| Preface  | x    |
| Acknowledgments                                  | xii  |
| About the Companion website                      | xiii |
| 1 Paleontology as a science                      | 1    |
| 2 Stratigraphy                                   | 25   |
| 3 Paleogeography and paleoclimates               | 50   |
| 4 Paleoecology                                   | 80   |
| 5 Taphonomy and the quality of the fossil record | 115  |
| 6 Fossil form and function                       | 140  |
| 7 Macroevolution and the tree of life            | 165  |
| 8 Biodiversity, extinction, and mass extinction  | 193  |
| 9 The origin of life                             | 223  |
| 10 Protists                                      | 248  |
| 11 Origin and expansion of the metazoans         | 279  |
| 12 The basal metazoans: sponges and corals       | 306  |
| 13 Lophophorates 1: brachiopods and bryozoans    | 344  |
| 14 Lophotrochozoans 2: mollusks and annelids     | 372  |
| 15 Ecdysozoa: arthropods                         | 412  |
| 16 Deuterostomes: echinoderms and hemichordates  | 445  |
| 17 Fishes and basal tetrapods                    | 486  |
| 18 Dinosaurs and mammals                         | 512  |
| 19 Fossil plants and fungi                       | 538  |
| 20 Trace fossils                                 | 570  |
| Finale   | 594  |
| Glossary   | 598  |
| Appendix 1: Stratigraphic chart                  | 617  |
| Appendix 2: Paleogeographic maps                 | 619  |
| Index  | 620  |
