poland
Pawel Hawryszkowski and Wojciech Zielichowski-Haber

Experimental Investigation of Arching Effects in Prestressed Concrete Beams with Parallel Chords
Philipp Gleich and Reinhard Maurer

In-Operation Experimental Modal Analysis of a Three Span Open-Spandrel RC Arch Bridge
Rosario Ceravolo, Giorgia Coletta, Erica Lenticchia, Lili Li, Antonino Quattrone, and Simone Rollo

A Low-Invasive Retrofitting Technique for Masonry Bridges: Experimental Results
Antonio Bencich and Davide Pera

Improving the Aerodynamic Stability of Bridges. Wind Tunnel Tests
Solovev Sergei and Khrapunov Evgenii

Dynamic and Quasi-static Load Tests in a Railway Stone Multispan Masonry Arch Bridge
Rüben Silva, Cristina Costa, and António Arêde
Design and Construction of Arch Bridges

Crossing the Thames at Taplow: The Challenges of a Slender Arch Footbridge ................................................................. 527
Ian Firth, Clare Taylor, Richard Jenkins, and Musa Chunge

Recent Research and Application of Arch Bridges in China ................................................................. 536
Baochun Chen, Junping Liu, and Tabatabai Habib

Design and Construction of Hoang van Thu Bridge in Vietnam ................................................................. 545
Junping Liu, Quocbao Tran, Tan Yilong, and Baochun Chen

Design and Construction of the Hejiang Yangtze River Highway Bridge ................................................................. 553
Junping Liu, Shaobin Lu, and Jianming Yuan

Comparison of Construction Schemes for Constructing Concrete-Filled Steel Tube Tied Arch Bridge in Shallow Water Channel .................................................................................. 559
Fei Wu, Sheng Zhou, Peng Shu, Jun Hua, Qiang Liu, and Guoli Huang

The Advantages of Steel-Concrete Composite Girder in Half-Through Concrete-Filled Steel Tube Bowstring Arch Bridge ................................................................. 569
Fei Wu, Donghua Xiao, Jiancheng Yuan, Sheng Zhou, Zhicheng Tan, and Zhongpeng Zou

Key Technologies and Innovations in the Construction of Matan Hongshui River Super-Large Bridge ................................................................. 578
Yu Han, Zhanfeng Yang, Dayan Qin, and Jian Zheng

Tamina Canyon Bridge, Bad Ragaz, Switzerland .................................................................................. 586
Michael Müller, Holger Haug, and Wolfgang Eilzer

Podilskyi Arch Bridge in Kiev .................................................................................. 595
Michael Korniiev, Vladimir Bolikov, and Friedhelm Eric Rentmeister

Past and Present for Arch Executions .................................................................................. 604
Fátima Otero Vieitez

A Flat Arch Bridge Construction Method and Its Temporary Stability ................................................................. 612
Riccardo Stroscio

Railway Road Bridge in Novi Sad – Steel Tied Network Arches Over the Danube .................................................................................. 621
Aleksandar Bojovic and Antonio Mora Munoz

Conceptual Design of a Footbridge Over the Warta River in Poznań .................................................................................. 630
Jan Biliszczuk, Anita Luniak, Joanna Ways, Jerzy Onysyk, and Marco Teichgraeb
Long Span Arch Bridges in India: Design Aspects and Aesthetics ........ 638
R. B. Singh and Keerat Kaur Guliani

Innovative Construction Strategies for Singular Arch Bridges .......... 646
Manuel Escamilla, Borja Martín, Luis M. Salazar, Jose A. Agudelo,
Héctor Faúndez, Ainhoa Marin, and Alejandro D. Salazar

The Santos – Guarujá Bridge over Santos Channel .................. 655
Marcelo Waimberg, Fernando Stucchi, Fabio Prado,
and Matheus Marquese

Use of the Arch as Substitution of a Footbridge Substructure ........ 663
Alejandro Calderon Landaverde and Alejandro Calderon Ollivier

A Set of Dainty Tied-Arch Bridges: The Formal Expression of the Structural Logic .................. 671
José Romo

Design of Large-Span Steel-Truss Girder Railway Bridge Stiffened by Flexible Arch Rib .................. 679
Zhengchun Xia, Wangqing Wen, Aiguo Yan, Dingguo Yan,
and Xiaojiang Zhang

Viaduct Over Genil River in the New Granada Bypass.
A Three Tied-Arche Innovative Bridge .................. 690
Óscar Ramón Ramos-Gutiérrez, Javier Fernández-Dívar Sánchez,
Guillermo Ortega-Carreras, Ricardo Rafael Pereira-Da Sousa,
and Marcos J. Pantaleón-Prieto

Classification of Construction Methods of Arch Bridges .................. 698
Manyop Han and Byungsuk Kim

Almonte Viaduct: Design Principles and Structural Monitoring ........ 706
Guillermo Capellán, Emilio Merino, Miguel Sacristán, Javier Martínez,
Santiago Guerra, and Pascual García

A New Arch Bridge in Georgia: A High-Seismicity Area .................. 715
Guillermo Capellán, Emilio Merino, Ysabel Guil, Pascual García,
Miguel Angel Frías, and Manuel Casado

Namhangang Railway Bridge – A Series of Normal
and Underslung Arches .................. 723
Hyung Kyoong Byun, Eric Gogny, and Hong Yong Kim

Cantilever Casting Construction Technology of Reinforced Concrete
Main Arch Ring of ShaTuo Bridge .................. 732
Zhi-Jun He, Hong-Ju Han, Ji-Ping Guo, and Jian Yang
Technical Development of Long Span Concrete Filled Steel Tube Arch Bridges in China ............................................ 744
Tingmin Mou, Bikun Fan, Yicheng Zhao, and Jian Liang

Reconstruction of the Butron Castle Arch Bridge .................. 753
José Manuel Baraibar

Formworks Travelers for Two Different Types of Reinforced Concrete Arch Bridges ........................................... 762
Javier Fernandez, Jose Vicente Rajadell, and Paula Rinaudo

Rehabilitation, Maintenance and Condition Assessment of Arch Bridges

Rehabilitation Design and Construction of an RC Arch Bridge .... 773
"Leon" Lung-Yang Lai

Bridge Asset Management in the 21st Century; a Case Study .......... 781
Ricardo N. T. Teixeira and Nicholas W. G. Trump

The Maintenance of Silver Jubilee Bridge, UK ...................... 790
Ray Langley

Modeling the Behavior of Radially Pinned Brick Triplets .......... 798
Jonathan Haynes, Ahmed Naggasa, Levingshan Augustus-Nelson,
Feras El-Basir, and Abdulaziz Alsaleh

Influence of Temperature and Bearing Condition on the Vibration Characteristics of a Steel Arch Bridge ...................... 806
Yugo Fukuoka, Toshihiro Okumatsu, Shozo Nakamura,
and Takafumi Nishikawa

Multi-rib Arch Bridge Strengthened by Stayed-Cable and Field Test .................................................. 814
Yiqiang Xiang

Structural Reliability of Masonry Arch Bridges Subject to Natural Aging .............................................. 823
Gianluca Borgna, Mariano Angelo Zanini, Lorenzo Hofer,
Flora Faleschini, and Jose Matos

Dynamic Investigation and Short-Monitoring of an Historic Multi-span Masonry Arch Bridge ..................... 831
Andrea Benedetti, Mirco Tarozzi, Giacomo Pignagnoli,
and Claudia Martinelli

Retrofitting of Slender Masonry Arch Bridges ..................... 840
Paolo Zampieri, Nicolò Simoncello,
Jaime Gonzalez-Libreros, and Carlo Pellegrino
Contents

Errors and New Trends in Widening the Deck of a Road Bridge .......................... 849
Antonio Brencich, Alessandro Clemente, and Massimo Robiola

Sustainable Masonry Arch Railway Bridges .................................................. 858
Zoltán Orbán

Bridge Active Monitoring for Maintenance and Structural Safety ....................... 866
Bernardino Chiaia, Giulio Ventura, Cristina Zannini Quirini, and Giulia Marasco

Application of the COST TU1406 Quality Control Framework to a Stone Arch Bridge in Portugal ........................................... 874
João Amado and Cristina Costa

Dynamic Identification and Calibration of an Arch Steel Bridge Model for the Evaluation of Corrosion Effects .................................................. 883
Elisa Saler, Valentina Pernechele, Filippo Lorenzoni, Lisa Biaetto, and Francesca da Porto

"Reinforced Arch Method" as Retrofitting Technique for Masonry Arches. Experimental Tests and Numerical Modelling .......................... 892
Lorenzo Jurina and Edoardo O. Radaelli

Survey Methodologies and Intervention in Stone Masonry Arch Bridges: The Case Study of Esmoriz Bridge ........................................... 901
Esmeralda Paupério, Rúben Silva, Cristina Costa, and António Arêde

New and Future Trends in Arch Bridges

Integral Arch Bridge of Unlimited Length ..................................................... 911
Georg Gaßner, Kerstin Fuchs, and Johann Kollegger

New Directions for the Development of Arch Bridges in Poland ....................... 920
Jan Biliszczuk, Wojciech Lorenc, Edward Marcinków, and Krzysztof Topolewicz

New Span Range on Modular Bridges – The Arch Relevance .......................... 929
António André, Inês Ferraz, Hugo Coelho, José Fernandes, and Pedro Pacheco

Three Arch Pedestrian Bridges ................................................................. 938
Jiri Strasky and Radim Necas

Cable-Stiffened Hinged Arch Bridges ....................................................... 947
João Fonseca and Clemente Pinto

Correction to: Proceedings of ARCH 2019 ................................................ C1
António Arêde and Cristina Costa
