Band 61

**Xiaoxin Zhang**

**Behaviour Comparison and Process Optimization  
of Al and Sb Zone Refining**

Shaker Verlag  
Düren 2020

## Table of Contents

<b>Extended Abstract.....</b>	<b>XI</b>
<b>1    Introduction .....</b>	<b>1</b>
<b>2    Background.....</b>	<b>3</b>
<b>2.1    High purity Aluminum .....</b>	<b>3</b>
2.1.1    Definition of high purity Aluminum .....	3
2.1.2    Application of high purity Aluminum.....	4
2.1.3    Production of high purity Aluminum.....	6
2.1.3.1    Worldwide production distribution of high purity Al.....	6
2.1.3.2    Production technology of high purity Al .....	7
<b>2.2    High purity Antimony.....</b>	<b>13</b>
2.2.1    Application of high purity Antimony.....	13
2.2.2    Production of high purity Antimony .....	15
2.2.2.1    Production distribution of commercial purity Sb.....	16
2.2.2.2    Production process of commercial pure Antimony .....	17
2.2.2.3    Production technology of high purity Antimony .....	20
<b>2.3    Introduction of zone refining .....</b>	<b>22</b>
2.3.1    Zone refining mechanism.....	23
2.3.1.1    Basic equations in zone refining .....	23
2.3.1.2    Zone refining influencing factors.....	26
2.3.2    Variants of zone refining .....	27
2.3.3    Possibilities to improve zone refining efficiency .....	31
2.3.3.1    Optimizing experimental parameters .....	31
2.3.3.2    Cropping and connecting .....	32
2.3.3.3    Inclination of the charging bar .....	33
2.3.3.4    Application of an electric current for impurity transport.....	34

---

## Table of Contents

2.3.4	Numerical models to describe zone refining process .....	34
2.3.5	Assessment of modelling versus experiment .....	38
2.4	<b>Mechanism of vacuum distillation</b> .....	38
2.5	<b>High purity analysis methods</b> .....	41
3	<b>Motivation and Targets</b> .....	43
4	<b>Experimental and Modeling Investigations</b> .....	45
4.1	<b>Experimental concept and workflow</b> .....	45
4.1.1	Experimental concept .....	45
4.1.2	General workflow .....	46
4.2	<b>Numerical simulation</b> .....	49
4.2.1	Zone length optimization through Spim model .....	49
4.2.2	Refining efficiency comparison between using the optimum zone length and others .....	53
4.2.3	Chapter conclusion .....	54
4.3	<b>Zone refining of Aluminum</b> .....	55
4.3.1	<b>Realization of the zone length measurement with the infrared camera</b> .....	56
4.3.1.1	IR camera temperature calibration .....	57
4.3.1.2	Zone length measurement through IR camera .....	57
4.3.1.3	Sectional summary .....	61
4.3.2	<b>Variation of the crystal growth rate and of the zone length during zone refining of Aluminum</b> .....	62
4.3.2.1	Experimental procedure .....	62
4.3.2.1.1	Experimental design .....	62
4.3.2.1.2	Data analysis .....	63
4.3.2.2	Results and discussion .....	65
4.3.2.2.1	Characterization of zone refining process .....	65
4.3.2.2.2	Dependency of zone length on power and heater movement velocity .....	68
4.3.2.2.3	Crystal growth rate variation .....	70

## Table of Contents

---

4.3.2.3	Sectional Summary .....	72
<b>4.3.3</b>	<b>Influence of the zone length on the refining efficiency .....</b>	<b>74</b>
4.3.3.1	Experimental process .....	74
4.3.3.2	Results and discussion .....	76
4.3.3.2.1	Real zone length at each zone pass measured by IR camera.....	76
4.3.3.2.2	Zone refining efficiency under different zone length combinations .....	77
4.3.3.3	Sectional summary .....	78
<b>4.3.4</b>	<b>Influence of initial concentration on refining efficiency .....</b>	<b>79</b>
4.3.4.1	Experimental process .....	79
4.3.4.2	Results and discussion .....	80
4.3.4.2.1	4N pure Aluminum.....	80
4.3.4.2.2	2N8 pure Aluminum.....	81
4.3.4.2.3	Recycled Aluminum.....	82
4.3.4.3	Sectional summary .....	84
<b>4.3.5</b>	<b>Chapter conclusion .....</b>	<b>85</b>
<b>4.4</b>	<b>Zone refining of Antimony .....</b>	<b>87</b>
<b>4.4.1</b>	<b>Separation behavior of As and Pb during vacuum distillation .....</b>	<b>88</b>
4.4.1.1	Fundamental of vacuum distillation of Sb .....	89
4.4.1.2	Experimental process .....	89
4.4.1.3	Results and discussion .....	91
4.4.1.4	Sectional summary .....	94
<b>4.4.2</b>	<b>Influence of the heater moving velocity on the refining efficiency of Antimony zone refining .....</b>	<b>96</b>
4.4.2.1	Experimental process .....	96
4.4.2.1.1	Measurement of Arsenic evaporation.....	96
4.4.2.1.2	Zone refining of Sb under different heater moving velocities .....	97
4.4.2.2	Results and discussion .....	99
4.4.2.2.1	Evaporation of Arsenic.....	99

## Table of Contents

---

4.4.2.2.2 Impurity reduction and effective distribution coefficients of impurities .....	100
4.4.2.2.3 Metallographic structure of Sb bar after zone refining .....	107
4.4.2.3    Sectional summary .....	108
<b>4.4.3    Influence of zone length on the refining efficiency of Antimony .....</b>	<b>109</b>
4.4.3.1    Experimental process .....	109
4.4.3.2    Results and discussion .....	110
4.4.3.3    Sectional summary .....	115
<b>4.4.4    Influence of additives on As-removal during both vacuum distillation and zone refining processes of Antimony .....</b>	<b>117</b>
4.4.4.1    Selection of additives .....	117
4.4.4.2    Experimental process .....	119
4.4.4.2.1 Production of Sb-Al and Sb-Zn master alloys .....	119
4.4.4.2.2 Vacuum distillation of Sb-Al and Sb Zn alloys .....	120
4.4.4.2.3 Zone refining of Sb-Al and Sb-Zn alloys.....	120
4.4.4.3    Results and discussion .....	121
4.4.4.3.1 Vacuum distillation of Sb-Al and Sb Zn alloys .....	121
4.4.4.3.2 Zone refining of Sb-Al and Sb-Zn alloys.....	124
4.4.4.4    Sectional summary .....	128
<b>4.4.5    Chapter conclusion.....</b>	<b>130</b>
<b>5    General Assessment.....</b>	<b>132</b>
<b>6    Outlook.....</b>	<b>134</b>
<b>Reference.....</b>	<b>136</b>
<b>Appendix .....</b>	<b>143</b>
<b>Acknowledgement .....</b>	<b>157</b>
