**CHAPTER 1 INTRODUCTION TO SUBSURFACE MAPPING 1**

---

---

**TEXTBOOK OVERVIEW 1**

**THE PHILOSOPHICAL DOCTRINE OF ACCURATE SUBSURFACE INTERPRETATION  
AND MAPPING 3**

**MENTORS AND MENTORING 7**

**TYPES OF SUBSURFACE MAPS AND CROSS SECTIONS 7**

---

---

**CHAPTER 2 CONTOURING AND CONTOURING TECHNIQUES 9**

---

---

**INTRODUCTION 9**

**THREE-DIMENSIONAL PERSPECTIVE 10**

**CALCULATION OF BED DIP 13**

**RULES OF CONTOURING 14**

**METHODS OF CONTOURING BY HAND 17**

**COMPUTER-BASED CONTOURING CONCEPTS AND APPLICATIONS 23**

Surface Modeling 24

Steps Involved in Gridding 24

Conformable Geology and Multisurface Stacking 29

Contouring Faulted Surfaces on the Computer 39

---

---

## **CHAPTER 3      MEASURING DEPTH, DIRECTIONALLY DRILLED WELLS, AND DIRECTIONAL SURVEYS      49**

---

---

### **INTRODUCTION      49**

### **VERTICAL WELLS      50**

Surface Location Uncertainty	50
Well Depth	51
Wireline Depth Measurements	54
LWD Depth Measurements	54
Pipe-Conveyed Log Depth Measurement	55
Relative Depth Uncertainty	56
Absolute Depth Uncertainty	58

### **DIRECTIONALLY DRILLED WELLS      60**

### **APPLICATION OF DIRECTIONALLY DRILLED WELLS      60**

### **COMMON TYPES OF DIRECTIONALLY DRILLED WELLS      60**

General Terminology	62
Horizontal Wells	62

### **DIRECTIONAL WELL PLAN      64**

### **DIRECTIONAL TOOLS USED FOR MEASUREMENTS      65**

Magnetic Surveys	68
Nonmagnetic Surveys	68
Survey Frequency	68

### **DIRECTIONAL SURVEY CALCULATIONS      68**

### **DIRECTIONAL SURVEY UNCERTAINTIES      71**

Sag Correction in MWD Directional Surveys	73
---	----

**DIRECTIONAL WELL PLOTS 73****WELLS WITHOUT DIRECTIONAL SURVEYS 79**

Reservoir Pressures 80

---

---

**CHAPTER 4 LOG CORRELATION TECHNIQUES 81**

---

---

**INTRODUCTION 81**

General Log Measurement Terminology 82

**ELECTRIC LOG CORRELATION PROCEDURES AND GUIDELINES 83****CORRELATION TYPE LOG 86****ELECTRIC LOG CORRELATION—VERTICAL WELLS 90**

Log Correlation Plan 90

Basic Concepts in Electric Log Correlation 92

Faults Versus Variations in Stratigraphy 94

Pitfalls in Vertical Well Log Correlation 99

**ELECTRIC LOG CORRELATION—DIRECTIONALLY DRILLED WELLS 102**

Log Correlation Plan 102

**CORRELATION OF VERTICAL AND DIRECTIONALLY DRILLED WELLS 105**

Estimating the Missing Section for Normal Faults 107

**MLT, TVDT, TVT, AND TST 120****ELECTRIC LOG CORRELATION—HORIZONTAL WELLS 122**

Direct Detection of Bed Boundaries 122

Modeling Log Response of Bed Boundaries and Fluid Contacts 123

True Vertical Depth Cross Section 123

True Stratigraphic Depth Method 125

<b>COMPUTER-BASED LOG CORRELATION</b>	<b>129</b>
Well Log Correlation: The Transition from Paper-Based to Screen-Based	<b>129</b>
On-Screen Log Correlation	<b>130</b>
Example of Unconformity Identification	<b>131</b>
Example of Fault Identification	<b>133</b>
<b>REPEATED SECTION</b>	<b>138</b>

---

**CHAPTER 6    CROSS SECTIONS    197**

---

---

**INTRODUCTION    197****PLANNING A CROSS SECTION    198****STRUCTURAL CROSS SECTIONS    198**

Electric Log Sections    202

Stick Sections    204

**STRATIGRAPHIC CROSS SECTIONS    204****PROBLEM-SOLVING CROSS SECTIONS    206****FINISHED ILLUSTRATION (SHOW) CROSS SECTIONS    207****CORRELATION SECTIONS    215****CROSS-SECTION DESIGN    217**

Extensional Structures    219

Diapiric Salt Structures    219

Compressional Structures    221

Strike-Slip Faulted Structures    221

**VERTICAL EXAGGERATION    223****PROJECTION OF WELLS    226**

Plunge Projection    228

Strike Projection    231

Other Types of Projections    235

Projection of Deviated Wells    235

Projecting a Well into a Seismic Line    239

**CROSS-SECTION CONSTRUCTION ACROSS FAULTS    239**

**THREE-DIMENSIONAL VIEWS 245**

Log Maps 245

Fence Diagrams 245

Isometric Projections 250

Three-Dimensional Reservoir Analysis Model 250

**CROSS-SECTION CONSTRUCTION USING A COMPUTER 256**

Correlation Cross Sections 257

Stratigraphic Cross Sections 257

Structural Cross Sections 259

**FAULT-SEAL ANALYSIS 262**

Fault Surface Sections Constructed by Hand 265

Computer-Based Fault-Seal Analysis 269

Conclusions 272

**CHRONOSTRATIGRAPHIC SECTIONS 272**

---

---

**CHAPTER 7 FAULT MAPS 275**

---

---

**INTRODUCTION 275****FAULT TERMINOLOGY 277****DEFINITION OF FAULT DISPLACEMENT 279****MATHEMATICAL RELATIONSHIP OF THROW TO VERTICAL SEPARATION 280**

Quantitative Relationship 283

**FAULT DATA DETERMINED FROM WELL LOGS 284****FAULT SURFACE MAP CONSTRUCTION 288**

Contouring Guidelines 291

Fault Surface Map Construction Techniques 292

**TYPES OF FAULT PATTERNS 295**

- Extensional Faulting 295
- Compressional Faulting 313

**FAULT DATA DETERMINED FROM SEISMIC INFORMATION 322**

- Seismic and Well Log Data Integration—Fault Surface Map Construction 329
- Seismic Pitfalls 331

**GROWTH FAULTS 338**

- Estimating the Vertical Separation for a Growth Fault 338
- Growth-Fault Surface Map Construction 345

**DIRECTIONAL SURVEYS AND FAULT SURFACE MAPS 346**

- Directional Well Pitfalls 348
- Fault Maps, Directional Wells, and Repeated Sections 349

**VERTICAL SEPARATION—CORRECTION FACTOR AND DOCUMENTATION 351**

---

---

**CHAPTER 8 STRUCTURE MAPS 353**

---

---

**INTRODUCTION 353****GUIDELINES TO CONTOURING 355****SUMMARY OF THE METHODS OF CONTOURING BY HAND 362****CONTOURING FAULTED SURFACES 363**

- Techniques for Contouring across Normal Faults 366
- Technique for Contouring across Reverse Faults 377

**MANUAL INTEGRATION OF FAULT AND STRUCTURE MAPS 378**

- Normal Faults 378
- Reverse Faults 388

<b>FAULT TRACES AND GAPS—SHORTCUTS AND PITFALLS</b>	<b>391</b>
Rule of 45	<b>393</b>
Tangent or Circle Method	<b>394</b>
New Circle Method	<b>400</b>
Equation to Determine Radius of Circle	<b>400</b>
Equation to Determine Heave	<b>403</b>
Fault Gap Versus Fault Heave	<b>404</b>
<b>STRUCTURE MAP—GENERIC CASE STUDY</b>	<b>404</b>
<b>THE ADDITIVE PROPERTY OF FAULTS</b>	<b>408</b>
<b>INTEGRATION OF SEISMIC AND WELL DATA FOR STRUCTURE MAPPING</b>	<b>411</b>
<b>OTHER MAPPING TECHNIQUES</b>	<b>413</b>
Mapping Unconformities	<b>413</b>
Mapping across Vertical Faults	<b>418</b>
Top of Structure Versus Top of Porosity	<b>419</b>
Contour Compatibility—Closely Spaced Horizons	<b>421</b>
<b>APPLICATION OF CONTOUR COMPATIBILITY ACROSS FAULTS</b>	<b>423</b>
Exceptions to Contour Compatibility across Faults	<b>424</b>
<b>MAPPING TECHNIQUES FOR VARIOUS TECTONIC HABITATS</b>	<b>427</b>
Extensional Tectonics	<b>428</b>
Diapiric Salt Tectonics	<b>451</b>
Strike-Slip Fault Tectonics	<b>461</b>
Compressional Tectonics	<b>465</b>
<b>REQUIREMENTS FOR A REASONABLE STRUCTURAL INTERPRETATION AND COMPLETED MAPS</b>	<b>473</b>
Multiple Horizon Mapping	<b>473</b>
<b>PERCHED WATER</b>	<b>475</b>

---

## **CHAPTER 9    INTERPRETATION OF THREE-DIMENSIONAL SEISMIC DATA        479**

---

---

### **INTRODUCTION AND PHILOSOPHY    479**

- The Philosophical Doctrine Relative to the Workstation    **480**
- Data Optimization    **480**
- Work Environment    **481**
- Optimizing Interpretation in Three-Dimensional Space    **481**
- Framework Interpretation and Mapping    **487**

### **PLANNING AN EFFECTIVE THREE-DIMENSIONAL INTERPRETATION PROJECT    488**

- The Role of the Geoscientist    **488**
- Developing an Interpretation Workflow    **489**
- Organizing a Workstation Project    **489**
- Documenting Work    **490**

### **FAULT INTERPRETATION    490**

- Introduction    **490**
- Reconnaissance    **494**
- Tying Wells Using Synthetic Seismograms    **499**
- Integrating Well Control    **499**
- Fault Interpretation Strategies    **501**

### **HORIZON INTERPRETATION    511**

- Selecting the Framework Horizons    **511**
- Interpretation Strategy    **518**
- Autotracking Methodology    **518**
- Manual Interpretation Methodology    **518**
- Infill Strategies in the Absence of Autotracking    **525**

### **STRUCTURE MAPPING    527**

- Drawing Accurate Fault Gaps and Overlaps    **527**

**DEPTH CONVERSION 530**

- The Basic Methodology 530
- Final Steps 533
- Quality Control of the Results 533
- Creating and Contouring the Target Map 536

**CONCLUSION 538**

---

---

**CHAPTER 10 COMPRESSIONAL STRUCTURES: BALANCING  
AND INTERPRETATION 539**

---

---

**INTRODUCTION 539****STRUCTURAL GEOLOGY AND BALANCING 540****MECHANICAL STRATIGRAPHY 541****CLASSICAL BALANCING TECHNIQUES 543**

- Volume Accountability Rule 543
- Area Accountability 544
- Bed Length Consistency 544
- Pin Lines 546
- Line-Length Exercise 546

**COMPUTER-AIDED STRUCTURAL MODELING AND BALANCING 548**

- Retrodeformation 553

**LOCATING THRUST FAULTS ON DIP AND STRIKE LINES 558**

- Picking Thrust Faults on Dip Lines 558
- The 3D Interpretation of the Waha Field, West Texas 560
- Three-Dimensional Models of Lateral Ramps 565
- Distinguishing Structural from Stratigraphic Dips 567

**CROSS-SECTION CONSISTENCY 567**

**CROSS-SECTION CONSTRUCTION 572**

- Busk Method Approximation 572
- Kink Method Approximation 575
- Kink Method Applications 578

**DEPTH-TO-DETACHMENT CALCULATIONS 585****NONCLASSICAL METHODS 587**

- Introduction 587
- Suppe's Assumptions and Dahlstrom's Rules 588
- Fault Bend Folds 589
- Fault Propagation Folds 598
- Determining Structural Styles to Reduce Risk Using Qualitative and Quantitative Techniques 602
- Qualitative Observations for Determining Structural Styles 605
- Quantitative Methods for Determining Structural Styles 606
- Real Fault Bend Fold and Fault Propagation Data 610
- Fault Bend Folds 610
- Fault Propagation Folds 612
- Conclusions 614
- Imbricate Structures 616
- Box and Lift-Off Structures 625
- Triangle Zones and Wedge Structures 628
- Interference Structures 632

---

---

**CHAPTER 11 EXTENSIONAL STRUCTURES: BALANCING AND INTERPRETATION 635**

---

---

**INTRODUCTION 635****ORIGIN OF HANGING WALL (ROLLOVER) ANTICLINES 636**

- Coulomb Collapse Theory 636
- Growth Sedimentation 641

## **A GRAPHICAL DIP DOMAIN TECHNIQUE FOR PROJECTING LARGE GROWTH FAULTS TO DEPTH 647**

- Rollover Geometry Features 647
- Projecting Large Normal Faults to Depth 649
- Procedures for Projecting Large Normal Faults to Depth 649
- Determining the Coulomb Collapse Angles from Rollover Structures 652

## **ORIGIN OF SYNTHETIC AND ANTITHETIC FAULTS, KEYSTONE STRUCTURES, AND DOWNWARD DYING GROWTH FAULTS 654**

- Backsliding Process 656

## **THREE-DIMENSIONAL EFFECTS AND CROSS STRUCTURES 664**

## **STRIKE-RAMP PITFALL 666**

## **COMPACTION EFFECTS ALONG GROWTH NORMAL FAULTS 672**

- Prospect Example 676
- Inverting Fault Dips to Determine Sand/Shale Ratios or Percent Sand 680
- Example from Corsair Fault Offshore Texas 682

## **USING STRUCTURAL RELIEF AND THROW TO PREDICT THE DOWNTHROWN STRATIGRAPHIC SECTION 687**

- Topics 688
- Linear Growth 692
- Calculations and Examples 694
- A Pregrowth Structure 696
- Accuracy of Methods 698
- Growth Structure and Calculations 699
- Syn depositional Growth Models 702
- Uniform Growth 703
- Low Variances in Growth Sedimentation 705
- High Variations in Growth 705
- The Growth Axial Surface Increases Dip 708
- The Growth Axial Surface Decreases Dip 709
- Large Growth, Multibend Structure 711

Real Structures	713
Seismic	713
Corsair Trend/Brazos Ridge Offshore Texas	716
Haynesville Shale Play, Texas/Louisiana	717
Well Log Data	719
Unconformity in Shale Basin	719
Conclusions	720

---

---

## **CHAPTER 12 STRIKE-SLIP FAULTS AND ASSOCIATED STRUCTURES 723**

---

---

### **INTRODUCTION 723**

### **MAPPING STRIKE-SLIP FAULTS 724**

The Problem of Strike-Slip Fault Interpretation	725
Strain Ellipse Model	726
Problems Interpreting Stress	728
Stress Measurements across Strike-Slip Faults	730

### **CRITERIA FOR STRIKE-SLIP FAULTING 731**

### **ANALYSIS OF LATERAL DISPLACEMENTS 733**

Surface Features	733
Piercing Point or Piercing Line Evidence	733

### **SCALING FACTORS FOR STRIKE-SLIP DISPLACEMENTS 746**

### **BALANCING STRIKE-SLIP FAULTS 748**

Compressional Folding along Strike-Slip Faults	748
Extensional Folding along Strike-Slip Faults	758

### **SUMMARY FOR SECTION 771**

### **GENERAL CONCLUSIONS FOR CHAPTER 12 772**

---

---

**CHAPTER 13 GROWTH STRUCTURES 775**

---

---

**INTRODUCTION 775**

Expansion Index for Growth Faults 777

**MULTIPLE BISCHKE PLOT ANALYSIS AND  $\Delta d/d$  METHODS 780**

Method 781

Common Extensional Growth Patterns 783

Unconformity Patterns 785

**ACCURACY OF METHOD 787****EXAMPLES OF THE  $\Delta d/d$  METHOD 787**

Generic Example of a Delta 787

Applying the  $\Delta d/d$  Method to Seismic Data 789

Resolving a Log Correlation Problem 791

An Example of Stratigraphic Interpretation 793

Locating Sequence Boundaries in a Compressional Growth Structure 794

Analysis of the Timing of a Strike-Slip Growth Structure 795

**THE MULTIPLE BISCHKE PLOT ANALYSIS 797**

MBPA to Recognize Correlation Problems 798

The Use of a Stacked Multiple Bischke Plot 802

**VERTICAL SEPARATION VERSUS DEPTH METHOD 804**

Method 805

Generic and Real Examples of Analysis of VS/d Plots 806

**CONCLUSIONS 814**

---

---

**CHAPTER 14 ISOCHORE AND ISOPACH MAPS 817**

---

---

**INTRODUCTION 817****SAND-SHALE DISTRIBUTION 822****BASIC CONSTRUCTION OF ISOCHORE MAPS 822**

Bottomwater Reservoir 823

Edgewater Reservoir 825

**METHODS OF CONTOURING THE HYDROCARBON WEDGE 837**

Limited Well Control and Evenly Distributed Impermeable Rock 837

Walking Wells—Unevenly Distributed Impermeable Rock 839

**VERTICAL THICKNESS DETERMINATIONS 847**

The Impact of Correction Factors 851

TVT Correction (Setchell's Equation) Discussion 854

**VERTICAL THICKNESS AND FLUID CONTACTS IN DEVIATED WELLS 857****MAPPING THE TOP OF STRUCTURE VERSUS THE TOP OF POROSITY 862****FAULT WEDGES 865**

Conventional Method for Mapping a Fault Wedge 865

Mid-Trace Method 867

**NONSEALING FAULTS 868****VOLUMETRIC CONFIGURATION OF A RESERVOIR 873****RESERVOIR VOLUME DETERMINATIONS FROM ISOCHORE MAPS 874****TILTED HYDROCARBON/WATER CONTACTS 875**

**INTRODUCTORY RESERVOIR ENGINEERING 879**

Reservoir Characterization 879

Estimation of Reserves 879

Field Production History 881

**INTERVAL ISOPACH MAPS 882**

True Stratigraphic Thickness from Well Logs 883

Interval Isopach Construction Using Seismic Data 885
