A SCIENCE PUBLISHERS BOOK

Contents

<i>Foreword</i>	v
<i>Acknowledgment</i>	vii
1. Introduction to Tribology	1
1.1 Introduction	1
1.2 History of Tribology	3
1.3 Development and Future Challenges	6
1.4 Knowledge of Tribology: Education, Publications and Researches	8
References	19
2. Tribo-material Properties	20
2.1 Introduction	20
2.2 Volume Properties	20
2.2.1 Elastic Deformation	20
2.2.2 Plastic Deformation	22
2.2.3 Creep Deformation	23
2.2.4 Hardness	24
2.2.5 Fatigue and Fracture Mechanics	25
2.3 Thermal Properties	27
2.4 Surface Properties	27
2.4.1 Adhesion	27
2.4.2 Surface Reactivity	30
2.4.3 Surface Roughness	31
2.5 Lubricant Properties	35
2.5.1 Density and Specific Gravity	36
2.5.2 Viscosity	36
2.5.3 Thermal Properties	38
2.5.4 Other Properties	39
References	41
3. Friction	43
3.1 Introduction	43
3.2 Contact of Solid Surfaces	43
3.3 Theories of Friction	44
3.3.1 Adhesion Theory of Friction	44
3.3.2 Junction Growth Theory	47
3.3.3 Asperity Interlocking Theory	48
3.3.4 Stick-Slip Theory	48
3.4 Laws of Sliding Friction	49
3.5 Laws of Rolling Friction	50
3.6 Factors Affecting Friction and Wear	51

3.6.1	Applied Load	52
3.6.2	Temperature	54
3.6.3	Sliding Speed	54
3.6.4	Material Compatibility	56
3.6.5	Surface Roughness	56
3.6.6	Environment and Surface Films	58
3.7	Friction Measurements	58
3.7.1	Sliding Friction Measurement	58
3.7.2	Rolling Friction Measurement	62
3.8	Frictional Heating	64
3.9	Contact Surface Temperature	64
3.10	Contact Temperature Measurement	67
	References	69
4.	Wear	72
4.1	Introduction	72
4.2	Wear Mechanisms	72
4.2.1	Adhesive Wear	72
4.2.2	Abrasive Wear	75
4.2.3	Surface Fatigue Wear	77
4.2.4	Corrosive Wear	79
4.2.5	Fretting Wear	80
4.2.6	Impact Wear	82
4.2.7	Erosive Wear	83
4.2.8	Thermal Wear	86
4.2.9	Other Types of Wear	87
4.3	Wear-regime Maps	87
4.4	Generation of Wear Debris	90
4.5	Measurement of Wear (Tribo-measurements)	94
4.5.1	Sliding Wear Test	96
4.5.2	Rolling Wear Test	97
4.5.3	Scratch Wear Test	99
4.5.4	Abrasion Wear Test	100
4.5.5	Erosion Wear Test	101
4.5.6	Impact Wear Test	102
	References	102
5.	Lubricants and Lubrication	105
5.1	Introduction	105
5.2	Types of Lubricants	106
5.2.1	Solid Lubricants	106
5.2.2	Liquid Lubricants	109
5.2.3	Gaseous Lubricants	110
5.3	Fluid Film Lubrication	110
5.3.1	Laminar and Turbulent Flow	111
5.3.2	Derivation of Reynolds Equation	111
5.3.3	Lubrication Regimes	114
5.3.4	Hydrostatic Lubrication	122
5.4	Gas-lubricated Bearings	125
5.4.1	Definition and Background	125
5.4.2	Fundamentals and Design Features	126
5.4.3	Classification and Configurations	128

5.5	Solid Film Lubrication	130
5.5.1	Solid Lubrication Mechanisms	130
5.5.2	Advantages and Applications of Solid Lubrication	130
5.5.3	Disadvantages of Solid Lubrication	130
5.5.4	Friction and Wear Testing of Solid Lubricants	131
5.6	Grease Lubrication	132
5.6.1	Definition	132
5.6.2	Scientific Fundamentals	133
5.6.3	Applications	134
5.6.4	Testing of Grease	134
5.7	Additives	136
	References	137
6.	Tribology of Polymer and their Composites	141
6.1	Introduction	141
6.2	Wear of Polymers	141
6.2.1	Abrasive Wear	142
6.2.2	Adhesive Wear	143
6.2.3	Surface Fatigue Wear	144
6.2.4	Other Forms of Wear	144
6.3	Friction of Polymers	145
6.4	Severity Parameters for Friction and Wear of Polymers	147
6.4.1	Sliding Speed	147
6.4.2	Sliding Temperature	148
6.4.3	Counterface Roughness	148
6.4.4	Applied Load and Contact Pressure	149
6.4.5	Material Properties	150
6.4.6	Humidity and Surface Wettability	151
6.5	Lubrication	152
6.5.1	External Lubrication	153
6.5.2	Internal Lubrication	155
6.5.3	Factors Contributing to Water Lubricated Polymers	157
6.6	Sliding Mechanics of Polymers	158
6.6.1	Transfer Film Formation	158
6.6.2	Wear Regimes	158
6.6.3	p v -limit	160
6.6.4	Thermal and Chemical Degradation	162
6.6.5	Generation of Wear Debris	163
6.6.6	Surface and Subsurface Cracking	164
6.7	Wear and Friction of Polymer Composites	165
6.7.1	Mechanisms of Failure	166
6.7.2	Continuous Unidirectional Fiber Composites	166
6.7.3	Short Fiber Reinforced Composites	168
6.7.4	Particulate-filled Composites	169
6.7.5	Laminated Fiber Reinforced Composite	170
	References	172
7.	Tribology of Automotive Components	176
7.1	Introduction	176
7.2	Piston Ring	177
7.2.1	Piston Ring Assembly	177

7.2.2	Piston Ring Groove	178
7.2.3	Tribology of Piston Ring	178
7.3	Valvetrain Mechanism	181
7.3.1	Valve and Valve Seat	182
7.3.2	Cam and Tappet	185
7.4	Crankshaft Bearing	187
7.5	Clutches and Brakes	190
7.5.1	Clutches	190
7.5.2	Brakes	194
7.6	Automotive Lubricants	199
7.6.1	Engine Oils	199
7.6.2	Transmission Fluids	200
7.6.3	Gear Lubricants	201
	References	202
8.	Friction and Wear in Extreme Conditions	206
8.1	Introduction	206
8.2	Challenges in Tribology	206
8.3	Friction and Wear Under Extreme Loads	207
8.3.1	Wheel-rail Interactions	207
8.3.2	Effect of Cyclic Loading on Wear of Polymers	210
8.4	Micro/Nano-Scale Friction and Wear	212
8.5	Friction and Wear at Extreme Temperatures	215
8.5.1	Mechanisms of Wear at High Temperatures	216
8.5.2	Effect of Surface Oxidation	218
8.5.3	Effect of Applied Load	221
8.5.4	Effect of Surface Texture	222
8.5.5	High Temperature Tribometers	224
8.6	Friction and Wear at Extremely Low Temperatures	224
8.6.1	The Challenge in Wheel/Rail Interaction	224
8.6.2	Sliding on Snow and Ice	226
8.6.3	Low Temperature Tribometers (Cryotribometers)	230
8.7	Friction and Wear at High Speeds	231
8.8	Friction and Wear Under Vacuum Conditions	234
8.8.1	Friction in Vacuum	234
8.8.2	Wear in Vacuum	239
8.8.3	Vacuum Tribometers	240
8.9	Wear in Mining and Mineral Processing	241
8.10	Geotribology	242
8.11	Abrasion of Concrete Paver Blocks	243
8.11.1	Effect of Slag Replacement Level	244
8.11.2	Effect of Slag Content (Mix Ratio)	245
	References	246
9.	Lubrication and Coating Challenges in Extreme Conditions	250
9.1	Introduction	250
9.2	Lubrication Challenges	250
9.2.1	Lubrication at High Temperatures	250
9.2.2	Lubrication at Low Temperatures and in Cryogenic Environments	251
9.2.3	Lubrication Under Extreme Pressures	255
9.2.4	Lubrication in Vacuum (Space Tribology)	257
9.2.5	Lubrication in High Dust and Dirty Areas	258

9.2.6	Lubrication in Radiation Environments	258
9.2.7	Lubrication in Corrosive Environments	258
9.2.8	Lubrication in Limited Weight Applications	259
9.2.9	Lubrication in Natural and Artificial Joints	259
9.3	Coating Challenges	259
9.3.1	Space Applications	262
9.3.2	Biomedical Applications	262
9.3.3	Plasma Sprayed Slag Coatings	264
9.3.4	Polymer Coatings for Extreme Working Conditions	266
9.4	Surface Treatment Challenges	268
9.4.1	Applications in Automotive Industry	270
9.4.2	Surface Treatment of Polymers	271
	References	272
10.	Simulation and Modeling of Tribo-Systems	275
10.1	Introduction	275
10.2	Empirical Equations and Mathematical Models	275
10.2.1	Empirical Equations	275
10.2.2	Mathematical Models	278
10.3	Finite Element Analysis (FEA)	279
10.3.1	FEA of Wear in Pin-on-disk Configuration	281
10.3.2	FEA of Frictional Heating and Contact Temperature (Thermal FEA)	282
10.4	Dimensional Analysis	283
10.5	Artificial Neural Networks (ANNs)	286
10.5.1	Fundamentals of Neural Network Approach	286
10.5.2	Prediction of Wear and Friction of Aluminum Composites	287
10.5.3	Prediction of Wear of Polyamide	287
	References	296
11.	Failure of Tribo-Systems	298
11.1	Introduction	298
11.2	Bearing Failure	298
11.2.1	Rolling Contact Fatigue (RCF)	299
11.2.2	Overheating	299
11.2.3	Wear	299
11.2.4	Corrosion	301
11.3	Gear Failure	301
11.4	Cam/Follower Failure	304
11.5	Wheel/Rail Failure	305
11.6	Failure of Artificial Joints	308
	References	311
