List of Figures xv

List of Tables xvii

Preface xix

1 General Principles 1
- 1.1 Writing Helps You to Learn . . . 2
- 1.2 Good Writing Reflects Clear Thinking . . . 2
- 1.3 Writing Is Difficult! . . . 2
- 1.4 Constructive Criticism Is Valuable . . . 3
- 1.5 Reading Improves Your Writing . . . 3
- 1.6 Analog Tools Are Not Dead . . . 3

2 Mathematical Writing 5
- 2.1 What Is a Theorem? . . . 6
- 2.2 Proofs . . . 7
- 2.3 The Role of Examples . . . 8
- 2.4 Definitions . . . 9
- 2.5 Notation . . . 11
- 2.6 Laying Out Mathematics in Sentences . . . 15
- 2.7 Words versus Symbols . . . 16
- 2.8 Displaying Equations . . . 18
- 2.9 Line Breaks . . . 19
- 2.10 Parallelism . . . 20
- 2.11 Roman versus Italic Font . . . 21
- 2.12 Ellipses . . . 22
- 2.13 Dos and Don'ts of Mathematical Writing . . . 23
  - 2.13.1 Avoid Unnecessary Symbols . . . 23
  - 2.13.2 Fine-tune Theorem Statements . . . 23
  - 2.13.3 Place Symbols Carefully . . . 23
  - 2.13.4 Choose between "The" or "A" . . . 24

2.13.5 Look for Notational Synonyms 24
2.13.6 Expand Equation References 25
2.14 Miscellaneous 26

3 English Usage **29**
3.1 A or An? 30
3.2 Abbreviations 30
3.3 Absolute Words 32
3.4 Acronyms and Initialisms 32
3.5 Active versus Passive 32
3.6 Adjective and Adverb Abuse 33
3.7 -age, -al, and -ology 34
3.8 Ambiguous "This" and "It" 35
3.9 Capitalization 35
3.10 Common Misspellings or Confusions 35
3.11 Consistency 37
3.12 Contractions 37
3.13 Dangling Participles 37
3.14 Distinctions 38
3.15 Double Negatives 40
3.16 Elegant Variation 41
3.17 False Ifs 41
3.18 Hyphenation 42
3.19 Linking Words 44
3.20 Lists 44
3.21 Misused and Ambiguous Words 47
3.22 Nouns 48
3.23 Numbers 49
3.24 Omit These Words? 49
3.25 Paragraphs 49
3.26 Punctuation 49
3.27 Repetition 51
3.28 Say It Better, Think It Gooder 52
3.29 Say It Succinctly 52
3.30 Saying What You Mean 53
3.31 Sentence Opening 53
3.32 Serial, or Oxford, Commas 53
3.33 Simplifying Words and Phrases 54
3.34 Spelling: Alternatives 54
3.35 Split Infinitives 57
3.36 Synonym Selection 58
3.37 Tenses 59

3.38 What to Call Yourself 60
3.39 Word Order 62
3.40 Zombie Nouns 62

4 The Writer's Bookshelf **65**
4.1 Dictionaries 66
4.2 Thesauruses 69
4.3 Usage Guides 69
4.4 Publishers' Style Guides 70
4.5 Technical Writing Guides 70
4.6 General Reading 71

5 When English Is a Foreign Language **73**
5.1 Thinking in English 74
5.2 Reading and Analyzing Other Papers 75
5.3 Articles 76
5.4 Ordinal Numbers 77
5.5 Double Negatives 77
5.6 Constructions 77
5.7 Connecting Words and Phrases 78
5.8 Distinctions 82
5.9 Keeping It Simple 83
5.10 Using a Dictionary 84
5.11 Punctuation 85
5.12 Computer Aids 86
5.13 English Language Qualifications 86
5.14 Further Reading 87

6 Writing a Paper **89**
6.1 Audience 90
6.2 Organization and Structure 91
6.3 Title 92
6.4 Author List 96
6.5 Date 99
6.6 Abstract 99
6.7 Keywords and Subject Classifications 102
6.8 The Introduction 103
6.9 Computational Experiments and Reproducible Research . 105
6.10 Tables 106
6.11 Graphs 111
6.12 Citing the References 112
6.13 The Conclusions 114

6.14 The Acknowledgments 115
6.15 Appendices 117
6.16 Supplementary Materials 117
6.17 Reference List 117
6.17.1 Digital Object Identifiers (DOIs) 119
6.17.2 Electronic References 120
6.17.3 ISBNs and ISSNs 122
6.18 Specifics and Deprecated Practices 122
6.18.1 Capitalization 122
6.18.2 Dangling Theorems 122
6.18.3 Footnotes 123
6.18.4 Numbering Mathematical Objects 123
6.18.5 Plagiarism 124
6.18.6 The Invalid Theorem 125
6.18.7 "This Paper Proves ..." 125

7 Revising a Draft **127**
7.1 How to Revise 128
7.2 Examples of Prose 129
7.3 Examples Involving Equations 137
7.4 A Revised Proof 139
7.5 A Draft Article for Improvement 141

8 TEX, LATEX, and BIBTEX **145**
8.1 What are TEX and LATEX? 146
8.2 LATEX Packages 147
8.3 Running LATEX, BIBTEX, and MakeIndex 148
8.4 New Paragraphs 148
8.5 Math Mode 149
8.6 LATEX Source Code Layout 150
8.7 Delimiters 150
8.8 Constants and Mathematical Functions in Roman 151
8.9 Further Math Fonts and Symbols 152
8.10 Multiline Displayed Equations 152
8.11 Text in Displayed Equations 153
8.12 Macros 154
8.13 Labels 155
8.14 Line Breaks in Formulas 155
8.15 Ellipses 156
8.16 Spacing in Formulas 156
8.17 Fine-tuning Spacing in Formulas 158
8.18 Miscellaneous Mathematics 159

8.19 Dashes 161
8.20 URLs 162
8.21 Fonts 162
8.22 Hyphenation Exceptions 163
8.23 Quotes, Dates, Lists, and Paragraphs 165
8.24 Annotating a Document 166
8.25 Page Layout 166
8.26 Ties and Spaces 167
8.27 Algorithms and Program Listings 168
8.28 Units 168
8.29 Tables 169
8.30 Figures 169
8.31 Chemical Formulas 171
8.32 Obsolete Usage 171
8.33 Debugging 172
8.34 BIBTEX 173
8.35 Further Sources of Information 180

9 Workflow **183**
9.1 Text Editors 184
9.2 Outlining 186
9.3 Plain Text and Markup Languages 186
9.4 Organizing Files 187
9.5 Version Control and Backups 189
9.6 Diffs 190
9.7 Spellchecking, Filters, and Pipes 190
9.8 Style and Grammar Checkers 192
9.9 Literate Programming and Reproducible Research 194
9.10 Color 194
9.11 Further Reading 195

10 Publishing a Paper **197**
10.1 Choosing a Journal 198
10.2 Submitting a Manuscript 200
10.3 ORCID 202
10.4 The Editing and Refereeing Process 203
10.4.1 Responding to Referees 203
10.5 Self-archiving 205
10.6 The Role of the Copy Editor 205
10.7 Checking the Proofs 206
10.8 Copyright and Licensing Issues 210
10.9 A SIAM Journal Article 211

10.10 Errata 213

11 Refereeing and Reviewing **217**
11.1 How to Referee a Paper 218
11.2 How to Review a Book Proposal 221
11.3 How to Review a Book 222

12 Writing a Talk **223**
12.1 What Is a Talk? 224
12.2 Designing the Talk 225
12.3 Writing the Slides 227
12.3.1 Legibility of the Slides 229
12.3.2 Tables 229
12.3.3 Graphs 229
12.3.4 Videos, Special Effects 230
12.3.5 How Many Slides? 230
12.4 Preparing Slides with LaTeX 230
12.5 Example Slides 235
12.6 Further Reading 235

13 Giving a Talk **239**
13.1 Preparation 240
13.2 Delivery 242
13.3 Chairing a Talk 246
13.4 Further Reading 247

14 Preparing a Poster **249**
14.1 What Is a Poster? 250
14.2 A Poster Tells a Story 250
14.3 Designing Your Poster 251
14.4 A New Approach to Poster Design 252
14.5 Transportation and the Poster Session 253
14.6 E-Posters 253
14.7 Poster Blitz 254
14.8 A Word to Conference Organizers 254
14.9 Example Posters and Further Reading 254

15 Writing and Defending a Thesis **257**
15.1 The Purpose of a Thesis 258
15.2 Content 258
15.3 Presentation 260
15.4 The Thesis Defense 261
15.5 Further Reading 262

16 Writing a Book **263**
16.1 Why Write a Book? 264
16.2 Audience 265
16.3 Coauthorship 265
16.4 Exercises and Problems 266
16.5 Revision 266
16.6 The Preface 267
16.7 The Book Proposal 267
16.8 Choosing the Publisher 268
16.9 Copy Editing 269
16.10 Indexing a Book 269
16.11 LaTeXing a Book 270
16.11.1 File Arrangement 270
16.11.2 The `backref` Package 270
16.11.3 Bibliographies by Chapter 271
16.11.4 Short Figure and Table Captions 271
16.11.5 Informative Headers 271
16.11.6 Source Code and Preparation of Final Book 271
16.11.7 Fine-tuning 272

17 Preparing an Index **275**
17.1 The Choice of Indexer 276
17.2 How to Prepare an Index 277
17.3 Index Length 281
17.4 Indexing with LaTeX and MakeIndex 281
17.5 Indexing Miscellanea 285
17.6 Further Reading 285

18 Writing a Blog Post **287**
18.1 What to Blog About 288
18.2 Writing the Post 290

19 Information Sources **293**
19.1 Citation Statistics 294
19.2 Review and Abstract Services 295
19.3 Library Classification Schemes 295

A The Greek Alphabet **297**

B Summary of TeX and LaTeX Symbols **299**

Glossary **309**

Bibliography **315**

Index **341**
