Contents

List of Figures	xi
List of Tables	xvii
Preface.....	xix
Acknowledgments	xxiii
Authors	xxv
List of Abbreviations	xxvii
1. Reactive Separation Processes as a Key Strategy for Sustainable Use of Natural Resources: Definition, Advantages and Disadvantages, Phenomenology.....	1
1.1 Reactive Separation Processes as Alternative for Improving the Processes Sustainability.....	1
1.2 Reactive Separation Processes: An Example of Intensification.....	5
1.3 Reactive Separation Processes: Definition	7
1.4 Phenomenology	9
1.5 Advantages and Disadvantages	13
References	15
2. Basic Aspects of Reactive Separation Processes: Classification, Range of Applications, Reactive Separation Processes in the Industry, Design Methods and Strategies, Successful Cases Improving Process Sustainability	19
2.1 Classification of Reactive Separation Processes	19
2.2 Range of Applications.....	22
2.3 Design Methods and Strategies.....	22
2.3.1 Process Synthesis.....	22
2.3.2 Modeling and Simulation.....	30
2.4 Successful Cases Improving Process Sustainability.....	32
2.4.1 Ethanol Production	32
2.4.2 Biodiesel Through Reactive Absorption	33
2.4.3 Ethyl Acetate: Comparison of Technologies.....	34
References	34
3. Reactive Distillation: Uses and Applications, Analysis of the Statics, Modeling and Simulation, Case Study	39
3.1 Introduction.....	39
3.2 Model.....	44
3.3 Strategy and Basic Concepts of the Analysis of the Statics	46
3.4 Trajectory Construction	50

3.5	The Basic Algorithm of the Analysis of the Statics.....	53
3.6	Case Study: Mesityl Oxide	65
3.7	Other Approaches to Analyze and Design Reactive Distillation Processes	68
3.7.1	RD in Dividing Wall Columns	68
3.7.2	Enzymatic RD	69
3.8	Conclusions	71
	References	71
4.	Reactive Extraction and Extractive Fermentation: Uses and Applications, Conceptual Design, Modeling and Simulation, Case Study.....	77
4.1	Classification of Reactive Extraction Processes by Chemical Type.....	77
4.1.1	Reactive Extraction.....	79
4.1.2	Extractive Reaction.....	79
4.1.3	Extractive Fermentation	79
4.2	Modeling of a Reactor-Extractor.....	80
4.2.1	Equilibrium Model for Reactive Extraction Processes.....	81
4.3	Modeling of Extractive Fermentation	83
4.4	Case Study	87
4.4.1	Analysis of a Reactive Extraction Process for Biodiesel Production Using a Lipase Immobilized on Magnetic Nanostructure.....	87
4.4.2	Liquid-Liquid Equilibrium Equation.....	89
4.4.3	Simulation Procedure	90
4.4.4	Reactive Extraction Process	91
4.4.5	Continuous Process.....	93
4.4.6	Multistage Reactor Extractor	94
4.4.7	Location of the Biocatalyst Using Magnetic Fields.....	94
4.4.8	Conclusions	96
	References	96
5.	Reactive Absorption: Uses and Applications, Conceptual Design, Modeling and Simulation, Case Study.....	101
5.1	Definition	101
5.2	Classification	102
5.3	Advantages and Disadvantages	103
5.4	Uses and Applications	104
5.5	Conceptual Design	105
5.6	Modeling and Simulation.....	106
5.7	Case Study	108
5.7.1	Considerations and Assumptions.....	108
5.7.2	Input Data.....	109
5.7.3	Modeling.....	109

5.7.4	Solution	112
5.7.5	Results	113
5.8	RAB Contributions to Process Sustainability	115
	References	115
6.	Reactive Adsorption: Uses and Applications, Conceptual Design, Modeling and Simulation, Case Study	119
6.1	Definition	119
6.2	Classification	120
6.3	Advantages and Disadvantages	122
6.4	Uses and Applications	123
6.5	Conceptual Design	123
6.6	Modeling and Simulation	125
6.7	Case Study	126
6.7.1	Adsorption Isotherms	128
6.7.2	Kinetic Parameters of the Reaction (Model Prediction).....	129
6.7.3	Comparison	131
6.7.4	Conclusions for this Case	131
6.8	RAd Contributions to Process Sustainability	131
	References	132
7.	Reactive Membranes: Uses and Applications, Conceptual Design, Modeling and Simulation, Case Study	135
7.1	Fermentation and Membrane Technologies	139
7.2	Case Study	144
	References	145
8.	Supercritical Fluids Extraction and Reaction: Conceptual Design, Modeling and Simulation, Case Study	149
8.1	Supercritical Fluid Extraction Concept	149
8.2	Modeling and Simulation	153
8.2.1	Solubility	153
8.3	Case Study	154
8.3.1	Supercritical Pretreatment	155
8.3.2	Techno-economic Results	157
	References	159
9.	Reactive Separation Processes for Biomass Conversion and Biorefineries	163
9.1	Biotechnological Processes	164
9.2	Biorefineries	165
9.2.1	Optimization	165
9.2.2	Early-Stage Approaches	165
9.2.3	Knowledge-Based Approach	166
9.2.4	Sensitivity Analysis	167

9.3	Raw Materials of Biorefineries.....	167
9.4	Reactive Separation Processes in Biomass Conversion.....	168
9.4.1	Case Study—Extractive Fermentation.....	170
9.4.1.1	Graphing the Residue Curves Map	173
9.4.1.2	Identification of Concentration Simplex (Separation Regions)	175
9.5	Application of Thermodynamic–Topological Analysis	176
9.5.1	Extractive Fermentation	176
9.5.2	Distillation Columns.....	178
9.5.2.1	Distillation Column	178
9.5.2.2	Rectification Column	181
9.6	Concluding Remarks.....	183
	References	183
10.	Future and Perspectives	189
	Index.....	191
