Achieving Success with the Engineering Dissertation

Contents

1	What is the Dissertation?	1
1.1	Purpose and Structure	3
1.1.1	What's a Dissertation for?	3
1.1.2	Dealing with Uncertainty	3
1.1.3	The Structure of the Project	4
1.1.4	The Structure of the Report	5
1.2	Types of Project	5
1.2.1	What Types of Projects Are Suitable for an Engineering Dissertation?	5
1.2.2	Computational-Based Investigation Projects	7
1.2.3	Design Projects	7
1.2.4	Feasibility Studies	8
1.2.5	Physical Experiments	8
1.2.6	Theoretical Research Projects	8
1.2.7	Test and Evaluation (T&E) Projects	9
1.3	The Project Client	9
1.3.1	Introduction	9
1.3.2	Engaging the Client	11
1.4	Whose Project is it?	11
1.5	Dissertation Terminology	13
2	Objectives and Expectations	21
2.1	The Student	23
2.1.1	The Objectives	23
2.1.2	What not to Expect	23
2.1.3	What Actually to Expect	23
2.2	The Supervisor	24
2.2.1	The Supervisor's Role	24
2.2.2	Relationship with the Student	25
2.2.3	Relationship with the Client	26

2.3	The Project Client	26
2.3.1	Who Is the Client?	26
2.3.2	Client Expectations	27
2.3.3	Future Employment	27
2.4	Other Stakeholders	28
2.4.1	Identifying Stakeholders	28
2.4.2	Stakeholder Relationships and Communication	29
2.4.3	Ethical Approval	29
3	How to Be the Student Who Achieves Success	31
3.1	Defining Success	33
3.2	Before You Start the Project	33
3.3	As You Start the Project	36
3.4	While You Are Doing the Project	39
3.5	Checklist	39
3.6	Suggestions for Further Reading	42
4	Selecting the Project	43
4.1	Advice to Students	45
4.1.1	Owning Your Learning	45
4.1.2	Selecting the Project and Supervisor	45
4.2	Advice to Supervisors	47
4.2.1	The Value of Student Projects to Student Engagement	47
4.2.2	Fitting in a Student Project with Your Research	47
4.2.3	Managing Expectations—Differences Between Undergraduate and Postgraduate Projects	48
4.2.4	Collaborating with Industry	48
4.2.5	The Project Acquisition Process—Selecting a Suitable Student	49
4.2.6	The Etiquette of Dissertation Supervision	50
4.2.7	Feedback	51
4.3	Advice to Project Clients	51
4.3.1	The Value of Industry-University Collaboration	51
4.3.2	Finding the Right Collaborator	52
4.3.3	Managing Expectations	54
4.3.4	Etiquette	56
4.3.5	Checklist	57
5	The Opening Literature Review	59
5.1	Beginning the Quest	61
5.2	Searching and Making Notes	62
5.3	Structuring the Literature Review	63
5.4	Composing the Literature Review	64

- 5.5 Formally Recording a Reference 65
- 5.6 Maintaining the Literature Review as You Work 66
- 6 The Project Plan 67**
 - 6.1 The Project Plan and Time-Management 69
 - 6.1.1 Introducing the Project Plan and Planning 69
 - 6.1.2 Preparing the Project Plan 69
 - 6.1.3 A Proposal 70
 - 6.1.4 Defining the Objectives 71
 - 6.1.5 Detailed Time Planning 71
 - 6.1.6 Pre-proposal Time-Management Exercise 72
 - 6.1.7 How Much Time Should You Spend on Your Dissertation Project? 73
 - 6.1.8 Using Project Management Techniques and Setting Milestones for Your Project Plan 74
 - 6.1.9 Using CPM on an Individual Project—One Participant 75
 - 6.1.10 Using Project Run-Offs to Finesse Your (Individual) Project Plan 77
 - 6.1.11 Using CPM on a Group Project—Team of People 79
 - 6.1.12 Checklist for Time Management of Your Project 84
 - 6.2 The Project Plan and Resources 86
 - 6.2.1 About Resources 86
 - 6.2.2 Defining Tasks and Understanding Equipment 87
 - 6.2.3 Consumables 89
 - 6.2.4 Software 89
 - 6.2.5 Risk Management 89
 - 6.2.6 Technicians 90
 - 6.2.7 Administrators 90
 - 6.2.8 Vital Information 92
 - 6.3 Budget 92
 - 6.3.1 About Budgets 92
 - 6.3.2 Relating the Budget to the Project Plan 92
 - 6.3.3 Spending the Money 93
 - 6.3.4 From Estimated to Actual Budgets 93
- 7 Designing the Dissertation 95**
 - 7.1 Designing Feasibility Studies 97
 - 7.1.1 What is a Feasibility Study? 97
 - 7.1.2 Defining the Feasibility Study Topic and Questions 97
 - 7.1.3 Designing and Commencing the Study 98
 - 7.1.4 The Ongoing Writing Journey 99
 - 7.1.5 What is Not in a Feasibility Study? 99

7.2	Designing Experiments	100
7.2.1	About Experiments	100
7.2.2	Defining the Question	100
7.2.3	Do You Need a Hypothesis?	101
7.2.4	Control, Dependent and Independent Variables	101
7.2.5	Now Design Your Experiment	102
7.2.6	Writing Up Your Experiment	103
7.3	Designing Products	105
7.3.1	What is Product Design?	105
7.3.2	Defining the Product Design Specification	106
7.3.3	Following the Design Process	107
7.3.4	Using engineering Figures of Merit (FoM)	108
7.3.5	Presenting Your Design	111
7.3.6	Prototyping	111
7.4	Designing Surveys	113
7.4.1	Survey as a Means of Gathering Data	113
7.4.2	The Need for Ethical Approval	114
7.4.3	Consideration of Legal Compliance Regarding Personal Data	115
7.4.4	Design of Survey Questions	116
7.4.5	Who Are Your Survey Participants?	118
7.4.6	The Survey Instrument	118
7.4.7	Questionnaires	119
7.4.8	Interviews	119
7.4.9	Focus Groups	120
7.4.10	Product Testing	121
7.4.11	Storing the Data	121
7.4.12	Testing the Survey Instrument	121
8	Acting Professionally	125
8.1	About Acting Professionally	127
8.2	Meeting Etiquette	127
8.3	Dress Codes	128
8.4	Phone and Electronic Messaging	130
8.5	Monitoring and Control of Your Project	132
8.6	When Things are Going Wrong	132
8.7	Managing Discontent	133
9	Presenting Data	135
9.1	Quantitative Data and Illustrations	137
9.1.1	Introduction	137
9.1.2	Tables, and Numbers Within Text	138
9.1.3	Graphical Data Presentation	140
9.1.4	Consideration of Errors	141

9.1.5	Sketches, Schematics and Illustrations	142
9.1.6	Drawings	146
9.1.7	Solutions to Problem	147
9.2	Qualitative Data	147
9.2.1	Types and Sources of Qualitative Data	147
9.2.2	Logic—Foundation of Analysis	148
9.2.3	Presenting Qualitative Data	149
9.2.4	Presenting Interviews	149
9.2.5	Critical Discourse Analysis	151
9.2.6	Discussion of Results	154
9.2.7	Numerical Expression of Opinion	155
10	Presenting Engineering Analysis	157
10.1	Introduction	159
10.2	Carrying Out, Then Writing Up Your Analysis.	159
10.3	Writing Up Your Engineering Analysis	161
10.4	An Example of How to Write Analysis—Some Take-Off Distance Calculations	162
11	Drawing and Presenting Conclusions	165
11.1	Introduction: About Conclusions	167
11.2	Type of Conclusions	167
11.3	Further Aspects to Conclusions	170
12	Making Recommendations	171
12.1	Introduction: Report Recommendations	173
12.2	Types of Recommendation and How They’re Written	173
13	Reflection	177
13.1	What Have You Learned from Doing This Project?	179
13.2	Lifelong Learning, Part of Being a Professional	179
13.3	A Model for Reflection	180
13.4	The Role of Reflection in Group Projects	183
13.5	How is Reflection, or a Learning Log, Assessed	184
14	The Output	185
14.1	The Final Report	187
14.1.1	Overview of the Structure of the Report	187
14.1.2	When Should You Start Writing the Final Report?	187
14.1.3	How Should You Write the Report?	187
14.1.4	Contents of the Final Report	187
14.1.5	Assessment of the Final Report	192

14.2	The Presentation	193
14.2.1	The Purpose of the Presentation	193
14.2.2	The Audience for the Presentation	193
14.2.3	Planning	195
14.2.4	Presentation After Submission of the Final Report	195
14.2.5	Presentation Prior to Completion of the Final Report	195
14.2.6	Presentations Other Than Live Performance	196
14.3	Intellectual Property	197
14.3.1	Intellectual Property (IP) and the Dissertation	197
14.3.2	Who Owns the Intellectual Property?	198
14.3.3	Patents	199
14.3.4	Copyright	201
14.3.5	Non-disclosure Agreements	201
14.3.6	A General Caution About Intellectual Property and Its Protection	202
15	The Dissertation and the Job	203
15.1	The Dissertation and the Job Application	205
15.1.1	Introduction to Job Applications	205
15.1.2	Before You Start Making Applications Make Some Decisions	205
15.1.3	Talk About Your Project—Including Friends and Family	207
15.1.4	Be Prepared to Talk to Random Strangers	207
15.1.5	Find Out Where the Specialists Are and Talk to Them	208
15.1.6	Present About Your Project—Present Around the World (PATW)	208
15.1.7	Write About Your Project	209
15.2	The Dissertation and the Job Interview	209
15.2.1	Introduction	209
15.2.2	Interview Technique	210
15.2.3	For More Advise About Interview Questions	211
15.3	The Dissertation and the PhD Application	211
15.3.1	Introduction	211
15.3.2	Demonstrating Your Potential as a Researcher	212
15.3.3	Getting a Reference for a PhD Application	213
15.4	The Dissertation as You Start Your First Job	214
15.4.1	What Has Your Dissertation Got to Do with Starting Work?	214
15.4.2	Transferrable Skills	214

15.4.3	Subject Knowledge	215
15.4.4	In Summary	215
16	Publishing Onwards	217
16.1	Research Posters	219
16.1.1	What’s a Research Poster?	219
16.1.2	How to Prepare a Research Poster	219
16.1.3	Example of a Good Poster	220
16.1.4	Example of a Bad Poster	220
16.1.5	What to Print Your Poster On?	220
16.1.6	At the Poster Session	223
16.1.7	Faults in the Bad Poster	223
16.2	Submitting and Presenting Conference Papers	224
16.2.1	What is a Conference?	224
16.2.2	What Exactly is a Conference Paper?	225
16.2.3	Applying to Present at a Conference	225
16.2.4	Presenting	225
16.2.5	Conference Follow-Up	227
16.3	Publishing in Academic Journals and Books from Your Dissertation	227
16.3.1	About Publishing in Academic Journals	227
16.3.2	Involving Others in Writing a Paper	228
16.3.3	Beware of Predatory Publishers	229
16.3.4	In Summary	230
	Appendix A: Referencing, Citing and Quoting	233
	Appendix B: Using Engineering Standards	245
	Appendix C: Competitions	249
	Appendix D: About Mr William Heath Robinson	265
	Index	273
