Preface.....	vii
Author.....	ix

WORKBOOK

PART 1: Gases and Gas Laws	3
Key Points – Gas Laws.....	3
Law of Corresponding States.....	4
Example Problems.....	4
Key Points – Mixtures of Gases.....	7
Example Problems.....	7
PART 2: The First Law of Thermodynamics: Work (PV) and Heat, as ΔU and ΔH.....	11
Key Points – The First Law.....	11
Example Problems.....	12
Adiabatic Processes.....	14
Example Problems.....	14
Key Points – Calorimetry.....	15
Example Problems.....	16
Key Points – Hess’s Law Calculation for ΔH	17
Example Problems.....	17
Key Points – Indirect Methods for ΔH Determination.....	17
Example Problems.....	18
Key Points – Using Cyclic Diagrams for ΔH	19
Example Problems.....	19
Key Points – Temperature Dependence of ΔH	20
Example Problems.....	21
PART 3: Second and Third Law of Thermodynamics, ΔS	25
Key Points – The Second Law.....	25
Example Problems.....	27
Key Points – Real Gases and Entropy.....	33
PART 4: Free Energy (ΔG), Helmholtz Energy (ΔA), and Phase Equilibrium.....	35
Key Points – Gibbs and Helmholtz Free Energy.....	35
Example Problems.....	37
Key Points – The Chemical Potential and Phase Diagrams.....	43
Example Problems.....	43
Key Points – The Chemical Potential of Real Gases and Fugacity.....	46
Example Problems.....	47
PART 5: Free Energy (ΔG) of Mixing, Binary Liquid Mixtures, Colligative Properties, and Activity.....	49
Key Points – Free Energy of Mixing.....	49
Example Problems.....	49

Key Points – ΔG and Two-Component Liquid Mixtures.....	50
Key Points – Real Solutions and Excess Thermodynamic Functions for Mixtures.....	51
Example Problems.....	52
Key Points – Vapor Pressure, Raoult's Law, and Henry's Law for Mixtures.....	57
Key Points – Henry's Law for Binary Mixtures.....	58
Key Points – Liquid–Vapor Phase Diagrams.....	59
Lever Rule Liquid Vapor Diagrams.....	60
Key Points – Non-Ideal or Regular Solutions: Azeotropes.....	60
Key Points – Activity and Activity Coefficients for Mixtures.....	61
Example Problems.....	61
Key Points – Colligative Properties.....	67
Example Problems.....	68
Key Points – Activity Coefficients in Colligative Properties for Real Solutions.....	71
Example Problems.....	72
Key Points – Henry's Law and Saturated Solutions of Solute B in A.....	73
Example Problems.....	74
PART 6: Free Energy, Equilibrium Constants, and Electromotive Force	77
Key Points – Free Energy and Chemical Reactions.....	77
Example Problems.....	78
Key Points – Ionic Strength, Activity Coefficients, and Effect on Equilibria	82
Example Problems.....	83
Key Points – Electrochemistry, Equilibrium, and Activities.....	84
Example Problems.....	86
Electrochemistry and Equilibrium in Biochemical Redox Reactions	87
Example Problems.....	88
Key Points – Thermodynamics of Redox Reactions: ΔS° and ΔH°	90
Example Problems.....	90
Mean Ionic Activity and Redox Reactions.....	91
Example Problems.....	92
FINAL ANSWERS	
Answers to Example Problems.....	95
Final Answers and Hints	95
Part 1: Gases and Gas Laws.....	95
Part 2: First Law of Thermodynamics – Work (PV), Heat, ΔU and ΔH	96
Part 3: Second and Third Laws – Entropy.....	100
Part 4: Free Energy (ΔG), Helmholtz Energy (ΔA), and Phase Equilibrium.....	103
Part 5: Free Energy (ΔG) of Mixing, Binary Liquid Mixtures, Colligative Properties, and Activity.....	109
Part 6: Free Energy (ΔG), Equilibrium, and Electrochemistry	119
Index.....	127
