Proceedings of the 2020 USCToMM Symposium on Mechanical Systems and Robotics
Contents

OrigamiBoat: An Application of Thick Rigid Flat-Folding Origami to Portable Watercraft ............................................. 1
Carl A. Nelson

Analysis and Synthesis of Planar Cam Mechanisms Using Working Model 2D .......................................................... 10
P. A. Simionescu and Samuel Ortega

Cam Profiles Generation as Follower Envelopes with MATLAB Programs .............................................................. 20
P. A. Simionescu and Mircea Neagoe

Cylinder Deactivation and Propulsion Electrification ......................... 31
Neeraj Shidore and Madhusudan Raghavan

Design of a Sealed Wave Gear .................................................. 41
Gennady A. Timofeev, Olga V. Egorova, and Darya M. Chernyshova

Design, Development, and Testing of an Autonomous Multirotor for Personal Transportation ........................................... 53
Nicolas Runge, Ryan Twedt, Wade Olson, Sterling Berg, Isaac Smithee, Todd Letcher, and Marco Ciarcia

Forward Kinematics and Singularities of a 3-(rR)PS Metamorphic Parallel Mechanism ...................................................... 68
Latifah Nurahmi, Manfred Husty, and Dongming Gan

Autonomous Mobility Improvements of Hybrid Electric 4 x 4 with Controllable Power Transmitting Unit ....................... 78
Vladimir Vantsevich and Jesse Paldan

Towards Relating Grasping Posture and Fingers-Object Curvature in the Vicinity of a Contact Location ....................... 92
Jong-Seob Won, Brianda Chavez, and Nina Robson
Steady-State Response of a Dual-Rotor Wind Turbine
with Counter-Rotating Electric Generator and Planetary
Gear Increaser .................................................. 106
Mircea Neageo, Codruta Jaliu, Radu Saulescu, and Petru A. Simionescu

Use of Flywheel Energy Storage in Mobile Robots ............ 116
Olga V. Egorova and Nikolay N. Barbashov

Twisting String Actuation with Noncircular Wrapping Rods ........ 126
Nicolas MouaZe, Thanh Nguyen, and Lionel Birglen

A Wearable Joint Sensing Device Based on the Inverted
Slider Crank .................................................. 137
Jun Liang Lau and Gim Song Soh

Using Cyclic Quadrilaterals to Design Cylindrical
Developable Mechanisms ...................................... 149
Lance P. Hyatt, Jacob R. Greenwood, Jared J. Butler,
Spencer P. Magleby, and Larry L. Howell

Optimization and Design of a Gripper Mechanism for Autonomous
Unmanned Aerial Vehicle Perching .......................... 160
Christopher Baird and Scott Nokleby

Computation of the Developable Form of a Planar
Four-Bar Linkage ............................................ 172
Andrew Murray and J. Michael McCarthy

Analysis of Soft Mechanisms Using a Homogenized
Strain Induced Model ......................................... 179
Sreeshankar Satheeshbabu and Girish Krishnan

Mobile Fiducial-Based Collaborative Localization
and Mapping (CLAM) ....................................... 196
Jiayi Liu, Randy C. Hoover, and Jeff S. McGough

A GPU Homotopy Path Tracker and End Game
for Mechanism Synthesis ................................. 206
Jeffrey Glabe and J. Michael McCarthy

Validation of Vision-Based State Estimation for Localization
of Agents and Swarm Formation ......................... 216
Hadi Fekrmandi, Skye Rutan-Bedard, Alexander Frye, and Randy Hoover

Unpacking the Mathematics of Modeling Origami Folding
Transformations with Quaternions ........................ 225
Zachary Broyles, Spencer Talbot, Jacob Johnson, Denise M. Halverson,
and Larry L. Howell
Algebraic Insight on the Concomitant Motion of 3RPS and 3PRS PKMs ................................................. 242
Hassen Nigatu and Yimesker Yihun

A Unified Representation for Mapping Robot Workspace and Performance with Applications for Parallel Mechanisms .......... 253
Dian Li, Sheng Guo, and Q. J. Ge

Human Factors to Develop a Safety Guard Model in Human-Robot Interaction ........................................... 271
AmirHossein MajidiRad, Prasham Maniar, Yimesker Yihun, and Hongsheng He

Singularity Design for RRSS Mechanisms ........................................ 287
Taher Deemyad, Omid Heidari, and Alba Perez-Gracia

Robotic Inspection Crawler for Small Diameter Complex Piping .......... 298
Joseph Allen, Skye Rutan-Bedard, and Hadi Fekrmandi

Author Index ......................................................................................... 311
