Airfield and Highway Pavements 2019

Design, Construction, Condition Evaluation, and Management of Pavements

Selected Papers from the International Airfield and Highway Pavements Conference 2019

Chicago, Illinois, USA
21 – 24 July 2019

Editors:

Imad Al-Qadi
Hasan Ozer

Andreas Loizos
Scott Murrell

ISBN: 978-1-5108-8982-8
Contents

Applications of Mechanistic-Empirical Design Method

Differences in Predicted Flexible Pavement Performance Using the AASHTOWare Pavement-ME—ESALs versus Axle Load Spectra ........................................... 1
Syed Waqar Haider and Gopikrishna Musunuru

Assessment of the 1993 AASHTO Structural Number as a Tool for Performance Evaluation of Asphalt Pavements Using Falling Weight Deflectometer Data from LTPP .................................................................................. 11
M. Elshaer, M. Oshone, E. Dave, J. E. Sias, Y. Mehta, and A. Ali

Prediction of Pavement Life of Flexible Pavements under the Traffic Loading Conditions of Bangladesh ........................................................................... 21
O. F. Hamim and M. S. Hoque

Impact of Heavy Logging Trucks on Flexible Pavement Performance during Spring Thaw ......................................................................................... 32
S. Owusu-Ababio and R. Schmitt

Using AASHTOWare Pavement ME Design to Establish Pavement Thicknesses for Frost Protection in Different Climate Zones or Regions ........................................................................ 43
Wouter Brink

Evaluation of Material Input Levels on Design of Unbonded Concrete Overlay Using Pavement Mechanistic-Empirical Design ...................... 52
Gauhar Sabih and Rafiquil A. Tarefder

Structural Modeling and Analysis of Pavements

Advanced Analytical Tool for Flexible Pavement Design and Evaluation ......................................................... 61
H. Huang, J. Luo, M. Moaveni, I. I. Qamhia, E. Tutumluer, and J. S. Tingle

Influence of Truck Acceleration on Dynamic Load Transfer to Pavement .......................................................... 72
Donia Savio, K. Kavinmathi, J. Murali Krishnan, and Shankar C. Subramanian

A Comparison of Concrete Pavement Responses Using Finite Element Method with Foundation Springs and 3-D Solid Elements .................................. 81
Nancy Aguirre, Abbasali TaghaviGhaesari, and Cesar Carrasco

UNLEA: A Multilayer Elastic Program Script in Scilab .................................................................................. 91
Luis R. Vásquez-Varela and Francisco J. García-Orozco

Viscoelastic Response of Asphalt Pavements Subjected to Dynamic Loading .............................................. 101
K. Kavinmathi and S. P. Atul Narayan

© ASCE
Effects of Water-Coupled Cracks on Life-Cycle Assessment of Concrete Pavement under Moving Load .......................................................... 111
H. Q. H. Nguyen, K. Maekawa, and S. Komatsu

Pavement Response to Full Scale Tests

Performance Evaluation of Pervious Pavement Using Accelerated Pavement Testing System ................................................................. 122
Zeyu Zhang, Guoyang Lu, Dawei Wang, and Markus Oeser

Design, Fabrication, and Instrumentation of a Full-Scale Pavement Testing Box .......... 131
M. Nimeri, H. Nabizadeh, E. Y. Hajj, R. V. Siddharthan, S. Elfass, and M. Piratheepan

Performance Based Specifications

Using Cost, Mix Design, Construction, and Performance Data to Inform Pavement Policy and Standards .................................................. 143
Ryan Howell, Stephen Muench, James Feracor, Milad Ashtiani, and Jim Weston

Development of Pay Factors to Regulate Chip Seal Construction Quality ............. 155
Syed W. Haider, Ilker Boz, Yogesh Kumbargeri, and M. Emin Kutay

A Review of Acceptance Schedule of Payment for Asphalt Pavements in Alabama ................................................................. 167
Akeem Ajede, Fan Yin, Nam Tran, and Lnydi Davis Blackburn

Three-Dimensional Balanced Mix Design for Asphalt Concrete ......................... 178
Uthman Mohamed Ali, Jaime Hernandez, Imad Al-Qadi, and Hasan Ozer

Preservation Techniques for Asphalt Surfaced Pavements

6-Year Study on Micro Surfacing Performance .................................................. 189
Adriana Vargas-Nordcebeck

Effect of Thin Overlays on the Structural Performance of Cold Recycled Bases for High Traffic Volume Roads ...................................... 198
Md. Rahman and Adriana Vargas-Nordcebeck

Full-Scale Probabilistic Assessment of Asphalt Surface Treatments: The Case Study of Lee Road 159 .................................................. 208
Farhang Jalali, Adriana Vargas-Nordcebeck, and Mostafa Nakhaei

In-Place Recycling Techniques for Flexible Pavements

Evaluating Cracking Tests for Performance-Based Design Concept for Cold Recycled Mixtures .................................................. 220
B. K. Diefenderfer, I. Boz, and B. F. Bowers
Investigating Simple Brittleness and Cracking Indexes for Cold In-Place Recycling ........................................................................................................................................230
Ben C. Cox and Isaac L. Howard

Evaluation of Full/Partial Depth Reclamation of Secondary Roads Utilizing Sustainable Steel Slag Materials and the Light Weight Deflectometer (LWD) ......................................................................................243
John J. Yzenas Jr. and Kelly Cook

Local Calibration of Stiffness Modulus for Full-Depth Reclamation Design ..........................................................................................................................255
Victor Galotti and Cristina Torres-Machi

Eight-Year Field Performance of Portland Cement and Asphalt Stabilized Full-Depth Reclamation Projects ........................................................................263

Maintenance and Rehabilitation for Concrete Pavements

Use of Ultra-High-Performance Fiber-Reinforced Concrete (UHP-FRC) for Fast and Sustainable Repair of Rigid Pavements ........................................................................273
Ashish Karmacharya, Jean Gamarra, and Shih-Ho Chao

Pavement Performance Monitoring and Condition Evaluation

20 Years’ Performance of LTPP SPS-2 Sections in Wisconsin: Transverse Joints ....................................................................................................................286
Danny Xiao and Sam Owusu-Ababio

Mechanistic Empirical Estimation of Remaining Service Life of Flexible Pavements Based on Simple Deflection Parameters: A Case Study for the State of Texas ..................................................................................................................294
Karthikeyan Loganathan, Mayzan Isied, Ana Maria Coca, Mena Souliman, Stefan Romanoschi, and Samer Dessouky

Influence of Asphalt Surface Temperature on Pavement Rutting in Cold Regions .............................................................................................................306
Osama A. Abaza, Mahmoud Arafa, and Tanay Datta Chowdhury

Pavement Performance Evaluation from an Instrumented Section .................................................................................................................................316
Zaiful Khan and Rafiquil Tarefder

Performance Evaluation of Composite Pavements Using Long-Term Pavement Performance (LTPP) Database ........................................................................327
H. Pandya, T. Weideli, M. Elshaer, Y. Mehta, and A. Ali

Towards Development of PCI and IRI Models for Road Networks in the City of St. John’s .....................................................................................................335
Abdualmintalab Ali, Kamal Hossain, Amgad Hussein, Surya Swarna, Heena Dhasmana, and Mohammad Hossain

© ASCE
Pavement Management in Decision Making

Pavement Structural Evaluation at Network Level Pavement Management—A Case Study ................................................................. 343
M. Nasimifar, S. Thyagarajan, and N. Sivaneswaran

Pavement Management System Informs Decision-Making at New Jersey Turnpike Authority ....................................................... 354
Laura Wagner-Bartz and John Benda

Real Time Pavement Asset Management and Integration with Work Order Management ....................................................................... 365
A. S. Kachwalla and M. I. Hughes

Asset Management Approach for Transport Infrastructure Networks: The AM4INFRA Project ............................................................... 374
Darko Kokot

NDT for Pavement Condition Assessment

Backcalculation of Raptor (RWD) Measurements and Forward Prediction of FWD Deflections Compared with FWD Measurements ............................................................. 382
Stine Skov Madsen and Niels Leergaard Pedersen

Pavement Condition Data from Traffic Speed Deflectometer for Network Level Pavement Management .............................................. 392
S. Shrestha, S. W. Katicha, and G. W. Flintsch

Comparison between HWD Backcalculated Subgrade Dynamic Moduli and In Situ Static Bearing Capacity Tests ......................................................... 404
M. Broutin, A. Sadoun, and A. Duprey

Pavement Surface Characteristics

Profile Measurement, Smoothness Acceptance, and the Integration of New Profile Measurement Technology ................................................. 414
Michael Gerardi and Albert Larkin

Image Processing Method to Estimate the Wearing Condition of Slurry Seal Mixtures ..................................................................... 424
Mahdi Saghafi, Seyed Mohammad Asgharzadeh, Aria Fathi, and Arash Hosseini

Reduction in Roughness Due to Asphalt Concrete Overlays Placed on Flexible Pavements ................................................................. 436
Rohan W. Perera
Development of a Trailer to Measure the Noise Generated at the Interface between Tire and Pavement Surface ......................................................................................................................... 446
Abdulhaq Hadi Abedali Al-Haddad and Tuqa Khalid Ibrahim
