# TABLE OF CONTENTS

1. ELECTRIC VEHICLE TRANSMISSION WITH HYPOID GEARSET
   H. Stadtfeld

2. MISALIGNMENT COMPENSATION SPLINE DESIGN
   D. Marano, M. Lorenzini, L. Mastrandrea, P. Pulvirenti, M. Turec, N. Filautel

3. SPLINE CENTERING, PILOTING, AND TOGGLE: TORSIONAL STIFFNESS, SHAFT BENDING, AND CENTERING OF MOMENT LOADS
   S. McKenny, D. Eseltine

4. OPTIMAL POLYMER GEAR DESIGN: METAL-TO-PLASTIC CONVERSION
   A. Kapelevich

5. DESIGN OF A DOUBLE SPIRAL BEVEL GEARSET
   H. Albertini, T. Cardoso, M. de Sousa, L. Alves

6. SPECIFIC DYNAMIC BEHAVIOR OF PLANETARY GEARS
   B. Pinnekamp, M. Heider, A. Beinstingel

7. PHASE MANAGEMENT AS A STRATEGY TO REDUCE GEAR WHINE IN IDLER GEAR SETS
   R. White, P. Patil

8. LEVERAGING THE COMPLEMENTARY STRENGTHS OF ORBITLESS AND PLANETARY DRIVES
   L. Stocco

9. REDUCTION OF THE TONALITY OF GEAR NOISE BY APPLICATION OF TOPOGRAPHY SCATTERING FOR GROUND BEVEL GEARS
   M. Kasten, C. Brecher, C. Lopenhaus, A. Lemmer, W. Blase, R. Schalaster

10. COMPUTING GEAR SLIDING LOSSES
    C. Gard, C. Wink, J. Bair, C. Fajardo

11. OPPORTUNITIES OF EFFICIENCY IMPROVEMENT BY THE USE OF HYDRO LUBRICANTS
    M. Pjadt, E. von Horsten

12. EVALUATION OF STEEL CLEANLINESS BY EXTREME VALUE STATISTICS AND ITS CORRELATION WITH FATIGUE PERFORMANCE
    T. Roy, N. De, C.L. Smith, C. Wink, J. Carroll

13. TOOTH ROOT TESTING OF STEELS WITH HIGH CLEANLINESS
    M. Trippe, C. Lopenhaus, C. Brecher, L. Kamjou, E. Lothman

14. 4D HIGH PRESSURE GAS QUENCHING - A LEAP IN PERFORMANCE VS. PRESS QUenching
    T. Hart, M. Korecki

15. PERFORMANCE AND PROPERTIES OF A NEW, ALTERNATIVE GEAR STEEL
    L. Kamjou, J. Fagerlund

16. MATERIAL PROPERTIES AND TOOTH ROOT BENDING STRENGTH OF SHOT BLASTED, CASE CARBURIZED GEARS WITH ALTERNATIVE MICROSTRUCTURES
    K.J. Winkler, T. Tobie, K. Stahl, C. Guntner, S. Schauer

17. CHAMFERING OF CYLINDRICAL GEARS - NEW INNOVATIVE CUTTING SOLUTIONS FOR EFFICIENT GEAR PRODUCTION
    G. Klein

18. INFLUENCE OF MANUFACTURING VARIATIONS OF SPLINE COUPLINGS ON GEAR ROOT AND CONTACT STRESS
    H. Karup, C. Wink

19. MICRO-SKIVING - (R)EVOLUTION OF A KNOWN PRODUCTION PROCESS
    P. Fabbriard, H. Baour

20. RAPID AND PRECISE MANUFACTURING OF SPECIAL INVOLUTE GEARS FOR PROTOTYPE TESTING
    C. Weber, T. Tobie, K. Stahl

21. A COMPARISON OF SURFACE ROUGHNESS MEASUREMENT METHODS FOR GEAR TOOTH WORKING SURFACES
    M. Wagner, A. Isaacson, M. Michaud, M. Bell

22. INFLUENCE OF THE LOAD-DEPENDENT SHIFT OF THE CENTER DISTANCE OF CYLINDRICAL GEARS ON THE CALCULATED LOAD CAPACITY AND NOISE EXCITATION USING AN ANALYTICAL MESH STIFFNESS APPROACH
    S. Radov
NEW STANDARDIZED CALCULATION METHOD OF THE TOOTH FLANK FRACTURE LOAD CAPACITY OF BEVEL AND HYPOID GEARSS .................................................. 362
J. Pelliłkofer, M. Hein, K. Stahl, J. Bojadzies

CALCULATED SCUFFING RISK: CORRELATING AGMA 925-A03, AGMA 6011-J14 AND ORIGINAL MAAG GEAR PREDICTIONS .................................................. 385
J. Amendola, J. Amendola III, R. Errichello

OPTIMUM CARBURIZED AND HARDENED CASE DEPTH .................................................. 402
R. Errichello, A. Milburn

SIZING OF PROFILE MODIFICATIONS FOR ASYMMETRIC GEARS .................................................. 425
U. Kissling
