Contents

| | |
|---|-------------|
| List of Contributors | xiii |
| Series Preface | xvii |
| Preface | xix |
| | |
| 1 Overview of Waste Valorisation Concepts from a Circular Economy Perspective | 1 |
| <i>Jinhua Mou, Chong Li, Xiaofeng Yang, Guneet Kaur and Carol Sze Ki Lin</i> | |
| 1.1 Introduction | 1 |
| 1.2 Development of (Bio)Chemical Process for Utilization of Waste as a Bioresource | 4 |
| 1.2.1 Mechanical Pretreatment | 5 |
| 1.2.2 Physical Pretreatment | 5 |
| 1.2.3 Chemical Pretreatment | 5 |
| 1.2.4 Biological Pretreatment | 6 |
| 1.3 Process Integration for Waste-Based Biorefinery | 6 |
| 1.3.1 Food Waste Biorefinery | 7 |
| 1.3.2 Agricultural Waste Biorefinery | 7 |
| 1.3.3 Industrial Waste Biorefinery | 8 |
| 1.3.4 Wastewater Biorefinery | 8 |
| 1.4 Closed Loop Recirculation in a Bio-based Economy | 8 |
| 1.5 Conclusions and Future Trends | 9 |
| References | 10 |
| | |
| 2 Waste as a Bioresource | 13 |
| <i>Gayatri Suresh, Joseph Sebastian and Satinder Kaur Brar</i> | |
| 2.1 Introduction | 13 |
| 2.2 Waste Streams and Their Suitability as Feedstock for Valorisation: Is All Waste a Resource? | 14 |

| | | |
|----------|--|-----------|
| 2.3 | (Bio)diversity and Variability of Waste Feedstock | 16 |
| 2.3.1 | Agro-industrial Wastes | 16 |
| 2.3.2 | Municipal Solid Wastes | 18 |
| 2.3.3 | Livestock Wastes | 19 |
| 2.3.4 | Industrial Wastes | 21 |
| 2.4 | Drivers, Policies, and Markets for Value-added Waste-derived Products | 23 |
| 2.5 | Conclusions and Future Trends | 25 |
| | Acknowledgements | 26 |
| | References | 26 |
| 3 | Treatment of Waste | 33 |
| | <i>Ravindran Balasubramani, Vasanthy Muthunarayanan, Karthika Arumugam, Rajiv Periakaruppan, Archana Singh, Soon Woong Chang, Thamaraiselvi Chandran, Gopal Shankar Singh and Selvakumar Muniraj</i> | |
| 3.1 | Introduction | 33 |
| 3.2 | Solid Waste Management | 34 |
| 3.2.1 | E-waste Management | 34 |
| 3.2.2 | Hazardous Waste Management | 35 |
| 3.2.3 | Biomedical Waste Management | 35 |
| 3.2.4 | Plastic Waste Management | 35 |
| 3.2.5 | Solid Waste Management Options | 35 |
| 3.3 | General Approach for Waste Treatment and Conversion to Value-added Products: Biochemical, Mechanical, and Thermochemical | 36 |
| 3.3.1 | Conventional Treatment | 36 |
| 3.3.2 | Biological/Biochemical Treatment | 37 |
| 3.3.3 | Thermal Methods | 40 |
| 3.3.4 | Open Burning | 40 |
| 3.3.5 | Mechanical Treatment | 40 |
| 3.4 | Factors Influencing Selection of an Appropriate Valorisation Technique for Specific Waste Types | 42 |
| 3.4.1 | Case Study of Paper Waste Recycling | 42 |
| 3.4.2 | Deinking Process | 42 |
| 3.4.3 | Paper Deinking Residue | 43 |
| 3.5 | Conventional and Novel Techniques: Overall Comparison in Terms of Energy Consumption, Waste Stream Generation and Cost | 44 |
| 3.5.1 | Pyrolysis | 44 |
| 3.5.2 | Gasification | 44 |
| 3.5.3 | Incineration | 44 |
| 3.6 | Energy Consumption, Waste Stream Generation, and Costs of Conventional and Novel Waste Treatment Technologies | 45 |
| 3.7 | Conclusions and Future Trends | 45 |
| | Acknowledgement | 46 |
| | References | 46 |

| | | |
|----------|---|-----------|
| 4 | Valorisation of Agricultural Waste Residues | 51 |
| | <i>Srinivas Mettu, Pobitra Halder, Savankumar Patel, Sazal Kundu, Kalpit Shah, Shunyu Yao, Zubeen Hathi, Khai Lun Ong, Sandya Athukoralalage, Namita Roy Choudhury, Naba Kumar Dutta and Carol Sze Ki Lin</i> | |
| 4.1 | Introduction | 51 |
| 4.2 | Agricultural Waste Definition, Composition, Variability, and Associated Policies and Regulations | 53 |
| 4.2.1 | Agricultural Waste from Farming | 55 |
| 4.2.2 | Agricultural Wastes from Livestock | 56 |
| 4.2.3 | Agricultural Waste Availability | 57 |
| 4.3 | Conventional Techniques – Anaerobic Digestion, Pyrolysis, Gasification, and Solvent Treatment/Extraction | 58 |
| 4.3.1 | Anaerobic Digestion | 58 |
| 4.3.2 | Solvent Treatment | 63 |
| 4.3.3 | Gasification | 65 |
| 4.3.4 | Pyrolysis | 67 |
| 4.4 | Novel Techniques and Envisioned Product Streams: A New Perspective | 71 |
| 4.5 | Case Study: Yard Waste Management | 74 |
| 4.5.1 | Background of Yard Waste in Hong Kong | 74 |
| 4.5.2 | Conventional Yard Waste Reduction and Treatment Strategy | 75 |
| 4.5.3 | Novel Techniques and Strategies for Yard Waste Treatment | 76 |
| 4.6 | Conclusions and Future Trends | 76 |
| | Acknowledgements | 77 |
| | References | 77 |
| 5 | Valorisation of Woody Biomass | 87 |
| | <i>Md Khairul Islam, Chengyu Dong, Hsien-Yi Hsu, Carol Sze Ki Lin and Shao-Yuan Leu</i> | |
| 5.1 | Generation of Woody Biomass | 87 |
| 5.2 | General Classification and Properties of Woods | 88 |
| 5.3 | Wood Chemistry | 89 |
| 5.3.1 | Cellulose | 89 |
| 5.3.2 | Hemicelluloses | 90 |
| 5.3.3 | Lignin | 91 |
| 5.3.4 | Extractives | 92 |
| 5.4 | Chemical Composition Analysis | 93 |
| 5.4.1 | Structural Carbohydrates and Lignin | 93 |
| 5.4.2 | Extractives | 94 |
| 5.5 | Pretreatment | 94 |
| 5.6 | Saccharification and Fermentation | 97 |
| 5.7 | New Functions of Wood Residues | 100 |
| 5.7.1 | Wood–Plastic Composite for Construction Purposes | 100 |
| 5.7.2 | Cellulose Nanomaterials | 100 |
| 5.7.3 | Wood Extractives | 102 |

| | | |
|----------|---|------------|
| 5.8 | Conclusions and Future Trends | 102 |
| | Acknowledgement | 102 |
| | References | 103 |
| 6 | Recovery of Nutrients and Transformations of Municipal/Domestic Food Waste | 109 |
| | <i>Divyani Panwar, Parmjit S. Panesar, Gisha Singla, Meena Krishania and Avinash Thakur</i> | |
| 6.1 | Introduction | 109 |
| 6.2 | Characteristics of Food Waste and its Supply Chain | 111 |
| 6.2.1 | Characteristics of Waste Generated from Food Industries | 113 |
| 6.2.2 | Food Waste Supply Chain | 114 |
| 6.3 | Recovery of Valuable Products from Anaerobic Digestion of Food Waste | 116 |
| 6.3.1 | Biogas | 118 |
| 6.3.2 | Digestate | 119 |
| 6.4 | Novel Approaches and Obtainable Products: Biotechnological Processes and Chemical Transformations | 124 |
| 6.4.1 | Chemical Transformations | 125 |
| 6.4.2 | Biotechnological Approaches | 130 |
| 6.5 | Case Study: Production of Methane via Anaerobic Digestion of Food Waste | 139 |
| 6.5.1 | Anaerobic Digestion | 140 |
| 6.5.2 | TEAM Digester for Domestic Food Waste Digestion | 143 |
| 6.6 | Conclusions and Future Trends | 144 |
| | References | 145 |
| 7 | Bioconversion of Processing Waste from Agro-Food Industries to Bioethanol: Creating a Sustainable and Circular Economy | 161 |
| | <i>Deepak Kumar and Vijay Singh</i> | |
| 7.1 | Introduction | 161 |
| 7.2 | Bioconversion Technologies for Bioethanol Production | 164 |
| 7.2.1 | Ethanol Production from Starchy Feedstock (First-Generation Bioethanol) | 164 |
| 7.2.2 | Ethanol from Lignocellulosic Biomass (Second-Generation Bioethanol) | 167 |
| 7.3 | Use of Processing Waste to Produce Ethanol | 170 |
| 7.3.1 | Citrus Peel Waste (CPW) | 170 |
| 7.3.2 | Peel Residue Waste from Other Food Industries | 171 |
| 7.3.3 | Waste from the Brewing Industry | 172 |
| 7.3.4 | Other Processing Wastes | 173 |
| 7.4 | Use of Processing Waste to Enhance Ethanol Yields | 174 |
| 7.4.1 | Improving Fermentation of Dry Fractionated Corn | 174 |
| 7.4.2 | Processing of DDGS to Enhance Ethanol Yields | 177 |
| 7.5 | Conclusions and Future Trends | 178 |
| | References | 179 |

| | |
|---|------------|
| 8 Challenges with Biomass Waste Valorisation | 183 |
| <i>Guihua Yan, Yunchao Feng, Sishi Long, Xianhai Zeng, Yong Sun, Xing Tang and Lu Lin</i> | |
| 8.1 Introduction | 183 |
| 8.2 The Pre-Preparation Technologies of Biomass Waste | 184 |
| 8.2.1 “Cellulose-First” Biorefinery Technologies | 185 |
| 8.2.2 “Lignin-First” Biorefinery Technologies | 185 |
| 8.2.3 “Lignin and Hemicellulose-First” Biorefinery Technologies | 186 |
| 8.2.4 “Cellulose and Hemicellulose-First” Biorefinery Technologies | 186 |
| 8.3 Handling of Emerging Biomass Wastes by Newly Developed Techniques | 188 |
| 8.3.1 Catalytic Chemistry Technologies | 188 |
| 8.3.2 Thermochemical Conversion Technologies | 189 |
| 8.3.3 Biochemical Technologies | 190 |
| 8.3.4 Integration with Existing Technologies and Economic Viability | 190 |
| 8.4 Transforming Biomass Waste to Cellulose by New Techniques | 191 |
| 8.4.1 Cellulose Extraction or Purification Techniques from Biomass Waste | 192 |
| 8.4.2 Cellulose Micro/Nanomerization Technologies | 192 |
| 8.5 Transforming Biomass Waste to Lignin by New Technologies | 197 |
| 8.6 Conclusions and Future Trends | 198 |
| Acknowledgements | 199 |
| References | 199 |
| | |
| 9 Lifecycle Approaches for Evaluating Textile Biovalorisation Processes: Sustainable Decision-making in a Circular Economy | 203 |
| <i>Karpagam Subramanian, Shauhrat S. Chopra, Cakin Ezgi, Xiaotong Li and Carol Sze Ki Lin</i> | |
| 9.1 Introduction | 203 |
| 9.2 Literature Review | 206 |
| 9.2.1 Circular Economy and Sustainable Development | 206 |
| 9.2.2 Textile Industry – Sustainability Issues and Recycling | 206 |
| 9.3 Methods | 208 |
| 9.3.1 Description of Environmental Assessment | 208 |
| 9.3.2 Description of Social Assessment | 209 |
| 9.4 Case Study | 211 |
| 9.4.1 Recovery of PET Fiber from Cotton–Polyester Blended Textile Waste | 211 |
| 9.4.2 System Description of the Biorecycling Method | 212 |
| 9.4.3 Life Cycle Inventory | 214 |
| 9.5 Results and Discussion | 215 |
| 9.5.1 Environmental Sustainability of Bio-based PET Fiber | 215 |
| 9.5.2 Social and Economic Sustainability of Bio-based PET Fiber | 217 |

| | | |
|-----------|--|------------|
| 9.6 | Conclusions and Future Trends | 218 |
| | Acknowledgement | 219 |
| | References | 219 |
| 10 | Circular Waste-Based Biorefinery Development | 223 |
| | <i>Raffel Dharma Patria, Xiaotong Li, Huaimin Wang, Chenyu Du, Carol Sze Ki Lin and Guneet Kaur</i> | |
| 10.1 | Introduction | 223 |
| 10.2 | Transitioning from Current Linear to Stronger Circular Economy Models | 226 |
| 10.2.1 | Integration of Circular Economy and Sustainable Development | 226 |
| 10.2.2 | Requirements for Transition to a Circular Economy | 227 |
| 10.3 | Case Study 1: Circular Textile Waste-based Biorefinery for Production of Chemicals, Materials, and Fuels | 229 |
| 10.3.1 | Need for a Circular Textile Waste-based Biorefinery | 229 |
| 10.3.2 | Circular Textile Biorefinery | 230 |
| 10.4 | Case Study 2: Circular Food Waste-based Biorefinery for Production of Chemicals, Materials, and Fuels | 233 |
| 10.4.1 | Circular Bioconversion of Food Waste into Polyethylene Furanoate (PEF) | 235 |
| 10.4.2 | Circular Bioconversion of Food Waste into Biosurfactant | 240 |
| 10.5 | Conclusions and Future Trends | 246 |
| | Acknowledgements | 246 |
| | References | 247 |
