

Handbook of Gasification Technology

Science, Processes, and Applications

James G. Speight

WILEY

Contents

Preface	xiv
Part 1: Synthesis Gas Production	1
1 Energy Sources and Energy Supply	3
1.1 Introduction	3
1.2 Typical Energy Sources	6
1.2.1 Natural Gas and Natural Gas Hydrates	6
1.2.2 The Crude Oil Family	7
1.2.3 Extra Heavy Crude Oil and Tar Sand Bitumen	10
1.3 Other Energy Sources	11
1.3.1 Coal	12
1.3.2 Oil Shale	14
1.3.3 Biomass	16
1.3.4 Solid Waste	19
1.4 Energy Supply	22
1.4.1 Economic Factors	22
1.4.2 Geopolitical Factors	22
1.4.3 Physical Factors	23
1.4.4 Technological Factors	24
1.5 Energy Independence	25
References	29
2 Overview of Gasification	35
2.1 Introduction	35
2.2 Gasification Processes	38
2.2.1 Processes	40
2.3 Feedstocks	41
2.3.1 Influence of Feedstock Quality	48
2.3.2 Feedstock Preparation	50
2.3.2.1 Crushing/Sizing/Drying	51
2.3.2.2 Pelletizing and Briquetting	51
2.4 Power Generation	52
2.5 Synthetic-Fuel Production	53
2.5.1 Gaseous Products	54
2.5.1.1 Synthesis Gas	54
2.5.1.2 Low Btu Gas	55

2.5.1.3	Medium Btu Gas	55
2.5.1.4	High Heat-Content Gas	56
2.5.2	Liquid Fuels	56
2.5.3	Tar	57
2.6	Advantages and Limitations	58
2.7	Market Developments and Outlook	60
	References	62
3	Gasifier Types- Designs and Engineering	67
3.1	Introduction	67
3.2	Gasifier Types	68
3.2.1	Fixed Bed Gasifier	72
3.2.2	Fluid Bed Gasifier	75
3.2.3	Entrained Bed Gasifier	78
3.2.4	Molten Salt Gasifier	79
3.2.5	Plasma Gasifier	80
3.2.6	Slagging Gasifier	82
3.2.7	Other Types	83
3.3	Designs	83
3.3.1	General Design Aspects	84
3.3.2	Chemical and Physical Aspects	85
3.3.2.1	Chemical Aspects	85
3.3.2.2	Influence of Feedstock Quality	86
3.3.2.3	Mineral Matter Content	88
3.3.2.4	Mixed Feedstocks	89
3.3.2.5	Moisture Content	89
3.3.3	Physical Effects	90
3.3.3.1	Bulk Density	90
3.3.3.2	Char Gasification	90
3.3.3.3	Devolatilization and Volatile Matter Production	91
3.3.3.4	Particle Size and Distribution	92
3.4	Mechanism	92
3.4.1	Primary Gasification	93
3.4.2	Secondary Gasification	93
3.4.3	Hydrogasification	94
3.4.4	Catalytic Gasification	95
3.5	Energy Balance	96
3.6	Gasifier-Feedstock Compatibility	97
3.6.1	Feedstock Reactivity	97
3.6.2	Energy Content	98
3.7	Products	99
3.7.1	Gases	100
3.7.2	Tar	102
	References	103

4	Chemistry, Thermodynamics, and Kinetics	107
4.1	Introduction	107
4.2	Chemistry	108
4.2.1	Pretreatment	109
4.2.2	Gasification Reactions	110
4.2.2.1	Primary Gasification	113
4.2.2.2	Secondary Gasification	114
4.2.2.3	Water Gas Shift Reaction	117
4.2.2.4	Carbon Dioxide Gasification	118
4.2.2.5	Hydrogasification	119
4.2.2.6	Methanation	120
4.2.2.7	Catalytic Gasification	121
4.2.2.8	Effect of Process Parameters	122
4.2.3	Physical Effects	122
4.3	Thermodynamics and Kinetics	124
4.3.1	Thermodynamics	126
4.3.2	Kinetics	127
4.4	Products	128
4.4.1	Gaseous Products	131
4.4.1.1	Low Btu Gas	132
4.4.1.2	Medium Btu Gas	133
4.4.1.3	High Btu Gas	134
4.4.1.4	Synthesis Gas	134
4.4.2	Liquid Products	135
4.4.3	Tar	136
4.4.4	Soot	136
4.4.5	Char	137
4.4.6	Slag	138
	References	138
Part 2:	Process Feedstocks	141
5	Coal Gasification	143
5.1	Introduction	143
5.2	Coal Types and Reactions	147
5.2.1	Types	148
5.2.2	Reactions	149
5.2.3	Properties	151
5.3	Processes	152
5.3.1	Coal Devolatilization	154
5.3.2	Char Gasification	154
5.3.3	Gasification Chemistry	155
5.3.4	Other Process Options	156
5.3.4.1	Hydrogasification	157
5.3.4.2	Catalytic Gasification	157
5.3.4.3	Plasma Gasification	158

5.3.5	Process Optimization	158
5.4	Product Quality	160
5.4.1	Low Btu Gas	160
5.4.2	Medium Btu Gas	161
5.4.3	High Btu Gas	161
5.4.4	Methane	162
5.4.5	Hydrogen	162
5.4.6	Other Products	163
5.5	Chemicals Production	164
5.5.1	Coal Tar Chemicals	164
5.5.2	Fischer-Tropsch Chemicals	166
5.5.2.1	Fischer-Tropsch Catalysts	167
5.5.2.2	Product Distribution	168
5.6	Advantages and Limitations	168
	References	169
6	Gasification of Viscous Feedstock	173
6.1	Introduction	173
6.2	Viscous Feedstocks	177
6.2.1	Crude Oil Resids	178
6.2.2	Heavy Crude Oil	180
6.2.3	Extra Heavy Crude Oil	180
6.2.4	Tar Sand Bitumen	181
6.2.5	Other Feedstocks	182
6.2.5.1	Crude Oil Coke	183
6.2.5.2	Solvent Deasphalter Bottoms	185
6.2.5.3	Asphalt, Tar, and Pitch	187
6.3	Gas Production	188
6.3.1	Partial Oxidation Technology	189
6.3.1.1	Shell Gasification Process	191
6.3.1.2	Texaco Process	191
6.3.1.3	Phillips Process	192
6.3.2	Catalytic Partial Oxidation	192
6.4	Products	193
6.4.1	Gas Purification and Quality	194
6.4.2	Process Optimization	195
6.5	Advantages and Limitations	195
	References	198
7	Gasification of Biomass	201
7.1	Introduction	201
7.2	Biomass Types and Mixed Feedstocks	205
7.2.1	Biomass	205
7.2.2	Black Liquor	209
7.2.3	Mixed Feedstocks	210
7.2.3.1	Biomass with Coal	211
7.2.3.2	Biomass with Waste	213

7.3	Chemistry	214
7.3.1	General Aspects	215
7.3.2	Reactions	218
7.3.2.1	Water Gas Shift Reaction	222
7.3.2.2	Carbon Dioxide Gasification	222
7.3.2.3	Hydrogasification	223
7.3.2.4	Methanation	224
7.4	Gasification Processes	225
7.4.1	Gasifiers	226
7.4.2	Fischer-Tropsch Synthesis	231
7.5	Gas Production and Products	232
7.5.1	Gas Production	233
7.5.2	Products	234
7.5.2.1	Synthesis Gas	235
7.5.2.2	Low-Btu Gas	236
7.5.2.3	Medium-Btu Gas	237
7.5.2.4	High-Btu Gas	237
7.5.3	Liquid Products	238
7.5.4	Solid Products	239
7.6	The Future	240
	References	243
8	Gasification of Waste	249
8.1	Introduction	249
8.2	Waste Types	251
8.2.1	Solid Waste	251
8.2.2	Municipal Solid Waste	252
8.2.3	Industrial Solid Waste	253
8.2.4	Biosolids	254
8.2.5	Biomedical Waste	254
8.2.6	Mixed Feedstocks	255
8.3	Feedstock Properties and Plant Safety	255
8.4	Fuel Production	256
8.4.1	Pre-Processing	257
8.4.2	Gasifier Types	259
8.4.2.1	Counter-Current Fixed Bed Gasifier	259
8.4.2.2	Co-Current Fixed Bed Gasifier	259
8.4.2.3	Fluidized Bed Gasifier	260
8.4.2.4	Entrained Flow Gasifier	260
8.4.2.5	Other Types	261
8.4.3	Process Design	262
8.4.4	Plasma Gasification	263
8.5	Process Products	264
8.5.1	Synthesis Gas	264
8.5.2	Carbon Dioxide	265
8.5.3	Tar	265

8.5.4	Particulate Matter	267
8.5.5	Halogens/Acid Gases	267
8.5.6	Heavy Metals	268
8.5.7	Alkalis	269
8.5.8	Slag	269
8.6	Advantages and Limitation	270
	References	271
9	Gas Cleaning	275
9.1	Introduction	275
9.2	Gas Streams	277
9.3	Water Removal	282
9.3.1	Absorption	282
9.3.2	Adsorption	283
9.3.3	Cryogenics	285
9.4	Acid Gas Removal	285
9.4.1	Adsorption	287
9.4.2	Absorption	288
9.4.3	Chemisorption	289
9.4.4	Other Processes	294
9.5	Removal of Condensable Hydrocarbons	297
9.5.1	Extraction	299
9.5.2	Absorption	300
9.5.3	Fractionation	300
9.5.4	Enrichment	301
9.6	Tar Removal	302
9.6.1	Physical Methods	302
9.6.2	Thermal Methods	304
9.7	Particulate Matter Removal	304
9.7.1	Cyclones	304
9.7.2	Electrostatic Precipitators	305
9.7.3	Granular-Bed Filters	305
9.7.4	Wet Scrubbers	306
9.8	Other Contaminant Removal	306
9.8.1	Nitrogen Removal	307
9.8.2	Ammonia Removal	308
9.8.3	Siloxane Removal	308
9.8.4	Alkali Metal Salt Removal	309
9.8.5	Biological Methods	309
9.8.5.1	Biofiltration	310
9.8.5.2	Bioscrubbing	312
9.8.5.3	Bio-Oxidation	313
9.9	Tail Gas Cleaning	313
9.9.1	Claus Process	314
9.9.2	SCOT Process	315
	References	316

Part 3: Applications	321
10 Gasification in a Refinery	323
10.1 Introduction	323
10.2 Processes and Feedstocks	324
10.2.1 Gasification of Residua	327
10.2.2 Gasification of Residua with Coal	328
10.2.3 Gasification of Residua with Biomass	328
10.2.4 Gasification of Residua with Waste	330
10.3 Synthetic Fuel Production	332
10.3.1 Fischer-Tropsch Synthesis	334
10.3.2 Fischer Tropsch Liquids	334
10.3.3 Upgrading Fischer-Tropsch Liquids	336
10.3.3.1 Gasoline Production	338
10.3.3.2 Diesel Production	339
10.4 Sabatier-Senderens Process	340
10.4.1 Methanol Production	341
10.4.2 Dimethyl Ether Production	342
10.5 The Future	344
References	347
11 Hydrogen Production	353
11.1 Introduction	353
11.2 Processes Requiring Hydrogen	359
11.2.1 Hydrotreating	360
11.2.2 Hydrocracking	361
11.3 Feedstocks	362
11.4 Process Chemistry	362
11.5 Commercial Processes	364
11.5.1 Autothermal Reforming	365
11.5.2 Combined Reforming	366
11.5.3 Dry Reforming	367
11.5.4 Steam-Methane Reforming	367
11.5.5 Steam-Naphtha Reforming	370
11.6 Catalysts	370
11.6.1 Reforming Catalysts	371
11.6.2 Shift Conversion Catalysts	372
11.6.3 Methanation Catalysts	373
11.7 Hydrogen Purification	373
11.7.1 Cryogenic Separation	374
11.7.2 Desiccant Separation Systems	374
11.7.3 Membrane Separation Systems	374
11.7.4 Pressure Swing Adsorption Separation Systems	375
11.7.5 Wet Scrubbing Systems	376
11.8 Hydrogen Management	376
References	377

12 Fischer-Tropsch Process	381
12.1 Introduction	381
12.2 History and Development of the Process	385
12.3 Synthesis Gas	388
12.4 Production of Synthesis Gas	391
12.4.1 Feedstocks	393
12.4.2 Product Distribution	396
12.5 Process Parameters	397
12.6 Reactors and Catalysts	400
12.6.1 Reactors	400
12.6.2 Catalysts	402
12.7 Products and Product Quality	406
12.7.1 Products	407
12.7.2.1 Gases	407
12.7.1.2 Liquids	407
12.7.2 Product Quality	412
12.7.3 Upgrading Fischer-Tropsch Liquids	415
12.8 Fischer-Tropsch Chemistry	415
12.8.1 Chemical Principles	416
12.8.2 Refining Fischer-Tropsch Products	421
References	423
13 Fuels and Chemicals Production	427
13.1 Introduction	427
13.2 Historical Aspects and Overview	438
13.3 The Petrochemical Industry	440
13.4 Petrochemicals	445
13.4.1 Primary Petrochemicals	446
13.4.2 Products	447
13.4.3 Gaseous Fuels and Chemicals	453
13.4.3.1 Ammonia	453
13.4.3.2 Hydrogen	454
13.4.3.3 Synthetic Natural Gas	455
13.4.4 Liquid Fuels and Chemicals	455
13.4.4.1 Fischer-Tropsch Liquids	455
13.4.4.2 Methanol	456
13.4.4.3 Dimethyl Ether	456
13.4.4.4 Methanol-to-Gasoline and Olefins	456
13.4.4.5 Other Chemicals	457
13.5 The Future	457
References	463
14 Gasification – A Process for Now and the Future	467
14.1 Introduction	467
14.2 Applications and Products	468
14.2.1 Chemicals and Fertilizers	468
14.2.2 Substitute Natural Gas	469

14.2.3	Hydrogen for Crude Oil Refining	470
14.2.4	Transportation Fuels	470
14.2.5	Transportation Fuels from Tar Sand Bitumen	471
14.2.6	Power Generation	472
14.2.7	Waste-to-Energy	473
14.2.8	Biomass to Chemicals and Fuels	473
14.3	Environmental Benefits	475
14.3.1	Carbon Dioxide	476
14.3.2	Air Emissions	476
14.3.3	Solids Generation	477
14.3.4	Water Use	477
14.4	Gasification – The Future	477
14.4.1	The Process	478
14.4.2	Refinery of the Future	479
14.4.3	Economic Aspects	480
14.4.4	Market Outlook	481
14.5	Market Development	482
14.6	Outlook	483
	References	485
	Coverision Factors	487
	Glossary	491
	About the Author	519
	Index	521
