Preface to First Edition *xvii*

Acknowledgments *xix*

1	Introduction	1
1.1	The Aim and Format of the Book	1
1.2	Background	1
1.3	What Is in this Book	2
1.4	What Is Not in this Book	2
1.5	Key Terms and Concepts	3
1.5.1	Petroleum	3
1.5.2	The Source	3
1.5.3	The Seal	4
1.5.4	The Trap	4
1.5.5	The Reservoir	4
1.5.6	The Timing of Petroleum Migration	4
1.5.7	Porous Rock and Porosity	5
1.5.8	Permeable Rock and Permeability	5
1.5.9	Relative Permeability	5
1.5.10	Net to Gross and Net Pay	5
1.5.11	Water Saturation	5
1.5.12	Formation Volume Factor	5
1.5.13	The Gas to Oil Ratio	6
1.5.14	Timescales	6
1.5.15	The Units Used in this Book	6
1.6	The Chemistry of Petroleum	6
1.6.1	Alkanes (Paraffins)	9
1.6.2	Naphthenes (Cycloalkenes)	10
1.6.3	Aromatics	11
1.6.4	Asphaltenes	11
1.7	Geoscience and the Value Chain	12
1.7.1	Exploration (Chapters 3 and 4)	12
1.7.2	Appraisal (see Chapter 5)	13
1.7.3	Development (see Chapter 6)	13
1.7.4	Production (see Chapter 6)	14

1.7.5	Reserves Additions and Reserves Growth (see Chapter 6)	14
1.7.6	Field Abandonment and Reactivation (see Chapter 6)	14
1.7.7	Gas Storage (see Chapter 7)	15
1.7.8	Unconventional Petroleum (see Chapter 7)	15
1.8	Geoscience Activity	15
1.9	Oil, Gas, and Geoscientists – A Global Resource!	16
	Further Reading	19
2	Tools	21
2.1	Introduction	21
2.2	Satellite Images and Other Remote Sensing Data	21
2.2.1	Introduction	21
2.2.2	Satellite Images	21
2.2.3	Gravimetric Data	22
2.2.4	Magnetic Data	24
2.2.5	Electromagnetic Surveys	25
2.3	Seismic Data	25
2.3.1	Introduction	25
2.3.2	The Seismic Method	27
2.3.3	Seismic Acquisition	29
2.3.3.1	Land	29
2.3.3.2	Water	29
2.3.3.3	Collection of Seismic Data: Receivers	30
2.3.4	Seismic Processing	30
2.3.5	Seismic Interpretation	30
2.4	Wireline Log Data	32
2.4.1	Introduction	32
2.4.2	Rock Tools	32
2.4.3	Seismic Enhancement	35
2.4.4	Porosity and Permeability Tools	37
2.4.5	Fluid Tools	40
2.4.6	Pressure Tool	42
2.5	Core and Cuttings	43
2.5.1	Introduction	43
2.5.2	Conventional Core Analysis (Porosity and Permeability)	45
2.5.2.1	Sample Acquisition	45
2.5.2.2	Sample Cleaning	45
2.5.2.3	Sample Drying	45
2.5.2.4	Porosity Measurements	47
2.5.2.5	Permeability Measurements	47
2.5.3	Core Logging	49
2.5.4	Petrography	49
2.5.4.1	Provenance	49
2.5.4.2	The Depositional Environment	51
2.5.4.3	Reservoir Quality	51
2.5.5	Geochemistry	52
2.5.6	Biostratigraphy	52

2.5.6.1	Sampling	53
2.5.6.2	Correlation	53
2.5.6.3	Age Dating	53
2.5.6.4	The Depositional Environment	53
2.6	Fluid Samples From Wells	54
2.6.1	Introduction	54
2.6.2	The Sampling of Fluids	54
2.6.3	Petroleum	55
2.6.3.1	Gas Chromatography and Gas Chromatography (GC) Fingerprinting	55
2.6.3.2	Molecular Maturity	56
2.6.3.3	Rhenium–Osmium Dating	56
2.6.4	Water	56
2.7	Outcrop Data	57
2.7.1	Introduction	57
2.7.2	Maps	57
2.7.3	Reservoir Analogs	59
2.7.4	Rock Sampling and Analysis	59
2.8	Seepage of Petroleum	60
	Further Reading	61
3	Frontier Exploration	63
3.1	Introduction	63
3.2	Acquisition of Acreage	66
3.2.1	Early Access to Acreage	66
3.2.2	The Licensing Process	67
3.2.3	License Areas	68
3.2.4	Farm-Ins, Farm-Outs, and Other Deals	69
3.3	Direct Petroleum Indicators	69
3.3.1	Introduction	69
3.3.2	Petroleum Leakage and Seepage	69
3.3.2.1	Seal Failure	70
3.3.2.2	Tertiary Migration	71
3.3.2.3	Dissipation in the Near Surface	72
3.3.3	The Identification of Petroleum on Seismic Data	72
3.4	Basin Types	76
3.4.1	Introduction	76
3.4.2	Extensional Basins, Generated by Divergent Plate Motion	78
3.4.2.1	Intracratonic Basins: Sags	78
3.4.2.2	Rift Basins	78
3.4.2.3	Passive Margins	79
3.4.3	Basins Generated During Convergent Plate Motion	82
3.4.3.1	Arc Systems	83
3.4.3.2	Foreland Basins	83
3.4.4	Strike-Slip Basins	84
3.5	Basin Histories	84
3.5.1	Introduction	84
3.5.2	Subsidence	85

3.5.3	Sediment Supply	88
3.5.4	Burial History	89
3.5.5	Thermal History	91
3.5.6	Uplift	92
3.5.7	Pressure History	93
3.5.8	Integrated Basin Modeling	95
3.6	Stratigraphy	96
3.6.1	Introduction	96
3.6.2	Chronostratigraphy	97
3.6.3	Biostratigraphy	97
3.6.4	Lithostratigraphy	100
3.6.5	Seismic Stratigraphy	102
3.6.5.1	Rift Basins	104
3.6.5.2	Passive Margins	104
3.6.5.3	Foreland Basins	105
3.6.5.4	Wrench Systems	105
3.6.6	Sequence Stratigraphy	106
3.6.7	Chemostratigraphy and Magnetostratigraphy	111
3.6.8	Stratigraphic Tests	111
3.7	Source Rock	112
3.7.1	Introduction	112
3.7.2	The Origin of Petroleum from Living Organisms	112
3.7.2.1	Organic Matter	112
3.7.2.2	Preservation of Organic Matter	112
3.7.3	Kerogen	114
3.7.3.1	Kerogen Type	114
3.7.3.2	The Quantity and Quality of Kerogen	115
3.7.4	Maturation of Source Rocks: Kerogen to Oil to Gas	116
3.7.4.1	Temperature	116
3.7.4.2	The Kinetics of Hydrocarbon Generation	116
3.7.4.3	Reaction Products	117
3.7.4.4	Maturation in the Reservoir	117
3.7.4.5	Bitumen and Tar Mats	117
3.8	Jubilee Field, Ghana, West Africa	119
3.8.1	Introduction	119
3.8.2	Basin Setting	120
3.8.3	Pre-Drill Assessment	120
3.8.4	Jubilee Field	121
3.8.5	Implications for West African and South American Margins	122
3.9	Johan Sverdrup Oilfield, Norwegian North Sea	122
3.9.1	Introduction	122
3.9.2	Location	122
3.9.3	Early Exploration History	123
3.9.4	Renewed Interest	123
3.9.5	Major Discovery	125
3.9.6	Petroleum Geology	125
3.9.7	Learning	126
	Further Reading	127

4	Exploration and Exploitation	129
4.1	Introduction	129
4.2	The Seal	129
4.2.1	Introduction	129
4.2.2	The Membrane Seal	130
4.2.3	The Hydraulic Seal	131
4.2.4	Faults	132
4.2.5	Trap Fill	133
4.2.6	The Pressure Seal	134
4.3	The Reservoir	135
4.3.1	Introduction	135
4.3.2	Intrinsic Properties	136
4.3.2.1	Net to Gross	136
4.3.2.2	Porosity	137
4.3.2.3	Permeability	139
4.3.2.4	Water, Oil, and Gas Saturation	139
4.3.3	Reservoir Lithologies	140
4.3.4	The Reservoir: Sandstone Depositional Systems	143
4.3.4.1	Alluvial Fans	143
4.3.4.2	Aeolian Dunes	144
4.3.4.3	Lakes	145
4.3.4.4	Fluvial Systems	145
4.3.4.5	Deltas	148
4.3.4.6	Shallow-Marine Systems	148
4.3.4.7	Submarine Fans	150
4.3.5	The Reservoir: Limestone and Dolomite	151
4.3.5.1	Shelfal and Ramp Carbonates	152
4.3.5.2	Reefs	152
4.3.5.3	Deep-Water Carbonates	154
4.3.5.4	Dolomite	154
4.3.5.5	Karst	155
4.3.6	Fractured Reservoirs	156
4.4	Migration	157
4.4.1	Introduction	157
4.4.2	Primary Migration	158
4.4.3	Secondary Migration	161
4.4.4	Tertiary Migration	167
4.5	The Trap	168
4.5.1	Introduction	168
4.5.2	Migration and Trap Formation	173
4.5.3	Structural Traps	173
4.5.3.1	Traps Formed by Compressive Tectonic Processes	173
4.5.3.2	Traps Formed by Extensional Tectonic Processes	175
4.5.3.3	Traps Formed by Diapiric Processes	176
4.5.3.4	Traps Formed by Compactional Processes	182
4.5.3.5	Traps Formed by Gravity Processes	183
4.5.4	Stratigraphic Traps	185
4.5.4.1	Traps Formed by Depositional Pinchout	185

- 4.5.4.2 Traps Formed by Unconformities 186
- 4.5.4.3 Traps Formed by Diagenetic Processes 190
- 4.5.5 Hydrodynamic Traps 191
- 4.6 Play and Play Fairway 193
 - 4.6.1 Play 193
 - 4.6.2 Play Fairway 193
- 4.7 Lead and Prospect 195
 - 4.7.1 Introduction 195
 - 4.7.2 Lead, Prospect, and Prospect Evaluation 195
 - 4.7.3 The Prospect Inventory 198
 - 4.7.4 Well Prognosis 198
 - 4.7.5 Failure Analysis 199
- 4.8 Yet to Find 199
 - 4.8.1 Introduction 199
 - 4.8.2 Areal Richness and Prospect Summation 200
 - 4.8.3 Pool Size Distribution 201
 - 4.8.4 Creaming Curves and Destruction of Value 203
- 4.9 Risk and Uncertainty 204
 - 4.9.1 Introduction 204
 - 4.9.2 Risk 205
 - 4.9.3 Uncertainty 207
- 4.10 Thunder Horse Field, Gulf of Mexico, USA 208
 - 4.10.1 Introduction 208
 - 4.10.2 Geology 209
 - 4.10.3 Deep Water Subsalt Exploration 211
 - 4.10.4 Discovery, Appraisal, and Field Start-Up 212
- 4.11 Clyde Field, UK North Sea 213
 - 4.11.1 Introduction 213
 - 4.11.2 Great Expectations 214
 - 4.11.3 Reality Dawns 214
 - 4.11.4 A Change of Owner 215
- Further Reading 217

- 5 Appraisal 219**
 - 5.1 Introduction 219
 - 5.2 The Trap Envelope 221
 - 5.2.1 Depth Conversion 221
 - 5.2.2 Mapping Surfaces and Faults 223
 - 5.2.3 Spill Points 228
 - 5.3 Fluid Distribution and Contacts 230
 - 5.3.1 Fluid Contacts and Transition Zones 230
 - 5.3.2 Intra-Field Variations in Petroleum Composition 233
 - 5.3.3 Intra-Field Variations in Water Composition 237
 - 5.4 Field Segmentation 238
 - 5.4.1 Introduction 238
 - 5.4.2 Barriers to Lateral Flow 238
 - 5.4.3 Barriers to Vertical Flow 241

5.4.4	Identification of Flow Barriers	241
5.5	Reservoir Property Distribution	243
5.5.1	Introduction	243
5.5.2	Lithofacies and Lithotypes	243
5.5.3	Reservoir Body Geometry	245
5.5.4	Reservoir Correlation	247
5.6	Reservoir Quality	249
5.6.1	Introduction	249
5.6.2	More Intrinsic Reservoir Properties	249
5.6.2.1	Relative Permeability	250
5.6.2.2	Wettability	252
5.6.2.3	Resistivity, Cementation, and Tortuosity Factors	252
5.6.3	Controls on Reservoir Quality	252
5.6.4	Compaction and Cementation in Sandstones	253
5.6.4.1	Sand Compaction	253
5.6.4.2	Sand Cementation	254
5.6.5	Compaction and Cementation in Limestones	257
5.6.5.1	Near-Surface Processes	257
5.6.5.2	Compaction and Burial Processes	262
5.7	Reservoir Description from Seismic Data	263
5.7.1	Introduction	263
5.7.2	Lithology Description	264
5.7.3	Porosity Determination	265
5.7.4	Lateral Variations and Reservoir Heterogeneity	265
5.7.5	Reservoir Correlation	267
5.7.6	Identification of Fluid Type and Contacts	268
5.8	Petroleum in Place, Reservoir Models, and Reserves	268
5.8.1	Introduction	268
5.8.2	Petroleum in Place	268
5.8.3	Geologic Models	269
5.8.4	Reservoir Models	274
5.8.5	Reserves	275
5.9	Kadanwari Field, Pakistan	277
5.9.1	Introduction	277
5.9.2	Re-Evaluation of Seismic Data over Kadanwari	280
5.10	Pedernales Field, Venezuela	281
5.10.1	Introduction	281
5.10.2	Geology of the Area	281
5.10.3	History of Exploration and Production	283
5.10.4	Field Reactivation, 1990s	285
	Further Reading	287
6	Development and Production	289
6.1	Introduction	289
6.2	Well Planning and Execution	290
6.2.1	Facilities Location and Well Numbers	290
6.2.2	Well Geometries	294

6.2.3	Well Types	298
6.2.4	Drilling Hazards	298
6.2.5	Well Completion and Stimulation	300
6.2.6	Formation Damage	300
6.2.7	Well Logging and Testing	303
6.3	Reservoir Management	307
6.3.1	Reservoir Description from Production Data	307
6.3.2	Reservoir Visualization	309
6.3.3	Time-Lapse Seismic	312
6.3.4	Managing Decline and Abandonment	315
6.4	Reserves Revisions, Additions, and Field Reactivation	316
6.4.1	Introduction	316
6.4.2	Reserves Revisions	316
6.4.3	Reserves Additions	317
6.4.4	Field Rehabilitation and Reactivation	318
	Case Histories	319
6.5	Thistle Field, North Sea – Improving Late Field Life Oil Production	319
6.5.1	Introduction	319
6.5.2	Field Production Profiles	320
6.5.3	Water Cut and Ultimate Oil Recovery	321
6.5.4	Voidage Replacement, Pressure Maintenance, and Sweep	323
6.5.5	Conclusions	325
6.6	Ardmore Field, UKCS	326
6.6.1	Introduction	326
6.6.2	Location and History	326
6.6.3	Structure and Stratigraphy	327
6.6.3.1	Devonian	327
6.6.3.2	Permian – Rotliegend and Zechstein	327
6.6.3.3	Upper Jurassic Humber Group	329
6.6.3.4	Upper Cretaceous – Paleocene Chalk Group	329
6.6.3.5	Paleocene/Eocene – Recent Stronsay, Westray, and Nordland Groups	330
6.6.4	Reservoirs	330
6.6.4.1	Upper Devonian	330
6.6.4.2	Rotliegend	330
6.6.4.3	Zechstein	331
6.6.4.4	Upper Jurassic	331
6.6.5	Source	331
6.6.6	STOIP and Reserves	331
6.6.7	Argyll Production	332
6.6.8	Ardmore Development and Production	332
6.6.9	Conclusions	335
6.6.10	Postscript	335
	Further Reading	335
7	Unconventional Petroleum, Gas Storage, Carbon Storage, and Secondary Products	337
7.1	Introduction	337
7.1.1	Unconventional Gas	337

7.1.2	Unconventional Oil	339
7.1.3	Gas Storage	340
7.2	Unconventional Gas	340
7.2.1	Tight Gas Reservoirs	340
7.2.2	Shale Gas	342
7.2.3	Low Saturation Gas	346
7.2.4	Shallow Gas	347
7.2.5	Basin-Center Gas	348
7.2.6	Gas Hydrates	349
7.2.7	Coal Bed Methane	350
7.2.8	Coal Mine Methane	351
7.3	Unconventional Oil	351
7.3.1	Heavy Oil and Tar Sand	351
7.3.2	Shale Oil and Oil Shale	352
7.4	Underground Coal Gasification	354
7.5	Gas Storage	356
7.6	Carbon Storage	357
7.7	Heat, Helium, and Other Secondary Products	360
7.7.1	Heat Recovery	360
7.7.2	Lithium and Other Solutes	362
7.7.3	Helium	363
7.8	Dunlin Field, UK North Sea, Opportunities for Power Generation from Unconventional Gas and/or Co-Produced Water	364
7.8.1	Introduction	364
7.8.2	Deep (Shale) Gas	366
7.8.3	Shallow Gas	366
7.8.4	Co-Produced Hot Water	367
7.9	Clipper South Field, UK North Sea – Development of a Tight Gas Field	371
7.9.1	Introduction	371
7.9.2	Re-Evaluation of the Field	371
7.9.3	Analysis of Well Test Data	372
